FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Hardware and Metal's Audited Circulation

There is no secret about HARDWARE AND METAL'S circulation. It is audited by the A.B.C.—the best authority in the world—and above all, the paper is read by practically every worth-while hardware buyer in Canada. There is no waste circulation in HARDWARE AND METAL. It is the paper to use if you have a message for the Canadian hardware trade. HARDWARE AND METAL carries more business than any other trade paper in Canada, and is read more closely than any other paper. HARDWARE AND METAL will carry your message to the hardware trade of Canada.

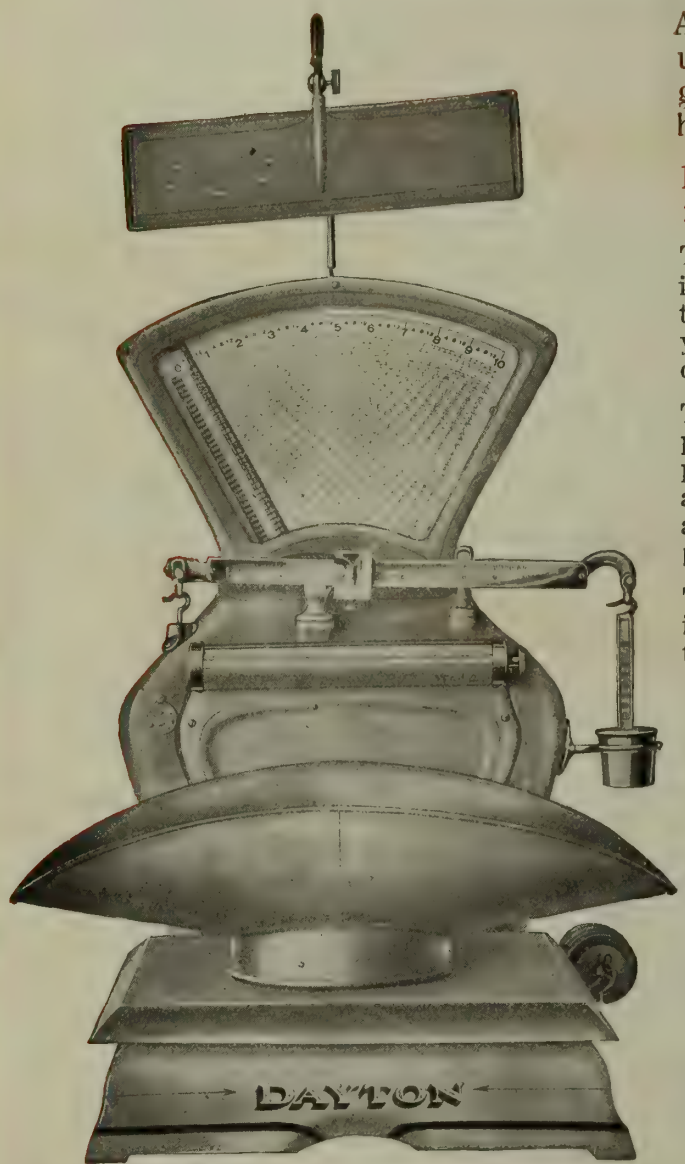
Dayton Computing Hardware Scale

Automatically shows weight, price and value—prevents loss, saves time and labor.



All other merchants who sell by weight use Automatic Computing Scales—the grocer, the butcher, the baker—each has a computing scale to meet the needs.

Here is the Dayton Computing Scale for the Hardware Merchant!

The old method of weighing and calculating values is not practical. Consider any of the hundred of different kinds of hardware you sell, and the chance of loss by giving overweight.

Take nails, for instance. The margin of profit is very small, but the sale is great in proportion to other hardware. The loss of an ounce or two on each sale means giving away your profit and perhaps part of your principal.

The Computing Hardware Scale illustrated is equipped with tare beam, so constructed that by sliding the poise to a "set pin" it will offset the weight of scoop or wire rack. 100 lbs. capacity (10 lbs. on chart, 10 lbs. on tare beam, 80 lbs. in weights). Range of prices 4c to 60c per lb. Total Adder Cylinder to 90 lbs. Automatic pendulum: Gravity with reflector.

With the Total Adder, where the weight is over 10 lbs., you can weigh and compute the value up to full capacity.

Full agate bearings throughout. Standard finish, Turquoise Blue.

Write us to-day—learn all about the Dayton Hardware Scale. The question is not "Can you afford to have it," but "Can you afford to be without it."

Elephant Brand

Genuine White Lead

CANADA'S FAVORITE

PREFERRED by the very best painters because of its snowy whiteness and the smoothness of texture that never changes.

The yellow label on the back of every container — the Government guarantee of purity—is an assurance to the customer of a White Lead that will satisfy in every particular.

ELEPHANT BRAND PURE PUTTY

The unusual popularity of this putty is due to the high standard of quality that is maintained. As is the case with Elephant Brand White Lead and all other Canada Paint Products only the finest of selected raw materials are used. It never fails to please the painter and glazier.

Dealers featuring Elephant Brand Genuine White Lead and the other Canada Paint Products, find repeat sales the rule in their paint departments. Paints, Stains Enamels, Varnishes, Dry Colors, Insecticides—the best of their kind—are all included in the Canada Paint line.

May we send you particulars of the C.P. agency proposition?

OXIDE MINES-RED MILL-QUEBEC

There Are Dollars in $ugge$tion$

Dollars have legs—they can walk right into your store, sniff at this and that, and unless you encourage them to stay and join their relatives in the cash register—they toss their heads and out they go to where a friendlier reception awaits them.

But—you can make them stay in your store if you want to. You can slip a noose right over their heads and call them yours.

It's easy—here is the way one merchant does it:

A customer enters the store and asks for a bottle of O-Cedar—merchant says in a friendly sort of way:

"Going to brighten up the furniture?"

Customer: "Yes! Everything gets pretty dusty in the Spring."

Merchant: "That's so!—did you ever try O-Cedar on your hardwood floors?"

Customer: "No! Is it good for floors, too?"

Merchant: "Splendid! We have it in gallon tins. Enough to do the floors and furniture a good many times."

Customer: "GIVE ME A GALLON THEN!"

There you have it in a nutshell. Just as simple as that. And instead of a 25c sale he sells $3.00 worth of goods.

DO **YOU** THINK THE IDEA IS WORTH TRYING?

Channell Chemical Company Limited

Fly Stoppers
More Effective Than Fly Swatters

SCREEN EVERY DOOR AND WINDOW IN YOUR VICINITY

If you become an advocate of "fly stopping" rather than "fly swatting" you will do more for the community than you have any idea.

It's not the fly which is outside, but the fly which gets into the home that does the harm.

Don't wait until he has done the damage—keep him out.

Show your customers the advantage of having every door and window in the home perfectly screened.

Screen Windows
Nos. 1 to 15

We carry in stock the best selling styles of screen doors (Nos. 1, 2, 8, 9 and 21, three of which are here shown); sizes 2 ft. 6 in. x 6 ft. 6 in., 2 ft. 8 in. x 6 ft. 8 in., 2 ft. 10 in. x 6 ft. 10 in., 3 ft. x 7 ft. **Window Screens** Nos. 1 to 15, in widths extending to 18 in. up to 48 inches.

We also carry a full line of **Screen Cloths** in black (12 mesh), galvanized (14 mesh), from 18 to 48 inches in width, bronze in 26, 30, 34, 36 and 38 inches.

"America" Trolley Hanger

Largest Hanger Sales in the Dominion

The America is easily the most popular for warehouse, factory, garage and barn doors. America operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. Much stronger and better than the plain track brackets.

The America moves smoothly on tandem trucks and hardened roller bearings. Apron 6 in. long, 3¼ in. wide. This efficient hanger appeals to customers because of the simple adjustments, anti-friction, forged steel yokes, and ability to stand hard usage.

With each pair of Hangers are included, two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

WHEN CHICAGO RECEIVED ONE MAIL A WEEK

IT is very difficult for the present-day visitor to Chicago to realize that within the lifetime of many of our citizens the second city in this hemisphere was but a cluster of buildings in the wilderness, receiving but one mail a week, brought by a post rider from distant settlements.

It was in 1834, ten years after the Plymouth Cordage Company began to send out to the world the rope which has played so important a part in the opening up of the great West, that Chicago was afforded the luxury of a weekly mail. From that time until now the increasing frequency and the increasing volume of the Chicago mails have been greatly aided by Plymouth Rope.

Plymouth played a large part in the construction and maintenance of the railway systems, and now that mail is being delivered by the air route, Plymouth is playing an even greater part in the construction and equipment of the mail ships of the air.

Your Opportunity

Wasteful snake and stump fences are disappearing. These weed-breeding nuisances which sprawl over good farm land and keep it in idleness, which demand repair after every windstorm, and which offer free passage to any frisky horse or hungry cow taking into its head to travel, are being banished by the farmer at his first opportunity. Are you prepared to serve the farmer in this movement? He sees that a FROST FENCE is the solution of his difficulties. He turns to you to buy it. Are you prepared to sell it to him? Don't wait until he asks you about FROST FENCE — tell him about it. When he has a FROST FENCE on his farm he will thank you for recommending it to him and will be a reliable customer for fence thereafter.

They Mean "Eddy's"

When a customer asks for "a box of matches" without specifying any particular brand, it is always safe to fill the order with Eddy's.

Ten chances to one such a customer has Eddy's in mind. To think of matches is to think of Eddy's—69 years match-making success have made the name Eddy the symbol of better matches to the Canadian public.

Always have Eddy's in stock for the sake of better sales and satisfied customers.

INDURATED FIBREWARE

is another popular Eddy line worth featuring. Light, durable and sanitary utensils for the Home—the Farm—anywhere. Try a display in your store and watch them sell.

The

E. B. Eddy Co., Limited

HULL, CANADA

"howdy"

"Let's Get Acquainted"

"I'm the magic figure eight movement of the 1900 Cataract Electric Washer, and folks are hearing of me from Coast to Coast.

What do I do? Well, I wash clothes faster than the ordinary washer. The hot, cleansing water swirls through the clothes in a figure 8 motion—and four times as often

"This 'figure 8,' is an exclusive feature of the 1900 Cataract Electric Washer."

The water swirls through the clothes a figure 8 movement —four times as often as in the ordinary washing machine.

1900 CATARACT Electric Washer

The swinging reversible wringer saves steps, swings right around without moving the washer.

The "1900" is easy to operate. Connects with the electric light socket. In 8 to 10 minutes out come the clothes sweet and clean. In order to "cash in" on the present day demand for Electric Washers, you will find it to your advantage to get acquainted with the "1900" Cataract Washer—the mechanically perfect machine that you can depend upon to give complete satisfaction in every house hold where you install it.

Our extensive national advertising in magazines and newspapers is creating a widespread opinion that the "1900" is THE Washing Machine of the day—and it takes little effort on the dealer's part to make sales at a goodly profit.

Write for our proposition—our line includes Electric Motor, Engine Power, Water Power, and Hand Washers.

He just stepped out—and so did the profits

THE old-timer hung a sign on the door. It said "Out—back in half an hour."

While the sign stayed there business stopped—or hot-footed it to a competitor.

Those days are gone. You and I don't use signs like that—not in 1920 in the hardware business.

Maybe not — but how about stock? Running low or running out of stock—isn't that just as bad?

Being forced to say "We're out of those" is just plain business suicide—like the old-timer's sign.

Especially so with taps and dies, reamers, or screw plates, which customers usually want in a hurry.

It takes time to make good tools and get them from the factory to your shelves—but the customer doesn't always understand that—nor care.

A full stock saves explanations and apologies, and keeps your money out of your competitors' bank balance.

SELL HACK SAW SATISFACTION

Selling hack saw *satisfaction*, not merely hack saw blades, is the Starrett policy. We want every package of Starrett blades that goes across your counter to be the means of gaining you a satisfied customer.

To show hack saw users how to get the full value out of the blades they buy is the idea back of "Hack Saws and Their Use," the newest Starrett Book.

Based on a long series of experiments at the Starrett plant, checked with the tests made by other manufacturers, it is the first practical book on that much misunderstood tool. It has 64 pages, and many charts and diagrams.

"Hack Saws and Their Use" is furnished to dealers for free distribution. Give it to the men who buy blades from you. It will bring you big returns in satisfied customers.

Story for Week Dated May 29, 1920. **Being No. 7 in the Series**

Recruiting for the Army of Match Millions

EVERY stick of lumber used in making Eddy Matches is put through an inspection as exacting as if those matches were to be Canadian soldiers.

Sawn to a thickness that is exactly match-length, the lumber is dried and seasoned. Careful selection brings to the machines that make the match splints only the most perfectly straight-grained blocks of Canadian White Pine from The E. B. Eddy Company's own limits.

Every little block of white pine passes under the eyes of an army of experts, and through their sensitive fingers. Where the wood has warped in the kiln-drying process; where there was a fault in growth; where even the tiniest knot has escaped the vigilance of the earliest inspection, the faulty block of wood is tossed aside.

Nothing but clear, straight-in-the-grain perfection will satisfy the standards of The E. B. Eddy continuous process of match-making. As a result you can sell Eddy matches to your customers with the assurance that every match in any box you supply will stand the strain of striking—even the strain of striking at random on a rough wall.

You can readily detect the difference between match splints made by the veneer process of which you read last week, and matches made by the continuous process which cuts each match splint out of a solid straight-grained block of pine. Veneer process match splints are square in section; continuous process match splints are very nearly round. In next week's story you will see why.

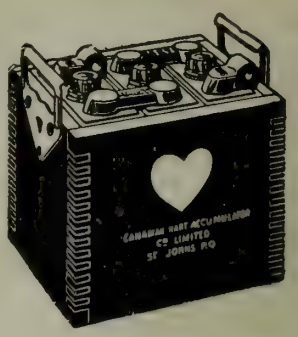
Satisfaction Makers

We also make Toilet Papers, Towels and Serviettes of the same high standard of value.

Sell Hart Batteries

The trustworthiness and reliability of the Hart Battery has made it a favorite with those who have had experience with it. Discerning motorists who have had to replace a worn-out battery for their car, are learning to ask for a Hart Battery. You can develop a good battery business if you keep a display of these famous batteries where your customers can see them. The battery business is growing rapidly. Get the business in your locality. Write for prices and terms to dealers.



Send us your Vulcanizing

Many motorists, right in your town, have casings and tubes that require vulcanizing. Only experts can do satisfactory, lasting work. You are sure of pleasing your customers if you send your work to us. We give estimates if desired. Send parcels express, postpaid.

Questions and Answers on New Taxes

Many Interesting Points Raised by Hardware Dealers—Government's Interpretation of New Taxation Clears up Much Confusion as to Procedure and Articles to be Taxed

AS MANY points have been raised by hardware dealers in connection with the application of the new taxation, and on taking up these matters with the Department of Inland Revenue, HARDWARE AND METAL has secured much information of value to the trade For this reason herewith are reproduced a series of questions and answers based on the Government's interpretation of the taxes. The answers given will clear up a great many points on which there has been much confusion:

* * *

Plated Ware

Question.—What constitutes plated ware?

Answer.—Any plated ware whatever, in so far as it is for use in the household or office. This is interpreted as applying to electrical appliances, safety razors, cutlery, and all such articles for personal or table use. It does not include plated hardware entering into the construction of the office or house such as builders' hardware, but electric and gas fixtures are taxable under a special section.

* * *

Deposit Ware

Question.—What is deposit ware?

Answer.—Deposit ware consists of articles for table or household use on which a pattern in gold or silver is deposited on the glassware or china.

* * *

Imitation Goods

Question.—Are imitation goods taxable as the genuine article?

Answer.—Yes. Imitation goods where the name of the genuine article is used such as in ivory goods, is taxable in the same category as the genuine article. Same applies to composition goods such as composition ivory billiard balls.

* * *

Tax on Solid and Plated Ware

Question.—What is the relation between the tax on solid and plated ware?

Answer.—Special taxes are outlined for either solid or plated ware. the former carrying a higher percentage than the latter.

* * *

Chandeliers

Question.—What articles are included as chandeliers?

QUESTION LEGALITY OF TAXES

Legality of the collection of "luxury taxes" before the Drayton budget is approved and finally passed by the House of Commons is questioned by many Toronto dealers.

"How can the Minister of Finance, merely on his own 'say-so,' impose this tax of 10 or 20 per cent. and insist on its collection before the House has come to a decision? Is Parliament running the country or is Sir Henry Drayton?" asks one dealer.

"Of course, it is a Government measure and it is reasonably certain that it will be carried," said one official. "That is why it is done. And, of course, the Government can make the tax retroactive. The objection is a technical one, but there's something in it."

Answer.—All ceiling electroliers, gasoliers and candelabra having two lights or more are subject to the 20 per cent. excise tax.

* * *

Tax Not Returnable When Goods Exported

Question—I am a manufacturer and pay a 1 per cent. tax on materials imported and used in producing other materials subsequently exported. Will I be permitted to refund to myself the amount of the tax paid in the first instance.

Answer.—To this the Government answers that the sales tax is not applicable to goods exported. This does not answer the question completely but it is evident that once the tax is paid it is not returnable.

* * *

Contracts for Future Delivery

Question.—Manufacturer has a signed contract to deliver quantity of gramophones at stated prices to include the tax. Can he compel customer to take delivery at contract prices plus additional ten per cent., or would he be allowed to fill old contracts without adding present additional tax? Are gramophones sub to one per cent. tax in addition to the 20 per cent.

Answer.—Increased tax on gramophones came into effect and applied to all shipments by manufacturers made after the 18th. One per cent. sales tax also applies.

* * *

Tax Invites Cancellations

Question.—Our business is all done by orders placed in advance. Having new tax invites cancellations of contracts. Must we add percentage under these conditions?

Answer.—Sales tax in force on goods delivered after 18th.

* * *

Tax on Small Sales

Question.—What tax is payable on individual sales by manufacturer or wholesaler where sale price is fraction of one dollar, as on small sales to plumbers?

* * *

Answer.—Customs practice prevails.

Tax on Automobiles

Question.—Is 15 per cent. tax on autos in addition to the present 10 per cent., or instead of it?

Answer.—Fifteen per cent. on automobiles supersedes former 10 per cent. tax.

* * *

Shipments on Standing Contracts

Question.—We have contracts made early this year with deliveries during this year. Do we charge 1 per cent. on shipments made on this contract from now on?

Answer.—Shipments made after 18th instant are liable to sales tax.

* * *

No Tax on Exported Goods

Question.—Presume new taxes do not apply upon instruments exported to foreign countries?

Answer.—Excise tax not applicable to pianos exported.

* * *

Retailer Liable as Wholesaler for Turnover Tax

Question.—Are sales of plated ware to hospitals, hotels, steamships, railway companies, restaurants, institutions, etc., to whom we sell wholesale prices, subject to 1 per cent. tax, the same as other

(Continued on page 38)

Retailers Must Keep Own Sales Records

No Luxury Stamps to be Issued—Retailers Must be Able to Verify Returns—Application of the Turnover Tax—Some Technicalities Cleared Up

DURING the past week scores of official rulings have been handed out by the Government in regard to the application of the tax. For one thing it has been made clear that the Department of Finance does not propose to issue luxury stamps. Retailers are told they must use their own discretion in keeping records of sales and should be able to verify their returns by affidavit and proof, if necessary. Local officials say that retailers who neglect to keep reliable evidence of their sales since May 19 make themselves liable to prosecution. No advice is offered as to how best records should be kept.

The plan being followed in a number of cases for keeping a record of taxes is to make out an invoice for each sale in triplicate with the amount of the tax shown as a separate item. Returns are to be made to the Government twice monthly together with one copy of each invoice as showing the amount of the tax. In cases where a retailer is of the opinion that showing the amount of the tax separately might interfere with sales he is authorized to include the amount of the tax with the sale price of the article and enter it on the invoice as the name of the article and "including luxury tax." One dealer stated that customers already had shown a willingness to pay an inclusive price, while they objected to paying the retail price plus the tax.

Turnover Tax Applications

Regarding the 1 per cent. turnover tax to be charged by the wholesalers, some rulings under this heading are as follows:

The 1 per cent. sales tax to be charged by the wholesalers was much discussed. Some of the rulings on this head were:

(1) Tax was applicable on cash discounts.

(2) Tax does not apply on articles sold for export.

(3) Specified luxuries sold by wholesale houses to contractors subject to 1 per cent. sales tax as well as luxury tax.

(4) Goods delivered on May 19 or after subject to tax, irrespective of when contract was made.

Technicalities to be Considered

Some technicalities on which the Government has promised consideration are:

(1) That a contractor who builds a house or a merchant tailor who builds a suit are technically manufacturers.

(2) That small cash sales in wholesale houses may be reported in some other way than by copies of invoices, which might be difficult to produce.

As regards the taxing of luxuries on the sale direct to the consumer, many questions asked have brought the ruling that goods may be reduced in price to exempt them from tax. "One of the objects is to reduce the cost of living," says the Government.

Another ruling was that vendors were responsible for the payment of the tax to the Government.

RETAILER'S TAX RETURNS TO GOVERNMENT

Practically every retailer in Canada will have to make semi-monthly returns of sales made of the various articles named in the tariff resolutions, and of the so-called "luxury" taxes he has collected in this manner. This will entail making out of every sales receipt in triplicate, and the instruction of drivers of delivery waggons to make collections when delivering taxable goods to those who have ordered by telephone or at the store c.o.d.

One copy of the receipt for each sale will go in the semi-monthly returns to the local collector of the taxes, with a detailed statement of the amount due. There will have to be an army of inspectors appointed by the department, and a large number of business firms involved will have to secure more clerical help to get ready, add up and forward these returns. This is true as well of the manufacturers, wholesalers and importers coming under the sales tax, even though they have to make returns only monthly. The problem of making the returns, so far as the manufacturers, wholesalers and importers are concerned, has been greatly complicated because there is a list of goods which are exempted. Every line of goods handled has to be classified, and the sales made divided into a free list and one on which the turnover tax has to be paid.

Returns are made to the nearest Government Tax Collector.

Boom in High-Speed Tool Steels and Tungsten in England

Reports from Sheffield, England, are that heavy buying orders from America and a greater domestic demand indicate increased prices for high-speed steel. Shortly after the war there was a great depression in the high-speed steel trade and in tungsten. To-day, however, both branches are flourishing. There is a large demand by local firms for tungsten. More tungsten powder could be sold than is possible to supply. Prices of ferro-tungsten and powder, steel alloys, ferro-molybdenum and ferro-silicon are stiffening. Ferro-vanadium is practically unprocurable.

QUESTIONS AND ANSWERS

(Continued from page 37)

wholesale orders, or does the 10 per cent. tax apply? If so, do both?

Answer.—Both luxury and sale tax are payable.

* * *

Ruling as to Tax Collection

Question. — Advise if wholesalers should collect one or two per cent. from retailer on all taxable sales. If we only collect one per cent. and pay that to the Government and pay one per cent. to manufacturers on all goods purchased by us we will lose one per cent. Seems to be misunderstanding on this point. Can you remove it? Is tax to be levied once or twice on same goods on passing from manufacturer to wholesaler and thence to retailer?

Answer.—Tax applicable to both manufacturer and wholesaler unless absorbed. Tax must be shown separately on invoice from manufacturer to wholesaler and on invoice from wholesaler to retailer.

* * *

Not Included in Cost

Question.—We are manufacturers and sell to dealers and jobbers only. Are we permitted to absorb the one per cent. tax or pay same ourselves to the Government?

Answer.—Tax must not be included in manufacturer's cost on which profit is calculated. Invoice must show separately amount of tax payable when not absorbed by manufacturer or wholesaler.

* * *

Tax Total Amount

Question.—In the case of goods on which a set amount of exemption is outlined, is the tax payable on the whole amount or what amount which is above the exemption figure?

Answer.—In cases where the article sells at a higher figure than the stipulated amount tax is payable on the total cost of the article, not on the amount above the exemption figure.

* * *

Selling on Instalment Plan

Question.—How is the tax collected when selling goods on the instalment plan?

Answer.—When selling on the instalment plan the tax on the full amount must be collected with the first instalment. That is, the dealer must pay the full amount of the tax to the Government with the first instalment, and it is then up to him to make his charge for the amount.

* * *

When to Make Returns

Question.—When are returns to be made on taxes collected?

Answer.—All manufacturers, wholesalers and jobbers are required to make monthly returns on the first of each month.

All retailers will make their returns on the first and fifteenth of each month.

Effect of Taxes on Automotive Industry

Application of New Taxes Indicates That Automotive Industry is Now Classed as a Great National Asset and Not a Luxury

THE fact that the passenger automobile in Canada has now been recognized as a utilitarian necessity rather than a luxury, is perhaps one of the most significant factors as demonstrated in the application of the new taxes. It is claimed to be one of the greatest moral victories ever achieved in the automotive industry in Canada to have its product classed as a great national asset.

For some time prior to the presentation of the Budget there were rumors in circulation of impending drastic motor car taxation, but it is now seen that the 7½ per cent. war excise tax on passenger cars and trucks has been wiped out (a net reduction of 7½ per cent. on imported motor trucks) and the excise tax of 10 per cent. is increased to 15 per cent. on passenger cars.

A one per cent. tax on sales by manfacturers and wholesalers has been imposed, this making the total equal to an excise tax of 16 per cent. Thus on cars imported from the United States, per $100 of manufacturer's cost, the total taxation collected by the Canadian Government is $56.60 as compared with $56.75 under the former arrangement. (a decrease of 15 cents). This calculation does not take into consideration the fluctuation of exchange.

The Canadian manufacturer of motor cars is not so well off, for he is compelled to absorb in his car's selling price not only his own one per cent, and the 15 per cent. excise tax, but also the one per cent. charged against the various Canadian manufacturers making parts used in his car. Some of these parts will pass through the hands of several manufacturers, each of whom will add cumulatively his one per cent.

It is true, too, that the Canadian motor car manufacturer has had his protection reduced by the withdrawal of the 7½ per cent. war import tax. This tax, however, was imposed for war revenue and not protection purposes.

The business profits tax has been reduced. Exemption has been increased from 7 to 10 per cent. On profits in excess of 10 per cent. on capital to 15 per cent., the tax will be 20 per cent.; from 15 to 20 per cent., tax will be 30 per cent.; on 20 to 30 per cent., the tax will be 50 per cent., and on profits in excess of 30 per cent. on capital, the tax will be 60 per cent. For small businesses with capital of not less than $25,000 and under $50,000, 20 per cent. on all profits exceeding 10 per cent. will be taken instead of 25 per cent.. as heretofore. The income tax, on the other hand. has been raised, the tax rate being increased by 5 per cent. on incomes of $5,000 and over.

It seems clear that the new excise tax applies on all sales of cars taken out of storehouse on or after the 19th, whether previous sale was made or not. (A show room or garage is held to be a "storehouse" by the Department of Inland Revenue). If this is the case, and there seems no doubt about it from the text then it would seem to be a matter of simple equity that the 7½ per cent. war tax collected on cars in stock should be refunded.

EXPORT SPARK PLUGS TO ENGLAND

It is significant of the steps being taken to readjust the badly distorted balance of trade between Canada and England, that Canadian spark plugs are now being shipped to England for the first time. A large Canadian company has just made its initial shipment of spark plugs, thereby establishing a precedent in the fact that a Canadian manufacturer is shipping into a field which formerly supplied this country, rather than looking to Canada for its supplies.

German Scrap Iron and Steel Prices Decline

The fall in the prices for scrap iron and steel in Germany, which commenced in February, has continued in the past few weeks. As compared with 2,800 marks per ton in that month, the price has dropped to about 1,100 marks. The decline is attributed to the increase incentive imparted to the collection of material. The scrap merchant associations in different districts have combined to firm a central office in order uniformly to represent the interests of the scrap trade, particularly in regard to the Federation of the iron and steel industry.

Remington Arms Company Reorganization

The Remington Arms Company has been incorporated under the laws of Delaware, with a capital of $110,000,000, as a step in bringing about a reorganization of the Remington Arms-Union Metallic Cartridge Company of Bridgeport, a Connecticut corporation. Since the close of the war the Remington Arms-Union Metallic Cartridge Company has sold a large part of its war plants in Bridgeport and vicinity. The plans call for an extension of the business of the company from that of manufacturing arms and munitions to other lines.

Call it a Car

"HO, Bill! That'll hold her! Slam her shut! Call it a car!"
"Hey there, you Checker! Jam your blinkin' seal on that door! . . . . Couple on and yank her out! Us guys is quick workers. We got two more to load to-night! Call it a car!"

* * * * * *

Such is the simple and good-natured formula—or approximately the formula by which something like $18,000,000 may be said to have been added unnecessarily to the past 12 months' cost of operating the Canadian railways.*

It is the jocular touch of an indifferent hand—by which the "safety margin" of car supply over car demand in Canada was and still is being cut down every day in spite of the railways.

It is the little episode—repeated thousands of times a day at thousands of loading points—which added 500,000 unnecessary car trips to the Canadian transportation program in the last year—each trip averaging 243 miles under load and 89 miles empty, and occupying 14 car days.

Thus the constant service of 10,000 freight cars was devoted to unnecessary work instead of remaining in reserve to meet emergencies.

Thus 4,000 unnecessary trains were moved.

Thus 8,000 unnecessary engines were employed instead of being in reserve.

Thus 79 miles of precious track-room was occupied instead of being free to preserve the elasticity of terminal and passing track capacity, thus reducing the margin between an easy car movement—and possible congestion with embargoes.

Thus 10,000 times 17 tons of tare weight (the weight of the car alone) was added to the constant burden of the railways the whole year through —or 170,000 extra tons.

Thus 6,000,000 tons of coal were taken from the available supply.

Thus all movement was slower.

Thus the entire machinery of Canadian business was slowed up ! Depressing, subtly but surely, the volume of business in your factories and warehouses! Cutting down the rate of turn-over ! Running up the overhead per unit of sale! Thinning your profits!

*** Figures based on 1918 Government statistics regarding average performance.**

Object to Duplication of Turnover Tax

Manufacturers and Wholesalers Dissatisfied With Vagueness of Tax Orders When Selling on Term Basis, Tax Will Have to be Advanced in Full by Vendor—Where Are the Mail Order Houses?

Montreal.—The budget still holds the interest of business men in this important commercial and industrial centre. Opinions and comments are very diverse. There is one respect in which most expressions and comments agree, and that is as to the vagueness of the orders. It is difficult, seemingly, for manufacturers, jobbers and wholesalers, and for retailers, too, to know just where they are at. Some have been hesitant about making a definite move, though HARDWARE AND METAL finds, upon investigating the matter, that manufacturers, jobbers and wholesalers are adding the one per cent. to invoices, and have been doing so since May 19. In the absence of more definite particulars from Ottawa, however, a great deal of dissatisfaction has been expressed, and the earlier the mist is cleared away, leaving the situation unbeclouded, the less will be the anxiety and unrest in business circles.

Perhaps the best summing up of wholesalers and manufacturers was made at a meeting of the Montreal section of the Canadian Manufacturers' Association, held on Tuesday of this week, when action was taken in connection with drawing up resolutions and sending a delegation to Ottawa. At this meeting the members present expressed themselves frankly, and a general expression of views is being asked from members of the association.

Duplication of Tax

One of the great objections is that of the duplication of the one per cent. tax. As a matter of fact it was brought out at this meeting that the Government, apparently, had not intended that there be a 1 per cent. tax on imports. Asked as to this, some members expressed their belief that the Government had seen an opportunity of augmenting the revenue still more by the application of such a tax, and that this would be imposed. Added several times to invoices that were naturally larger, as goods passed from one hand, or rather from one dealer to another, it was argued by several members that the tax would total a very considerable sum, multiplied as it would be.

Another point brought out was that wholesalers and manufacturers, selling on a term basis, would be required to finance the one per cent. tax until the maturity of an invoice. While it was generally agreed that the Government had to raise revenue, exception was taken to financing the tax charges in this way. Apparently no provision was made for deferred collection of this tax; it was payable at the time of sale.

Where the Mail-Order House?

"Where does the mail-order house come in? Are they classed as manufacturers? Are they in the manufacturers' class?"

These questions were asked of HARD-

"Excess Profits Tax a Camouflage"

AT the recent convention of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association in Atlantic City, a number of important resolutions dealing with conditions and difficulties affecting the hardware trade were adopted. For the reason that the trade in Canada is interested in noting how the trade in other countries is meeting these problems, the resolutions, as referred to, are outlined herewith:—

Whereas: There appears to be a growing public sentiment against high prices, which sentiment should be regarded and heeded by both manufacturer and distributer;

Whereas: These high prices are caused, to a large extent, by unscientific, cumbersome and vexatious methods of taxation;

Now, therefore, be it resolved: That the American Hardware Manufacturers' Association express most emphatically their condemnation of the present unbusinesslike tax method and the expensive regulations under which the tax laws are administered. We most seriously urge the adoption of a more direct system of taxation and a reduction in the cost of administration. The so-called excess profits tax is, in a large measure, a camouflage for vote-getting, and is a burden upon the Government which forces higher taxes and is altogether unbusinesslike because of its wastefulness. We are earnestly in favor of a reduction in these Governmental overhead expenses which, if accomplished, will enable us to refrain from unduly advancing selling prices.

Whereas: There is now pending before the Ways and Means Committee of the House of Representatives a bill providing for increased taxation in order to permit the payment of bonuses to those who were actively engaged in the service of our country during the war;

Whereas: It has been proposed to impose additional taxes upon industry and to make these taxes retroactive;

Therefore, be it resolved: That we record our emphatic protest against larger taxes on industry and more particularly against the suggestion that these taxes be made retroactive. Such provisions as these have in them serious danger of disaster, as we believe there are many industries having closed their accounts for years prior to the current one, and who have also reached the limit of financial resources and borrowing capacity. The imposition of retroactive taxes upon such industries would bring strain to the breaking point. We therefore urge upon Congress that great wisdom be displayed before enacting such measures.

Whereas: It appears that we are approaching a serious condition of inflation as a result of the upheaval of the war, and

Whereas: High prices are encouraging severe criticism fromhigh level, which condition resulted in a very general high cost of living;

Whereas:High prices are encouraging severe criticism from the great majority of our people, which is a condition which should be heeded by both producers and distributers;

Now, therefore, be it resolved: That the American Hardware Manufacturers' Association now place itself on record as being in full harmony with the desire of our people to prevent further advances in prices and should do its full share in bringing about a more healthful condition of affairs, and to frankly state some of the difficulties in accomplishing this resolve. First, costs of production are constantly increasing through conditions beyond our control, such as increases in the costs of basic raw materials and fuel, caused by strikes of the miners; inadequacy in the supply of steel caused by the steel strike, the result of which was fortunately the preservation of the principle of the open shop; inadequate transportation facilities, caused by strikes of the railroad men, and railroad embargoes which necessarily followed the interruption caused by the strike. The costs of production are also increased by the continual demand of workers for increased pay. These conditions must be corrected befor the upward trend of prices can be arrested. We therefore make a most earnest plea to our workers to co-operate with us in our sincere desire to keep selling prices upon as reasonable a basis as possible. We need the assistance of the workers and we plead for it, in their interest as in our own. We also believe that our efforts are in harmony with the desire of the distributers, with whom we are now in joint convention. We urge all of our members to frankly place this condition and its cause before their respective employees in the hope of establishing a rule of reason which will bring stability out of a dangerous situation. We can see but one solution of the present difficulty and that solution can be summarized in one word—production, and this thought should also be frankly and truthfully placed before all employees if the proper solution is to be found.

WARE AND METAL by the representative of a large Canadian manufacturing firm. That is the point. How will they be diagnosed? There is no question but that these mail-order houses are manufacturers. Will they be so considered for the purposes of the budget? In fairness to the various branches of the trade these houses ought to bear, and must bear, their share of the imposed taxes. A defining of the points is eagerly awaited by the manufacturing and other branches of commercial and industrial business. A definite ruling will doubtless soon be made.

Among comments made by members of the C. M. A. at Montreal, the following are of interest:

J. Chesney, manager of Almy's Ltd., speaking on behalf of the St. Catherine Street retailers, pointed out the hardship which would result to dealers who gave four, five or six months' credit, if they had to pay the tax within fifteen days of delivery of the goods, and suggested that the association should demand of the Government that they interpret "consummation of the deal" as the actual payment of the bill.

M. Hirsch expressed the opinion that the Government had not originally intended to make the one per cent. tax so extensive, but subsequent enquiries as to whether it had to be paid on imports, whether it was payable on repeat sales, etc., had shown the authorities a way of getting more out of it than they originally intended.

(Continued on page 42)

Who Collects the Tax and How Much?

(CLIP THIS OUT FOR REFERENCE)

Owing to the fact that there is considerable misunderstanding among the trade as to who collects the various taxes and the percentage charged, the following table outlining goods sold in the hardware trade will be helpful:

EXCISE TAX

(Taxes Payable by Retailer)

Tax on following articles **to be charged by retailer when selling to consumer** or on importation for consumption or use other than resale :

(10 per cent. tax) Trunks over $40; bags, suitcases, hat boxes, fitted travelling cases over $25; ivory-handled cutlery, cut-glass ware; sporting goods such as tennis rackets, nets, racket covers and presses, skates, snowshoes, skiis, toboggans, canoe paddles and cushions, polo mallets, baseball bats, gloves, masks, protectors shoes and uniforms, football helmets, harness and goals, basketball goals and uniforms, gold bags and clubs, lacrosse sticks, balls of all kinds, fishing rods and reels, billiard and pool tables, chess and checker boards and pieces, dice, games and parts of games (except playing cards and children's toys and games) and all similar articles commonly or commercially known as sporting goods in excess of 50 cents;

Plated ware not otherwise provided for as adapted for household or office use.

(20 per cent. tax). Ash trays, humidors and smoking stands; hunting and shooting garments and riding habits; hunting and bowie knives; gold and silver handled pocket knives and pencils; gold, silver, ebony and ivory toilet-ware; articles of silver not otherwise provided for as adapted for household or office use; silver or gold deposit ware.

Taxes Payable by Manufacturer

Tax on following articles **to be payable by the Canadian manufacturer** in addition to customs duties at time of sale. Also when imported, but not when exported.

(10 per cent. tax) Boats, yachts, canoes and motor boats (except when used for commercial purposes when refund of tax will be made), cameras weighing not over 100 pounds, firearms, shells, cartridges for use other than militia purposes, pianos and organs (other than pipe organs), musical instruments not otherwise provided for.

(15 per cent. tax) Automobiles for passenger use.

(20 per cent. tax) Mechanical piano-players, gramophones, talking machines, music boxes and records used in connection with any musical instrument.

Tax on Playing Cards

Tax on **Playing Cards** for every package of fifty-four cards or fraction of fifty-four; when selling at $25 or less per gross package—25 cents per pack; when selling in excess of $25 per gross package—fifty cents per pack.

License Fee

License Fee—Any dealer handling above lines may be required to take out annual license fee for which will be $2.00. (All above taxes taking effect from May 19th) (to apply to all goods mentioned which were imported or taken out of warehouse for consumption on and after that day and to have applied to goods previously imported for which no entry for consumption was made before that day.

THE TURNOVER TAX

Tax of 1 per cent. in addition to present excise and customs duties on sales by manufacturers, wholesalers or on importations. Purchaser to be furnished with written invoice of any sale, which states separately the amount of the tax when not included in purchase price. This tax not to be included in manufacturer's or jobber's costs on which profit is figured. Tax to be paid by purchaser to jobber or manufacturer and remitted to Government (penalty of $500).

Manufacturers and wholesalers may have to take out annual license (fee $5.00).

EXEMPTIONS:—Anthracite and bituminous coal is exempted from turnover tax on sales or imports.

(Turnover Tax was effective from May 19th applying to all goods imported or taken out of warehouse for consumption on and after that day and applying to goods previously imported for which no entry for consumption was made.

STAMP TAX ON PROMISSORY NOTES, BILLS OF EXCHANGE

Stamp tax of two cents on promissory notes and bills of exchange of value of $100 or less and two cent stamp additional for every one hundred dollars or fractional part thereof in excess of one hundred dollars.

INCOME TAXATION

Taxes and surtaxes including taxes upon corporations and joint stock companies is increased 5 per cent. per annum on incomes of $5,000 and upwards, to apply on all taxes leviable for income received during 1919 or any accounting period ending in 1919.

Persons liable for this form of taxation for the year 1920 or for any period ending in 1920 and thereafter are to furnish the Finance Minister with each annual return of his income, an amount equal to at least one-fourth of the amount of the tax and surtax, and will pay the balance in not more than three bi-monthly payments with interest at 6 per cent. per annum. Penalty is interest at 10 per cent. for incorrect statement of income.

BUSINESS PROFITS TAX

Exemption under this tax is raised from 7 per cent. to 10 per cent. On profits between 10 per cent. and 15 per cent. tax is 20 per cent. of profits; on profits between 15 per cent. and 20 per cent. tax is 30 per cent. of profits; on profits between 20 per cent. and 30 per cent. tax is 50 per cent. of profits; on profits over 30 per cent. tax is 60 per cent. of profits.

Incorporated business with capital between $25,000 and $50,000 pays tax of 20 per cent. of amount by which profits earned during accounting period ending in 1920 exceed 10 per cent.

WIPE OUT WAR TAX

The 7½ per cent. war tax on imported goods is wiped out on all remaining lines.

Little to Indicate Steel Plate Changes

Variety of Conditions Contribute to Make Matters Worse Rather Than Better—Underproduction May Force Prices to Higher Levels

So much has been written and outlined relative to the present and prospective steel situation, that it is difficult to make any forecast. Few will hazard a definite statement, but there are some phases of the situation which are at least interesting, and it is well to bear these in mind, in view of the present movement in price-cutting in various countries—notably in the United States. In investigating the matter this week HARDWARE AND METAL finds the situation much as follows:

Price-cutting has confined itself to several distinct lines, and most of these are wearables. In no instance has there been a movement toward a reduction of commodity prices as relating to iron and steel products, and there appears to be no promise of such reduction taking place.

Reports from producers in widely-separated areas agree as to the conditions responsible for a present shortage of tin plates, black and galvanized sheets, and other kindred raw materials. This is, in itself, rather significant.

Under date of May 25th, a Canadian buyer who had travelled to a United States production centre wired his firm as follows:

"Find conditions very bad, chiefly "due to switchmen's strike. Cor- "poration plants less than 40% "capacity—about 100 tons ready to "ship immediately, cars available."

That reference is of very recent dating and indicates how clearly production in the Pennsylvania producing area has been retarded, and shipment held back. It is but a re-echoing of the reports that have come to hand within the present month. "If we are compelled to shut down next week, as now appears probable," begins another report sent out by a southern United States Steel and Iron company, "we have no assurance as to when we will again be able to operate. The car situation for the past four or five months has been more than unfavorable; impossible would be a better word to express it. To-day it is even worse."

Any Lower Price?

Many will ask, "Will prices be lower, and when?" That is a natural question in view of the present tendency to lower prices on many commodities.

Perhaps the best answer to this is that the world demands are such as to absorb all the supplies that can be got together, and in addition, much more than is being, or than can be, under existing conditions, produced.

Domestic demands are great, and are sufficient to absorb the available tonnage, and more. Bare markets abroad are crying for supplies, and these sources are willing to pay the premiums asked for the raw material if they can obtain it. The present "settling price" of $7 per box, on tinplate, is purely a nominal one. Manufacturers have been paying $10 a box, and more, for their requirements. It is a case of pay the premium asked, in many instances, or someone else will take the available tonnage, so many are there in the market for it.

In summing up this, a very superficial diagnosis of the situation, there are the following important considerations to be borne in mind: First, the under production. Labor is working fewer hours, and is producing relatively less than they were when the full ten-hour day was operative. Some estimates of this production run as low as 40% of the possible efficiency of the men; others are given at 60 and 70% of maximum.

In the second place, the rolling stock situation is bad. It has grown worse. This means limited deliveries of coal and coke to the producer. It means belated deliveries of the raw material, when produced, to the manufacturer. Coupled with this great shortage of probably more than 200,000 cars, the mood of the switchmen has aggravated beyond measure what was already a serious enough situation. When this will end none seem to know.

In the third place, the difficulty of maintaining output of coal, coke, fuel oil, and other fuels for use in the big mills, has increased. Many plants arranged to use one or more of these fuels, but unless they get continuous supplies from week to week their production will be greatly restricted.

Taking a view of the whole situation, it is impossible to foresee or forecast any price revisions downward; there appears to be every probability of any revision being upward.

WHAT ABOUT MONEY COLLECTED IF TAXES NOT APPROVED

"Suppose that some of those taxes proposed by Sir Henry are not approved by the House. Suppose that some of them are even modified. In the meantime the tax has been collected from thousands of people," said one dealer. "It is in the pockets or cash boxes or bank accounts of the dealers. They cannot, in the majority of cases, trace back where they collected the tax. Where does that tax go? Imagine the amount of luxury tax collected by our big department stores, without the name and address of the customer being taken, and think of the impossibility of returning that tax to the people who paid it! If anything happens the Drayton budget, if it is altered in any way, it is the consumer who is stung."

Dominion tax officials were asked about this argument. They admitted it.

OBJECT TO DUPLICATION

(Continued from page 41)

W. P. Downie made some rapid calculations to show the enormous amount of tax which would ultimately fall on an article which paid one per cent. sale tax three or four times, each time on a bigger invoice, and finally ten per cent. or more luxury tax. G. D. McKinnon also spoke of the repetition of the one per cent. tax.

L. Latourneau, M.P. for Quebec East, suggested that the 10 per cent. tax should be collected from the manufacturer instead of at the time of the retail sales, as the latter system imposed a most expensive accounting system on the retailer.

A Plan to Save Much Detail Work

For the Eastern section of the Canadian Wholesale Hardware Association re new taxes, it was suggested at the meeting that the Government would enforce and collect taxes as follows:

One per cent. and luxury tax, in cases where goods were imported—collect same through customs—in cases of domestic manufacture, collect 1 per cent. or up to 2 per cent. and luxury tax from the Canadian manufacturers, which would be included in their cost to wholesalers or retailers.

"The machinery is now complete to carry this out, and it would not necessitate further organization or expense and would save a great deal of detail that is involved with jobbers and retailers making the necessary advances and collecting. Goods would cost the consumer the same," said Colonel Robert Starke, vice-president of the Canadian Wholesale Hardware Association.

Canadian Wholesaler at Disadvantage in Selling Imported Goods

"The one matter that appears to us to be unreasonable is that in selling imported goods the Canadian wholesaler is put at a disadvantage in comparison with manufacturer or merchant in the country from which goods would be shipped, as the buyer here purchasing from shipper in U. S. or other country would pay only the importation tax, whereas the same material, if purchased through a Canadian concern, would pay both the importation tax and the 1 per cent. on the sale made in Canada," said Mr. F. B. Leslie, of A. C. Leslie & Co., Ltd., to HARDWARE AND METAL. This affects us and other people in the same line of business as we are selling here on our own account in direct competition with U. S. producers. It also in the same way puts a responsible concern like ourselves who handle such transactions on their own account at a disadvantage compared with the small broker or agent who can sell only on commission and whose material would be invoiced direct by the producer or principal outside of this country."

Compare Tax Imposts of Canada and United States

Price-Cutting Wave in U.S. Said to be Following Application of Luxury Taxes—What Will Happen in Canada?—Some Dealers Say Canadian Measures Too Stringent.

THE application of the luxury tax in the United States is said to have been followed by a wave of price-cutting throughout the country, but many dealers fear that the reverse will be the case in Canada. Those voicing this opinion state that the U. S. regulations are not nearly as stringent as those outlined in the Budget as applying to Canadian trade. For sake of comparison with taxation in the United States, herewith are reproduced the percentages and the exemptions as applying in both countries on lines sold in the hardware trade:—

	Canada		United States	
ARTICLE	Taxation	Who Pays It	Taxation	Who Pays It
Trunks, in excess of $40 each, but not exceeding $50 each.	10% of entire retail ing price.	Retailer	10% of that part of retail selling price in excess of $50 each.	Retailer
Valises, traveling bags, suitcases, in excess of $25 each.	10% of entirel retail selling price.	Retailer	10% of that part of retail selling price in excess of $25 each.	Retailer
Ivory handled cutlery.	10% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Cut glassware.	10% of entire retail selling price.	Retailer	None.	
Sporting goods, such as tennis rackets, nets, racket covers and presses, etc., in excess of 50 cents each.	10% of entire retail selling price.	Retailer	10% of manufacturer's or importer's selling price.	Manufacturer or importer.
Plated ware, not otherwise provided for in this resolution, adapted for household or office use.	10% of entire retail selling price.	Retailer	None.	
Cigar and cigarette cases or trays and match boxes of gold or silver.	20% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Humidors and smoking stands.	20% of entire retail selling price.	Retailer	10% of manufacturer's or importer's selling price	Manufacturer or importer.
Hunting and shooting garments and riding habits.	20% of entire retail selling price.	Retailer	10% of manufacturer's or importer's selling price.	Manufacturer or importer.
Hunting and bowie knives.	20% of entire retail selling price.	Retailer	10% of manufacturer's or importer's selling price.	Manufacturer or importer.
Gold and silver handed pocket knives and pencils.	20% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Gold, silver, ebony, and ivory toilet-ware.	20% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Articles of silver, not otherwise provided for in this resolution, adapted for household or office use.	20% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Silver or gold deposit ware.	20% of entire retail selling price.	Retailer	5% of entire retail selling price.	Retailer
Chandeliers, except for churches.	20% of entire retail selling price.	Retailer	None.	
Boats, yachts, canoes and motor boats, not in excess of $15 each.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.	None.	
Boats, yachts, canoes and motor boats, in excess of $15 each.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.	10% of manufacturer's or importer's wholesale selling price.	Manufacturer or importer.
Cameras, weighing not more than 100 lbs. each.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.	10% of manufacturer's or importer's wholesale selling price.	Manufacturer or importer.
Fire arms, shells or cartridges.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.
Pianos and organs, other than pipe organs; musical instruments not otherwise provided for.	10% of manufacturer's or importer's selling price.	Manufacturer or importer.	5% of manufacturer's or importer's selling price.	Manufacturer or importer.
Automobiles, adapted or adaptable, for passenger use.	15% of manufacturer's or importer's selling price.	Manufacturer or importer.	5% of manufacturer's or importer's selling price.	Manufacturer or importer.
Mechanical player-pianos, gramophones, phonographs, talking machines, music boxes, records.	20% of manufacturer's or importer's selling price.	Manufacturer or importer.	5% of manufacturer's or importer's selling price.	Manufacturer or importer.
Playing cards—				
(a) When selling at $25 or less per gross package;	25 cents per package.	Manufacturer or importer.	8 cents per package.	Manufacturer or importer.
(b) When selling in excess of $25 per gross package.	50 cents per package.	Manufacturer or importer.	8 cents per package.	Manufacturer or importer.

There is no Turnover Tax in the United States. The Stamp Tax in the U. S. is the same as in Canada on Promissory Notes, Bills of Exchange and Stock Transfers, but in the U. S. there is no Stamp Tax on letters, cheques, money orders, etc. The Canadian Income Tax is about 5% higher, and the Business Profits Tax is about equal, now that the Canadian rates have been decreased.

EDITORIAL COMMENT

ANTICIPATED REVENUE AND ITS SOURCES

THE Department of Trade and Commerce, in response to questions put up by the Montreal Guild of Wholesalers, has made a ruling that the one per cent. tax is to be applied to every sale. It must, therefore, be collected by the manufacturer from the wholesaler. The latter, in turn, when he sells to the retailer, must also collect a Sales Tax, so that in such cases the second one per cent. really makes the tax a two per cent. impost.

This method of levying the tax discriminates against manufacturers who do not maintain their own sales organization and are not in direct touch with the retailer. In the case of importation there will be similar discrimination against the merchant who imports to sell to the retailer, and in favor of the retailer who imports for his own store.

In some lines of business the tax will be three per cent. instead of one, for there are industries so organized that the factory output is sold en bloc to a factor, who sells to the wholesale traders, who in turn sell to the retailer.

The new form of taxation will provide a far greater revenue under these conditions than the amount generally estimated when Sir Henry Drayton's plans were announced. The imports for consumption in the year ending March 31, 1920, were valued at $1,064,516,000. Assuming that half of them were brought in by retailers and half by wholesale importing houses for resale, the revenue would be fifteen millions. There are, however, important lines of imported goods, to which the Sales Tax does not apply.

It is difficult to estimate the revenue which may be obtained from a Sales Tax levied in the manner prescribed by Ottawa, upon domestic products subject to the tax. It is reasonable to suppose that domestic products subject to the tax would have a value at least twice as great as that of imported goods. The taxable range of manufactured products may be from a billion and a half to two billions. The great bulk of the goods are handled through wholesalers, so that the actual taxation will be for the most part two per cent. on the value.

HARDWARE TRADE IN HARMONY WITH PEOPLE FOR LOWER PRICES

IT is of interest to the trade in Canada to note the recent action taken by the convention of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association dealing with problems of the day as they affect the retail hardware trade. It was felt that as high prices were being caused largely by cumbersome methods of taxation, that a more direct system of taxation be adopted and a reduction in administration costs. The Association went on record as being in harmony with the desire of the people for lower prices and resolved to keep selling costs at the lowest possible figure.

In view of the new taxation imposed on dealers in Canada it will be of interest to note how our neighbors to the South have dealt with a situation which might develop in this country as result of the new impositions.

CANADA'S COAL PROBLEM

RECURRING frequently of late have been veiled threats by American business men and politicians that coal supplies to Canada may be shut off should awaken this country to the need of developing home production. Canada is not deficient in coal. In fact, we have quantities estimated at one-sixth of the world's supply. But our known coal is nearly all bituminous, and it is located chiefly at the two extremities. Coal may be found in large quantities in the Hudson's Bay region.

Last year Canada bought $70,000,000 worth of coal from the United States, which is a considerable increase. At the same time, domestic production decreased from 14,435,000 tons in 1917 to 13,714,000 tons. The tonnage imported from the United States, 21,000,000, was approximately 61 per cent. of our consumption. This dependence seems unnecessary. Premier Stewart, of Alberta, declared recently his Government would try to get special rates on coal to Ontario. Last year 308 tons of Alberta coal were sold in this province, but the movement is

practically impossible under present conditions. Yet the Alberta mines are closed six or seven months of the year, owing to lack of demand. Why should not the Government adopt the suggestion of buying an immense quantity of coal in the summer, and storing it for resale, thus keeping the mines equally busy throughout the year? It is useless, under the present cost of living, to expect the mass of consumers always to lay in coal in hot weather. Heads of families, earning a moderate wage, simply cannot do it. The management of the larger aspect of coal movement is becoming a Government problem. It is expected that briquettes of Alberta and Saskatchewan coal will be available in Winnipeg next winter at a price of about $9 a ton. The briquetting plant on which the Government is spending $400,000 will have a capacity of about 30,000 tons per annum, and 300 such plants would be required to satisfy full Western requirements. But if the demand for coal were sufficient, and the rates cut down—the railways being allowed an equivalent increase on luxuries, for instance—private capital might assist in the development.

The quantity of anthracite shipped from the East to Manitoba each year is a large addition to our import coal bill. Anthracite has qualities for domestic heating that perhaps cannot be found in lignite briquettes, but Alberta and Saskatchewan buildings heated with home coal are kept warm, and the problem is one of adapting heating apparatus for the use of soft coal. In any circumstances, the present anthracite fields in the United States will be exhausted in another generation or two, and then this country's immense supplies of soft coal will give it equal footing with the United States. We may as well take time now to have this coal production business set right.

Predicts Continuation of High Prices

IN their weekly business letter, Hayden, Stone & Co., investment brokers, New York, have the following to say regarding general conditions:—

Whether due to a change in the psychological atmosphere, owing to reports of cancellations and to reductions in price by large merchandise retailers, or to badly crippled transportation facilities or to both, it has now become quite evident that there is a distinct recession in many lines of business. While such an interruption to progress of business as has been occasioned by the outlaw railroad strike is most regrettable, it has also furnished a greatly needed object lesson, which could, perhaps, be supplied in no other way—that no body of men employed in such a vital industry can quit work without seriously affecting great numbers of other wage-earners. The men who, without cause, went on strike, are to-day very justly most unpopular with men who have thereby been wholly or partly thrown out of jobs. The loss of wages, and, therefore, of purchasing power which this has caused, are beyond computation. The fact is that the transportation system of this country is at the best so inadequate, and has been still further so crippled by the action of these men, that even were all other conditions favorable, this alone would make it impossible to continue business operations at anything like the volume necessary to show the best results. Nor is this a condition that, even if the roads generally could command the necessary capital, could be remedied in a week or a month. It would take years to supply the equipment necessary to put the railroads on a basis where they could adequately serve the business of the country.

The point has been well made that there has never been an instance of any serious financial depression when there has been such a general scarcity of goods, but the difficulty in securing goods, owing largely to transportation conditions, is apt to blind one to the fact that productive capacity is probably well up, and, perhaps, in some lines exceeds consumption. The productive capacity of steel in this country to-day must be fully 50,000,000 tons. This is much greater than has been actually consumed in any one year. It seems doubtful if this great capacity could at the moment be profitably employed —certainly not at prices now ruling. The same is true of articles entering into clothing and manufacturers generally. Unfortunately, it is not true of food products. The movement of labor away from the farms has become alarming. This will in time be corrected by the lessening of pressure for labor in manufacturing industries, but this will take time, and, meantime, food products are bound to remain high.

The one outstanding and controlling factor to-day—not only in this country but throughout the world—is the shortage of capital. This is due to three causes: the destruction of capital in the war; the tremendous expansion of industry as evidenced by the great outpouring of securities in the last few years, and, finally, by the absorption in taxes of profits that would otherwise be available for enlarging business facilities. The fact is being brought home that there is a vast difference between currency and capital; that inflating currency does not increase the supply of loanable capital. It seems to us that this shortage of capital which, after all, is but a synonym for accumulated wages or savings, is bound to result in continued high rates, which of itself is a restrictive and deflating influence. This process of deflation through which we are now passing is disagreeable, but vastly to be preferred to the experience which Japan, for instance, has recently undergone. It will in time bring about its own cure, and, meanwhile, will present opportunities to those in position to take advantage of them.

EVENTS IN THE TRADE

Business Changes

Bradwardine, Man.— Morrison & Graham, hardware and implements, have sold out to J. W. McManus.

Vernon, B.C.—The hardware business which has been under the direct control of H. B. Morley for three years past has been purchased by J. S. Johnston, a hardware man, who has been in business for many years in Vancouver.

Now Incorporated in Nova Scotia

Ottawa, Ont.— Announcement has been made that the British Empire Steel Corporation has secured a charter from the Province of Nova Scotia. It is now suggested that the merger may not press its application to the Federal Government for letters patent increasing its capital stock to $500,000,000. The company, in view of its large capitalization, would be required to pay the Dominion Government a fee of $100,000. It is said the fee charged by the Province of Nova Scotia amounts to a considerably smaller sum.

New Cutlery Manufacturer in Kingston

Kingston—The ratepayers of Kingston carried the bylaw which provided for the city buying the Cereal Works property, and leasing it for twenty years, with the option of buying at any time, to C. A. Eaton, of Turner's Falls, Mass., who proposes to establish a plant for the manufacture of cutlery. This bylaw carried by a vote of 618 to 60.

Buck Stove Company is Sold

London, Ont.—Official announcement has been made of the purchase of the William Buck Stove Company, Limited, of Brantford, Ont., by the McClary Mfg. Company, of London.

The purchase will add a force of 300 men to the McClary organization as well as a large increase in equipment. The purchase will not cause the transfer of any employees of the Brantford company to London.

Alberta Dealer Makes Store Improvements

B. F. Morris Hardware Co., Leduc, Alta., have made some changes and improvements to their store recently. A new tin-shop has been built to the rear of the store. The balcony at the rear of the store is given over entirely to house furnishings. The offices have been moved from the balcony to the main floor. Several new racks for display purposes have been added

Six Weeks to Normal Operating After Strike Ends

Dealing with conditions resulting from the U. S railroad tie-up 'The Iron Age' says: "With the immediate cessation of the strike it would take six to eight weeks to approach the operating pace of March. The present natural stagnation in business is not accompanied by any price softening as would normally occur under such a condition, for besides full order books, a slump in buying will be offset by the necessarily gradual resumption of the mills. It now appears that there are 1,300,000 tons of finished products in yards and warehouses in the Pittsburgh district alone, that the leading interest has probably 600,000 tons of unshipped material, and that in the whole country the undelivered manufactured steel is not far short of 2,000,000 tons."

Establish Canadian Plant

The Norton Company, of Worcester, Mass., announces the establishment of the Norton Company of Canada, Ltd., at Hamilton, Ont., for the manufacture of grinding wheels for the Canadian market.

Moffat Stove Company Makes Changes

Weston, Ont.—The Moffat Stove Company, Limited, are undergoing extensive changes. Some one-storey buildings are having another storey added, and partitions are being removed to make larger rooms. Preparations are being made for the installation of much electric power.

Must Have Sanitary Closets and Garbage Pails

St. Catharines—The Board of Health announced a strenous fight against all and sundry offenders against the Health Bylaws.

The Board is going right after these persons particularly:

Those who neglect or refuse to obey the law by providing proper receptacles for manure

Every person who does not forthwith provide a covered metal garbage receptacle. Too long has the use of old wooden boxes for this purpose been permitted.

Those persons who still persist in the use of the malodorous outside closet.

France and Britain at Odds Over Oil

Britain's alleged campaign to capture the world's oil markets is said to have stirred France up as well as the United States, and a Franco-American policy to protect their petrol interests is rumored. France has no considerable supplies of oil, and coupled with the fact that the United States is, according to reports, likely to become exhausted, insofar as oil supplies are concerned, within twenty years, immediate action is desired by French and United States interests. Neither of the latter countries recognize the Anglo-Persian Treaty which gave Britain control of the rich Persian oil fields, because, it is stated, Britain has not given French and American capital enough rights in that section, and has discriminated too much.

Standing of U. S. Railways Under Government Control

THE people of United States had a very practical demonstration of what could be made out of so complicated a utility as a railway system.

The Government controlled the roads. They raised passenger and frieght rates enormously, and then lost money in millions.

Here is what happened in an average month of 30 days:

"The earnings of 17½ days of each month were paid to labor in wages.

"The earnings of 3 days were paid for fuel."

"The earnings of 5 days were paid for materials and supplies.

"The earnings of 1½ days were paid out for taxes and equipment and facility rents.

"This consumed the earnings of 27 days of each month.

"The earnings of the remaining 3 days went to net operating income and were used by the Government to pay the guaranteed standard return to the companies. The net operating income was insufficient for this purpose and in consequence there was a direct levy on the Government to meet the deficit."

Paint Association Discuss Budget

MONTREAL.—The Canadian Paint, Oil and Varnish Asociation held a meeting this week on Thursday at Montreal. The budget was one of the main items of business up for consideration. In the meantime, HARDWARE AND METAL is informed, the paint and varnish manufacturers are adding the one per cent. to invoices as from May 19th.

Exhibits Have Gone Forward

Montreal.—Two definite shipments of exhibits for the Canadian Industries Exhibition, which is to take place at the Royal Agricultural Hall, London, England, on June 3 to 17, left this week on two C.P.O.S. steamers. The exhibits comprise nearly every branch of trade. Pulp and paper, boots and shoes, leather goods, steel products, aluminumware, hardware, textiles, pianos, organs, and a great many other lines will find their way to London, where it is confidently expected by those in charge of this work, Canadian manufacturers will be very much better known to the people of the British Isles. The exhibits are expected to be in charge of competent representatives who will follow a little later.

More Production Before Reduction

Colonel Robert Starke, vice-president of the Canadian Wholesale Hardware Association, who attended the recent convention of the Wholesale Hardware Association of the Southern States, held at Atlantic City, stated this week to HARDWARE AND METAL that there was no possibility of prices falling on steel products, according to the manufacturers addressing the convention sessions. It is simply a matter of increasing production before commodity prices can become lower or more favorable in any way. The difficulty that has existed and which still exists in this respect is that of the continued attitude of labor. Where they used to produce on, say a ten hour basis, these men are now working on an eight hour basis and in some cases only 40 per cent. efficient, while others are up to 70 per cent. Colonel Starke states that the falling off in production has been enormous. While these conditions continue to exist there can be no softening of prices, he asserts, and this would seem to be obvious.

Will Erect London Warehouse

LONDON.—Simmons, Limited, will erect a warehouse at London, Ontario. This will be of 80 x 140 feet dimensions and will afford the company distribution for their products, HARDWARE AND METAL is informed by the president, J. H. Sherrard, in Western Ontario territory.

Will Not Form Part of Steel Merger

The James Smart Manufacturing Company, one of the three companies which was included in the Canada Forgings merger, but which will not form part of the British Empire Steel Corporation, like the other two units, has been capitalized at $2,000,000, and will continue operations as a separate concern. It is expected in the Street that along with the exchange of securities for those of British Empire Steel, according to the arrangements recently approved by the board, proportionate amount of shares of the Smart Company will be distributed as representing their interest in the business.

To be Less Production of Non-Essential Lines

Hardware Trade Will Not be Adversely Affected by Financial Conditions

BELIEVING that the hardware business will not be adversely affected by the financial situation, Fayette R. Plumb, president of Fayette R. Plumb, Inc., and former president of the American Hardware Manufacturers' Association, in a letter to the New York Journal of Commerce, makes some interesting observations concerning financial conditions and other factors in the present business situation with their probable effect upon the hardware trade. He writes as follows:

"To my mind, the outlook on industrial conditions as they exist to-day is for a period of less extravagance, less reckless buying of non-essentials, and development of production of essentials to a point where this production will catch up with the unusual demand now existing.

"All financial signs point to a period of liquidation in the near future. Probably those who are carrying on business with borrowed money will find it much harder to get or to keep, and that it will cost much more. The volume of business being transacted with the reduced value of the dollar is straining our national resources in spite of the great expansion of credit. The Federal Reserve Board has decided to raise rates in order to bring about a gradual contraction of credit rather than to permit expansion to proceed to a point that might result in a crash such as followed the resumption of specie payments after the Civil War.

Demand for Hardware to Continue

"The demand for hardware, due to the shortage created by the war, is so great, however, that even such repressive influences cannot seriously or for any length of time check the volume of business. If there is not enough money to go around, the less essential industries must curtail. Hardware, and especially tools, are such necessities for the rehabilitation of the country that they must be made and distributed in the largest possible volume.

"If money has to be borrowed the price for it must be paid, no matter how much it adds to the cost. Although it will become increasingly difficult to advance prices to offset increases in cost and we must all expect smaller margins of profit, nevertheless the consumer will choose to pay what it is necessary to ask in order to keep production at the full, and will, when it is a matter of choice, go without what each considers the less essential articles, thereby releasing capital for the production and distribution of necessities.

"This will be the working of the law of supply and demand. A shortage of capital and higher money rates will increase cost. The consequent increase in prices will check the demand for the less essentials. Only the essential articles will be able to stand the increase, and these industries will outbid the less essential due to the demand.

"Difficulties attending the production of tools will be very great. The steel strike and the coal strike have produced a shortage greater than the average buyer realizes. We cannot secure assurances of delivery in less than a year on new specifications. It is expected that when the railroads start to buy they must be given preference and this will postpone other deliveries to eighteen months.

"The cost of labor is constantly rising with the cost of living, which is steadily going up in spite of the futile efforts to the contrary. The cost of common labor has advanced in our vicinity 20 to 25 per cent. since last fall. Aside from this, however, labor conditions are undoubtedly improving. There is not such a large turnover and there is a greater disposition to work.

Less Reckless Buying of Non-Essentials

"I believe in the future there will result less extravagance, less reckless buying of non-essentials. But this will not affect the essentials until the shortage has been made up. Then production will overtake consumption and the oversupply will produce a buyers' market in which profits will melt. The foreign exchange situation with its curtailment of exports will not seriously affect the tool market. The home demand is too great. It is possible that before the home demand is satisfied financial arrangements may be concluded under which the stream of American production may be turned into foreign channels.

"Regardless of what effect advancing costs may have upon the prices of tools, the demand for them must be satisfied. The utility of a tool on the farm, the railroad, in the mine, the lumber camp or the factory, and especially in carrying out the great building program, is so great that the cost of it is not so important as the necessity to supply it. The shortage is so great and the difficulties attending production are so great that it will take years to supply the demand. The waves will rise and fall, but the tide will continue to run strong."

Newsy Notes From Here and There

Toronto.—A. W. Poole, manager of Stewart & Wood, Ltd., wholesale paint, etc., is holidaying in Eastern Ontario.

* * *

Toronto.—R. Pinchin, President of the Ontario Oil and Turpentine Co., Ltd., is back to his office after a slight illness of a weeks duration.

* * *

oronto.—J. M. Ramsom, manager of The Canada Linseed Oil Mills, Ltd., Toronto, Ont., has returned after a successful business trip of several weeks to different points in the United States.

Clarence Munn has joined the sales staff of Bonthron and Drysdale, hardware, Hensall, Ont.

* * *

Charles Hood, of the sales staff of Ingram & Davey, hardware, St. Thomas, Ont., is leaving for Sarnia next week, having accepted a position with the Mackenzie Milne Co.

Shortage of U. S. Oil Supplies Getting Nearer

In a recent report of the U.S. Geological Survey dealing with the world's petroleum supply and consumption, it is pointed out that while other parts of the world have a 250-year supply, there is a supply in the United States which is good only for 18 years.

"Not counting oil to be obtained from shales and other retortable materials by distillation," says the Survey's report, "the world's supply of recoverable petroleum amounts to as much as 60,000,000,000 barrels. Of this amount 43,000,000,000 barrels may be regarded as oil more or less definitely in sight as shown by actual drilling with successful results. The remainder covers the available oil which it is believed will be found in other regions in which oil seeps, asphalt deposits or favorable geological conditions point to oil, although no producing wells have yet been drilled. Of this great amount, which is 13 times the oil already taken from the ground in America and about nine times all the petroleum yet produced in the world, 7,000,000,000 barrels only, in round numbers, are believed to be left in the United States and Alaska, the remaining 53,000,000,000 being in foreign countries.

"This latter supply is nearly equally divided between the old world and the new, the Americas having a total very close to that of the remaining continents. However, as in the case of coal, much more oil will be developed north of the equator than to the south.

"Fortunately it is simply impossible to discover and take out the oil remaining in the ground in the United States, 7,000,000,000 barrels, in so short a period as 18 years. Instead of mining our petroleum so rapidly, we must either depend more and more on oil from other sources or get along with less oil. Our children will doubtless do both."

War Tax on Steel and Tin Plates

In referring, last week, to the budget changes, HARDWARE AND METAL commented on the war tax and duty of tin plates and steel plates. The matter might be made a little clearer.

Since June 6, 1919, the duty on tin plates and black sheets has been 12½ per cent. Prior to that tin plates were free, but subject to 7½ per cent. war tax. Black sheets were 5 per cent. and subject to 7½ per cent. war tax. On this date, June 6th, 1919, a straight duty of 12½ per cent. was put on these items and the war tax cancelled. Thus, the removal of the war tax leaves the tax unchanged on these raw materials.

POWER LAWN MOWERS

R. Blain, Brampton, Ont.—Kindly advise us where we can purchase gasoline lawn mower with roller attachment?

Catalogues and Booklets

THE ENTERPRISE FOUNDRY CO., LTD.

The Enterprise Foundry Company, Limited, Sackville, N.B., have issued a very attractive circular describing their combination range, which, they state, burns either coal or gas, separately or at the same time.

The circular describes how to have a warm kitchen in the winter time or a cool kitchen in the summer time, as well as other interesting literature describing the construction, workmanship and other features. copies to readers of HARDWARE AND METAL on request.

St. John Merchants Censor Advertising

Local R. M. A. Adopts Plan to Eliminate Useless Advertising Which Merchant Has Felt Under Obligation to Patronize

THE Retail Merchants' Association of St. John, N.B., have adopted a plan to eliminate useless advertising. For two or three years there has been a constant drain on the pockets of the merchants by promoters of social affairs, who have pestered storekeepers with requests that they take up advertising space in programmes, etc. While the merchants were not opposed to helping out at times with a little financial assistance, the practice has become more or less of the nature of a held-up, and it is very doubtful if the merchants get returns in proportion from this form of advertising scattered through the sixty pages of programme.

This particular merchant was forced to take a page or have his name spread among the members of the church as being a non-supporter of their organization.

It can readily be seen that with social affairs occurring every week, and two or three times a week, that a large amount of money was absolutely wasted, and the merchant put in such a position that he could not help himself.

To cope with this situation the St. John branch of the Retail Merchants' Association has appointed a censor committee, and all members of the association have pledged themselves not to buy any space in any advertising scheme unless they were first submitted to the secretary of the association, who would in turn hand the application to the censor committee, who would not be known to the public.

If it is passed and endorsed by the committee, then the solicitor for the advertisement could go to the merchant, but without a certificate showing that the scheme had been passed the merchant would decline to take space, and refer the canvassers to a card which hangs in his office, and reads:

"This firm is a member of the Retail Merchants' Association, and is not permitted to take space in any advertising scheme until such has first been passed by the censor committee of the association."

Canada to Get More Cutlery Soon

Better Deliveries Will be Made by British Makers—Various Tools Also Coming to Hand —Plated Wares Are Now in Sight

ALREADY there is a decided improvement in the delivery of some lines of hardware specialties of British manufacture, and there will be a decidedly improved delivery within the next few months. As a matter of fact hardware men will be able to bank on fairly satisfactory delivery of cutlery for the coming fall trade, in the opinion of Frank H. Scott, manufacturers' representative, Montreal, and who, on his return from an extended trip to Great Britain, expressed himself to HARDWARE AND METAL as greatly pleased with the outlook in general over there.

"Production has been greatly increased, but of course there is a great home demand for this and much of the production is being taken at home. There will be much improvement in deliveries to Canada, however, and cutlery will come along in larger quantities. There ought to be a great improvement within a short time."

Two Difficulties

While production has improved, this has not been accomplished without attendant difficulties. These have been several, but one of them has been that of getting essential raw material. Improvement has been showing of late, to some extent, and, manufacturers are nearer the point of being able to accept orders for specified delivery than they have been for some time. This is very encouraging in that, for a long while, jobbers and retailers have been hesitating with regard to placing orders on which no likely delivery could be promised.

The other outstanding difficulty which has continued for so long is that of labor. Some manufacturers have been confronted with many difficulties in this regard; others have had less trouble. In some factories, employees, while asking for and receiving more consideration in the way of wage returns, have been more content to remain with their tasks. This minimized labor disturbance and production has been satisfactory, even if not maintained as prior to the war. Evidences there are that there will be rapid improvement, however, in this direction. Only recently the Ministry of Labor permitted the operation of wage demands to the cutlers of 15 per cent. increases. Not only so, but these were made retroactive to January last. As a result prices on cutlery will not likely be reduced materially, in fact they will perhaps be still higher.

Carvers, table cutlery, and possibly scissors, will come to hand more promptly from now on, Mr. Scott says. Sheffield cutlers will be able to afford a better service in time than ever before.

Plated-Ware Tools

In considering other lines and delivery thereon, plated silverware will be more readily available than for some time. Some supplies are already en route to this country, and the trade, Mr. Scott states, will readily absorb stocks that may arrive. There has been a dearth of this material for some time past, and it means that the trade is more than anxious to secure such supplies as are available, even though the present prices are much higher than obtained in normal times.

Tools, such as measuring sticks, gauges of various kinds, tape lines, etc., are available to a great extent now, and these goods are coming to hand regularly. Mr. Scott states that the Canadian demand has been active for these goods and that, on the whole, goods of British manufacture are bound to come forward more readily from now on, even though immediate supplies of raw steel products are somewhat difficult to obtain still. There have been a host of buyers in England of late—many of them from Canada. Goods do not have to go begging.

INCORPORATIONS

Toronto.—Champion Rubber Co., Ltd., has been incorporated to manufacture rubber products and accessories.

Toronto.—Collapsible Tubes. & Containers, Ltd., has been incorporated here to manufacture boxes, cartons, and all containers made of paper, cardboard, tin, aluminum, etc.

Toronto.—Querrie-Anderson, Ltd., has been incorporated to manufacture automobiles, bicycles, tires and accessories, and deal both wholesale and retail therein.

Toronto.—Acton Tool & Stamping Co., Ltd., has been incorporated to manufacture metals, tools, machinery and metal articles of all kinds.

Toronto.—Marchment Company, Ltd., has been incorporated with capital of $130,000 to carry on business as a sanitary engineer, manufacturer and general contractor.

PERSONAL

Toronto.—Roy C. Lewis, of T. S. Simms & Co., Ltd., St. John, N.B., is in Toronto this week on business for his firm.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

AUTO POLISH

The Damon Specialty Co., 42 Duke St., Toronto, Ont., are offering the Canadian trade their Nonolio automobile piano and furniture polish, which they describe as follows: As its name discloses, it contains no oil and by reason thereof leaves a surface free from grease and oil, to which dust cannot adhere.

Without the use of acid, alkali, grit or any injurious substance, it cleans thoroughly the surface to which it is applied and leaves it protected by a thin invisible coat of wax, which protects the finish from mud, rain and the elements.

Auto Polish

Nor is the wax which is left to protect the surface cumulative, leaving no more on the car after a year's use than after the first application.

This line of polish has until recently been manufactured in the United States. The makers however are now established in Canada, the factory being situated on 42 Duke Street, Toronto.

BRAKE LINING FORD CARS

The Hamilton Cotton Co., Ltd., Hamilton, Ont., are placing on the market a specially treated brake lining for use on Ford cars which will be known in future under the trade name of Lion Brand Brake Lining.

In describing this new product the manufacturers claim they have produced a brake lining which very largely overcomes the trouble Ford owners experience by chattering. The Lion Brand brake linings are made of cotton web so impregnated with a frictioning compound that the lining will last a long time and will not easily wear smooth. The manufacturers also state they are making this new product of the best grade of materials, and in order for it to be easily recognized they manufacture it with a red line in the centre.

These linings are put up three pieces in a set complete with rivets, in an attractive cardboard carton, and can also be supplied in rolls of 100 ft. each.

Brake Lining

THE PRESTOY MANUFACTURING CO., INC.

The Prestoy Manufacturing Co., Inc., Bridgeport, Conn., are manufacturing a new line of children's collapsible table and chair, which they claim, being practically all steel, will stand rough usage.

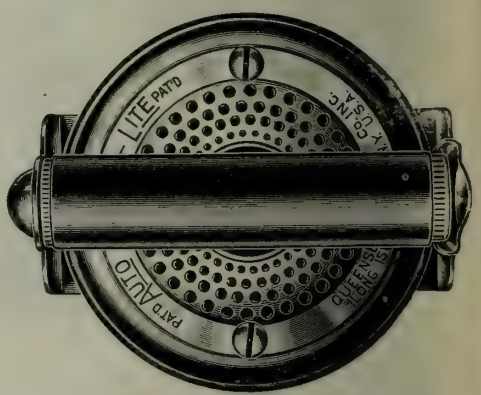
They also claim this combination, by a simple movement, it can be adjusted to fit any child up to seven years of age, and when not in use can be folded up to four inches deep. Finished in a high lustre of green enamel with tray, seat and back rest of polished oak or mahogany, and in a radiant blue with white enamel tray, seat and backrest. To give an idea of their rigidity, it is possible for a grown-up person to stand on them without showing any strain. The fact of their being collapsible may appeal to many, as it is possible to fold up into a reasonably small space so as to allow for being stored away or laid aside when not in use.

Combination Chair and Table

AUTO CIGAR LIGHTER

A new style of cigar lighter is being offered the Canadian hardware trade by the J. C. McAdams Sales Co., 51 East 42nd St., New York, N.Y., which will be known by the trade name of Auto Spark Lite.

The manufacturers claim their new lighter will operate on any car or motor boat using gasoline as a fuel, regardless whether the engine is equipped with magneto or storage battery, as the wick may be lighted so long as it utilizes one spark plug. In describing their new product the makers state the Auto Spark Lite is a convenience of sturdy yet decorative construction, and is uncomplicated by battery connections or fragile tips, and is an instrument that may be relied upon to produce a light so long as the wick is saturated with gasoline.



Auto Cigar Lighter

In order to install the device it is claimed that it is only necessary to attach to the instrument board, then connect the wire which originally ran to one of the spark plugs to one terminal of the lighter, then run an extra wire from the other terminal of the device to the spark plug from which this wire was removed, then fill the tube in the torch of the lighter with gasoline.

THE WESTCO PUMPS, LTD. CORRECTION.

In an article which appeared in the new goods department of HARDWARE AND METAL issue of May 22 a typographical error appeared in the manufacturer's name and address. The name given was the Weston Pumps Ltd., 707 George Street, Toronto, and which should have read: THE WESTCO PUMPS LTD., 707 Yonge Street, Toronto, Ont. As described in the article the above-named firm manufacture in Canada a new tankless water system.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

DESPITE the rumor that the peak for high prices has been reached, many important hardware commodities continue to advance and the price tendency is still upwards. However it is interesting to note that price advances are not so numerous this week.

Tin quotations are 7c per pound lower. Lead and spelter are also weaker.

Furnace prices have been advanced 5 per cent. Galvanized shingles and siding, also barb wire, shaving soap, tubular and split rivets, axes, clothes line wire, scythes and snaths, wire nails, japanned sand screens, regalvanized wire cloth, butt hinges, harness rings, saddlery hardware, hose bands and hose fittings, plaster Paris, dee top shovel handles, wrapping paper, rasps, grain cradles, hammers, rivets, sleigh bells, and fuel oil all have new higher prices.

The turnover tax is being readily adopted, and is the chief topic amongst business men. The tie-up of freight transportation on the United States railroads is causing considerable loss and inconvenience to many in the trade, depending on this source for supplies. Manufacturers and jobbers state there is an ever increasing shortage of raw materials and manufactured commodities; especially is this true where iron or steel is concerned. Collections continue to come forward promptly and money is still circulating freely, although it is believed that financial concerns have tightened up on

MONTREAL MARKETS

MONTREAL, May 27.—While there are fewer actual changes of price this week, the upward trend does not seem to have abated materially. Tendencies are strong, and while conditions surrounding production are such as they now are there will be little likelihood of relief.

This week, among the important changes are those of higher prices for floor hinges and spring hinges of various kinds. Welding compound is up. Dee tops for handles are considerably higher. Grain cradles advanced $12.50 per dozen. Scythe snaths are higher in price. Wrapping paper advanced half a cent. Heller rasps are higher through discount revision. Bench axes and adzes are higher, following the changes made a week ago for axes. Maydole hammers are higher. Packaged rivets are higher. Ten per cent. increase applies this week on sleigh bells. Fuel oil is very much higher and decidedly scarce. Sheets and plates are almost unprocurable. Old scrap markets are weaker, with reduction on old tires and heavy machinery cast. Pig tin is softer again this week, but pig lead is somewhat firmer.

The budget proposals still occupy the centre of interest in business circles. Jobbers state that business conditions continue very active.

Floor Hinge Prices Show Stiff Increase

Montreal.

SPRING HINGES.—Revised higher prices are being quoted by the jobbing trade on various spring hinges. No. 2001x3 are now $3.50 per pair, 2001x4, $4.00 per pair; 2001x5, $4.80 per pair; 2001x6, $6.00 per pair. No. 1½-⅞ to 1 are $3.50 per pair; 1⅛ to 1¼ $4.00; 1⅜ to 1½ $4.80; 1¾ to 2, $7.20; No. 3½ in similar sizes are priced as follows: ⅞ to 1, $1.75; 1⅛ to 1¼ $2.05; 1⅜ tto 1½, $2.50; 1¾ to 2, $3.55; Nos. 2131, 2171 and 2281x3 are priced at $4.50 per pair, while 4 inch are $5.50; 5 inch, $6.50; and 6 inch, $8.25 per pair.

Floor hinges are selling as follows: No. 3001 per set, $2.00; 3131, $2.20; 3171, $2.20; 3281, $2.20.

Welding Compound Joins With Advances

Montreal.

WELDING COMPOUND.—Revised prices are given this week by the jobbing trade on welding compound. Cherry Heat in 5 lb. boxes is quoted at 13c per pound, Climax in 5 lb. boxes 13c, Climax in 100 lb. boxes at 11½c per lb.

More Money Asked For Handle Tops

Montreal.

DEE TOPS.—Higher prices are being quoted on malleable dee tops for use on forks or other handles. The new price is $4.55 per doz.

Stiff Upward Trend For Grain Cradles

Montreal.

GRAIN CRADLES.—A price of $75.00 per dozen is now quoted by the hardware jobbing trade on grain cradles. This makes an advance of $12.50 per dozen, the previous price being $62.50.

Scythe Snath Prices Reach Higher Level

Montreal.

SNATHS.—Scythe snaths have been selling at list plus 10%. The jobbing trade have revised their quotations upward and the new plus discount is 20%.

Bench Axes Follow in Upward Revisions

Montreal.

BENCH AXES.—In addition to the changes already announced on various axes the following prices are being quoted on bench axes: No. 2 are quoted at $22.00 per doz.; No. 3, $24.75; No. 4, $27.00; No. 5, $29.70.

Half Cent Increase For Wrapping Paper

Montreal.

WRAPPING PAPER.—Kraft wrapping paper has again advanced in price. The last increase is ½c per 1000, the selling price to the trade being 13½c.

Prices For Rasps Have Moved Upward

Montreal.

HORSE RASPS.—A change has been made in the discount on Heller's horse rasps. The present discount is 57½%.

Adzes Are Revised and Prices Are Up

Montreal.

ADZES.—Following the changes recently made on adzes, a revised price list is out on adzes. House carpenters' patterns are now $31.00 per doz.; the Railroad, $33.00; Ship, $35.00, and Ship (Ripped), $40.00 per doz.

One Line Hammers Take on Higher Prices

Montreal.

HAMMERS.—In addition to recent changes made on various makes of hammers, new prices are quoted on "Maydole" nail hammers. No. 1 are now selling at $25.00 per doz.; No. 1½ at $23.00; No. 11 at $25.00; No. 11½ at $23.00; No. 12 at $21.50; No. 13 at $19.00; No. 611½ at $36.00.

Packaged Rivets Are on Higher Levels

Montreal.

RIVETS.—Increased prices are effective for rivets in cartons. Bifurcated No. 9 are quoted at $1.80 per carton and tubular at $1.60.

Revised Lists Now on Spring Hinges

Montreal.

SPRING HINGES, BUTTS. — List prices have been revised on various makes of floor and door hinges and butts of the spring and reacting variety. The new lists are said to be materially higher, permitting of discounts being applicable instead of a "plus" being used over the list. The net increases, while not available, are said to total 10 per cent. at least.

Up Ten Per Cent. Are All Sleigh Bells

Montreal.

SLEIGH BELLS.—An advance of ten per cent. has been made on sleigh bells. This applies to all kinds, shaft, team, gong, strap, Quebec, etc.

No Advances Yet on Oil or Gasoline

Montreal.

OILS, GASOLINE. — While as yet there have been no fresh advances in the price of coal oil or gasoline, all indications are strong and there may be an early revision upward. This comes from the fact that fuel oil has reached the high basis of close to 20 cents per gallon. An increase for the refined products may come at any time. Present selling price, base, is 27 cents per gallon for coal oil, and 38 cents per gallon for motor grade gasoline.

Very Great Scarcity Standard Wire Nails

Montreal.

WIRE NAILS.--Still there is a great scarcity of standard wire nails. Jobbers are at their wits' end to know how to fill orders, and the demands are naturally greater with the advance of the building season. Despite the dearth of stock there has been no change of price, the basis still remaining at $5.85. Cut nails are $6.35 per keg, base, still.

Rope Still Steady With Sales Improved

Montreal.

ROPE AND CORDAGE.—Prices have been unchanged over the week and there is still a fairly active demand on the part of the trade. Pure manila base price is held at 35½ cents and British and Beaver manila at 28 cents. Sical is 22½ cents per pound still.

"Get Sheets Where You Can" Is Now the Rule

Montreal.

SHEETS.—The situation is no better. Some are giving up hope absolutely of there being any improvement for some time to come. There is nothing to denote relief for the near future, and jobbers, manufacturers and brokers are obtaining what they can, where they can, and paying a premium for such supplies as they can obtain. The situation is decidedly nominal.

Steel Bars and Iron Continue in Good Demand

Montreal.

STEEL AND IRON.—Activity for bars of both steel and iron is still manifest. The jobbing trade have a certain amount of difficulty from time to time in getting necessary supplies to meet the needs of customers. The basis, while unchanged, remains steadily firm.

IRON AND STEEL

Iron finish machinery steel		$4 95

Old Scrap Prices Are Softening Now

Montreal.

OLD MATERIAL.—Prices are softening on various scrap. This is due to two causes, for the most part, that of the congestion of railway rolling stock and that of strikes shutting down certain manufacturing plants. The receipt of considerable old junk from the small dealers in the country has served to weaken buying prices and automobile tires, scrap zinc and machinery and cast iron are all lower.

Tin Softness Still But Lead Is Firmer

Montreal.

INGOT METALS—Prices have lowered in London again this week and the declines do not seem to have reached bottom, though some cannot see any reason for the continued softening of prices. Lead is somewhat firmer.

COPPER.—Little new feature in this, last week's quotations holding still, which are: Electrolytic, 23½ cents; casting, 23 cents.

TIN.—London cables are lower again. A lessening of local prices two in sympathy with this is noted, the present price being 63 cents.

ANTIMONY.—At 12½ to 13 cents a certain amount of routine demand exists.

ALUMINUM.—Rather uninteresting and featureless and with prices ranging at 35 to 38 cents per pound.

SPELTER.—Eleven cents per pound is the basis for this metal, at which price a fair trade is being met.

LEAD.—The market has firmed a little this week, the local basis being a quarter of a cent higher at 10¼ cents per pound.

TORONTO MARKETS

TORONTO, May 27.—It is interesting to note that fewer advances have been made on the price of hardware commodities, although the tendency continues to be for higher prices.

Tin has again taken a decided decline, having dropped 7 cents per pound. Spelter and lead are also weaker.

Furnaces have been marked up 5 per cent. this week. Tubular rivets, split rivets, Williams holder and hinge top shaving soap sticks, barb wire, staples, axes, Chicago butt hinges, and galvanized shingles have all been revised upwards.

The tie-up of freight on the United States railroads has embarrassed many depending on this source of supply, and in many cases the manufacturer is forced to live from hand to mouth till shipments come to hand. Sheets and plates are practically off this market and few shipments are coming through.

The new Turnover Tax is being fairly well received, although the luxury tax, which has also been imposed, has been the cause of some misunderstanding, however, it is believed that most of the points in doubt have been made clear and the new legislation will soon be assimilated with the daily routine.

Tabular and Split Rivets Have Been Marked Up

Toronto.

RIVETS.—An advance on some lines of rivets has been made, and clinch rivets as well as tubular will now cost the dealer more. The peak for higher prices on many commodities composed of iron or steel does not seem to have been reached yet, and those manufactured from other metals are also subject to continual advances due to labor and other factors. The new price on clinch rivets, number 9, is $1.70 per carton of 1 doz. packages. The number 6 is now quoted at $3.30 per carton of one doz. The tubular has been revised upwards and is now quoted at $1.60 per carton of one doz.

Barb Wire Staples Have Been Advanced

Toronto.

STAPLES, in line with other commodities manufactured from wire, iron or steel, etc., have new and higher prices. The bright is now selling at $6.10 per hundred lbs., and in 25 lb. boxes the quotation is $7.10 per hundred lbs. The galvanized is now quoted at $7.10 per hundred lbs. and the 25 lb. boxes $8.10 per hundred lbs.

Williams' Holder Top Shaving Soap $4.65 Doz.

Toronto.

SHAVING SOAP.—New and higher prices have been made on Williams' shaving soap. The large holder top now being quoted at $4.65 per doz.; the large hinge cover also sells for $4.65 per doz.

Quotations on Furnaces Are Revised Upwards 5%

Toronto.

FURNACES of many makes have been revised upwards to the extent of about 5 per cent. Manufacturers state that this is in the way of a revision and the new prices are now more in line with their cost than those formerly quoted.

Manufacturers state they are kept very busy on orders for all kinds of stoves, furnaces, and other kindred lines, and while it is true there is some rumor of lower prices on many commodities in the near future manufacturers state they can see no intimation of lower prices until raw materials becomes more plentiful or the present demand falls off. They also state that present indications point to a very busy fall and that they are working with full speed in order to accumulate if possible sufficient stock to handle the heavy business which they expect for fall delivery.

Rope Sales Brisk; Good Volume Moving

Toronto.

ROPE.—The opening of navigation as well as the bright warm weather which has set in has greatly stimulated the sales of rope, it is stated, and manufacturers say they are very well satisfied with the amount of business being offered. Prices are very firm, although unchanged, and collections continue to come in very good form.

Prices on Axes Have Again Advanced $1

Toronto.

AXES.—An advance in price of $1 per doz. applying to various grades and makes of single bit pattern axes has been made. Boys' and hunters' axes have also been marked up, and will now cost the dealer more.

Wire Nails Scarce; Situation Not Improved

Toronto.

WIRE NAILS.—The situation on wire nails has shown little improvement and jobbers state their stocks are very low. The present demand, they state, is very insistent and while they are able to fairly handle any business at present being offered they are very much concerned for the near future, they state.

Owing to the large amount of orders on the books at present, the mills say they are unable to take further orders for immediate delivery, but when they will catch up with their orders or whether they will be able to take on new business is at present very uncertain. The present quotation on wire nails is $6.10 base, f.ob., Toronto warehouses.

Warm Weather Stimulates Demand for Garden Tools

Toronto.

SPRING LINES are moving very freely and a heavy business is being done on garden hose, and garden hose fittings, garden tools, spades and shovels, black wire screen cloth, poultry netting, and garden seeds, etc. The present quotations on these lines are as per current quotation pages.

Chicago Hinges and Butts Now Cost Dealer More

Toronto.

HINGES AND BUTTS again have been marked up to higher prices, and Chicago floor hinges, double-acting butts and blanks will now cost the dealer more.

Heavy Demand Continues on Sporting Goods

Toronto.

SPORTING GOODS.—So far the new tax schedule has shown little interference with the sale of sporting goods and all in

the trade seem to be very well satisfied with the business being offered. Baseball goods especially are in good demand. Fishing tackle is also moving freely.

Lead Products Steady; Prices May be Lower

Toronto

LEAD AND ZINC PRODUCTS.—Notwithstanding the fact that prices on lead pipe, lead waste pipe and lead sheets, etc., showed a decline last week, stocks are reported to be light, and the demand seems to be very brisk. The declining market, however, is attributed to the erratic condition of the basic metal on the English market, dropping one day and gaining the next. Present indications point to steady market for some little time although few are predicting higher prices, some have it that they would not be surprised if quotations on these products would go still lower in the near future. The warm weather is said to have brought out the demand for lead waste and lead pipe and large volumes are moving out daily. The following are the present quotations:

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 44
Solder, strictly, lb.	0 38½
Solder, commercial, lb.	0 36½
Solder, guaranteed, lb.	0 44
Solder, wiping, lb.	0 36
Zinc sheets, per lb.	0 19

Boiler Tube Prices Firm; Remain Unchanged

Toronto

BOILER TUBES.—A fair demand continues for boiler tubes, and jobbers state they are very well satisfied with the business that is being offered at present. Stocks on hand are said to be fairly light and the opinion seems to be that boiler tubes may be very scarce, especially coming on towards the fall season, and this is attributed fully to the shortage of skelp.

Some have it that the recent tie-up of the American railroads will seriously affect this situation on account of the coal, the holding up of raw material and many other factors. The present prices are being quoted at firm figures, although no change has been made this week, and are as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	30 00	.....
1½ inch	31 50	.....
1¾ inch	33 00	30 00
2 inch	32 00	29 00
2¼ inch	37 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	49 00
3½ inch	70 00	39 00
4 inch	96 00	63 00

No Material Coming to Make Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — As announced in last week's issue of HARDWARE AND METAL, corrugated sheets have been advanced, although prices were not available in time for publication. This week, however, records the new prices which are a shade higher.

Manufacturers state that sheets are daily becoming harder to procure and are very much concerned for the near future. Some state that if the embargo on the United States railroads continues and sheets do not come in better quantities that this market will show famine as no one seems to have any stocks to sell and prospects seem very poor for procuring immediate delivery. It may be that it will be sometime before shipment will commence to arrive, even after the embargo is lifted on account of the congestion of freight. The quotations are as follows:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

An additional charge of 10% of the list price is added to cover exchange.
Discount, 7½%.

Famine Prevails on Sheets and Plates

Toronto.

SHEETS AND PLATES.—The freight embargo on United States railroads is the cause of many empty warehouses, it is stated, and jobbers and manufacturers are veery much concerned for the future, as they claim that the embargo has tied them up in such a manner that they are only able to obtain very light shipments, if any.

Many state they have large shipments of sheets in transit, and state they have some of them paid for, and yet they so far have no advice of their whereabouts or where to locate them. It is the opinion of some that it may be some little time before freight moves freely, even after the embargo is lifted on account of the congestion of freight cars at many important shipping centres.

The following prices are quoted here merely as a guide as it is believed that very few could supply a full list of sizes. Owing to the present scarcity, it is necessary, in many cases, to pay premiums over these quotations as jobbers often find it necessary to go into the local market in order to secure the urgently needed stock to fill their orders.

BLACK SHEETS—	
10 gauge	9 00
12 gauge	9 05
14 gauge	9 10
16 gauge	9 35
18-20 gauge	9 40
22-24 gauge	9 45
28 gauge	9 50
GALVANIZED SHEETS—	
26 gauge	9 50
U.S. Standard—	
10¾ gauge	12 50
28 gauge	12 10
26 gauge	10 75
22 and 24 gauge	11 55
20 gauge	11 55
18 gauge	11 55
16 gauge	10 25
English Standard—	
26 gauge	12 25
28 gauge	12 50
24 gauge	11 65
22 gauge	11 30
18 and 20 gauge	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Lower Prices—Despite the rumors that are current that prices are about to fall from the pinnacle, jobbers state they are continuing to have one of the best years in their history, and that the demand is now almost more persistent than in the early spring.

One manufacturer stated that so far as he could remember the demand and supply always governed the marketing of commodities, and at present he could see no changing from this rule. He also stated that raw material was never so scarce in the history of his business, nor was the demand heavier or more insistent.

Many are of the opinion that a good crop, especially in Western Canada, will go a long way to stabilize the markets on all commodities, and, according to reports from Western Canada, indications are as favorable as during the spring of the year 1915.

The tie-up of freight transportation on the United States railroads has been very detrimental to merchandising of all kinds. Especially is this true of the manufacturer who has to depend on his supplies coming over these roads, and in many cases he is living from hand to mouth till he receives shipments, which, in many cases, he has paid for and which are still tied up on the road in transit. This is also true of sheet and plates of iron and steel, and the majority of manufacturers, dealers, and jobbers, etc., state their warehouses are bare. One manufacturer says to HARDWARE AND METAL that he had not a sheet in his place, and could not tell definitely when any of his shipments, which were on the way, would arrive. However, just what the future will show remains to be seen, the present demand is very brisk and any goods that are available are moving very freely. Collections also continue to come in satisfactorily and money is circulating freely, although it is believed that loans have tightened up to some extent.

Iron and Steel Bars Firm; Quotations Unchanged

Toronto.

IRON AND STEEL BARS. — Good business is being done in this commodity, although the demand has slackened down to some extent. This, however, is believed to be due to the freight embargo which is causing the shortage of many commodities which in turn hold up work requiring the use of bars. The present prices are very firm, although is is not expected that higher prices will be made, at least not immediately. Some have it that the mills are not accepting orders unless for long date bookings. The following are the present quotations:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Waste Materials Have Sagging Tendency

Toronto.

SCRAP AND WASTE MATERIALS. —Little change has been shown in the tendency of this market, and dealers state that business is very quiet. This is especially true of the red and yellow metals, which show a very noted sagging downward tendency. No. 1 cast iron and also stove plate show a fair demand, although they are gradually weakening, it is stated. This situation is fully attributed to the embargo on the United States railroads, which, it is believed, is tying up many industries which use these materials in their manufacture. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½.

Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

Galvanized Shingles Now Quoted at $12 Sq.

Toronto.

GALVANIZED SHINGLES.—New and higher prices have been made on this commodity, which is directly attributed to the scarcity of raw material and the higher cost of procuring same. The new price is now being quoted at $12 per square.

Galvanized siding has also been advanced in price, the new quotation being $10.50 per square.

Further Reductions on Tin, Spelter and Lead

Toronto.

INGOT METALS.—The entire metal situation continues more or less panicky and nearly all are erratic; the tendency, however, is weaker, and further reductions have been made this week. Tin has shown the heaviest decline, having dropped 7 cents; spelter is a ¼ cent lower, while lead has declined a ½ cent. Other ingots are also weaker.

TIN.—A heavy decline has been made in tin, the price having dropped 7 cents per pound, making the present price 60 cents per pound.

LEAD has also been marked down this week, 10½ cents per pound being the new quotation.

SPELTER. — Prices continue to weaker, a lower quotation of 10½ cents per pound having been made.

ANTIMONY.—Prices continue to hold unchanged, although the tendency is weaker and is selling at 15 cents per pound.

ALUMINUM shows little active demand and is quoted at around 37 cents per pound.

COPPER quotations remain unchanged, 24 cents per pound still being the quotation.

LONDON MARKETS

LONDON, May 27.—The upward trend of prices on hardware lines continues to be felt, although this week records fewer actual changes than have been made for some time.

Clothes line wire has again been marked up. Wire nails have also been advanced. Scythe snaths have again come up for revision. Japanned sand screens, regalvanized wire cloth, Chicago butt hinges, harness rings, saddlery hardware, hose bands and fittings and plaster Paris all have new higher prices.

Business has been excellent during the past week. The warm weather has speeded up the sale for lawn mowers, doors and windows, screen wire, lawn hose and fittings, paints, varnishes, etc.

Prices continue very firm and scarcity of goods is being felt more keenly each week.

Collections continue good.

Clothes Line Wire Has Again Been Marked Up

London, Ont.

CLOTHES LINE WIRE.—In line with the higher cost of wire of nearly all kinds clothes line wire has again been revised upwards, the demand is said to be quite a heavy one and stocks generally are inclined to be light. The new prices on some sizes are as follows:

No. 19 or XX, 50-ft. lengths, $7.85 per M. ft.; 100-ft. lengths, $7.15; No. 18 or XXX, 50-ft. lengths, $8.60; 100-ft. lengths, $8.

Higher Prices Have Been Made on Scythe Snaths

London, Ont.

SCYTHE SNATHS have again been revised upwards. This is said to be due to the situation which has developed in lumber and wood of nearly all kinds. The high cost of labor is also said to be a factor. The new prices are now being quoted as follows:

Patent, No. 00, $16.50 doz.; No. 1, $15.85; No. 2, $15.20; No. 3, $14. Brush Double Ring, $17.20 per doz.

Advance Made on Wire Nails; Now $6.10 Base

London, Ont.

WIRE NAILS.—The situation on wire nails has shown little improvement and jobbers state that stocks are becoming very light, and that if some relief is not soon offered the situation will prove serious. It is believed that some manufacturers are out of the market for sometime to come and have no nails to offer and have also withdrawn their prices. The new quotation has been revised upwards to $6.10 per keg base in place of a former $5.75 per keg.

The demand seems to be daily increasing and merchants generally seem to be looking for a heavy building activity. Some have it that merchants have fairly heavy stocks but the consensus of opinion seems to be that few have bought much ahead of their season's requirements.

Cut nails continue to sell at unchanged quotations and the price remains at $7.50 per bag base.

Japanned Sand Screens Have Higher Prices

London, Ont.

SAND SCREENS are also among the commodities to have new and higher prices. This line is also said to be affected by the situation which has developed in wire, and stocks are generally said to be light. The new quotations on some of the sizes are as follows:

Mesh		Rolls	Less Rolls
2 x 2	24 in.	$0 70 yd.	$0 75 yd.
3 x 3	30 in.	0 81 yd.	0 85 yd.
4 x 4	36 in.	1 00 yd.	1 05 yd.

Re galvanized Wire Cloth Has Advanced

London, Ont.

WIRE CLOTH.—In line with wire and wire screen of many kinds regalvanized wire cloth has been marked up to higher prices. Owing to the big demand for wire of nearly all kinds the shortage of raw material, coal and other factors the mills have been seriously handicapped, it is stated, and which has reflected in the scarcity of nearly all materials of this kind. The new prices on regalvanized wire cloth are as follows:

Mesh		Rolls	Less Rolls
2 x 2	24 in.	$0 56 yd.	$0 60 yd.
3 x 3	30 in.	0 70 yd.	0 75 yd.
4 x 4	36 in.	0 85 yd.	0 90 yd.

Chicago Hinges and Butts Are Revised Upwards

London, Ont.

HINGES AND BUTTS.—New and higher prices have been made on Chicago floor hinges, double-acting butts and blanks. The higher cost of raw material and labor as well as the shortage of material are factors for higher prices, it is stated. The new quotations on some of the better known lines are as follows:

Chicago Floor Hinges—No. 3171 A.C., $2.15 each; No. 3281, D.B., $2.15 each.

Chicago Double-Acting Butts—No. 1½, ⅞ in. to 1 in., $2.40 pair higher; 1⅛ in. to 1¼ in., $3 pair; 1⅜ in. to 1½ in., $4.85 pair; 1¾ in. to 2 in., $7.35.

Blanks for above—No. 3½, ⅞ in. to 1 in., $1.25 pair; 1⅛ in. to 1¼ in., $1.55 pair; 1⅜ in. to 1½ in., $2.40 pair; 1¾ in. to 2 in., $3.70 pair.

Japanned Harness Rings Again Move Upwards

London, Ont.

HARNESS RINGS.—Japanned harness rings have again come up for revision and higher prices have again been made this week. The new prices on some of the sizes are as follows:

Japanned Harness Rings—¾ in., $1.60 gross; ⅞ in., $1.70; 1 in., $2.20; 1¼ in., $2.65; 1½ in., $3.70; 1¾ in., $3.80; 2 in., $4.20; 2½ in., $5.10.

Prices on Saddlery Hardware Marked Up

London, Ont.

SADDLERY HARDWARE.—Further activities have again been noted in this line, and saddlery hardware of many kinds have again come up for revision, and an advance of approximately 15 to 20 per cent. has been made on harness snaps, whiffle tree and neck yoke irons, as well as clevices, etc. This is said to be due to the situation which has developed in iron and steel as well as the higher cost of labor and other manufacturing charges.

Japanned screw cockeyes have also been revised upwards and some of the new quotations are as follows:

Japanned Screw Cockeyes—New price: 1¼ in., $1.10 doz.; 1½ in., $1.25; 1¾ in., $1.50; 2 in., $1.75.

Lawn Mowers Sell Well; Warehouse Stocks Light

London, Ont.

LAWN MOWERS.—The demand for mowers of nearly all kinds continues to be a heavy one, and jobbers state their stocks are light and find great difficulty in securing replenishments. Some of the quotations are as follows:

K 8 in. wheel, 3-blade—12 in., $6.55 each; 14 in., $6.80; 16 in., $7.10.

K 9 in wheel, 4-blade—12 in., $6.80 each; 14 in., $7.10; 16 in., $7.35; 18 in., $7.85.

C 10½ in. wheel, 4-blade, plain—14 in., $8.40 each; 16 in., $8.80; 18 in., $9.15; 20 in., $9.95.

BB 10½ in. wheel, 4-blade, ball bearing—14 in., $10 each; 16 in., $10.50; 18 in., $11; 20 in., $11.55.

The following figured net at 25% off list.

Daisy—12 in., $6.19 each; 14 in., $6.75; 16 in., $7.28.

Star—14 in., $8.03 each; 16 in., $8.55.

Woodyatt—14 in., $8.85 each; 16 in., $9.38; 18 in., $9.90; 20 in., $10.43.

Empress, ball bearing—14 in., $11.44 each; 16 in., $12; 18 in., $12.49; 20 in., $13.01.

Many Orders for Various Kinds of Grass Catchers

London, Ont.

GRASS CATCHERS are moving very freely, which may be on account of the big sale for lawn mowers. The all canvas continues to be quoted at $7.50 per doz., while the heavy canvas with galvanized bottom sells for $20 per doz.

Poultry Netting Stocks May Soon be Depleted

London, Ont.

POULTRY NETTING continues to have a big sale although stocks are becoming very low. Jobbers state they are finding great difficulty in securing fresh supplies as the mills do not seem to be able to cope with the present demand. The Canadian two-inch mesh is now being quoted at net list, while the one-inch mesh is quoted at an additional 5 per cent. to the list.

Heavy Buying Movement for Screen Wire Cloth

London, Ont.

SCREEN WIRE CLOTH continues to have a big demand, and as the weather becomes warmer, the demand seems to increase. This is accounted for, however, by the fact that people are getting ready early this year for the fly season. The painted black and galvanized are quoted as follows:

Painted black, $3.60 per 100 sq. ft.; galvanized, $4.25 per 100 sq. ft.

Garden and Harvest Tools Hold at 50% and 10% Off

London, Ont.

GARDEN AND HARVEST TOOLS continue to have a brisk movement and nearly all lines are going out very satisfactory. The discount continues to be quoted at 50 per cent. and 10 per cent. off the new list.

SPADES and shovels and scoops, etc., are also enjoying a very good demand, and 35 per cent. off the list continues to be the quotation.

Many Rope Sales Are Result of Warm Weather

London, Ont.

ROPE of neary all kinds has been subject to a heavy demand, which is daily increasing, it is stated. This is due, it is believed, to the seasonable warm weather which is opening up many kinds of summer work, etc. The present quotation is very firm although unchanged, and is as follows:

Pure manila, 35½c base; Beaver manila, 28c; New Zealand hemp, 28c; sisal, 22½c.

Hose Bands and Fittings Have Brisk Demand

London, Ont.

HOSE FITTINGS.—With the coming of warmer weather and the increased number of gardens and lawns that are being attended to this year, the sale for hose and hose fittings has been a very heavy one. Stocks are said to be low on this line at present and replacements are slow from the manufacturers. Some of the present quotations are as folows:

Hose Bands, galvanized—½ in., 40c doz.; ⅝ 45c; ¾ in., 45c; 1 in., 80c; 1¼ in., $1.50; 1½ in., $1.75.

Brass Hose Couplings—½ in., $2.60 doz.; ⅝ in., $2.70; ¾ in., $2.75; 1 in., $4.

Hose Nozzles—Mystic, $8 doz.; Canadian Gem, $8.60; Magic, $13.50.

Stocks of Linseed Oil Are Almost Exhausted

London, Ont.

LINSEED OIL.—The scarcity of linseed oil is very pronounced and the local markets are said to be almost bare. This is said to be due to the fact that Canadian seed is not coming in in any large quantity and imported seed is very badly tied up owing to the embargo which has been placed on the United States railroads. Crushers state they are very much disappointed with their deliveries as they had bought considerable tonnage which has already been paid for, and yet they are unable to get delivery on account of the freight embargo. Some have it that even were the embargo to be lifted immediately, that owing to the congestion that it may be sometime before the traffic is straightened out and the cars are on their way to their destination. The present quotation remains unchanged, although the prices are firm, and are as follows:

	Raw	Boiled
	Per gal.	
1 to 2 barrels	2 87	2 90
3 to 5 barrels	2 86	2 89
6 to 9 barrels	2 84	2 87

Less barrels add 15c gal.

Turpentine Famine Still Prevails

London, Ont.

TURPENTINE is still very scarce and some have it that the situation is daily becoming worse. Very little turpentine has been coming in, it is stated, on account of the embargo on the United States railroads, which has tied up shipments coming from the South. The present demand is very heavy and many are wondering how they will provide for

the near future, especially if relief is not soon shown in the transportation situation. The present prices are quoted as follows:

	Per gal.
1 barrel lots	3 80
2 to 4 barrels	3 79
5 gal. lots	3 95

White Lead in Oil Has Firm Quotations

London, Ont.

WHITE LEAD IN OIL.—A very good demand is noted for white lead in oil and stocks on hand at present are fair, although it is believed that crushers are predicting that there may be a shortage in white lead, but this is believed to be more due to the heavy foreign demand. However, the situation shows little change locally and quotations remain firm at the following prices:

	Tons	Less Tons Per 100 lbs.
Pure	20 45	20 80
Elephant brand	20 95	21 30

Prices on Putty Firm; Remain Unchanged

London, Ont.

PUTTY is also moving good and the price continues to be firm. The situation on whiting is a serious drawback on the manufacturer of putty, it is stated, and some are predicting that if whiting does not come forward in better quantities that manufacturers may have difficulty in supplying the demand. Prices are quoted as follows:

	Per 100 lbs.
Standard, 100-lb. drums	8 30
Do., 25-lb. drums	8 55
Pure, 100-lb. drums	10 80
Do., 25-lb. drums	11 05

Plaster Paris Has Advanced to $6 Per Bbl.

London, Ont.

PLASTER PARIS.—New and higher prices have been made on plaster of paris, the new quotation being $6 per bbl.

WINNIPEG MARKETS

WINNIPEG, May 27.—Higher prices is the ruling feature of the week's markets and many important hardware lines are affected as a result. All of the following lines are involved in the new revisions: Food choppers, tackle blocks, set screws, post-hole augers, sheet lead, metallic shingles and siding, corrugated iron, gilling twine, coal oil, gasoline mirrors and Ingersoll watches. Reports show little change in existing conditions of the various markets, acute shortage still being the chief contention, and in consequence making many of the most important basic materials, as well as the manufactured products, very difficult to procure in satisfactory and sufficient quantities. The present freight embargo on the U.S. railroads, it is said, will also prove a detriment.

Meat and Food Choppers Show an Increase of 14%

Winnipeg.

FOOD CUTTERS have new and higher prices this week and the Uuiversal line feels the effect of the latest changes to the extent of a 14 per cent increase on old lists. The new quotations, it is said, are caused by the present high cost of raw material to which can be added greatly advanced operating costs. The prices now ruling show:

Universal Food Choppers—Sizes, 0, $2.30; 1, $3.15; 2, $3.75; 3, $5 each.

Post Hole Augers Are Quoted at Higher Prices

Winnipeg.

POST HOLE AUGERS.—New prices appear on post hole augers and advance this line an approximate 8 per cent. on previous prices. Taking into consideration the fact that the basic material employed in the manufacture of this line is metal, the new increase is to some extent to be expected on account of the past firmness and stability of this line. Present prices are quoted as follows:

Vaughan Post Hole Augers—Sizes, 5 in., $17.78; 6 in., $18.20; 7 in., $20.65; 8 in., $23.10; 9 in., $25.20 per dozen.

A New Discount Is Listed For Set Screws

Winnipeg.

SET SCREWS.—The old discount on set screws of 25 per cent. off the standard list has been revised in the latest changes, and a result quotes this line 15 per cent. off list, a change that results in slightly higher prices:

Metallic Shingle Have Higher Prices

Winnipeg.

METALLIC SHINGLES.—New prices are quoted in metallic shingles and siding and as a result advance these lines an approximate 5 per cent. on previous prices. General shortage on these lines, it is said, is the cause of the new increase, the demand for this class of goods increasing steadily. To-day's prices show:

Metallic Shingles — galvanized med., $11.50, painted med., $8.75 per 100 sq. ft. Metallic Siding—galvanized, $9.50; painted, $7.25 per 100 sq. ft.

Revised Prices on Sheet Lead Shows 2½c Increase

Winnipeg.

SHEET LEAD is quoted higher to the extent of 2½ cents per lb. The new increase, it is believed, is chiefly attributed to the present scarcity of this line, chiefly due, it is said, to the now somewhat heavy demand which is rapidly diminishing immediate stocks available. The latest price shows:

SHEET LEAD.—2½ to 3 lbs., in rolls, 18 cents; cut, 19. 4 to 8 lbs., in rolls, 17 cents; cut, 18 cents per lb.

Corrugated Iron Also Shows Upward Tendencies

Winnipeg.

CORRUGATED IRON also follows siding and shingles and is advanced accordingly. This commodity also shows a shortage on present available supplies. The present demand is also heavy, and it is feared will greatly deplete any reserve that can possibly have accumulated. The prices now quoted are:

Corrugated Iron—galvanized, 28 gal., $9.75; 26 gal., $10.50; painted, 28 gal., $7.75; 26 gal., $9 per 100 sq. ft.

Gilling Twine Shows Higher Trend; 25% Up

Winnipeg.

GILLING TWINE. — Heavy advance appears on gilling twine to the extent of 25 per cent. on old prices, a heavy advance, but one to be expected when the present adverse conditions of the cotton markets are taken into consideration. New prices appearing are quoted as follows:

Gilling Twine—No. 18, $5.50; No. 20, $5.55; No. 25, $6.05; No. 30, $6.25; No. 35, $6.25; No. 40, $6.50 per lb.

Gill Netting—Linen, 3½ in. to 3¾ in. mesh, $7; 4 in., 4¼ in., 4½ in., 5 in. and 5½ in., $7 per lb.

1½c *Advance Affects Coal Oil and Gasoline Prices*

Winnipeg.

GASOLINE AND COAL OIL.—New prices appear on coal oil and gasoline, advancing both lines an average 1½ cents per gallon, although it is said the new prices are not of an altogether reliable character, indications pointing to the possibility of further advance at any time. The present quotations show:

Coal Oil—Royalite, per gal., 39 cents; case of 2-4 gals., $4. Palacine, per gal., 33 cents; case of 2-4 gals., $4.25.

Gasoline—Premier, per gal., 43 cents; case of 2-5 gals., $6.30. Queen, per gal., 51 cents; case of 2-4 gals., $5.68.

The above gallon quotations are for barrel lots.

Bathroom Mirrors Change; An Advance Resulting

Winnipeg.

MIRRORS.—Higher prices are quoted on bathroom mirrors, raising this line a further approximate 50 per cent. This

new increase is of an exceedingly heavy character and is said to be due to the present existing conditions of the glass markets. The new prices affect the following sizes and are quoted as follows:

Mirrors—Sizes, 8 inches x 10 inches, $1.50; 9 inches x 12 inches, $2; 10 inches x 14 inches, $2.40; 12 inches by 18 inches, $3.25; 12 inches x 20 inches, $3.60; 14 inches x 20 inches, $4.10 each.

Dominion Shot Shells and Ammunition Up 10%

Winnipeg.

AMMUNITION.—General change occurs on Dominion shells and ammunition, advancing this line an approximate 10 per cent., which affects all sizes and styles, an occurrence brought about, it is said, by the present greatly advanced cost of raw material. The new discount now covering Dominion ammunition is 45 per cent. off the standard list:

New Prices Appear and Advance Ingersoll Watches

Winnipeg.

INGERSOLL WATCHES. — Higher prices are quoted for Ingersoll watches, which show approximately a 17 per cent. increase on old prices, an occurrence said to be somewhat anticipated on account of the advanced cost of raw material coupled with advanced operating costs; two conditions that cannot help but influence the finished product. The latest prices appear firm and are quoted as follows:

Ingersoll Watches—Maple Leaf, $2.15; Maple Leaf Radiolite, $2.65; Eclipse, $3.15; Junior, $3.65; Midget Radiolite, $4.15; Waterbury, $4.65; Wrist Radiolite, $4.40; Waterbury Radiolite, $5.15; Reliance Snap, $5.90; Reliance Screwed, $6.20 each.

Lead Waste Pipe Prices Decline About ½c Lb.

Winnipeg.

LEAD WASTE PIPE.—A slight decline of about ½ cent per pound has been made on lead waste pipe.

O. and A. Wire, Bright and Copper Jump 10%

Winnipeg.

WIRE.—Oiled and annealed wire, also bright and copper spring wire prices have again been revised upwards and will now cost the dealer about 10 per cent. more.

Some Lines of Builders' Hardware Advance

Winnipeg.

BUILDERS HARDWARE. — Higher prices have again been made on Yale padlocks, which are an advance of approximately 25 per cent.

SPRING HINGES of the Borner pattern have also been revised upwards to the extent of 35 per cent.

PITTSBURGH MARKETS

PITTSBURG, May 27.—At the time the last report was written traffic conditions, growing out of the rail strike, were becoming worse rather than better, and the trend has continued in the same direction. Meanwhile, however, the Interstate Commerce Commission has begun to exercise the powers given it by the Transportation Act of last February, and strong hopes are entertained that conditions will now improve. The commission was urged to act by leading railroad officials. The orders of the commission, which are being issued from day to day as the way is made clear, include many things, such as abrogation of car service rules, disregard of original routings of shipments, establishment of priorties for various commodities and direct routing of trainloads of empty cars to points where cars are particularly needed.

It must be understood that the object of these activities is not primarily to relieve the congestion as a whole, but to facilitate the movement of the most important commodities, foodstuffs coming first and then coal. Iron and steel products in general cannot of course be regarded as entitled to any priority, except in special instances, and one noteworthy case is that of tin plate. The canning season is just beginning, and if tin plate is not moved to can factories, and cans to canneries, food will be lost. The Interstate Commerce Commission has gone carefully into the tin plate situation, having had leading representatives of the industries of tin plate making, can making and canning with it in conference last week. The tin plate manufacturers reported that about 2,500,000 boxes of tin plate lay in the warehouses of the tin plate mills, which would be enough to make one billion two-pound cans (a rule easy to remember is that approximately 2½ boxes of tin plate make 1,000 two-pound cans), for the movement of which 3,500 or 3,600 box cars would be required. The commission would not undertake to interrupt the movement of box cars West, for moving grain, but efforts are being made to find the box cars by other means.

The real strike itself is still on, though it has waned somewhat. There is divergence of opinion as to haw much of the trouble is due directly to there not being enough men to work on the railroads, and how much is due to the congestion that has been produced by the strike, which is now about eight weeks old. Practically, the point at issue would be whether the termination of the strike itself would right matters, for if the present trouble is due chiefly to congestion ending the strike would not end the congestion. There were traffic difficulties and car shortages in the first three months of the year, before the strike. The better opinion seems to be that the strike really is an important factor at this time, so that its entire settlement would help very materially. It is accepted in most quarters, apart from this, that the present work, directed by the Interstate Commerce Commission, will tend to relieve the congestion very considerably, even though the immediate object is better movement of foodstuffs and fuel in particular.

Accumulation of Steel.

A rough estimate of the quantity of steel that has accumulated at steel mills may be made in thismanner. One starts with the March production, which was at the rate of 45,200,000 gross tons of steel ingots a year, as indicated by the monthly report of the American Iron and Steel Institute. The March rate had been the highest since October, 1918. Finished rolled steel products run normally about 76 per cent. of the ingot production (on account of scrap and scale losses in rolling and heating) and applying this proportiono and passing from the gross to the net ton the March rate of production appears to have been about 750,000 net tons of finished rolled steel per week. Thus far the computation is substantially accurate. Now one may make a careful guess, rather than a precise estimate, that production since April 1, when the strike began, has been at 80 per cent. of the March rate, averaging the whole country, and that shipments have been 65 per cent. of the production, whereby shipments would be 52 per cent. of the March production, and the accumulation would be 28 per cent of the March production, 28 per cent. of 750,000 tons being 210,000 tons. For eight weeks this would be 1,680,000 net tons. There were some accumulations before the strike started, due to the previous car shortage, though those accumulations were diminishing late in March. Then there is a large tonnage of steel that has been "shipped" but is simply stalled en route. The grand total of steel made but not received by consumers and not actually moving as it should, is probably in excess of 2,000,000 tons. All the steel made, of course, has been on order, and none of it is for sale. The market is stagnant at present, and if one desires to forecast what sort of a steel market there will be when the traffic situation is righted he should take into his reckoning this extra 2,000,000 tons of steel, which eventually wil reach the buyers.

All branches of the iron and steel market are stagnant, and while producers are disposed to argue that the quietness is due to the rail case it is difficult to put all the responsibility on that head. If a quiet market is a natural result of consumers not receiving deliveries the active and advancing market of early in the year has to be explained. At that time consumers were doubling up in their purchases. When they received poor deliveries against old contracts they bought afresh, at premiums, for early deliveries. Again, if the present quietness is due to

Consider Structural Details When Choosing New Wallpaper

Room Must Have Proper Relation to Rest of House—Good Ideas of Harmony Brought Out in This Season's Lines—Prices From 50 Cents to $18—Paper Shortage Causes Concern—English Blocked Papers Available, But French Output Still Low.

FEW persons in choosing a new wall paper for a hall way, a living room, or a bedroom, do so with any consideration of the structural detail of the room or the building in which the decoration is to be employed. No matter how expensive or how artistic the scheme worked out if it does not become harmoniously absorbed by the whole general scheme its principal value is lost. Otherwise it may give a most startling and unpleasant effect when the door of the particular room is opened into the hallway of the house.

One of the simplest guides to be remembered along this line is that fabric effects are good in a light room—grass-cloth papers, etc., are effective when a simple treatment is employed in the construction of walls, etc. When the stucco effects are used with the very popular beamed ceiling, more weight in the wall coverings and draperies may of course be introduced, and the salesman in the wallpaper department of your store—even if you keep a very modest department—should be posted on a few of the elemental rules in the treatment of interiors. The fact that the larger stores employ experts on their permanent staffs and bring lecturers from the art centres to instruct in attractive employment of decoration in the modern home, shows how important this department is considered by the most up-to-date concerns, and even the small town hardware store with its limited stock need not be behind the times if the owner makes the best of what he has. A few good lines that will surely be good sellers and create good effects is a safer buy than a wide range of novel, cheaper lines for the smaller merchant. He should be guided, however, by what is being shown by the wholesalers to the bigger retail buyers.

The Present Tendencies

This season there is a marked tendency towards stencil and tapestry effects, while reproductions in soft attractive shades of the best-liked designs in cretonnes are also selling very well to the general trade. Many novelties are being tried out by the bigger decorators in the homes of customers who wish to pay the price of these elaborate effects.

One large company, for instance, is decorating a home in Toronto and introducing a unique wall treatment in which sand is thrown on a wet paint. The walls are tinted the desired shade, and while the paint is still wet a fine transparent crystal sand is thrown on the wall, giving an effect like the sheen of velvet when the wall becomes dry. This process can be done in any color, and the effect is very beautiful, but of course could only be used in a home where the rest of the interiors could be equally elegant in treatment. This sand process is more often used in panel effects with the darker schemes and is sometimes used in scroll or mural decorations in theatre or hotel lobbies, etc.

English Hand-Blocked

Among the finest looking wall papers being shown for the present season are the hand-blocked English papers of a rather conventional design. These are in great demand in a wide range of designs and are very good for the better class type of living room, library or lining room. They will retail at about $3.50 a roll. The designers of these papers cut out their patterns in wooden blocks and the moulds are pressed on by hand, making the process a comparatively expensive one from the standpoint of time and labor. "We cannot get the deliveries quickly enough," one importer of English wall papers told HARDWARE AND METAL. 'There is a very large demaand for them and of course the wall paper business is suffering from the paper shortage as well as the manufacturers in other lines of paper goods."

Factory Used as Hospital

The wallpaper supplies have suffered too, as a result of the war. Previously France contributed a large supply of the better class of goods to Canadian wholesalers and retailers. To-day the French wallpapers are almost impossible to get. The famous Zuber plant in France was utilized as an immense military hospital all during the war, and only now is it being restored and equipped again to carry on the manufacture of wallpaper lines, world-famous before the war.

This shortage of wallpaper output in France is believed to have a good deal to do with the increased vogue for fabric-covered walls, cotton and silk materials being widely used in interiors of every description.

Eighteen a Yard—Worth It, Too!

Among the novelties for halls is a fine Japanese leather paper in bold conventional design in rich shades and bronze which sells at $18 a roll.

"The hall is the most important space in the house," said one merchant. "If I were being cautious about expense in wallpapers I should go easy on every room before I started to cut down on the hall. It is the first room into which you step—and every room opens into it. Therefore the quality and color scheme must be given careful consideration.

Jaspe Stripes Lead

Dainty for bedrooms, boudoirs, and dressing rooms are the plain Jaspe stripes, pin-head satin stripes, and plain fabric effects that look very much like linen and are particularly refreshing in appearance. Chintz patterns with cut-out borders are very good in soft, loose floral effects, and very dainty bedroom papers may be had from 50 cents a roll up.

"It is absolutely wrong to buy cheap paper these days," said one wallpaper man this month. "People are under the impression that if they can't save in other things they will in wallpapers, and this is a terrible mistake. The cheap papers are a worse investment than the old, faded ones on the wall, and when money is spent on having new paper hung, it might far better be paper that will stay on the walls a few years. Cheap paper is a poor investment and customers should certainly be warned against it."

Among the Novelties

Among the novelties shown to HARDWARE AND METAL by this wholesale merchant was a very pretty Japanese grass cloth. This comes in natural color grass in various colored backgrounds and is very nice for the popular type of living room. It permits of a cheery treatment of draperies and hangings, and like the good greys and buffs in one-toned papers, is an excellent paper when bright shades are employed in the drapery cretonnes or silks.

For the Modern Kitchen

The culinery department should not be overlooked in this brief review.

"Canvas walls painted are the most satisfactory for kitchens, HARDWARE AND METAL was told. "These should not be attempted until the house is four or five years old so that the plaster is given tibe to crack if it is going to. After this period the house is settled and the canvas can be stretched on the walls without fear of big cracks splitting it. White enemal paint is applied and the effect is fresh and sanitary, for the walls can be frequently washed without any harm being done."

Of course the wholesalers are showing a good range of neatly-tiled kitchen papers for those who prefer to carry them. With the present shortage there is no danger of the wallpaper department proving a Jonah. Prices, too, will be firm and are advancing.

Making Paint a Twelve-month Seller

"Keep It in the Windows," Says Western Firm—Find This Plan a Winner—Gets Customers in the Habit of Anticipating Displays

IF there be virtue in making continuous displays of paint and painting accessories twelve months in the year, then Moser-Cruickshank, of Melfort, Sask., should be permitted to say a word right on this important topic.

The displays are made in the same window each time they are changed. This has virtue in it, in that the customer comes to know what he may expect to find in that window—that is, the nature of the goods. While two other windows have been provided, and are used for general and special hardware displays, the one window accommodates, at all times, the special paint lines handled by the company.

Mr. Moser dresses the windows himself. To him this is really a hobby, and because of the interest he assumes, the displays reveal the care that is taken to make each window attrastive. For if sales are to be made and maintained the impression on the customer ought to be made as vivid and effective as possible.

A Specimen Window

It will be of interest to hardware men in small towns to note that this firm use a closed-in background. This is an ideal setting for a paint display for two reasons. In the first place, as with the Moser-Cruickshank window, it affords the window dresser an opportunity to build up his work at the back, giving the best possible opportunity to display the various packages that are being shown. That is to say, there is something at the back of the goods, pyramided or piled about the window, which "sets them off," so to speak, before the customer. This is decidedly important and has helped to "make" an otherwise poor showing of hardware or paints.

In the second place, and as with displays made by Mr. Moser, it gives to the cut-outs, lithographs, color cards, and other advertising matter used to brighten the display, the best possible effect.

Who Gets the Profit?

Business is, in part, a selfish thing. One of the first questions confronting the hardware merchant when he is offered a line for disposal to his trade is: "Will it be worth my while to handle this; will it yield me as much profit as

Continued on page 66

An interesting window display of paints is shown herewith, as arranged by McKinnons, Ltd., Weyburn, Sask. It represents a model of the 1920 *Prosperity Farm and is complete to the last detail. The house, garage, and barn are shown well preserved by the adequate use of paint. The lawn with fence and telegraph poles, the trees and the cattle grazing in the enclosure, give the whole setting a very realistic appearance. In a farming community a window display such as this arouses much interest and comment. The idea has also been used successfully in rural and city communities.*

Mooramel

A PERFECT WHITE ENAMEL

Made in GLOSS and EGGSHELL White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

MOORAMEL works easy, has perfect flowing properties, ENDURING whiteness and other qualities which make it the EXCELLING ENAMEL. It is without any question the most practical and also the most economical article of its kind ever manufactured.

MOORAMEL can be used with equal good results on either INTERIOR or EXTERIOR work and can be cleansed with soap and water as often as necessary without any injurious effects.

MOORAMEL SELLS AT A REASONABLE PRICE

MOORAMEL like all other MOORE PRODUCTS sells on its MERITS. We do not ask our Dealers to pay high prices to help pay the cost of EXPENSIVE and INEFFECTIVE advertising. We depend on QUALITY and PRICE to sell our products.

This is only one of the answers to the questions so often asked—

? HOW CAN MOORE'S SELL HIGH GRADE PAINTS AND VARNISHES AT PRICES SO MUCH LOWER THAN OTHER MANUFACTURERS ?

Write us for details of our splendid agency proposition and we will give you further reasons why we can do it.

"Save the surface and you save all" *Paint & Varnish*

The Brush Department

Good Assortment of Brushes Necessary

How One Dealer Secured Much Trade by Taking Traveler's Advice in Stocking Two Brushes of a Better Grade Than His Trade Generally Required —Personal Solicitation for Brush Trade

IN the sale of kalsomine or whitewash brushes, neglect to keep a good assortment of stock on hand results in losing business more than with other types of brushes, though this is an important matter at any time.

In a small town about twenty miles from Toronto, a traveller for one of the large brush manufacturers tried to induce a dealer to keep a good brush on hand.

"But I would never sell one at the price of that you are showing me, if I had it in stock for five years," protested the dealer.

To further impress on this merchant the fact that he could make sales of this class of brush in his trade the salesman agreed to send him a pair of brushes same as sample, and if not sold by the time he made his next visit, he would take them back. Much to the surprise of the dealer he had the brushes in his store only three weeks before they were both sold and as result of another party seeing the brushes in use by the purchaser, the dealer was asked to order another pair of brushes of the same class.

This illustration is an everyday occurrence in the hardware trade and indicates that the dealer is well justified in stacking a certain quantity of good quality brushes. The dealer knows his own trade best, and its requirements, but the exceptional case is bound to occur and it is just possible the dealer will lose business in other lines if he cannot supply the right quality brush. In the case outlined the purchaser was a building contractor whose business was cultivated from the moment the brushes were bought.

Personal Solicitation of Brush Business

Realizing the value of an opportunity when presented, and taking every advantage of it, is claimed to be the way to success in brush selling. In this connection some dealers have found it good business to have a man solicit this business on days when there is a minimum of rush in the store.

Sources of business which could be solicited might be classed as follows: Dairies, stables, factories, rooming houses, hotels, banks, schools, office buildings, hospitals, town councils, etc. These are also sources of business in other lines sold in the hardware trade and in some communities there might be sufficient business to be secured to take a good portion of a man's time.

The personal suggestion conveyed by such calls is an important factor in selling and it increases the total volume of business by getting the trade as soon as the articles in question are required. The person solicited does not have a chance to delay by putting the purchase off until he happens to be in the hardware store, for the representative of the store brings the matter to him.

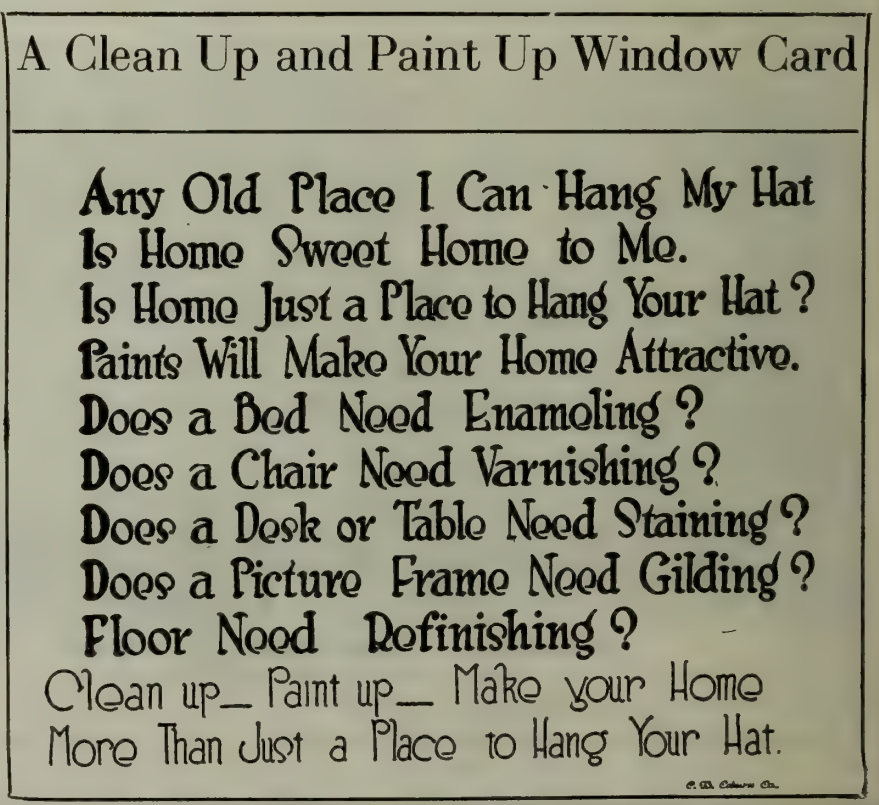
The increase of profits in a business follow the expenditure of extra effort to secure and build sales that would not come in the regular way. This class of trade comes only through the channel of better selling ideas, planned and carried out. This is particularly the case with brushes, for, as has been pointed out, they come in for a hundred uses, and the power of suggestion is a very important factor in their sale.

Celebrate Eightieth Anniversary

On Saturday, June 12, Carpenter, Morton & Company, paint and varnish manufacturers, Boston, Mass., will celebrate the 80th anniversary of its founding. On that day the members of the corporation and their families will be taken on an outing.

The company was established in 1840 by Eleazer F. Pratt. In 1843 he was joined by George B. Rogers under the name of Pratt & Rogers. In 1846 George W. Banker became a partner, the name chaanging to Pratt, Rogers & Co. In 1849 Pratt and Rogers withdrew, and the business was continued by George W. Banker, Matthias Crocker and George O. Carpenter under the name of Banker, Crocker & Co. In 1852 Mr. Crocker withdrew and the firm name changed to Banker and Carpenter. In 1864 Edward T. Woodward, John D. Morton, and Isaiah Woodbury were admitted to partnership without change in the firm name. In 1868 Banker and Woodbury withdrew, the remaining partners continuing under the name of Carpenter, Woodward & Morton, this firm name lasting until 1892, when the business was organized as a Massachusetts corporation under its present name, the Carpenter-Morton Company.

A Clean Up and Paint Up Window Card



Suggestion from "The American Paint and Oil Dealer"

The Bristles Can't Come Out

Every Boeckh Brush Guaranteed

BOECKH'S

Steel Grip Rubber Set Flat Paint

With characteristics that please the consumer, either professional or amateur. The long, uniform, business-like bristles convey a suggestion of lasting wear and good service. The Steel Grip Rubber Set process affords security against bristle-shedding and a definite control of shape that means better and more economical spreading of the paint. The good, sensible handle, handsomely, but yet serviceably finished, assures easy control.

Boeckh's Brushes satisfy, and the well-known trademark links you up with future sales.

MAKING PAINT A TWELVE-MONTH SELLER

Continued from page 62

other hardware lines, or specialties that I can easily buy?"

Moser-Cruickshank's best answer is: "Twelve months' displays for us," or better, perhaps, "A paint window all the time." As with argument, reiteration plays no small part in the ultimate "putting-over" of the sale. Therefore, repeated displays, arranged differently, as with this firm, and with a new message each time, interest is maintained. The customer can be made to see how easily the paint and varnish brush will work in winter as in summer. Not only bric-a-brac, but all manner of indoor painting, tinting and varnishing may be as readily carried out in the winter as in the summer. Not only so, but frequently to better advantage. The writer, in his own experience, put in a whole winter tinting the walls of a new house, staining the woodwork, and had the pleasure, when this was completed, of viewing a five-coat job throughout the house. It can be done, and—IT PAYS. Try it.

How Hardwaremen Advertise Paints---No. 9

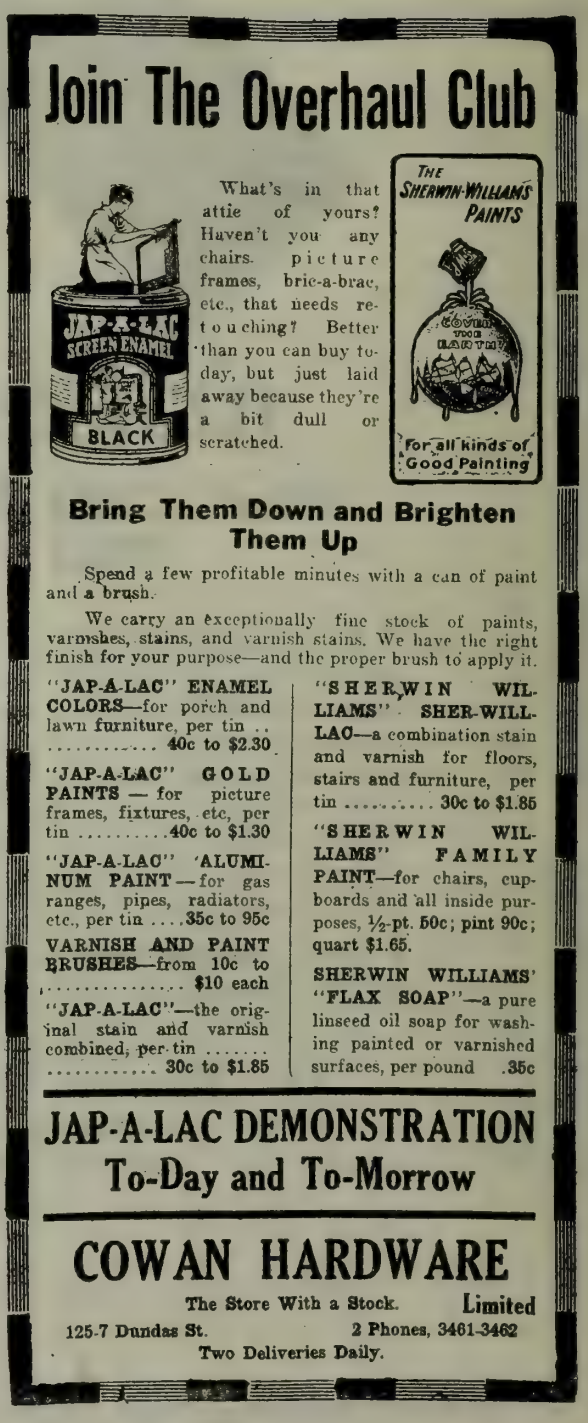
TAKING advantage of popular sentiment as created by advertising and other publicity being done in the interests of spring cleaning up and painting up, this advertisement by Cowan Hardware, London, Ont., appeals for readers to "Join the Overhaul Club."

A personal element is created by asking the direct question "What's in that attic of yours? Haven't you any chairs, picture frames, bric-a-brac, etc., that need retouching? Better than you can buy to-day but just laid away because they're a bit dull or scratched."

Such an appeal carries much weight in these days, when, owing to high costs, people are bringing forth discarded piece of furniture and retouching them to renew their appearance. The suggestion for a clean-up of the attic or storeroom is a good one, as in the average household there are many articles stowed away while still in their useful stage, which may only require a little retouching with paint or varnish.

"Brig them down and brighten them up," continues the ad. "Spend a few profitable minutes with a can of paint and a brush."

Various lines of interior and exterior finishes are then quoted, with a brief description of what each is for and the price. This is an effective style of ad. for it is well laid out and illustrated, and it makes a personal appeal which affects a very large number of householders, and then proceeds with full information concerning the finishes recommended, with prices quoted.



The Luxeberry Painter Says:

The cow that gave a good pail of milk and then kicked it over reminds me of home-builders who pay for handsome interior trim and then allow it to be spoiled with cheap or unsuitable varnish.

If I do your next job you will get a finish you will be proud of, and it will be produced with Berry Brothers Varnishes, Enamels and Stains.

It is the earned confidence in "Berry" Finishes that has created the great and always growing confidence for them.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 27.—Linseed oil is selling still at $2.60 per gallon, raw basis. There will probably be some relief in a week or ten days, although jobbers do not look for a radical decline. Turpentine is just as scarce as it was a week ago, if not scarcer. Few are quoting at any price. White lead in oil, putty and paints, as well as various specialties, are steady and unchanged.

Dry colors and colors in oil are very strong and some state that they will not be surprised if higher prices should soon rule. Glass stocks are still smaller than existing demand. Trade, from a seasonable standpoint, has been very excellent.

Dry Colors Have Been Very Active; Are Strong

Montreal.

DRY COLORS.—So great has the demand for dry colors been this year that the manufacturers believe 1920 will break all records. It has been difficult to meet the requirements. Some expect that prices may stiffen, while others feel that the purchases of the manufacturers have been ample to forestall, at present, any inflation of the market. It seems generally understood that there will be no reduction of price, and the same will apply to colors in oil.

Time Will Relieve Prices Linseed Oil

Montreal.

LINSEED OIL.—So great has been the congestion that linseed oil stocks have not been available on a much improved basis for the past week or ten days. Some lessening of the demands for oil are reported, one jobber stating to HARDWARE AND METAL that they were not besieged with orders now to the same extent, but that there were still substantial needs to be met. Prices will probably be a little easier in a few weeks, but the feeling at present denotes that quotations will range around $2.50 to $2.60 per gallon. The basis this week remains at $2.60 for raw and $2.62½ for boiled.

	Imp. Gal.
Raw—	
1 to 2 barrels	2 60
3 to 4 barrels	....
Boiled—	
1 to 2 barrels	2 62½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Seeking Turpentine But Relief Deferred

Montreal.

TURPENTINE, RESIN.—No relief has come in the situation and prices are being still withheld by the jobbing trade. Out of stock, the jobbers are not taking any chances. One source is quoting a price of $3.35, in large quantities, for June 15th delivery, but are out of the market for the present. Another paint manufacturer is quoting $3.87 per gallon on 5-gallon lots, per gallon, packages extra.

Turpentine—	Imp. Gal.
Single barrels	....
Small lots	3 87

(Packages extra.)

Putty Holds on Steadied Basis

Montreal.

PUTTY.—Sales are seasonable. There has been an active demand from usual sources, but nothing unusual is reported from jobbers. Supplies of whiting have, as already pointed out, been more or less difficult to obtain, but there will be some relief in the fact that demand is less than it was. The following basis and differentials apply:

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Present Supply Ample of White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Present supplies of whie lead in oil are tmple for trade requirements, and there is still quite an outturn of the product. The basis is unchanged, with five-ton lots of Government standard lead selling at $19.50 per 100 lbs.; tons lots at $20 and smaller quantities at $20.35.

Paints and Specialties Have Been Big Sellers

Montreal.

PAINTS, ETC.—This has been one of the biggest seasons on record. Manufacturers state that there has been an easing off in the volume of business during the past week or ten days but there still is good demand. Retailers have evidently been securing excellent business, for all reports agree that there has been more paint sold this year than for some time. If the totals were known a record doubtless has been established. The basis is firm and unchanged.

Shellac Supplies May Come Forward

Montreal.

SHELLAC.—Prices have been maintained on shellac, and jobbers state that supplies have been coming through the English importer. This has given a more favorable price to the buyer, in view of the English or sterling exchange basis, as related to the American. At the same time deliveries are necessarily deferred several months—three or four in some instances—and this means that present quotations will hold for some time, in all likelihood. Later in the season, however, a lower basis may obtain.

To offset this there is the matter of denatured alcohol, the price of which has risen rapidly.

Delays in Shipment Reduce Glass Stocks

Montreal.

GLASS.—While the demand for glass still exceeds the supply, jobbers have been able to take care of customers' needs reasonably well. The strike troubles have been the source of difficulties arising with regard to delivery of booked orders, and long delays have been experienced in obtaining required tonnages of plate and box glass. The market is steady and unchanged.

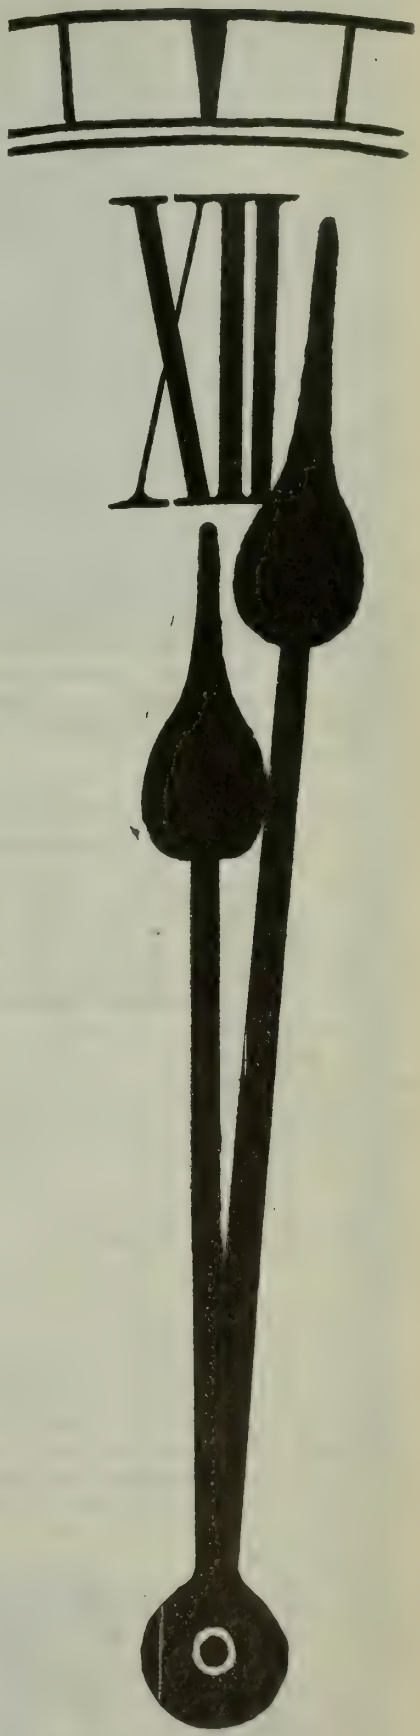
TORONTO

TORONTO, May 22.—Scarcity continues to affect many lines in the paint department. Especially is this true of turpentine and linseed oil, which jobbers state are nearly off the market, and few if any are able to sell more than five to 10 gallons to a customer.

The scarcity of whiting is also a trouble-maker for the cold water paint and putty manufacturers, who state they are unable to secure sufficient supplies.

Wood alcohol has been revised upward this week and the new quotation is $4 per gallon. The freight embargo on the American railroads is causing much inconvenience and loss to manufacturers and jobbers, etc. The new business tax has caused little confusion, although its

"On Ramsay's Paint the Sun Never Sets"



You cannot afford another minute!

It is the part of wisdom to order your supply of Ramsay Paints and Varnishes in time; this promises to be the greatest building and painting season in Canada's history. Building permits for more than $75,000,000 of work have been issued.

A. Ramsay & Son Company

Makers of Property Preserving Paints & Varnishes for 78 years

Toronto MONTREAL Vancouver

DISTRIBUTORS—Edmonton District: Revillon Wholesale Limited, Edmonton. **Calgary District:** The McDonald-Baker Co., 818 8th Ave. W., Calgary. **Nova Scotia District:** Jas. Simmonds, Limited, Halifax, N.S.

If interested, tear out this page and keep with letters to be answered.

imposition is still the chief topic among business men. Colections are still coming forward freely and business is more brisk than ever, it is stated.

Wood Alcohol Price Reaches $4 Mark

Toronto.

WOOD ALCOHOL again comes up for revision and new and higher prices have again been made. The new price is now being quoted at $4 per gal. The new quotation is said to be a firm one.

Pure White Lead in Oil Still Quoted $20.70 Cwt.

Toronto.

WHITE LEAD IN OIL.—President indications point to a shortage in white lead in oil. This is said to be due to the very heavy demand which is at present being experienced by nearly all in the trade. Especially is this true of export orders, and it is believed that a good volume of business is being obtained for export. No change in price has been made recently, and the present price is holding very firm, the quotation being $20.70 per hundred pounds for the pure, while the genuine is being quoted at $23.40 per hundred pounds.

Heavy Sales Continue For Paint and Specialties

Toronto.

READY-PREPARED PAINTS.—Nearly all in the trade are enjaying the very brisk demand for ready-prepared paints and paint specialties of nearly all kinds, and the increasing warm weather is daily stimulating the already heavy demand. Some have it that many ingredients are becoming very scarce and are gradually advancing in price, although the vresent price is unchanger. Quotations are firm and are as per current quotation page.

Whiting Still Scarce; Putty Prices Firm

Toronto.

COLD WATER PAINT.—Little relief has been eexperienced from the great shortage of whiting and supplies are daily becoming more scarce. This is not without its effect on cold water paints, depending on whiting for their manufacture, and manufacturers state that if supplies do not come to hand in larger quantities there may be a shortage of cold water paints.

PUTTY is in almost the same predicament, and stocks are becoming very light, especially for this time of the year, and many are concerned for the near future, when the heavy demand sets in. The following are the present quotations on putty:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Freight Embargo Delays Shipments of Glass

Toronto.

GLASS.—The embargo on the United States railroads is not without its effect on the supplies of glass, and jobbers and importers state their already meagre stocks will not last long, unless relief soon comes to hand. However, it is hoped that the freight embargo will soon be lifted and many carloads that are tied up in shipment should then soon come to hand. The quotations continue to hold unchanged, although the present price is a very firm one. The single and double diamond continue to sell at 15 per cent. from the list, while the cut lights are being quoted at a discount of 40 per cent. off the list.

PLATE GLASS shows little or no improvement and stocks are said to be lower if anything, and many are finding difficulty securing sufficient supplies to fill their orders.

Paris Green Has Good Demand; Prices Firm

Toronto.

PARIS GREEN.—A fair demand is felt for Paris green. Present quotations are firm and unchanged, some of which are as follows:

Paris Green—	Per lb.
½-lb. pkgs.	0 58
1 lb. pkgs	0 56
25-lb. drums	0 54
50-lb. drums	0 53
100-lb. drums	0 53
250-lb. kegs	0 52½
600-lb. barrels	0 52

Linseed Oil Prices Unchanged; Stocks Light

Toronto.

LINSEED OIL continues to be very scarce. One of the main factors for this, it is stated, is the embargo which has prevailed on the United States railways. Crushers state they have many cars in transit which have been tied up for several weeks, and they are unable to secure delivery or even advice as to their whereabouts. The present price remains firm and lower prices do not yet seem to be in sight. It is believed, however, there are heavy shipments in flaxseed in some of the United States harbors, but owing to the embargo on the railroads and other difficulties, etc., these as yet are not being moved. However, the near future should clear up the situation and seed may come to hand in better quantities.

Linseed Oil—	Raw	Boiled
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.

Turpentine Stocks Light; Embargo Holds Shipments

Toronto.

TURPENTINE.—Local markets are said to be practically bare of turpentine and a hand-to-mouth business is at present being transacted. The embargo on the United States railroad is said to be the cause of this, and importers state they are unable to procure any shipments from the South whatever. Owing to the cold weather in the South the yield is said to be considerably smaller than it was first expected, although it is believed that with several weeks favorable weather that this difference may be made up. Quotations in the South are gradually becoming lower and it may be that the near future will show lower prices locally on this commodity. However, very little turpentine is to be had on the local market and the present quotations remain firm.

Turpentine—	Per imp. gal.
1 barrel lots	....
2 to 4 barrel lots	....
5 gal. lots	4 00 4 25

PITTSBURGH MARKET

Continued from page 60

buyers not receiving deliveries, will the buyers become eager to make fresh purchases by the resumption of heavy deliveries?

It is a reasonable inference that buyers of pig iron and steel products are influnced by the unsettlement in Wall Street and by the general talk that commodity prices in general are coming down. Probably in many quarters too much is expected in the matter of price declines, but it does look as though some movement has begun. As to steel products, a disappearance of the premiums over the Steel Corporation or Industrial Board prices does not seem too much to expect, in the course of a few months. It is quite improbable that the market would go beyond that. Whatever readjustment is needed in the economic situation there does not seem to be any basis for predicting that the adjustment will require a long time.

As to pig iron, it must be remembered that it is too high relatively to finished steel products. The prices are not in line with each other, hence pig iron may easily come down more than finished steel, but there is hardly likely to be any slump. While pig iron in all markets is now well above $40, furnace, except in the case of Birmingham, it must be remembered that no very great tonnages were sold at about $35, and a decline to that level would not make a great deal of difference.

Selling Quality to the Farmer

Good paint is even more economical for the farmer than for the city man. There are so many more surfaces about the farm that need protection—surfaces exposed to weather and wear, but the opportunities for saving are correspondingly greater.

And there are Greater Profit Making Possibilities Too

The farmer wants quality paint. He has come to realize that buying paint is really buying protection for the longest possible time. Low gallon price doesn't have its old time appeal.

Give the farmer what he wants — Glidden quality. Let us tell you more about the completeness of the Glidden Line — How it covers every need of the farm and meets each need perfectly. Write for interesting literature to-day.

—From a hardwareman's own experience

"To show my customers what a fine paint I was selling I had the front of my store painted—did the finest job that any painter could do; yet look at it, in a few months there is hardly a vestige of paint left—that's why I changed my line of paint."

This is the result of not using a good quality linseed oil. The basis or lasting quality of any paint is governed largely by the quality of the linseed oil used. You will find where Livingston Brand Linseed Oil is used that paint has lasting qualities far beyond the average.

For goodness sake insist on Livingston Brand.

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

Machine Cut Gears Mean Easy Running

F. W. HAM.
Mr. F. W. Ham is one of the four District Sales Managers handling the Province of Ontario. Many of our friends will remember the days when he was "on the road" before coming into the office. He also had an extensive experience superintending the manufacture of BT Goods, and has, therefore, a splendid all-round knowledge of BT Goods and the needs of BT Customers.

There are no clumsy cast gears in the BT Time Saver Washer and Wringer. This is one of those points which your customers don't see—but they appreciate the results!

All gears on the Time Saver are cut with utmost accuracy by machine. They fit to a hair's breadth.

This is one big reason for the quiet, easy running of the "Time Saver." No power is wasted through badly fitting gears. There is neither noise nor rattle. The machine lasts longer and works more satisfactorily.

All these points mean more satisfaction for your customer and less "service" expense for you.

TINKER TOM'S TALKS.

TALK No. 261.

Let's Be Thankful

that we live in Canada, where conditions are so much better than anywhere else that it's a

"Little Bit of Heaven"

Longer Hours
Harder Work

Less Wasted Time and Money

is what is needed. If Canada can keep on sanely while the rest of the world goes crazy, we certainly will shine when the day of reckoning comes—as it surely will.

CARTER'S

Your Paint Customers Need Carter's Genuine Red Lead

Pure, uniform and economical Carter's Genuine Red Lead is the best protection for metal work of every description.

When mixed with pure linseed oil it possesses every quality of a perfect Red Lead—free flowing, uniform in film and with unusual covering capacity.

We also make Carter's Genuine Orange Lead, Dry White Lead and Litharge. It will pay you to keep an ample stock on hand.

The Carter White Lead Company of Canada, Ltd., 91 Delorimier Ave., Montreal

Paint Preserves Protects Your Property

Good paint, properly applied, is necessary for the well-being of your house. It beautifies and protects. It puts your property "in a class by itself" and it stamps you as a citizen who cares.

Stephens

REGISTERED TRADE MARK

HOUSE PAINT

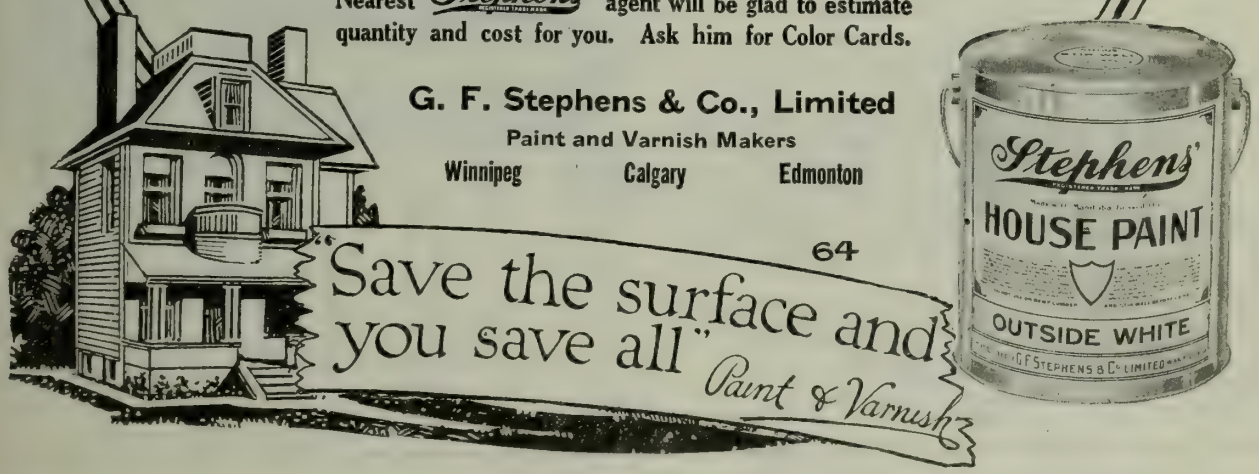
is desirable from every point of view; it covers economically, stops decay, withstands our extreme weather conditions and it is as beautiful as paint can be.

Nearest Stephens' agent will be glad to estimate quantity and cost for you. Ask him for Color Cards.

G. F. Stephens & Co., Limited

Paint and Varnish Makers

Winnipeg Calgary Edmonton



The demand for Stephens Paints is daily increasing through the influence of advertisements such as the one herewith, which are appearing in the leading Farm Journals, including—Winnipeg Grain Growers' Guide; Farmers' Advocate; Nor'-West Farmer; Weekly Free Press; Weekly Telegram; Western Home Monthly; Calgary Farm and Ranch Review; Montreal Family Herald and Weekly Star.

An unusual opportunity is presented to dealers to increase their paint sales and gain the goodwill of their customers, by keeping a full stock of Stephens Paints, and having them well displayed, in their store.

If interested, tear out this page and keep with letters to be answered.

MADE IN CANADA

BUFFALO OILS

Special Cylinder Oil for Steam Engines
Harness Oil. Neatsfoot Oil
A Gas Engine Oil (for gasoline engines).
Tractorlene Oil (for oil burning engines).
Ideal Thresher's Machine Oil (for general use.)
Automobile Oil and Transmission Greases.

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

OR-ib-O
Round Coal Chute

This shows a wall in section so that our Round Coal Chute can be seen as it appears in place. The door of this serviceable coal chute is also made with a flange which fits over the rim of the frame, making it both wind and water proof. It is fitted with our self-locking device.

With walls under 12" thick, use No. 1 or No. 4. Over 12", No. 2 or No. 5.

Winnipeg, Man.

Let the Royal Prove its Merit in *Your* Store

THE real test of an electric cleaner is how well and easily it will do the work in the home. Will it get all the deeply imbedded dirt in the rug as well as lint, hair, threads, and litter on the surface? Will it clean under the beds, close to the base-boards and in the out-of-the-way places?

Will it remove germ-laden dust and dirt lodged in draperies, upholstery, mattresses, walls, ceilings, closets, stairways and other un-get-at-able places?

Is it light in weight, easy to operate, economical and thorough?

To thousands of women the Royal has proven a household blessing because it satisfactorily answers all of these questions.

Just a touch of the handy switch on the handle, and the powerful, cleansing air stream is ready to save hours of heart-breaking, back-straining household drudgery.

Let us send a Royal to your store and let you try it yourself. A few minutes trial will convince you that it is the one vacuum cleaner for you to sell. There's a good profit too.

The "Dillon" Window Holder

and

Automatic Lock

The Dillon Automatic Lock is a boon to the housewife. It does away with the old style method of propping the window up with books, sticks, bottles, etc. It will hold the window up at any desired height and will keep it exactly where it is wanted. If someone tries to raise the window from outside the holder is released and the lock immediately operates automatically. When the window is closed the lock always drops into place. The windows are always locked whether up or down.

Plant Managers Usually Specify

Morrow High Speed and Carbon Twist Drills

To-day every effort is towards greater production and lowered cost. Morrow drills are a direct factor in the attainment of this result.

Morrow High Speed Drills are made from hammered steel bars, specially Morrow tempered, with a graduated thickness of web giving strength where strength is needed. They definitely increase production and lower production costs by giving more holes with less regrinding. A selling point that assures sales to the dealer.

Morrow Carbon Drills are made from Sheffield (England) steel.

John Morrow Screw & Nut Company, Limited

Ingersoll *London, England—7 Hop Exchange, Southwark Street, S.E.1.* **Canada**

"Oldest, largest best equipped plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-Finished Nuts."
"Sole Distributors for the Ingersoll File Company's Files."

Barrett Roofings, Cements Industrial Paints etc.

OUR extensive advertising in the leading Farm and Technical publications is creating a big demand all over the Dominion for these Barrett Products. They offer an opportunity you can't afford to miss if you want quick sales, sure profits and satisfied customers.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

EVERY progressive farmer in your community is almost surely a customer for Creonoid.

For every farmer knows that constant annoyance by flies makes cows give less milk and horses do less work; and that lice and mites keep hogs from fattening and hens from laying.

Creonoid is an effective destroyer of flies, lice and other verminous pests. It is easy to use and so inexpensive that it pays for itself many times over in the better health and the increased production of livestock and poultry.

If you are not carrying Creonoid you are missing a chance to increase your profits and, at the same time, confer a real benefit on your farm trade.

Creonoid is put up in: 1-gallon cans (12 to the case), 5 and 10-gallon cans, ½ barrels and barrels.

We can also supply, in any desired quantity, a low-priced Sprayer, designed especially for applying Creonoid.

Everlastic "Rubber" Roofing

THIS popular roll roofing covers more farm and factory buildings than any other ready roofing on the Canadian market.

It is made of the best grade roofing felt, thoroughly saturated and heavily coated *on both sides* with durable waterproofing materials. It sells at a low price and can always be depended upon to give long and satisfactory service.

Everlastic "Rubber" Roofing comes in three weights: light (1 ply), medium (2 ply) and heavy (3 ply). Each roll contains 108 square feet of roofing, and nails and cement for laying.

Everjet Elastic Carbon Paint

A LUSTROUS, black carbon paint for use on all kinds of metal and wood, particularly on surfaces exposed to severe conditions.

Positively without an equal as a protective coating on farm implements, machinery, smoke-stacks, steel bridges, metal roofs, etc.

Everjet Paint is waterproof, acid-proof and alkali-proof. Prevents rust and corrosion. Is easy to apply, wonderfully durable and very moderate in cost.

Put up in standard-sized packages, from 1-gallon cans to 40-gallon barrels.

Pump Portion of Bowser System

Get Ready For Spring Paint Profits

Someone will get the big Spring Paint Trade. You may as well have your share of it. There is a good profit in it for you if you handle it and sell it with Accuracy, and Eliminate the Losses that are common in so many stores.

BOWSER ESTABLISHED 1885

Safe Oil Storage Systems

Enable you to sell Oils at a profit, because they measure Accurately and Save you time. A few turns of the pump handle and you have the exact amount asked for, and the price for odd quantities figured for you. Let a Bowser System do the work and make money for you.

Send to-day for our literature. It will show you ways of improving your store generally.

THE STURDY SPRAYER

"Just what its name implies"

The Sturdy leads when it comes to the fine points of a compressed air sprayer. It is built strong. The centre pump makes it solid to operate pump. It is a convenient size. And the non-clog, *one-hand control nozzle* is superb. One hand is free to climb with or push bush or plant aside.

Our line of sprayers is complete.

THE COLLINS MANUFACTURING CO.,
TORONTO, ONTARIO

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

THE NEW CENTURY

ELECTRIC WASHING AND WRINGING MACHINE

Has a swinging tub and a three position adjustable wringer. The washing (in the New Century way) and all the wringing are done by power. All gears and pulleys are protected making it absolutely safe to operate.

Extra large Cypress Tub—rigid steel stand—highest grade wringer rolls—1-6 H.P. splash-proof motor.

Its the good old NEW CENTURY with a swinging wringer operated by electricity. Descriptive folder on request.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND MEAAL are big buyers because they buy for business as well as for private consumption.

IMPERIAL
Polarine
MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.
IMPERIAL POLARINE
(Light medium body)
IMPERIAL POLARINE HEAVY
(Medium heavy body)
IMPERIAL POLARINE A
(Extra heavy body)
One of these grades is specially recommended for the correct lubrication of any car or truck in your community.
See the Imperial Polarine Chart of Recommendations—display it prominently and sell by this chart.
For Efficient
Automobile transmission and differential lubrication sell
IMPERIAL POLARINE TRANSMISSION OIL
In cases where grease is required or preferred, sell
IMPERIAL POLARINE TRANSMISSION GREASE "BB"
IMPERIAL POLARINE CUP GREASE

The Article in Demand

We advertise Imperial Polarine extensively the year round. For public preference is the greatest sales force in the business world.

The ability to supply public demand is the secret of success in retail merchandising.

Imperial Polarine is sold by more dealers than any other lubricant on the market. That is because Imperial Polarine is used by more than 62 per cent. of Canadian motorists and is rapidly forging still further ahead in public favor.

Your Share

The dealer who displays the Imperial Polarine sign lets motorists know that he can give them the lubricant they want. The better the display the bigger the business.

There is market for hundreds of dollars' worth of Imperial Polarine in your territory. Are you getting your share of this market? You can make your store headquarters for Imperial Polarine. Stock the three grades—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A. Also the special Imperial Polarine transmission and differential oils and greases.

Put up in half-gallon, gallon and four-gallon lithographed sealed cans, 12½-gallon steel drums, half-barrels and barrels.

The minimum profit on Imperial Polarine is 33 1/3 per cent. The business is staple the year round. Sell by the Imperial Polarine Chart of Recommendations.

Write to The General Sales Department,

56 Church St. Toronto, Ontario

for our dealers proposition.

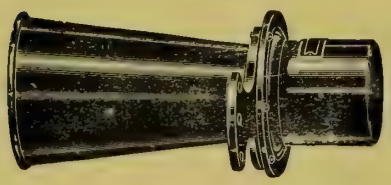
BRANCHES IN ALL CITIES

BIGGER BUSINESS FOR 1920

DO you realize, Mr. Dealer and Garage Man, to what extent the Automobile, Truck and Tractor have increased in usefulness? They have become of vital importance to the economic life of every community.
It is estimated that at the end of 1920 Canada will have close to 500,000 motor-driven vehicles on her highways. Think of the tremendous business possibilities the sale of Automotive Equipment and Supplies offers dealers!

THE HYSLOP LINE

NEWTONE MOTOR DRIVEN ELECTRIC HORN



The mechanism of this motor driven horn is most efficient and simple of operation. When connected to a storage battery it emits a very loud but pleasant sound. Black enamel finish, nickel bell. Furnished complete with cable and round push button switch. A very high grade outfit throughout.

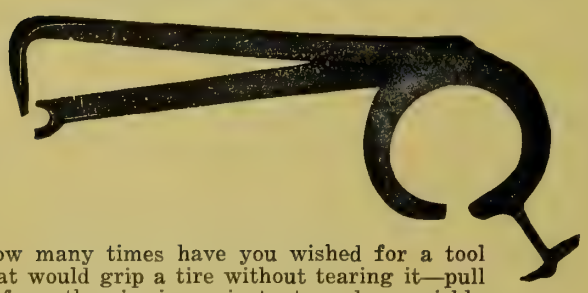
No. 5279—Price $9.25

The Hyslop line is the logical dealers' line.
It offers the best medium to meet the ever-increasing demand for equipment and supplies from car owners.
It comprises the largest and most comprehensive assortment of quality goods on the market, that will pay you handsomely to stock, giving you generous profits, quick turnovers and satisfied customers.
Get in touch with us right now.

BILLMONT MASTER WRENCH
"The Wrench that Spins 'em off"

The Billmont, with its curved nose, will slip into heretofore inaccessible places, take a bull-dog grip on nuts or bolts and turn off the hardest. Once on the nut it will not slip because the knurled outer casing gives you a firm hand grip. Set consists of 5 hexagon sockets of unusual sturdiness, sizes, 7/16, ½, 9/16, 19/32, ⅝ and one adapter (so you can use any standard ½-inch square shank socket).
No. 6055—Price Billmont Master Wrench Set, complete $15.00

MARQUETTE TIRE TOOL

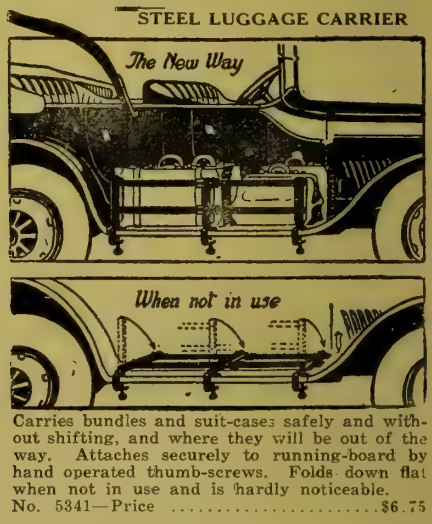


How many times have you wished for a tool that would grip a tire without tearing it—pull it from the rim in an instant; and as quickly and easily put it back on again. Getting a tire off and on is the hardest, dirtiest, most exasperating work about a car. The Marquette Tire Tool makes it one of the simplest. Every car owner wants one, needs one, and will buy one if you carry them in stock. Full directions in each tool.

No. 6056—Price $4.00

Make us your Headquarters for equipment and supplies and prepare for the Bigger Business for 1920

STEEL LUGGAGE CARRIER



Carries bundles and suit-cases safely and without shifting, and where they will be out of the way. Attaches securely to running-board by hand operated thumb-screws. Folds down flat when not in use and is hardly noticeable.
No. 5341—Price $6.75

Dealers : Send for our 1920 Catalogue Order by Catalogue Number.

HYSLOP BROTHERS, LIMITED

Shuter and Victoria Sts. **Toronto, Ontario**

Superb AND Supreme

¶ The measure of mileage you expect to get from an automobile tire is exactly the measure we are prepared to give you in **Dunlop Cord Tires.**

¶ **Dunlop Tires** are thoroughly "thought out" in the Scientific Research Department, then they are thoroughly "tried out" on the road. You, as a tire buyer, get the Final Result.

¶ The new ideas we have evolved from world-wide collaboration with Dunlop Master Tire Builders have worked wonders in tire construction.

¶ Every other make of tire has suffered in comparison with Dunlop in a test of endurance; and that means foreign-made tires as well as Canadian-made.

¶ A tough tread, sturdy walls, largest air-chamber, unsurpassable anti-skid features, are some of the reasons why **Dunlop Cord Tires** are so much in evidence these days.

¶ And just as **Dunlop Cord Tires,** wherever you go, are being awarded the palm as "1920's best," so, right across Canada, our 1920 sales figures are registering the definite approval of motorists in decidedly unusual increases.

¶ When you buy **Dunlop Tires** you buy from the world's greatest rubber organization, whether the comparison is in technical knowledge, area of plants, financial resources, etc.

¶ Our new million-and-a-half-dollar factory is now nearing completion. It will be exclusively devoted to the manufacture of **Dunlop Cord Tires—"Traction," "Ribbed."**

Dunlop the Universe Over—The World's Greatest Rubber Organization.

OLD TOPS FOR NEW

The shabby, leaky and weatherworn top can be restored to its original appearance and made weatherproof by a coat of Beats-All Top Dressing. This elastic dressing becomes a part of the original, putting back into the fabric that something which has gone out through deterioration.

Faded and stained top linings can be made to look like new by re-dying them with our Black or Drab Lining Dye. It covers all stains and discoloration, giving the lining that factory newness in appearance.

Beats-All Brand means just what it says—"Beats All." We incorporate into our Top Dressings a LIQUID RUBBER which guarantees its waterproofing and re-rubberizing qualities.

Write to-day for our liberal trade plan and sample order.

Tool Locked in Position for Removing or Replacing Tire.

K.P. Universal Rim Tool

The Easiest Way to Remove Tires from Split Rims

Fits all types of cross-cut demountable rims in use to-day.

Collapses a rim no matter how badly a tire may be stuck to it.

Forces the rim back on the tire again with the utmost ease even in the case of new tires which are under-sized.

Locks rim collapsed while tire is being removed or replaced.

Price $6.00

Test Your Tire Pressure Frequently

It is not enough to fill your tires up to the requisite inflation—they must be kept at that inflation. A tire may be below pressure and yet look and feel fully inflated.

Take no chances. Insufficiently inflated tires mean not only rapid destruction of the tires themselves, but wasteful consumption of gasoline. It takes sometimes as much as 25% more gasoline to pull a soft tire over the road.

Measure your tire pressure daily with a SCHRADER UNIVERSAL TIRE PRESSURE GAUGE and be sure.

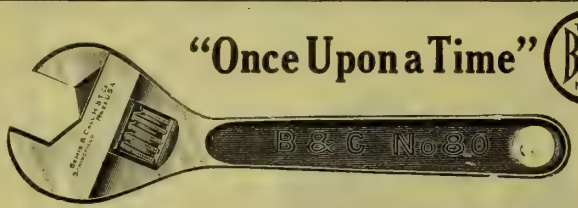
Clayton & Lambert Mfg. Co.
Detroit, Mich., U.S.A.

"Once Upon a Time"



An automobile broke down in front of a Hardware Store. While the lightning flashed and the water gurgled along the curb, the owner slogged around in his wet boots and found he had no tools with him. The Hardware Man sold him a wrench, in a few minutes a screw driver and another style of wrench. And then, gently and tactfully—for the car-owner was miserable—he pointed a moral about preparedness; and he sold that auto driver about fifty dollars' worth of tools. HE HAD THE RIGHT TOOLS.
Are you prepared? Have you got a line, like Bemis & Call, that you could stand and watch him use with confidence that he would buy more?

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way. Our leaflet explains it fully.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

O.P.W.

Trade Mark Registered

T

is for O.P.W. traditions—time-tested and thoroughly trustworthy, these treasures of the trade teem with tip-top talking points that tempt the townsfolk to try them. The O.P.W. team tells the trade a thrifty tale through the thriving totals tallied by the cash-register.

"Save the surface and you save all" *Paint & Varnish*

"Paints and Varnishes for Every Purpose."

For Spring Painting

In the Spring everyone's fancy turns to Spring cleaning and the general restoring of the home for the new season. Painting follows cleaning as logically as day follows night. There's a lot to be done; the house, the porch floor, the fences, the garage, the automobile and various inside jobs of varnishing and touching up.

Order Now!

Don't wait for the salesman; your order will receive exactly the same careful attention if sent direct. If your stock isn't sorted up at once, you'll be losing sales and profits every day. Sort up now! Be systematic! Make a list of all the articles that people paint in the Spring—inside the house and out—then order. Write, 'phone or wire to-day!

If you're not already handling O.P.W. Products,
Let us explain the Dealer-Agent Plan.

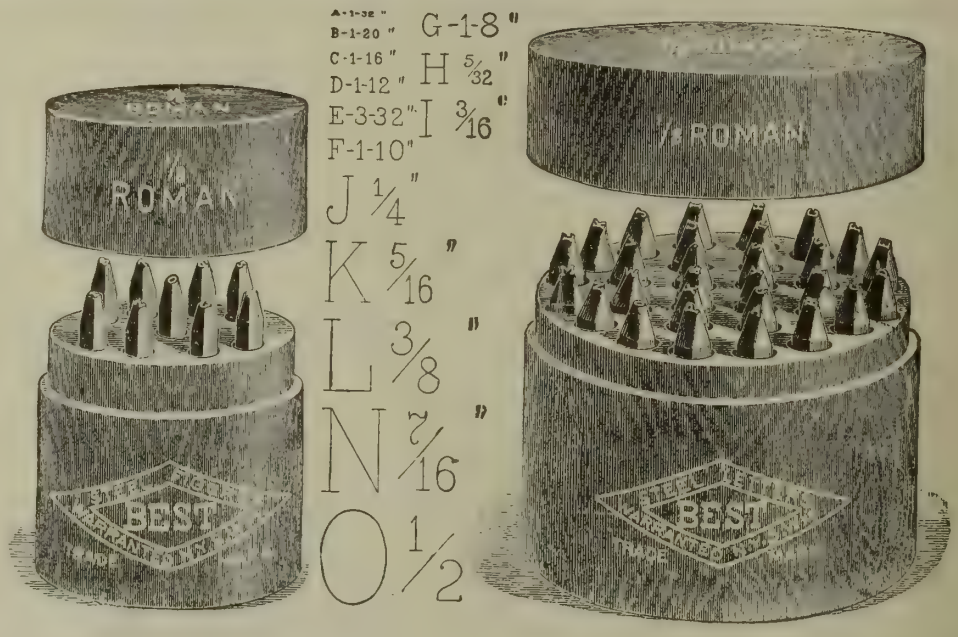
STEEL LETTERS AND FIGURES

AS THEY SHOULD BE
ARE MADE BY

THE NEW YORK STENCIL WORKS

HAND MADE

GOTHIC STYLE



MACHINE MADE

ROMAN STYLE

Unsurpassed for stamping soft steel, mild steel, wrought iron and malleable iron.

Also brass, tin, zinc, wood, aluminum and substances not of a finely hardened character.

Made of carefully drawn, hardened and tempered steel.

For ordinary stamping purposes they should last indefinitely.

Made in sizes 1-32 to ½ inch.

Each set packed in a neat wooden box with separate space for every character.

New York Stencil Works steel letters and figures also are put up in hardwood cabinets, nicely varnished, which are just the thing for counter display.

These tests prove the theory upon which Crown Diamond Paints are constructed

What is Paint? What is Pure Paint?

THE Standard of purity is that combination of paint ingredients through which the fullest degree of efficiency and service are obtained.

Exhaustive scientific research and severe tests have proven that Crown Diamond Paints combine all the essential features necessary to give the highest results in economy and service.

Therefore if you want the *highest standard of purity* in paint -- a thoroughly practical paint -- you will find it in

The Finish He
To Make Sales Ea

Goodell-Pratt, the Toolsmiths, are constantly commended by dealers for their policy of putting an extra high-grade finish on each tool of the more than 2000 different tools this Company produce.

This really superior and uniformly distinctive finish gives Goodell-Pratt tools more definite character and greater attractiveness for the window and counter. It guarantees beyond any doubt the endurance of these tools in use. It adds much to the mechanic's pride of possession. It certainly increases their sale among house owners and men who drive their own cars.

Last, but not least, it firmly identifies the entire Goodell-Pratt tool line and the Toolsmith Store where that line is carried.

Goodell-Pratt tools are finished in trim red and black wherever an iron surface will take the paint; the steel is beautifully polished in contrast; and the full quality of the wood and grain in handles and similar parts is always brought out.

Even when customers don't look for Goodell-Pratt tools, they always look at them with admiring interest.

As if the customer were yourself

STEP into your own store some day as if you were a total stranger.

Imagine yourself a customer for some such item as a ¼-20 GTD hand tap which you've seen advertised and expect a good store to carry.

Could *your* store make good? Would they know what a ¼-20 GTD hand tap is? Where to find it at once? And how to explain its particular and especial features if you as a customer hesitated about buying it?

If they can do that, it's real merchandising.

Try this little test some day. Look in at yourself from the other man's viewpoint. Get out of the parade and watch yourself go by. It may give you a jolt or two and it may *also* put your stock and your store's selling ability a peg or two ahead—where you'd like it to be.

P. S. *If* your experience shows any incompleteness of your GTD stock or information, our Pocket Size Catalog No. 40 will set you on the proper road. Use the coupon.

Your Friends for Life

MILLERS FALLS Bit Brace No. 732 is several tools in one. With it you can drive screws, countersink and ream as well as bore holes. Its ratchet, patented chuck and 'feel' in the hands have made it "the carpenter's favorite."

A MAN who owns fine tools is never lonesome. He enjoys a companionship with them that grows through the years.

Many a good workman would actually feel the loss of a thumb less than if he had to part forever with the prized contents of his tool chest.

This attachment is easy to explain. By doing work that hands cannot do, fine tools become a part of a man's creative self.

Millers Falls Tools are fine tools. For fifty years they have been making life-long friends of people who do things with their hands. Carpenters, craftsmen, repair men, mechanics—all swear by Millers Falls Tools, and so do the leading hardware men of America who sell them.

Amateurs often buy cheap tools. That's why they are amateurs. It takes a real expert to do a good job with poor tools.

But whether amateur or expert—select Millers Falls Tools. They will be your friends for life.

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.

MILLERS FALLS TOOLS

"You're No Stranger!"

ALLS TOOLS

If interested, tear out this page and keep with letters to be answered.

"You're No Stranger!"

—is what this new customer is saying to the drill being shown him. He recognizes it as a reliable old friend from Millers Falls. Its brother tools from Millers Falls—hack saws, braces, augur bits, mitre boxes, vises, and more—all have served him well. Like a friendly face in a strange land, the sight of this Millers Falls tool gives him confidence in the dealer's knowledge of good hardware.

Millers Falls tools are friendly tools. Their strength sureness, ease of operation, make them real partners with skilled workmen.

This is the message of a campaign of national advertising for Millers Falls tools appearing every four weeks in the *Saturday Evening Post*. Thousands of men, who like to work with their hands, will learn of this line of tools. If your store is Millers Falls headquarters, it will be their source of supply for many items of house and garage hardware as well.

Let Millers Falls tools make friends for *you*.

Story for Week Dated June 5, 1920. **Being No. 8 in the Series**

Matches That Burn Bright and Sure But Go Out Free From Spark or Glow

A MAN strikes a match and lights his pipe. There is a big, hot flame that does the work to perfection. He shakes out the flame and drops the match on the wooden floor at his feet, amongst sawdust, papers, or shavings. It falls there dead, black out, cold, and entirely freed from fire risk.

That is an Eddy match, chemically self-extinguishing.

How is it done? How is the fire-peril taken from the match without impairing the fine flaming quality that makes it a good, serviceable pipe-lighter? Very simply, but the Eddy Company spent years of research, and many a dollar to secure that perfection of match-service plus match-safety that means the saving of millions to Canada through reduction of fire-losses.

Those specially selected blocks of match-wood about which you have read are carefully kiln-dried before they go to the great machines which convert them almost at one stroke into completed matches. Held in a vice-like clutch, they meet the swift attack of a many-edged cutter which makes them instantly into headless matches. Held firmly like bristles on a wide-travelling belt of metal, they plunge down a steep slope into the bath of chemical that makes the dry wood self-extinguishing. Up they sweep into the fine, dry air of the match-factory, and down again into the bath that makes them sure to flame on striking. On they march a headless army, but in a moment more they dive again into the thick paste of "sesqui" that adheres to form their heads.

Now they are real matches, but moist and clammy after their baths. To dry off they have a procession in graceful curves up and over and under the big revolving wheels of the mighty match-making machines that marshal them along seventy million strong every working day of the year. And then they go in a perfect torrent to the girls who box them.

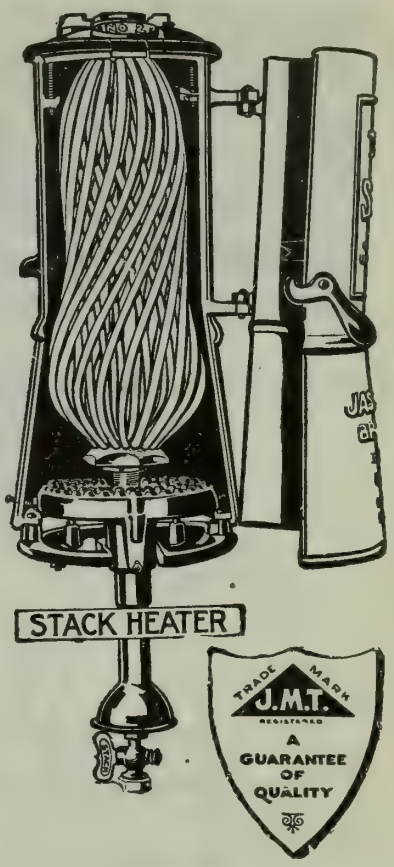
From Cold to Hot in 60 Seconds

STACK HEATER

Take note of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

You can sell your prospect with certainty when you show him that this dependable heater will heat water in one minute.

Send for a Stack Heater Display Card.



The James Morrison Brass Mfg. Co., Limited
93-97 Adelaide Street West, Toronto, Ontario

"YANKEE" TOOLS

PUSH DRILL No. 44

Saves Time at Every Turn

Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.

A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.

Shears and Scissors

Profitable for Import

"Acme" shears and scissors are of special interest to dealers because of their extremely low price for the excellent quality. "Acme" offers a splendid line to sell in conjunction with a high-priced line. Their famous, specially hardened, sharp cutting edges "deliver the goods" for the consumer and thus bring repeat sales and future business to the dealer. An output of 35,000 pairs daily insures satisfactory delivery.

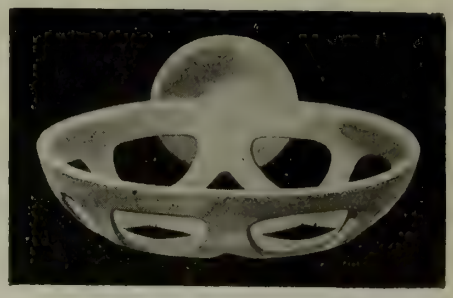
Sno-Wite
Enameled Fixtures



C87. Soap Dish

Genuine Vitreous Enamel

White Porcelain Enamel on Special Iron. Sno-Wite is not baked paint, celluloid or other imitation, but genuine, vitreous enamel.

It is remarkably handsome in appearance and strikingly original in design.

Sno-Wite is a quick seller with a large margin of profit for the dealer.

American Enamel Products Co.

CHICAGO, U.S.A.

Ask Your Jobber

Profits in Carbon Cure

We have been telling the public, through widespread advertising, of the great medicine for carbon troubles in gasoline engines.

It is not "just another carbon remover"—

D-B CARBON REMOVER

works without damage to the engine, and positively removes all carbon in thirty minutes without laying up, and **does not cut compression.**

It is just what the motorist wants —WILL HE FIND IT IN YOUR STOCK? There is good money in it. Investigate our dealer's proposition.

AUTO JACK says:

It's funny how a man who uses a tooth brush twice daily to preserve his teeth should begrudge his engine a weekly dose of D-B—the engine's dentifrice.

DUSTBANE MFG. CO.
LIMITED
OTTAWA, ONT.

BUILT upon the quality of the goods themselves, Yale Padlocks, Night Latches, Door Closers and Builders' Hardware, Yale prestige exerts a powerful consumer demand that is capitalized by the Yale dealer.

It is profitable to stock a line so well known, so extensively advertised throughout the Dominion, and so certain to give satisfaction.

You are invited to inspect our plant at St. Catharines, Ontario.

"The trade-mark 'Yale' helps make the sale"

Here's the strongest Ratchet Drill made

Bridge builders, ship builders, boiler makers, and all who ask constant heavy service from Ratchet Drills are proving the "Monarch" Square Sleeve Single Acting Ratchet to be the strongest Ratchet made. The body is made of Drop-forged Steel, and handle of solid Bar Steel. Parts subjected to wear are extra hardened. This is the ideal Ratchet Drill for heavy work.

Remember that a Ratchet is almost useless without a Drilling Post. Therefore, always suggest with every sale a "Keystone" Drilling Post. It will save many hours of time and permit of more perfect work.

"Keystone" Tools are known everywhere for quality of material and workmanship. If your jobber cannot supply you, write direct to us.

GARGOYLE

Mobiloils

A grade for each type of motor

How expert advice from you can build business and make QUICK profits

BUSINESS comes to the merchant who knows his goods. That Gargoyle Mobiloils sign in front of your place shows people you can recommend the correct lubricating oils for all makes and models of automobiles, trucks and tractors.

Every day more people realize the red Gargoyle means scientific lubrication. They have gained confidence in that red Gargoyle, and in the recommendations of Gargoyle Mobiloils Charts.

They know that all recommendations in the Chart represent the experience of the world's leader in scientific lubrication. You can recommend oils from these Charts with absolute confidence because they represent the united professional knowledge and experience of oil experts and engineers in lubricating all kinds of machinery.

But—you ought to have *all* the oils specified in the Chart. Only with the complete line of Gargoyle Mobiloils can you supply all the recommendations. Only in that way will each automobile, truck and tractor owner turn to you for scientific lubrication of his equipment.

Less Friction in Tax Collection Process

Manufacturers May Make Provision for Turnover Tax so Price to Consumer Will be Unaltered—On Small Items Retailer May Absorb Fractional Charge Due to Tax—Luxury Imposts Due Twice Monthly—Manufacturers' and Turnover Taxes Due Once Monthly—Returns Must be Sworn To.

A NUMBER of the difficulties which at first were presented in connection with the collection of the new luxury and turnover taxes, are now being overcome and the process is working with less friction.

The statement that the retailers escape the turnover tax, as outlined in the May 22nd issue of HARDWARE AND METAL, is correct insofar as there being any requirement of retailers to make returns covering the turnover tax. Naturally the tax is passed on to them by the wholesaler or manufacturer, but in the majority of cases the retailers will add this tax into their cost of doing business and the consumer will be called upon to pay the added cost.

There is, however, another phase of the matter pertaining to the possible absorption of the turnover tax by the retail hardware dealer, and in such cases, if this policy be followed, the retailer will not escape the turnover tax except insofar as the necessity of making returns for it is concerned.

In the case of an article on which a fixed price has been made and this is advertised nationally, some dealers may deem it inadvisable to advance this price by the amount of the turnover tax. In this case, as was pointed out to HARDWARE AND METAL by the manager of a large Toronto retail hardware store, the manufacturer may possibly make some arrangements to take care of this matter either by absorbing the tax himself or by lowering the cost to the retailer, so that when the 1% is added the cost will not be higher than the advertised set price.

On certain other articles where the sale price is small it was pointed out that the retailer will likely absorb the extra cost of the turnover tax, as it would be but a small fraction on the individual article coming within this class. It must be remembered, however, that on the annual turnover the absorption of this tax, while small individually, would reach considerable proportions. It is expected that a definite ruling will shortly be forthcoming as to how the tax will apply and how the resale price will be affected under such circumstances.

WORK GLOVES TAXABLE

A decision has just been announced by the Department of Inland Revenue that men's work gloves or mitts are taxable if the price exceeds $2.00.

A question asked of HARDWARE AND METAL this week dealt with the relation between the tax which must be paid by a wholesaler and an importer when both forms of business are conducted by one firm. It was pointed out that the regulations read that the turnover tax is a "tax on sales" and the inquirer did not see how this applied to importations.

The ruling handed out by the Inland Revenue Department in such a case is that as an importer the firm pays 1% in addition to the customs duties on importations, and then levied the 1% turnover tax as wholesalers against the party to whom they sell the goods. In this way the firm, though importers and wholesalers, pay only the one turnover tax.

Plan Followed by Toronto Dealers

Retail hardware stores in Toronto are proceeding with the collection of the luxury tax on sporting goods, plated ware including nickel-plated electrical appliances, electrical fixtures, etc., but not including any plated ware such as is known as builders' hardware. In most stores the plan of making out invoices in triplicate, the third copy being a thin tissue paper to be turned into the Inland Revenue Department twice monthly, with a remittance of the amount of money collected, is being followed. Some stores did not get the plan working for two or three days after the 19th of May owing to the fact that they had no definite interpretation of the requirements, and these dealers are of the opinion that no action will be taken against them under the circumstances.

On asking officials of the Inland Revenue Department as to the possibility of action being taken in such cases it was pointed out that the Act specifically declared May 19th as the day on which it was effective and that action could be taken, but that in such cases where there was some confusion over the requirements it was unlikely that any action would be taken where the provisions were not put into full effect for only a day or two after the 19th.

Luxury Taxes Due Twice, Others Once

The first instalment of taxes was due to be turned over to the nearest collector of taxes on June 1st. Rules governing the collection class the taxes under the three headings, luxury, manufacturers' and sales. The luxury tax is payable on the 1st and 15th of each month, while the other two are due on the 1st of the month. Taxes collected under each of these classes are to be shown on separate entry forms. No entry is being accepted to cover more than one class of tax, even though the same person may be paying on two classes at the same time.

Returns Must be Sworn to

Entries for luxury tax must be sworn to and be accompanied by (a) duplicate of sales slips or invoices, to which the entry refers, and (b) an accepted cheque or cash for the full amount of the tax. The same rules apply to the manufacturers' tax.

Upon receipt of a tax entry, the collector will transmit one copy to the department with all statements, sales slips or invoices relating to each entry firmly attached thereto. The checking or classifying of the sales slips will be done at the department, and any corrections or enquiries necessary will be the subject of future correspondence.

"Increased Tax on Drafts and Notes Discriminates Against Manufacturers"

Some Expressions of Opinion by Manufacturers on New Taxes—Injustice to Consumer on Goods Sold Through Distributors as Compared With Sales Direct to Retailers—Sellers Forced to Await Buyers' Convenience to Remit by Cheque.

THE following letter from McArthur, Irwin, Ltd., Montreal, deals very fully with the effect of the new taxes on various branches of business:—

"Gentlemen:

"While we have found no difficulty whatever in applying the new tax regulations to our business, we are not very sure yet as to how much better or worse off we will be at the end of this year than we were last year.

"There are some things which look to be a distinct injustice to the consumer, as for instance: We sell a large quantity of our goods through distributors in various parts of the country, and by the new regulations we are bound to add to our invoices for goods 1 per cent. of their value; the distributor in turn has to add 1 per cent. when selling to the retailer, whereas if we distributed our goods direct to the retailer there would be only 1 per cent. tax. as against 2 per cent. when they pass through the hands of the distributor.

"Then, again, because it is impossible to raise the tax on cheques for fear of preventing banking business, there does not seem to be any justification for charging 2 cents on every hundred dollars' value of drafts. This is an additional tax on the manufacturer. which will mean a considerable sum in the course of a year.

"As far as the 1 per cent. tax on the purchases, it seems to us that the Government have been giving with one hand and taking away with the other, and that we should be better off under the old scale than under the new. Taking, for instance, the business operations of an average firm capitalized at $1,500,000, doing a turnover of $3,000,000, and earning a profit of $200,000. Under the old Business Profits Tax, $105,000 would be exempted, leaving $95,000. on which a tax of 25 per cent., or $23,750. would be paid. Under the new scale, $150,000 are exempted, leaving a balance of $50,000, on which 20 per cent., or $10,000, would be paid, but in addition to this, there would be 1 per cent. on their purchases, which on a turnover of $3,000,000, after deducting various expenses, would be at least $1,500,000. This tax would be $15,000, which added to the $10,000 above, would make $25,000 against the old tax of $23,750.

"We realize, however, that the 1 per cent. taxation on purchases will affect a much larger proportion of the population than the Business Profits Tax, but at the same time our firm opinion is that we have reached the period in the history of the development of Canada's resources when the manufacturer should be relieved of the burden that he has been bearing for some years.

"It is a trite saying that the cost of materials is higher. but it has this bearing on the subject, that it is impossible for a factory to extend its capacity to the same extent if it is earning to-day 10 per cent. on its invested capital, as it would have done six years ago, if it was earning the same profit; therefore. it is necessary to have a larger surplus to apply against extensions and additions. and some means should be taken by which money so applied is exempt from the Business Tax.

"There are many. many angles to the new Budget, and it would not be difficult to write at great length on the subject, but we think that we have outlined those things which effect us most closely, and trust that the information will be of benefit to you.

Yours very truly,
McArthur, Irwin, Limited."

Another letter dealing with the effect of the stamp tax is from the Canada Linseed Oil Mills, Ltd., as follows:—

"We have given some thought regarding the proposal of stamp tax of 2 cents per $100.00 on promissory notes and bills of exchange, and, in our opinion, such tax should not be imposed, because:

"(a) The promissory note and bill of exchange is a trade convenience for collection of accounts. and the imposition of proposed tax will force sellers to await the convenience of buyers to remit by cheque instead, with its attending evils and disadvantages.

"(b) A substantial tax in many cases has already been imposed on the sale of goods.

"Regarding proposed tax on luxuries, we are of opinion that the collection of this tax should be by stamps affixed and cancelled by seller in the presence of the buyer. This is the most economical and only sure way of the Government securing full payment of luxuries taxes imposed."

Gas Famine in Ontario Cities

Ottawa.—With not quite two weeks' supply of coal on hand and no immediate prospects of getting any shipments, the Ottawa Gas Company is faced with an extremely serious situation, and there is even the possibility of the people of Ottawa having their gas cut off until coal is obtainable.

Hamilton.—The United Gas & Fuel Co. has about two weeks' supply of coal, and if the situation does not improve before this is used it will be unable to supply gas to the citizens. It is not receiving any coal because of shipping difficulties, and there is little prospect of relief at present.

Toronto, Ont.—Toronto may shortly experience a gas famine. Arthur Hewitt, general manager of the Consumers' Gas Company, stated that, unless all gas users co-operated with the company to cut down consumption the city will face a shortage.

He states that transportation is the principal difficulty. Where the company formerly received sixteen 50-ton cars of coal, but five are now procurable. Railway strikes and trouble in the United States mines made the coal supply uncertain, he said. There was absolutely no guarantee that even the present reduced supply would continue, and the company has long since used up its reserves of coal.

Hardware Association Voices Objection to Turnover Tax

Difficult Now to Obtain Normal Percentage of Profit Without Addition of 1% Turnover Tax—Profit Too Low to Permit Absorption of Tax and Increasing Prices Further is Impracticable.

THE following letter was sent by the Ontario Retail Hardware Association to the Minister of Finance, voicing certain objections against the turnover tax and its application to the retail trade:

"Hon. Sir Henry Drayton, M. P.,
Minister of Finance, Ottawa, Ont.

"Dear Sir:—

"Permit me, on behalf of the Ontario Retail Hardware Association to draw to your attention an apparent hardship to the retail trade, in the inclusion on invoices of the wholesaler and manufacturer to the retailer, of the one per cent. tax as per clause 7A of Taxation Bill of 18th inst. This tax will really fall on the retailer, as owing to the high cost of goods, it is even now impossible to obtain a normal percentage of profit, and this with higher overhead costs than ever before. During a recent visit to some retail hardware stores, I found goods being sold at, or even less than the wholesale cost at that time, which would go to show that no undue advantage was being taken of the consumer on account of having goods on hand bought prior to advanced wholesale price.

"The profit of the average hardware dealer to-day is too low to permit of the absorption of the tax referred to, and to increase the selling price, which is now far too high for the ordinary consumer—seems to be impracticable on account of high costs—competition which really exists in the retail business, and a desire to keep prices within reach of the ultimate consumer.

While I am speaking for the members of our Hardware Association, I would suggest that similar conditions exist in other lines, and would respectfully ask you to consider means to relieve the retailer of this tax, collected in the way proposed.

Yours very truly,
W. F. Macpherson, Secretary.

Believes There Will Be Modifications in Present Luxury Tax Legislation

Deputation of Over 200 Retail Merchants From All Over Canada Waited Upon Finance Minister Drayton in Ottawa on Monday Last—Want Luxury Tax Imposed at Source of Supply—All Sections of the Trade Were Represented

THAT there will be some modifications in the luxury tax laws as recently enacted, is the opinion expressed to HARDWARE AND METAL, by W. C. Miller, secretary of the Ontario Retail Merchants' Association, on his return from Ottawa, on Tuesday of this week. Secretary Miller was one of a large deputation of retail merchants, who waited upon Sir Henry Drayton, Minister of Finance, on Monday last, and protested against, what they termed, was the "discriminatory and confusing" luxury tax, which they described as "ill-advised, poorly conceived, and poorly devised." There were over 200 retailers from all parts of the Dominion in the deputation, and a strong and comprehensive resolution was presented. The Finance Minister did not commit himself in regard to any changes that might be made, but it is the contention of many of the merchants that the laws as they at present stand, cannot be carried out, and the Minister of Finance, they believe, has been impressed with the impracticability of some of the measures.

Various speakers representing the different sections of the association, all were of one mind, in declaring that the luxury tax should be collected from the source of supply, that is from the manufacturer and the importer, and absorbed in the same manner that all systems of taxation are absorbed.

The Simplest Way Possible

Henry Watters, Ottawa, Ont., acted as chairman of the deputation, and read the memorial to Sir Henry Drayton. In part, this memorial pointed out that upwards of 200,000 retail merchants operated in Canada, by far the largest commercial class. They objected to the retailer having to collect a tax, because, in their opinion, the ideal system was based on the principle of "ability to pay," and one whereby it could be collected in the simplest manner. The budget outlined six different methods of taxation, customs, excise, taxation on sales, income tax, luxuries tax, and stamp tax.

Tax at Source of Supply

With regard to the tax on sales, the wholesalers said manufacturers were passing it on to the retailer. He was paying it out of his own pocket. With regard to the income tax, the retailers expressed surprise that only $20,000,000 was collected through this system, and "it is evident that a great many persons are evading this tax."

As to the proposed luxury tax, "we consider it ill-advised and poorly conceived and devised, and one that will be resented by every sound-thinking man in Canada." The proposed luxury tax is discriminatory and confusing. The application of the tax applied to 23 sections of the retail trades. Their views were summed up in the request that the luxury tax should be collected from the manufacturer and importer, instead of from the customer, through the retailer. If not, the system of selling direct from the manufacturer would increase by leaps and bounds. One of the most striking inconsistencies of the tax was that women's dresses up to $45 were not taxed. Yet ribbons and all kinds of material was. The luxury tax would succeed in dislocating business.

The retailers, prior to the interview, passed a resolution asking that the Government appoint a commission of retail merchants to study the conditions and problems of the retail trade.

A POINT OF LAW

(Question).—A. M. Carscadden, Fort Saskatchewan, Alta., makes the following enquiry: "If a merchant contracted or ordered a car of coal from a local coal dealer and the team that was hauling the coal from the car to the store ran away and smashed a plate glass window, would the merchant who ordered the coal or the coal dealer be held responsible?

(Answer).—The owner of the horses would be liable unless the horses were loaned or hired, and even then he would be liable if the person who had charge of the horses were not negligent or careless. It would be necessary to prove negligence or carelessness on the part of the person to whom the horses were loaned or hired to free the owner from liability for damage caused by the horses.

London Merchants Are Opposed to the Luxury Tax

The retail merchants of London, Ont., have placed themselves on record as opposed to the luxury tax imposed by the

Continued on page 42

Over 200 retailers waited on Finance Minister Sir Henry Drayton on Monday of this week, protesting against the luxury tax being collected by them. They came from all over the Dominion.

When the Turnover Tax is Multiplied

Jobbers Purchasing from Another Jobber for Customers' Accommodation Will be Taxed—"Citizens' Duty to Support Tax," Says Alex. McArthur Co. President.

MONTREAL.—Alec. Prudhomme of Prudhomme & Fils, in discussing the budget with HARDWARE AND METAL, re-affirmed his previous conviction that the best means of meeting these taxes was through the application of the income tax principle. The worst feature of the 1 per cent. tax, as called for in the budget, is that this tax is multiplied many times over. For instance, under present merchandising conditions, it is necessary for the jobber to buy very extensively from his brother jobber, and many of these purchases are simply in the way of accommodations for the customer. In some cases buyers will be out from various jobbing houses calling on other jobbers in the city and will be engaged in this work probably all day long. In a great many cases these purchases are of such goods as carry a very small margin of profit, and even with the 1 per cent. tax added the margin of profit, Mr. Prudhomme asserts, may be entirely wiped out.

Continuing, Mr. Prudhomme expressed his belief that the new requirements would form the basis for practising dishonest selling. For instance, the tax of the minimum price at which shoes may be bought is $9.00. A customer goes in to buy a pair of shoes and finds what he wants at the price of $13. A dishonest trader, to satisfy the customer, would be inclined to make out two invoices, one say for $6, and one for $7, making a total of $13; but each invoice being under the minimum price and no tax being collected. This might be made to work very extensively throughout the country, in which case such merchants would be getting off "scot' free, and no tax paid in to the coffers of the Government.

Suggesting an improved manner of collecting this tax, Mr. Prudhomme felt that to make it operative against manufacturers and to make it easier for all concerned, it would certainly relieve the dealer of a tremendous amount of detail work if a small additional tax be arranged. At present Mr. Prudhomme feels that a great burden has been placed upon the consumer.

Duty of Citizens to Support Tax

"To us there is an evident desire in the new plan of taxation to derive a necessary increase of revenue on a basis of fairness and equality," said president, D. J. Munn, of Alex. McArthur & Co., Ltd. "The current of this taxation must ultimately reach every person, least upon the needy and thrifty, and in large proportions from others who could not be reached in any other way. It is the duty of all good citizens to support and give it a fair trial."

Toronto Building in May Double That of Last Year

TORONTO.—Permits for buildings of a total value of $3,133,605 were issued by the City Architect's Department for the month just ended. This is an increase of more than 100 per cent. over May, 1919, when the total stood at $1,455,734. An even greater increase is shown for the five months, the totals for 1920 and 1919 being $10,276,358 and $4,983,050 respectively.

Wholesale Hardware Ass'n. and the Budget

Have Interview with Finance Minister as to Operation and Collection of New Taxes—Some Matters Likely to be Made Clearer.

MONTREAL.—The members of the Canadian Wholesale Hardware Association, on Saturday last, the 29th ult., were advised that Sir Henry L. Drayton, Minister of Finance, would meet a deputation representing this association on Monday, the 31st ult., and the following committee interviewed the Minister of Finance:

Messrs. C. A. Whitwam, R. Starke, S. H. Alexander, T. B. Williamson, G. C. Davis, T. M. Birkett, Jr., and the association secretary. The following motion was agreed upon prior to the meeting:

"Resolved: That a proposal be made to the Government that the entire Sale and Luxury Tax, whatever be decided on as being necessary, be collected through the Customs where goods are imported, or in the case of domestic goods, through the manufacturer, as the same result would be obtained, and the Government would no doubt be saved a very large percentage of the detail work and costs in collecting the tax, and the distributors of the goods relieved of a very heavy responsibility and a great amount of unnecessary work."

The interview with Sir Henry Drayton was most satisfactory, and the members were promised that the above resolution would be given due consideration.

A number of other matters were discussed, such as the removal of the luxury tax on children's toys and games, and the removal of the luxury tax on the cheaper lines of baseball bats, baseballs, footballs, lacrosse sticks, toboggans, skates. The committee also discussed the various rulings on plated ware, both for the collection of the luxury tax, and customs duties, and understand that some new rulings will be issued in the near future, giving clearer interpretations of what is considered plated ware for excise and custom tax purposes. In all probability there will also be exemptions from the luxury tax on the cheaper lines of coffee pots, tea kettles, electric toasters, and electric irons.

The deputation also had interviews with G. W. Taylor, Assistant Deputy Minister, and with R. W. Breadner, Commissioner of Taxation. From these sources some further information was secured relative to the operation of the tax.

It was further resolved by the committee, relative to firearms, etc., that the following be adopted:—

"Resolved: That all invoices after May 18, 1920, and excise tax applying on arms, ammunition, and any other goods on which tax is paid by manufacturer, or at time of importation, such excise tax to be added to invoice.

"For example: Firearms and ammunition, 10 per cent. luxury tax is paid by Canadian manufacturers, or at time of importation by importer, to the Government, and Canadian manufacturer charges the purchaser the 10 per cent. This tax should be either added to cost of the goods or added to foot of invoice to the retail merchant. This tax, however, is not paid to the Government either by the jobber or retail merchant."

TAX APPLIES TO ARTICLES INDIVIDUALLY EXEMPT IF SOLD IN GROUP

The following question was received by HARDWARE AND METAL this week from the Johnson Hardware Co., Fort Frances, Ont.:—

"I sold a spoon hook worth 40 cents; fish line, 40 cents; a sinker for 10 cents, and six fish hooks for 5 cents, making a total of 95 cents. Should I have charged 10 per cent. tax on that sale?"

The point involved is that individual items of sporting goods are exempt up to 50 cents, and while the total was higher than this figure, each article individually was less.

On taking this up with the Inland Revenue Department we are advised that the 10 per cent. tax should have applied to the sale, because the sale of sufficient articles to bring the value over the exemption figure was made at one time. The officials agree that had the articles been purchased separately no tax would have applied.

Mark-Up Reaches 5% in Some Cases

Dakin Bros., Digby, N.S., Anticipate Difficulty Over Fractional Additions of Tax—1% on Sales Would be 10% to 12% of Net Profit in Some Stores, Says A. C. Clemens, Milverton, Ont.

IN response to the request made by HARDWARE AND METAL for an open discussion of the question of whether or not the turnover tax should fall on the retail trade, as has been urged by some branches of trade, a large number of letters voicing the opinion of manufacturers, wholesalers and retailers have been received. Some valuable suggestions are outlined in these as follows:

MARK-UP WILL AMOUNT TO 5 PER CENT. IN SOME CASES

Dakin Bros., Digby, N.S., think that in view of the fact that the jobber deals in larger quantities than the retailers, that the collection of the tax is in the proper hands. It takes the attitude that the tax if required to be collected by the retailer would make a fractional price in some cases and that he would either have to add more than he should, or lose the sale. Will this not have to apply in any case unless the retailer plans to absorb the turnover tax himself?

"Dear Sir:

"We do not wish to shirk any part of the work of collecting the war expenditure, but in view of the fact that the jobber deals in quantities where we deal in pieces, it strikes us that the collection of the tax has been put in the proper hands,—the jobber and the manufacturer. The jobber, for instance, sells us a gross of gate hooks and eyes selling for five cents each. All the retail merchant could do in this case would be to make it a six cent article or lose it. The retail trade is made up of so many of these small purchases that to handle the collection of this tax would make merchant life a nightmare. For instance: During the last Christmas rush in making sales amounting to $95.00, we served 175 customers. Again, in some classes of business the turnover is small, but the margin of profit large, while in others the reverse is the case.

"Some may say that this tax can be easily added, but in the small business we are safe in saying that either 5 per cent. will be added to the mark-up or none at all. Another thing, if a merchant sells $1,000.00 worth of goods, he must get $1,010.00. The merchant must turn in $10.10. It is a simple matter to figure the loss on one hundred thousand which the seller loses. None of us can see all the points to this as the issue is large, but we have done our best to cover the matter as we see it."

1 PER CENT. ON SALES WOULD BE 10 PER CENT. TO 12 PER CENT. OF NET PROFITS IN SOME STORES

The following letter is from A. C. Clemens, hardware, Milverton, Ont:—

"It would almost be impossible for us small dealers, say, with a turnover of $20,000, to keep track of much of this kind of stuff, as our business would not permit the use of a bookkeeper, or even a girl in the office. A man with a $25,000 turnover can not engage more than one man beside himself in a hardware store. as the profits of the business would not allow it.

"Take for instance selling nails (which are always sold at near cost), selling stoves at 10 to 12 per cent. above cost, wire, staples, and a good many such lines at small margins. We must get quite an advance on some things to bring up the average per cent. or down goes our curtain. Then if we get a little extra profit on some things, we are profiteers, and it takes from 18 per cent. upwards to run any business now, especially on a small turnover. 1 per cent. on $20,000 would be $200, which is too heavy a tax for any such business, as it would possibly mean 10 per cent. or 12 per cent. of the net profit. I think a meeting should be called in Hamilton or Toronto of all retail hardware merchants, whether they belong to the Hardware Association or not, and possibly send a delegation to Ottawa at once. as I have a delegation to Ottawa at once, doing it with the intention of passing it on to the retailer.

SOME IMPORTANT RULINGS

Additional rulings of importance to the hardware trade are being made by Government officials in connection with the taxes. One of the latest of these is that articles plated with antimony are regarded as plated ware when used for household purposes, and subject to the 10% luxury tax.

A producer of lead, copper and zinc is subjected to the 1% sales tax when selling to manufacturers and wholesalers. Silver and gold is exempt from this tax on the producer. The manufacturer and wholesaler also add the 1% tax, so that in the case of these metals the tax is applied three times.

Another ruling is that bona-fide repairs made for consumers or users are not taxable, except in the case of repairs to garments.

REGRET NO TAX PROVISIONS ON MAIL ORDER HOUSES

A letter from a merchant in Fergus, Ont., expresses the opinion that the trade will feel keenly the fact that there is no provision for taxing mail order houses:—

"Gentlemen:

"I am greatly interested in the way you have taken up the matter of the new Excise Tax and the publicity you are giving it.

"The average retail hardware man will feel very keenly that on the face of it, at any rate, no provision seems to have been made for taxing so-called mail order or catalogue houses.

"This is something which should be given due consideration by the Government and no doubt their attention will be drawn to it in many ways."

WHOLESALERS HAVE STAFF TO KEEP RECORDS

A letter from J. N. Raymond, Williamstown, Ont., makes the point that the wholesalers already have the staff and could apply the 1 per cent. tax with little trouble:—

"Dear Sir:

"My opinion, re the new tax being passed on to the retailer, is that it would compel a great number of retailers to employ an extra bookkeeper or clerk. This would be an added expense on the retailer, whereas the wholesaler has, as a rule, enough clerks to make out all invoices and it is a simple matter to add the tax of 1 per cent. The retailer sells a great many articles for cost and does not make out a bill for some, but if he has to collect the tax he would be compellel to do so."

REVENUE RETURNS WILL BE CUT BY IGNORANT DEALERS

An important point is dealt with in this letter from Williams & Cavers, Allen, Sask. It indicates that many Western merchants are greatly lacking in business training and cannot be trusted to make a correct accounting:—

"Dear Sirs:

"It appears to us that it does not make very much difference which way it is done insofar as the consumer is concerned—he is the one who will pay it in the end either way. But if it is left for the retailer to collect, it will make a very great difference to the revenue returns, as there are a great number of merchants in the West who have not a business education, and would not be able at the end of the year to compute the taxes collectible, or even their gross turnover.

"We can speak only of conditions in the West, and, it is a fact, that owing to the distances from base of supplies and the difficulty in getting merchandise when needed. that the average Western merchant carries a much heavier stock than he otherwise woud do, and if actual figures were obtainable I think you would find that the average turnover of merchandise is about three times a year. If this be true, you can see where the small merchant would feel abused.

"Then, again, the jobbers with their complete and correct systems for keeping records and accounts can keep track of the collection of these taxes at a much less expense than we can."

Electrical Men Want Luxury Tax Eased

A representative delegation of electrical dealers and manufacturers from Toronto visited Ottawa to wait upon the Government in the hope of securing some mitigation in connection with the luxury tax of twenty per cent. placed upon electric fixtures. It is claimed that the tax as it stands will increase the already high cost of building and rental.

The delegation from Toronto, which met delegations from other parts of Canada, included H. S. Banfield, W. H. Banfield & Sons, Ltd.; C. H. Willson, McDonald & Willson, Ltd.; J. F. Heffron, Macbeth-Evans Glass Company, Ltd.; J. A. Tanner, Standard Bronze Company, Ltd.; S. Turnbull, Tallman Brass & Metal Company, Ltd.; S. J. Brown, Nitro Electric Co., and A. N. Starkey, Toronto Art Glass Dome Company.

Luxury Tax Not High Enough To Force Curtailment of Buying

Mills Hardware Co., Hamilton, Thinks Straight Tax on Retail Sales Would be More Effective—Swift Current Dealer Asks What About Parcel Post and Mail Order Houses?

NELSON MILLS, vice-president of the Mills Hardware Company, Ltd., Hamilton, Ont., thinks a straight tax on retail sales would be along the line of least resistance.

"Gentlemen :

"Replying to your request for the retailers' viewpoint regarding the Luxury Tax, I I have no hesitation in expressing an opinion on this tax, even though it stands as slated.

"We all agree that the Government must raise revenue and that it is the duty of every Canadian to do his or her share. The tax should be collected along the lines of least resistance, inconvenience and expense. I contend that the method of collection as adopted is not such as far as the retailer is concerned. My experience in 20 years of retailing is that Luxury Tax or no Luxury Tax, the public will buy that which they desire with what money they have. The Luxury Tax is not high enough to force curtailment and, if it were high enough, then the Government would lose its revenue.

"After careful consideration of the subject it appears to me that a straight tax on retail sales would be the lines of least resistance to all concerned and the cheapest to the consumer. Why burden the retailer with enormous detail when a tax added to the monthly sales would settle the argument? No matter how the tax is collected or what per cent. the tax is, it eventually becomes a cost of doing business and the consumer pays the bill. Taxes added by manufacturers and middle men decidedly raise the final cost to consumer higher than if applied only once by the retailer. Let me suggest further that the tax could vary from 1-2 to 5 per cent. of sales according to different lines of business, determined as luxuries and non-such, but let the tax be on the full line and not make differentials on certain selected goods.

"Before closing I wish to make reference to the phrase "plated ware." I contend that this phrase is indefinite as it stands, and until the Government defines it in detail, I interpret it as being gold and silver plated ware. If they mean nickel plated, then we hardware men have hundreds of articles in our stock which are nickel plated and brass plated and it will require a lot of detail to properly divide and list it. If they mean nickel plated, does it include butt hinges, etc., which are used for household and office use, and many other articles of hardware which are plated? To separate these articles on special sales slips for the Government would entail an expense which would again advance the cost of goods to the consumer.

"The time has arrived when everyone must do all within their power to bring down the cost of commodities, not send it up. It is the little details that make the big amounts."

WHAT ABOUT PARCEL POST SYSTEM—WILL BOOM MAIL ORDER

THIS letter from Fyffe & Park, Swift Current, Sask., states that adding tax to invoices avoids any profit on tax:—

"Dear Sirs:

"With reference to your enquiry regarding Excess Tax.

"In our opinion the retailer should not have to pay this, for it all adds to the cost to the consumer. Whether it is included in cost or added at the bottom of the invoice, the consumer pays anyway. By adding it to the invoice is a little better, as then there is no profit on the tax, from jobber to retailer. There is a profit on tax from manufacturer to jobber and. then to retailer, and, from there to consumer. At the present time the Government puts three taxes on the same article.

"What about the parcel post system? This is a boon to the mail order house. and, a loss to the revenue department."

WHY THE NEW TAXATION IS NEEDED

Dealing with the conditions which have led up to the imposition of the new taxes, Hon. N. W. Rowell stated recently in the House of Commons that the total estimates, with the supplementaries, were $549,000,000. With maturing obligations the amount which must be provided for was $623,000,000. Certain outlays during the year, provided for in the estimates, were in the nature of investments, he explained. Some $190,000,000 was expected to come in this year, so that it was a matter of conversion from one asset to another. There was an estimated income of $381,000,000, less a reduction of $31,000,000 through the cutting off of the 7½ per cent. war surtax. There would be an estimated $451,000,000 to meet an expenditure of $443,000,000. The public debt of Canada was less than that of any of the warring nations, with the exception of the United States. Canada's foreign trade had grown enormously. From an adverse balance of $825,000,000 in the five years ending March 31, 1915, there had been brought about a favorable balance of trade of $1,803,000,000 in the succeeding five years.

RETAILER CARRIES GREATER RISK AND SHOULD NOT BEAR TURNOVER TAX

THE Rouleau Hardware, Rouleau, Sask., thinks that the retailer does a credit business to such an extent that it is not fair to ask him to carry the turnover tax:—

"Dear Sirs:

"Re Turnover Tax,

"My opinion is, the Turnover Tax should not fall on the retailer but on the manufacturer and wholesaler. The retailer, in my opinion, carries a greater risk than the former. My own case for example:

"On a $15,000 stock I do a 50 per cent. credit business and take a chance of collecting same any time from one to two years, and with present prices cannot get consumer to pay interest on same, and we also take a chance of ever getting it at all.

"The Turnover Tax will mean increased prices, additional work, increased expenses, and will make it almost impossible for retailer to do business. I have been in business for several years and I find more complaints on prices now in one day than I would in one year, two to three years ago. We hear this complaint daily from our customers. We hear more of this than manufacturer or wholesaler owing to dealing direct with the consumer. I am sure other retail merchants will agree with me in this matter and are not in favor of this Turnover Tax being put on to us."

Less Than $6,000 Taxes Paid by Montreal Dealers

Montreal.—That there is, and will continue for some time to be a great deal of uncertainty, to say nothing of dissatisfaction regarding the working of the budget, is evidenced in the vain efforts of manufacturers, jobbers and retailers, to ascertain definitely what they are required to do in complying with the new laws. An instance of this, as happening in Montreal this week, bears directly on the matter.

On Tuesday, the first day of the present month, the Montreal Department of Inland Revenue was besieged with enquirers, seeking information as to just what the law required of them. There is no stronger proof of the utter lack of information or facilities for taking care of the enquiries of these business men, than is indicated in the meagre returns paid over to the local Department, less than $6,000 sach being collected, although from the estimates brought forward it was indicated that such returns, from Montreal alone would total over $3,000,000 for a single month. The local collector of excise taxes pointed out that it is expected the taxes from Montreal alone will run about $40,000,000 annually.

LONDON MERCHANTS ARE OPPOSED

Continued from page 39

Government on sales over a certain sum. Secretary Gordon Phillip was instructed to draft a memorial to send to Secretary Miller of the Retail Merchants' Association of Canada, to be in turn forwarded to the Dominion Government.

Opposition to the measure was unanimous, and the recommendation was made that until such time as the law is thoroughly understood, and defined, the tax should not be imposed, but instead the Government should collect a levy of one per cent. on the total sales of the retailer. It was pointed out that the law, as it now stands, is so full of holes, that anyone who cares to shirk it can do so very easily. It was claimed that such an attempt at taxation is bound to breed a class of shirkers and put a premium on dishonesty. It was further contended that the tax is not a luxury tax at all and that it hits the poor consumer as well as the rich one.

Seasonable Appliances Now Moving

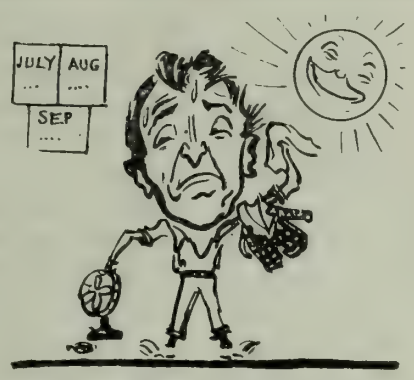
Warm Weather Electrical Appliances Becoming Active—Labor-Saving in the Household is Strong Argument for Summer Trade—Rural and Farming Districts Present Big Field for Expansion, Says Authority—Implore Dealers to Avoid Technicalities in Sales Talk Over the Counter

WITH the approach of the warm weather there are a number of lines of electrical supplies which become specially active and which should therefore now come in for their share of publicity.

Labor saving for the housewife has been one of the strong arguments in the sale of certain electrical devices, and it is obvious that this argument is more imperative in the warm weather than at any other season.

If our forefathers could see the marvellous inventions of modern science for the elimination of drudgery from housework, and the emancipation of women from the toil of sweeping and ironing, they would have been indeed amazed. Yet this is not the only phase of the matter, for it is held by medical authorities that the introduction of electric appliances into the average home means better health for everyone through the elimination of drudgery and the cleanliness which is encouraged by simplifying such work.

In an effort to encourage the sale of such articles a model kitchen was con-



structed by a Hamilton hardware merchant recently, to demonstrate electrical appliances. Among the many useful articles exhibited was an electric washer and ironer. These were shown in the model laundry. The kitchen was constructed with the idea of saving the housewife unnecessary steps and revealed the utmost efficiency. The stove was the combination type and was placed near the kitchen cabinet and close to the sink. The idea was to link up with "saving household labor" the saving of steps and thereby entail a stronger appeal to the housewife.

Housewives Appreciative of Comfort and Utility of Appliances

There is no question that housewives in Canada are daily becoming more appreciative of the comfort and convenience as well as the air of distinction which is given their home by the unstinted use of electrical devices. Especially is this the case with those for use on the table. Some dealers have received complaints regarding power connections for table appliances, it being found by many purchasers of toasters, chafing dishes, percolators, etc., that through lack of baseboard sockets they must use overhead fixtures. One trade authority advocates the installation of outlets on the table itself as a means of increasing the usefulness of electrical table appliances and doing away with unsightly overhead cords. The use of a portable serving table with wired connections has also been adopted in some homes.

With the aid of proper cookers in some

A window of seasonable electric appliances in the J. H. Ashdown Hardware Co. Retail Store, Calgary. It demonstrates some table lines which are big sellers in the warm weather.

EDITORIAL COMMENT

RETAILERS ARE GOVERNMENT TAX COLLECTORS WITHOUT REMUNERATION

IN connection with the levying of new taxation through the medium of the retail merchant, some dealers are making a passive resistance to becoming tax collectors for the Government without remuneration. The plan as outlined virtually commandeers merchants as collectors of taxes and makes them the butt of any abuse which may be forthcoming in their application. Merchants have been called upon to bear a good deal of the opprobium in connection with the high cost of living and their task will not be rendered any lighter by the new development. With the addition of the new Luxury and Turnover taxes it will mean that many people will blame the merchant for the high prices they will have to pay for the articles so taxed.

GOVERNMENT TAKES UP EVERY REVENUE-PRODUCING AVENUE PRESENTED

NOW that the real meaning and effect of the new taxation is more clearly outlined as result of two weeks' discussion, it is evident that a large number of additional sources of revenue are being located. It looks as though there was some justification for the remark made at the meeting of the Montreal Wholesalers' Guild to the effect that the Government never knew there were so many avenues of revenue production until they were besieged with technical questions from those who had made an expert's analysis of the application of the new taxes.

During the past week a number of new rulings have been secured by HARDWARE AND METAL, as outlined elsewhere in this issue, and it is evident that the Government is taking advantage of any doubt which exists. This week it is noted that the tax applies to articles which, if sold individually, would be exempt as being under the price mentioned, but which, if sold in groups and the total price exceeds the figure mentioned for one article, tax is levied on the total amount.

Articles plated with antimony are also subject to the tax as plated ware, and producers of lead, copper and zinc are subject to the Turnover Tax as manufacturers.

The important point now being emphasized by the retail trade is in regard to the mark up to be made where the passing on of the 1% Turnover Tax by the wholesaler makes a fractional charge. One retailer points out that in some cases a misunderstanding on this point will either result in a loss for the retailer or a mark-up approximating 5%. Another retailer indicates that a 1% tax on sales will amount to 10% to 12% of the net profits in the average hardware business with a turnover of $20,000 to $25,000. Still another opinion expressed is that the luxury tax is not high enough to curtail buying, and yet if it were any higher the Government would lose its revenue as result of curtailment. There are a number of very interesting phases of the question and these are dealt with at length in this issue.

GOVERNMENT PLACES GREAT RELIANCE IN "FREE" PUBLICITY

SOME indication of the reliance which is placed on the press of Canada by the Canadian Government officials, is found in the action taken in connection with the promulgation of the newly-imposed taxes. Details of the changes and additions to existing tax regulations, as outlined in the budget speech, were handed to publishers' representatives for publication broadcast and there ended the Government's liability insofar as a warning was concerned. Whether or not the report was reproduced correctly or was printed at all in the newspapers of the Dominion, the retail trade was responsible for finding out and applying the new regulations as from May 19th. This is but one case which indicates the use made of the press in Canada by the Government as an agency for putting information before the public and before merchants.

Would it not have been a good policy for the Government to have also had official paid advertisements prepared for insertion in the various papers necessary to carry the message to everyone concerned? Such announcements would have been official and there would have been no doubt as to their meaning. It would have indicated that the Government was taking some responsibility for advising merchants and others as to their responsibilities.

SEASONABLE APPLIANCES NOW MOVING

Continued from page 43

homes meals are now being cooked right on the table. Particularly is this the case when the maid is out. The hostess by this means is enabled to preside and do her own cooking under most favorable circumstances and the food is served hot from the pan. The soup course is previously heated and brought to the table in thermos pitchers ready to serve. Plates are kept warm on the electric warmer so that the next course, which can be cooked at the table in the chafing dish, is served hot. On the small serving table is the grill and percolator.

Electric Fans Make Strong Seasonable Appeal

From the brief description given of the uses of the various electrical appliances, it is evident that any housewife would be proud to possess such articles for comfort and convenience. Displays showing these articles in use will often carry a strong appeal, for their value is not fully appreciated by a great many who, if once shown, would never be without them. Electric fans sell rapidly in the warm weather when demonstrated in an appealing manner—an achievement which is not difficult with such a seasonable line.

Then, too, electric power is being applied to sewing machines, assuring a rapidity of service hitherto undreamed of. The modern portable sewing machine weighs less than a packed suitcase and can be carried conveniently wherever one wishes to sew. Women who use them declare they get a great deal more work done with far less fatigue than by the old method. These machines not only simplify sewing but do dainty work and are capable of doing all kinds of sewing such as hemming and sewing on lace, edge stitching, etc.

Few Customers Know Points of Good Vacuum Cleaner

Judging by the large number of enquiries made by prospective purchasers of a vacuum cleaner, it is evident that the average individual has little conception of what constitutes a good cleaner. Here the dealer can establish himself by giving some practical information which will help the customer in choosing a cleaner. Tests for cleaning rugs can be carried out on a demonstration in the store.

It is doubtful is any electrical appliance will carry stronger weight with t housewife than the electric vacuum cleaner, for nothing is more desired by her than cleanliness in the home. Well she knows that sweeping rugs is drudgery and does not in the end do the job thoroughly. Also she knows that once or twice a year the rugs must all be taken ut and given a beating—more drudgery. But perhaps the strongest appeal for the use of vacuum cleaners is the fact that they clean rugs and carpets more thoroughly than any other device. Dirt cuts the nap and shortens the life of good rugs. It is therefore very necessary that they be cleaned thoroughly and often. Vacuum cleaners do all the work, supply all the energy and all the while, unseen, the dirt is being removed dustlessly from the fabric of the rug. To run the cleaner over the dining-room rug after each meal will pick up crumbs and food particles without injury to the rug and thus lengthen the life of the floor covering.

Farming Districts Offer Field for Expansion

The foregoing data deals with the sale of electrical appliances, which in the past, has been much larger in the cities than in the rural districts, but the latter districts and the farming communities present the greatest field for expansion in the sale of electrical appliances, according to the statement made recently by W. L. Goodwin, former vice-president and general manager of the Pacific States Electric Company. Mr. Goodwin stated that effort previously has been entirely devoted to the development of industry and to cities, while the farmer had never enjoyed the benefits that have accrued to the city man, but that in California the industry had practically covered the land with wires and it was surprising how the farmer had responded. He pointed out that one of the greatest faults had been that electrical men had been talking in technical terms, a fact which, he declared, had resulted in not one man in 50 having even a comprehensive conception of the hydro-electric development. He urged a language which would be understood by the public, otherwise, he said, the progress of electricity would continue to be greatly retarded through lack of proper understanding.

In co-operation, he said, the public always sensed some ulterior purpose, some effort on the part of the trade or industry to restrain trade and to raise the prices. That was not the intention, however. It was necessary that co-ordination be established.

"It requires a microscope to find electrical ads. in the papers to-day," he continued, referring to the inattention of the industry towards its retail aspect. Advertising, he argued, was one of the basic principles of business and they had so far attempted progression without attending to its foundation.

No Precedent to Act Upon

"The electrical industry is in the hands of a single generation," the speaker said. "We have no precedent to act on and we are going out into the wilderness. Occasionally we make mistakes but we are without that old conservatism in business." He referred to electricity as the basic matter of all industry.

Another matter which, unless remedied at once, would make necessary the reorganization of the whole structure of the electrical business, he said, was the standardization of electrical service not only in Canada but internationally. At present household equipment which was used in New York was of no use here owing to the difference in the voltage or the difference in the construction of the appliance. This matter, which would prevent a man taking his household electrical equipment to another part of the country with him, he said, causes the public to lose confidence. It would have to be remedied.

EVENTS IN THE TRADE

Business Changes

Keeler, Sask.—The hardware business conducted by W. H. Green has been purchased by J. E. Langtry, a brother of G. A. Langtry, hardware merchant of Tessier and Conquest, Sask.

Obituary

The death is announced of Robert John McNally, an old and highly esteemed resident of Blackstock, Township of Cartwright, County of Durham. Mr. McNally was born in Cartwright and conducted a furniture and hardware business in the village for a number of years.

Amherstburg, Ont.—Wm. H. Jones, aged 55, lifelong resident of this town, passed away at his home last week, after a short illness. For a quarter of a century Mr. Jones conducted a hardware business, later engaging in the manufacture of dynamite, in which he became an expert. His services as an explosive specialist became so well known that he was called to Haileybury, where, for a time, he was engaged with the Haileybury Powder Company.

Absorb Brantford Company

Brantford.—Controlling interest in the Brantford Emery Wheel Co. has been secured by the Waltham Grinding Wheel Co., Waltham, Mass., and the local company, which has been in operation for ten years, is absorbed by the big United States concern. The latter has an established Canadian trade at present, and it is expected that the production of the local plant will be increased. Col. Frank A. Howard will remain here as managing director.

Will Reside in Sydney

Sydney, N.S.—Official announcement is made that Edward P. Merril has been appointed general manager of the Dominion Iron & Steel Company and the Dominion Coal Company. Mr. Merril will reside in Sydney and will be in charge of all the operations of the two corporations and their subsidiaries. He has been a frequent visitor here for several months past, and has been understood to be an expert adviser to the interests behind the negotiations which have led to the creation of the British Empire Steel Corporation.

Newmarket on Daylight Saving

Newmarket.—In accordance with a proclamation issued by the Mayor, daylight saving is in effect here and will continue in force until September 4.

Brampton Hardware Stores Close Wednesday Afternoon

Brampton, Ont. — W. E.. Anthony; Brampton Hardware;; J. A. Henderson; White Hardware, have agreed to close Wednesdays at 12 noon during June, July and August, except where a regular holiday occurs in the same week.

Delegate of Automotive Equipment Assn. Goes to Paris

F. B. Caswell is en route to Paris to attend the International Chamber of Commerce meeting, which opens June 20th. Mr. Caswell is going to this meeting as a delegate of the International Automotive Equipment Association.

He is general sales manager of the Champion Spark Plug Company of Toledo, and vice-president and general manager of the Champion Spark Plug Co. of Canada, Limited, of Windsor, Ont.

Accompanying Mr. Caswell on his trip to Europe is R. R. Brown, who will represent the interests of the Champion Spark Plug Company of Canada, Ltd., in England.

Openings in Canada for British Firms

At a general meeting of the Toronto Branch, Canadian Association of British Manufacturers and their representatives, Mr. F. W. Field, British Trade Commissioner in Ontario, spoke of the close co-operation between the Association and the Trade Commissioners in Canada. "There are about 1,200 United Kingdom firms represented in Ontario," said Mr. Field. "The opportunity for United Kingdom trade in this market is good in a number of lines, despite the competition of foreign companies. Given aggressive treatment by the British manufacturer, this market will undoubtedly yield a substantial volume of business, as it has done in the past."

Improvement in Freight Movements Slower than Expected

"Improvement in freight movements has been slower than expected," says "The Iron Age." "In view of the several weeks which must transpire before any approach is made to normal conditions, it is noteworthy that there is a growing resignation to this fact, with its likely salutary effect, particularly on labor. Fuel continues at the moment to be the first consideration of both mill and consumer, and naturally every effort is being made to move raw and manufactured materials."

"Delivery uncertainties have chilled buying and the few cancellations reported are not indicative of any cessation in demand. Steel plates and structural material are easier, in part the result of diminished building operations in relation to large producing capacity, but marked firmness is noted in pig iron, in semi-finished steel, and in several forms of finished steel in which there has long been a pronounced scarcity, notably tin plate, of which it is predicted the supply will be 50 per cent. short of the needs."

Canadian Explosives Acquires New Company

Montreal.—A deal by which Canadian Explosives. Ltd., will secure possession of Dominion Copper Products Co., Ltd., has been arranged, and all that now is required to complete it is the sanction of the Copper shareholders, a special meeting of whom has been called for June 7.

The proxies are made out in the name of G. H. Duggan, H. H. Vaughan, F. L. Wanklyn and A. J. Brown, K.C., directors of Dominion Copper Products, and also prominent members of the board of Dominion Bridge Company.

It will be recalled that Dominion Copper Products was one of the subsidiaries created by Dominion Bridge interests during the war in connection with the handling of large orders for ammunition, the company being specially designed to supply the copper cases for certain classes of ammunition.

Cutlery Firms Amalgamate

A press report from England states that some cutlery manufacturers have formed what will be known as the British Cutlery Research Association. It is stated that manufacturers feel that this association will prove of great value in consolidating manufacturing of cutlery lines, particularly as mass production is contemplated. It is further reported that it has been formed under a Government subsidy plan. In addition to this the trade will arrange, it is said, to raise a fund itself.

Inquiries made of outstanding cutlery men of Montreal reveal the fact that while this association has been formed it is much more limited in scope than first reports indicated it would be. It appears that certain difficulties have arisen and that the association thus far is of a very limited nature.

Woolworth Sales

New York.—Sales of F. W. Woolworth Co. are estimated at $140,000,000 for the full year of 1920, an increase of nearly $21,000,000 over 1919. This is based on sales for the first four months, which were 17.41 per cent. greater than the same period of last year.

Business of this volume would bring aggregate sales since the formation of the company, in 1912, to about $825,000,000, or an annual average of $91,400,000 for the nine year period. To the end of 1919 the annual average was $85,553,616.

S. M. Ward Honored on Eve of Marriage

S. M. Ward, trade sales manager of the Canada Paint Company, Limited, Montreal, was honored on the eve of his marriage on Wednesday last, June 2nd, to Miss Mary Finnie of Montreal, by the office and sales staffs of the firm. This expression took the form of a presentation to Mr. Ward of a fine cabinet of silver, suitably engraved. Mr. and Mrs. Ward will reside in Montreal after returning from their honeymoon, which is being spent in New York.

Steel Mfrs. Weigh Outlook From Operating Standpoint Only

"As the return of normal operating conditions remains so problematical, some readjustments to a further period of fractional production of iron and steel are beginning to appear," says "The Iron Trade Review." "The action of a large Youngstown steel interest in reducing its clerical force 20 per cent. suggests that actual retrenchment is receiving attention by some managements. These measures are not due to a lack of orders, or of a large, unsatisfactory demand, but rather in spite of them, since unfilled obligations are heavy. Manufacturers confronted by suddenly distorted costs, especially in fuel, are weighing future prospects wholly from an operating, and not from a trade standpoint."

"Conditions Were Never More Unsettled"

The attitude of Canadian banks in discouraging the employment of the country's liquid financial resources in speculation in commodities was reflected in the addresses delivered at the annual meeting of the shareholders of the Imperial Bank of Canada this week. Peleg Howland, president of the Imperial Bank and of H. S. Howland & Sons, Co., Toronto, said that there was never a time in his memory when conditions were more uncertain. Sooner or later he looked for a period of deflation. However, if it came soon he believed that it would be only temporary in view of the shortage of commodities throughout the world. He did not see that there could be any real permanent reduction in prices until real work supplied a surplus of goods.

Western Manufacturers Elect Officers

D. J. Dyson, Chairman of Prairie Provinces, Branch of C.M.A.—Discussion of Tax Application—L. C. Stephens on Transportation Committee.

Winnipeg, Man.—D. J. Dyson was unanimously elected chairman of the Prairie Provinces branch of the Canadian Manufacturers' Association at the annual meeting held in the association offices; L. R. Barrett was elected vice-chairman.

During a discussion of the regulations pertaining to the collection of taxes under the budget the opinion was expressed that returns should not be asked for from manufacturers more frequently than once a month, and it was suggested that returns could be made on the first of each month and sent in to the Commissioner of Taxation not later than the fifteenth of the month following in which the sale took place.

Another point was raised in connection with the tax made on credit sales where customers became financially embarrassed. It was felt that the tax should be the first credit.

It was decided that manufacturers would charge the sale tax of one per cent. separately on all invoices.

Asks Aid for Soldiers

A report was read from a special committee, of which T. R. Deacon is chairman, recommending that efforts be made to induce the parliamentary committee on re-establishment to give returned soldiers and sailors who have not yet been re-established in civil life an opportunity to regain their pre-war status in regard to earning power.

E. Parnell submitted a report urging closer trade relations with Australia. The branch delegates will present resolutions to this effect at the manufacturers' annual convention to be held in Vancouver.

W. R. Ingram presented the report of the finance committee and J. M. Thompson, the membership committee report.

J. O. Thorn, chairman of the special committee on accident prevention, submitted a report recommending an amendment to the Workmen's Compensation Act, similar to that provided in the Ontario act, which provides that employers may form themselves into an association for accident prevention and make rules for that purpose. The meeting held that this was desirable and steps will be taken to deal with such legislation.

Committee Named

The following were elected as the executive council for the year: W. G. Fraser, T. R. Deacon, J. O. Thorn, E. Parnell, W. J. Fulton, W. R. Ingram, F. W. Drewry, W. J. Bulman.

Committees were named as follows:

Executive Committee

A. Davidson, N. W. Warren, C. F. Creighton, H. Echlin, E. F. Hutchings, H. Bell, W. T. Kennedy, W. A. Lawson, J. R. Hitchings, L. R. Baker, W. R. Milton, Major Rogers, A. B. Stovel, J. W. Ackland, G. Malcolmson, J. H. Parkhill, M. F. Christie, D. Dingwall, E. B. Reynolds, W. J. Welton, C. E. Lewis, Wm. Martin, R. A. Rogers, E. G. Parkers, T. Fernie, A. G. Hall, F. Shea, G. Stewart, G. H. Campbell, J. M. Horn, L. A. Willson.

Transportation Committee

W. R. Ingram, chairman; L. C. Stephens, J. Cameron, N. J. Breen, D. A. Clark, E. G. Parker, Wm. McKay, C. F. Roland, J. Minhinnick, P. Shea, A. Dobbs, A. E. Donavona, D. Dingle, D. Bowman, J. L. Costello.

Membership Committee

J. M. Thompson, chairman; C. E. Harvey, J. L. Costello, B. E. Windrum, A. Davidson, W. H. Brett, J. L. Paul, I. A. Turnbull, W. A. Church, H. Hutchings, C. F. Roland, P. G. Grout, A. L. Welton, G. W. Murray, W. T. Kennedy, T. Moore.

Insurance Committee

H. B. Lyall, chairman; C. C. Wardrope, J. Horn, W. Wood, D. N. Finnie, G. W. Veysey, J. S. Henderson, P. J. Smith, D. A. Harp, H. L. Wilson, Major Ackland, Wm. Martin.

Appreciate Assistance of Trade Paper

Winnipeg.—At the recent annual meeting of the Canadian Credit Men's Trust Association, Ltd., the following resolution was passed:—

"That the members of the Canadian Credit Men's Trust Association, Limited, representing the wholesale trade throughout the Dominion, in annual meeting assembled at Winnipeg, desire to express to the daily press and trade and financial journals of Canada their appreciation of the interest shown in and assistance given to the furtherance of the work that the association is doing for the improvement of business conditions throughout Canada."

Electrical Conference in Vancouver

VANCOUVER, B. C.—Celebrated electricians from all parts of Canada and the United States gathered here last week to attend an electrical conference. Among the subjects dealt with was "Electrical Merchandise," by Q. H. Caldwell, editor of the paper of the same name: "Conditions in the Electrical Business 20 Years Ago," by F. T. Copes; "Why I'm Here," by H. J. Kirkland, general manager of the American Conduit Company, and "How the Electrical Industry of the West Impresses Me," by M. K. Pike, Northern Electrical Company, Montreal.

Newsy Notes From Here and There

Toronto.—The retirement of Miss Lilian King from the service of Benjamin Moore & Co. Limited, prompted several presentations during last week. Advantage was taken of the visit of the president, L. P. Moore, on Thursday, to call the factory and office workers together and thus publicly acknowledge Miss King's loyalty and her faithful service for the past fourteen years.

* * *

Toronto.—L. P. Moore, president of Benjamin Moore & Co. Limited, accompanied by W. P. Talbot, director, visited the Toronto plant during the week of May 29th.

* * *

Montreal.—The marriage of Douglas Whittaker, assistant to the managing director of the Sherwin-Williams Company of Canada, Ltd., to Miss Ballantyne, was celebrated quietly in Montreal on Wednesday last. Mr. and Mrs. Whittaker left for New York, and on their return will reside in Montreal.

* * *

Montreal.—H. Stewart, Montreal general manager of Gourock Ropework Export Company, is leaving shortly for an extended trip to the Old Country. Mr. Stewart will visit Glasgow and other cities, and will spend considerable time in Belfast.

* * *

Montreal.—Harry E. Haynes, representing the Amalgamated Savage and Stevens Arms Companies, was in Montreal this week calling on the trade. Mr. Dery of Canada Needle & Fishing Company, Toronto, Ont., was in Montreal this week calling on the trade, and was accompanied by Mr. James, of England.

* * *

Montreal.—Mr. Albinson, of Russill-Erwin Manufacturing Company, was in the city this week, having succeeded Mr. Bowman, who formerly covered this territory. W. H. Newton, manufacturing sales manager of the Canada Paint Cmpany, spent last week in Ontario. A. C. Cuaig, manager of Dominion Linseed Oil Company, Ltd., Montreal, returned this week from two weeks' visit to United States points.

* * *

Montreal.—Col. Robert Starke, vice-president of the Canadian Wholesale Hardware Association, was one of the delegation who visited Sir Henry Drayton, Minister of Finance, in connection with the resolution presented to the Finance Minister regarding the budget. Geo. C. Davis, managing director Frothingham and Workman, Ltd., was in Ottawa this week attending the special conference of the Wholesale Hardware Association in connection with the budget. John W. Richardson, buyer for Caverhill, Learmont and Co., Montreal, is away on holidays.

Fort Saskatchewan, Alta.—R. Bunyon, formerly of Lloydminster, Alta., is now chief clerk for A. M. Carscadden, hardware merchant, Fort Saskatchewan, Alta.

* * *

Wetaskiwin, Alta.—Balsillie Henderson Company have just recently added a stock of hardware to their regular business.

* * *

Wetaskiwin, Alta.—Roulstone Bros., hardware, have recently put in a new system for handling paints and stoves. Instead of having the paints and stoves in the main store, they have built a partition dividing this department from the store.

* * *

Edmonton, Alta.—V. W. Beans, 10543 97th St., Edmonton, recently purchased the block his store has been located in for the past year. It is a two-storey brick building, with two store frontage. He intends making alterations immediately to have another entrance on the side street and installing tanks for gasoline and oils.

English Fishing Tackle Manufacturer on Visit to Canada

Mr. Thos. Tulley, of Riverside, Ill., representative of Messrs. Ludgate, Ryder, Thomas & Co., fishing tackle manufacturers of Redditch, England, was a caller at the office of HARDWARE AND METAL last week. Mr. Tully is making a tour of the Eastern States and expects to make a trip through to Canada early in August.

Early in the year Ludgate, Ryder Thomas & Co. had a very disastrous fire, but they are gradually recovering from its effects.

A factory has been built at Broomsgrove, 7 miles from Redditch, where girls of 14 years of agge are being taught the fine arts of tackle making. These girls are later transferred to Redditch.

The firm has reconstructed their old factory at Redditch and have built new additions, and hope soon to be supplying the demand for all kinds of fishing tackle.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1023. **Machinery and iron and steel products.**—An old-established firm of general importers (English) in Rio de Janeiro will be glad to hear from, and receive catalogues, etc., from Canadian manufacturers of dairy equipment, shovels and tools, railway wheels and axles, rails, hydraulic presses, wood-pulp, windmills, barb wire, wires and cables for electrical purposes; also require information as to how the goods would be shipped and freight rates.

1024. **Machinery and hardware lines.**—A well-established British firm would like to secure exclusive selling rights in the United Kingdom for road machinery, agricultural implements, barb wire, galvanized wire, wire nails, bolts and nuts, tinsmiths' wire, baling wire, corrugated sheets, wire netting, chisels, axes, picks, shovels and other hand tools. They do not wish to act as commission agents. They are ready to buy and pay cash, and will undertake to advertise in the United Kingdom. A member of the firm is now in Canada and would be glad to call on manufacturers who are interested.

1025. **Plates and steel products.**—An English firm in Rio de Janeiro wish to import from Canada mild steel sheeting and plates, rivets, yellow metal sheets and ships' bottoms, locomotives, vertical log frame saw blades, circular saw blades, band saws of all dimensions.

1027. **Aluminum mats and angles**—A London firm wish to purchase from Canada aluminium corrugated mats for running boards of automobiles and also the angles, and invite offers from manufacturers.

1028. **Black wire.**—A Bristol firm wish to purchase 100 tons of black wire for making machine-made wire netting according to the following specifications, and invite prices from Canadian manufacturers who can fill orders promptly: 16½, 10 tons; 17½, 16 tons; 18½, 10 tons; 19½, 60 tons; 20½, 7 tons; 22½, 3 tons.

1029. **Wire nails.**—A Liverpool firm ask to be placed in communication with exporters of the above.

1030. **Enamelled ware.**—A Manchester firm inquire for manufacturers of enamelled ware open to appoint a representative in the north of England.

1037. **Electrical supplies.**—A business firm in Perth, Australia, would like to get into communication with manufacturers of electrical supplies who are prepared to export to Australia.

1041. **Forks, spades, churns, washing machines.**—A company in Ireland ask for the addresses of Canadian manufacturers of manure forks, spades, churns, cedar churns, tubs, washing machines, and wooden goods generally.

1044. **Pig-iron.**—A Scotch firm contemplate importing Canadian pig-iron, and would be glad to hear from the principal Canadian manufacturers.

1045. **Hoop iron.**—A Bucharest firm is desirous of receiving quotations from Canadian firms in a position to supply hoop iron for export to Roumania. Detailed specifications on application to Commercial Intelligence Branch, Department of Trade and Commerce.

1046. **Steel rails.**—A firm in Bucharest, Roumania, desire to receive quotations and terms of payment on 15,309 tons of steel for street railway. Further particulars as to specifications and financial terms on application to Commercial Intelligence Branch, Department of Trade and Commerce.

1047. **Chemicals, hardware, tools and textiles.**—An important firm at Christiania would like to secure agencies for the Scandinavian market of Canadian manufacturers of chemicals (wax cerecin, etc.), hardware, tools and textiles.

1054. **Enamelware.**—A correspondent at Cork reports a great market in Ireland for Canadian-made household enamelware.

Hardware Letter Box

Oulett Manufacturing Co.

Cochrane Hardware Limited, Sault Ste. Marie, Ont. Please furnish us with address of the Ouellett Mfg. Co., manufacturers of piano cream.

We are unable to locate any polish manufacturers under this name. Could any readers of HARDWARE AND METAL forward this information?—Ed.

* * *

Poultrty Fence

Geo. D. Dahmer, Esq., Conestogo, Ont. —Would you kindly inform us the name of the manufacturer of the Blue Ribbon Poultry Fencing, and also who handles this line?

The name of the manufacturer is the Keystone Steel & Wire Company, Peoria, Ill., and is handled through the following jobbers:—Rice Lewis & Sons, Limited, Toronto; H. S. Howland, Son, Co., Toronto; J. H. Ashdown Hardware Co., Ltd., Winnipeg; Merrick-Anderson Co., Ltd., Winnipeg; Marshall-Wells Co., Ltd., Winnipeg; Wood-Vallance, Ltd., Winnipeg; Whites Limited, Collingwood, Ont.; Wood, Alexander and James, Hamilton, Ont.; Lewis Bros., Ltd., Montreal; Caverhill, Learmont & Co., Montreal; Frothingham & Workman, Montreal.—Ed.

* * *

Primus Gas Stove

Verwood Hardware Company, Verwood. wood, Sask., Could you kindly give us the name of the manufacturer of the Primus Gas Stove, and also name of Canadian agent?

Christopher Collins, Limited, Birmingham, England, manufacture a gas stove of this type called the Primus. We do not know of any agent handling this line in Canada, although we understand it is handled by some jobbers.—Ed.

* * *

Revolving Nail Bins and Store Fixtures

E. A. Burden,, Truro, N.S.—Please forward names of manufacturers of revolving nail bins and store fixtures.

Cameron & Co., Queen St. East., Toronto; Jones Bros. & Co., Ltd., Adelaide St. W., Toronto; Kent McClain, Carlaw Ave., Toronto; Canada Show Case Co., King St. W., Toronto; The Duluth Show Case Co., Duluth, Minnesota; Warren Mfg. Co., Chicago, Ill.; American Bolt & Screw Case Co., Dayton, Ohio; Hobart Bros., Troy, Ohio; Eclipse Mfg. Co., Welston, Ohio.—Ed.

Cobourg Reverts to Standard Time

Cobourg.—As no other town between Toronto and Kingston has adopted daylight saving, Cobourg has decided to revert to standard time on June 7. The town council reached this decision at its regular meeting this afternoon.

Catalogs and Booklets

SLATER & BARNARD LTD.

A very attractive catalogue has been issued by Slater & Barnard Limited, Hamilton, Canada, which they call their catalogue No. 12. The new catalogue is well illustrated and contains 74 pages, which shows a full line of tee and strap hinges, screen door spring hinges, wrought safety steel hasps, chest handles, trap door rings. Door track and hangers and many different styles for barns and garages, as well as house parlor door hangers and other special hangers, are also illustrated. Barn door latches, stay door fixtures, fire door fixtures, as well as store ladders and other fixtures, are also shown. The latest discount also accompany the catalogue. Readers of HARDWARE AND METAL may have one from the above named manufacturers on request.

* * *

WOOD-VALLANCE LTD.

A new catalog of automotive equipment has recently been issued by Wood Vallance Ltd., Winnipeg. It is a well-illustrated catalog of over three hundred pages, containing much color work to better illustrate the accessories listed. The design of the cover shows a roadway with an automobile, motorcycle, truck, tractor and aeroplane in view, indicating that equipment for them can be supplied in addition to necessaries for garages and machine shops. The index covers both regular and Ford equipment. Items used in connection with the latter are plainly marked "F." Garage equipment and replacement parts are all shown in separate sections.

Special attention has been paid to listing specification charts covering the following lines: Proper bulbs for automobiles and trucks; specification charts on ignition, coil replacements, pyramid, automobile brush, specification storage battery, specification carburetors, automobile fuses, clutch facings, piston rings, fanbelts, bumpers, rim equipment, seat covers, radiator hood covers, mixing formula for non-freezing liquid, automobile spring, etc.

Also illustrated and properly listed are all replacement parts for Ford cars.

A large assortment of vulcanizing and storage battery equipment, welding, lead burning and brazing outfits are also shown.

The tool section has a wide variety of tools necessary in the shop, including wrenches of every description, service tools, tire repairing and vulcanizing tools, shop equipment of every description.

It has been the aim to make the catalogue not simply a reference book, but to arrange the goods and describe them so as to impart a more complete knowledge of the articles themselves, and in this way help the hardware store handling accessories and the garage man to pick out lines that will readily sell and simplify his ordering.

ON THE TRAIL OF THE PROFITEER

—Reynolds in Tacoma "Register."

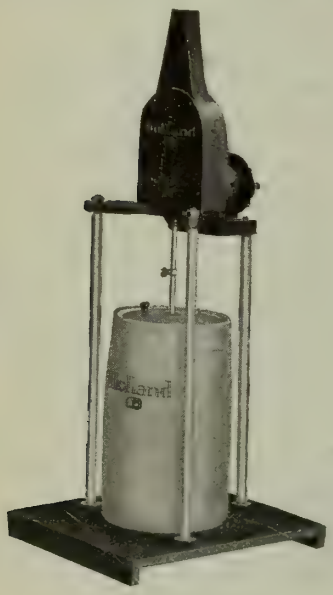
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

ELECTRIC BUTTER MAKER

The Holland Manufacturing Co., 129-131 North Wells St., Chicago, are offering to the Canadian trade their new improved Electric Butter Maker, which they state is operated on the stick and dash principle, the application of an electric motor to the mechanism operating the dasher, giving a steady, forceful and constant stroke.

Safety is also one of the principal features, they state, and claim that this is made possible by all gearing and other moving parts being enclosed, thereby eliminating any danger to the person or clothing.



Electric Butter Maker

They also state that the churn complete with motor weighs only 60 pounds and may be readily carried from place to place as desired. The earthenware vessel may also be easily removed from the mechanism at any time for filling, cleansing or removing butter.

The manufacturers give the following description: The base of the churn is stained wood, supporting three iron uprights, which in turn support the driving mechanism mounted on a T-shaped base. Suitably located on the base are three pins which keep the earthenware container in proper place.

The container is a double-glazed stone jar with suitable side handles, making it easily handled and cleaned. It has a close-fitting top, rendering it impossible for cream to splash out.

The dasher includes a dash rod of aluminum, which eliminates rust or corrosion and is easily kept clean. The dasher blades are of maple, forming a cross, with an opening in each section which assists in working the cream.

The driving mechanism, base plate and casing are of iron, with one side easily removable for access to gears. The gear mechanism is directly connected to a 1/12 H.P. motor.

The machine is designed for home use and will churn from one-half to three and one-half gallons at a time. It can be equipped with motor, either for 110 volts alternating current or direct current, or 32 volts direct current. Suitable conducting wires are furnished which can be attached to any ordinary lamp socket or electric plug. The shipping weight is 75 pounds.

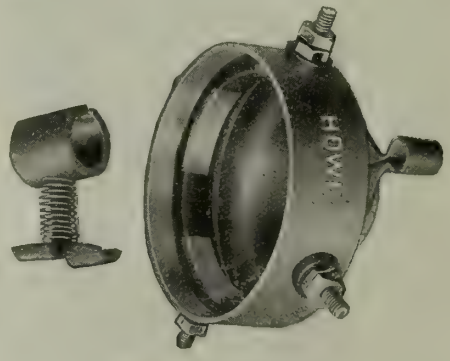
———

TIMER FOR FORD CARS

The Howe Lamp & Manufacturing Co., 115-123 E. Ontario St., Chicago, Ill. are offering to the Canadian trade their new timer for Ford cars, which, they state, is an entirely new achievement in timing devices, being practical, simple, and free from complicating delicate parts.

Formerly the use of too much, or not enough oil, and the wearing out of pins, rollers, etc., caused considerable trouble; this they claim is all eliminated in the new timers.

The manufacturers describe their new product as follows: No oil is necessary in the operation of the timer, therefore no cold weather congealing is possible. This makes it unnecessary to crank the car many times before the oil and grease becomes heated or softened so that a contact may be made. The shell is made of heavy gauge stamped steel and is finished in nickel plate. The insulating fibre is bone-hard, natural seasoned fibre. The steel contact fingers are unusually long, and are well machined and trued up with the fibre surface. The distributing finger or contact assembly which is attached to the timer shaft of the car, is composed of only three parts, The first section of the contact shoe cleans the surface of the segments. It then closes the circuit and passes a long, hot spark. This contact shoe and the long segments are made of hardened steel.

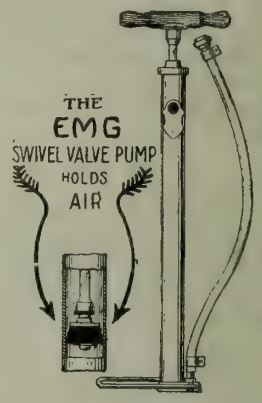


Timer for Ford Cars

———

SWIVEL VALVE TIRE PUMP

The E. M. Grant Mfg. Co., Ethbridge, Tenn., are offering to the Canadian trade their new swivel valve air pump, which they state is especially constructed on scientific principles and is particularly designed to hold air.



Swivel Valve Tire Pump

The manufacturers claim that in the construction of their pump the barrel is made of heavy 18 gauge steel tubing and is finished in Brewster green enamel. They also point out that considerable attention has been paid to the leather pump washer, which they state is oil treated in a special manner, which permits the pump to be used after a long idleness without impairing efficiency.

The swivel valve that is used in connection with these pumps is also said to greatly add to its convenience and efficiency. The pump is made in three sizes. No. 1 has a 1¼ inch cylinder with a 20 inch stroke. No. 2 has a 1¼ inch cylinder and has a 24 inch stroke and the No. 3 has a 1½ inch cylinder which allows a 20 inch stroke.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

HIGHER prices continue to be made on hardware commodities and many important hardware lines have been revised upwards this week. Wood screws have been marked up approximately 10%. Silver flat ware masons' lines, cow bells, hose nozzles and couplings, gun sights, stove pipe polish, automobile is also higher in price. Cutlery, chalk and oils, keg blanks, waxes, boiler tubes, roofing, building paper, carpet and tarred felt, carriage heaters, stove pipes and stove pipe elbows, scythe snaths, and hammers of some makes have all been revised upwards.

The new luxury tax has caused some confusion in hardware stores regarding the necessity of a tax on certain lines and some merchants are protesting against being required to assume the one per cent. Turnover Tax, on the grounds that they stand to lose considerable on the yearly turnover through the loss of the fractional amounts on small articles. The luxury tax may also make a difference on the sales of sporting rifles and ammunition, etc.

Jobbers state their stocks are daily becoming depleted and replenishments are coming in very unsatisfactorily, on account of the drawback manufacturers are experiencing for lack of raw material.

Collections are coming forward freely, although financial institutions have tightened up considerably on loans.

MONTREAL MARKETS

MONTREAL, June 3.—Of interest are the changes of the week, and which are quite numerous. Papers and roofings of various kinds, as well as sheathings, are marked higher, and this is due to the continued advances for raw materials. Various cutlery prices have gone higher to the extent of ten per cent. Chalk and mason lines are advanced again, in keeping with the increases for twines of various kinds. Cow bells are higher this week. An advance is made for nozzles and hose couplings. Gun sights are higher. One line of oil mops has again advanced. Stove and pipe polishes are again higher. Various waxes, including candles, parowax, etc., are up one cent a pound. Automobile oils are higher. The luxury tax has made considerable difference in the selling prices of ammunition and rifles, although ammunition discounts are still unchanged. Key blanks are higher. Coal oil and gasoline are advanced in price, and this was very definitely forecast in HARDWARE AND METAL last week. Old material is tending to ease off as there is not much buying by the manufacturers and dealers are shipping in scrap from the country quite freely. The ingot list is rather dull, and little change, has been made. Trade is active for summer lines.

Chalk and Masons' Lines Have Taken on Advances

Montreal.

LINES.—The following prices, and which are higher than those formerly in effect, are being charged by the jobbing trade for masons' lines: No. 15, per doz., $2.25; No. 18, $2.50; No. 24, $3.50. This is for the white variety.

Chalk lines in 20 ft. hanks are selling as follows, per gross: No. 12, $5.40; No. 15, $6.60; No. 18, $7.20; No. 21, $8.40.

Papers and Roofings Again Revised Upward

Montreal.

ROOFING PAPERS.—Revised prices to higher levels are effective this week for various roofing and building papers. The following prices will be of interest: Cyclone dry per roll, $1.50; Cyclone tar, $1.60; dry sheathing, $1.05 per roll; tarred sheathing, $1.22 per roll; heavy dry sheathing, $5.45 per 100 lbs.; heavy tarred sheathing, $5.60 per 100 lbs.; rosin sized sheathing, $1.10 per roll; Surprise sheathing, $1.10 per roll; Ready Roofing, 2 ply, $2.30 per roll; Ready Roofing, 3 ply, $2.55 per roll; carpet felt, per 100 lbs., $9.00; tarred felt per 100 lbs., $5.70; pitch, $1.20 per 100 lbs.; coal tar, $8.00 per bbl.; refined coal tar, $9.25 per bbl.; shingle varnish, $9.75; roof cement, in barrels, per gallon, 50c; in 4 and 5 gallon cans in quantity, 60c; in 1's, 2's and 3's, per gallon 85c.

Ten Per Cent. Added to Various Cutlery

Montreal.

CUTLERY.—An advance of 10% is made this week for many lines of cutlery made by various manufacturers. Pen knives and pocket knives, table cutlery, butcher knives and carvers are included in the advance. More definite particulars will doubtless be forthcoming later.

Cow Bell Chimes Have New Advances

Montreal.

BELLS.—Cow bells have advanced again and are selling as follows: No. 7 per doz., $4.20; No. 6, $4.80; No. 5, $6.00; No. 4, $6.50; No. 3, $7.20; No. 2, $9.00; No. 1, $12.00; No. 0, $14.40.

Nozzles and Couplings Join in New Advances

Montreal.

COUPLINGS, NOZZLES. — Hose couplings are revised upwards this

week and are selling as follows: ½ in. per doz., $2.75; ¾ in. per doz., $3.00; 1 in., $3.50.

Canadian Gem hose nozzles are now quoted at $9.50 per doz.

Gun Sights Prices Ten Per Cent. Higher

Montreal.

GUN SIGHTS.—Revised prices to new high level are now obtaining for Lyman gun sights. The following prices are effective: No. 1, $5.50; No. 1A, $6.00; No. 2, $6.00; No. 2A, $6.50; No. 3, $1.20; No. 4, $1.80; No. 5, $2.20; No. 6, $2.20; No. 9, $1.05; No. 12, 55c; No. 20, $1.20; No. 26, $1.10.

Advance Is Made for Line of Oil Mops

Montreal.

MOPS.—New prices are being quoted by the trade on O-Cedar mops, complete with handle, as well as without handles. The complete mops are selling at $14.70 per doz. and without handles at $12.60. Extra handles are quoted at $2.10 per doz.

Stove and Pipe Polish Costing the Dealer More

Montreal.

STOVE POLISHES.—New prices are being quoted by jobbing trade for Sultana stove polish. No. 12 in gross lots are now selling at $1.30 per dozen and in less than dozen lots at $1.35.

Pipe gloss of this manufacture is selling at $2.70 per dozen, gross lots at $2.75 per dozen in less than gross quantities.

Waxes Up One Cent; Lubricants Up, Too

Montreal.

WAXES, LUBRICANTS.—An advance of one cent a pound on various waxes, such as parowax, and on candles, has been made effective. This is due to the higher rates now effective for the crude products.

LUBRICANTS.—Prices have advanced for various motor oils, several of the auto oils being considerably higher in price than they have been for some time. This increase is due to a similar basic cause.

Advances on Rifles; Ammunition Costs More

Montreal.

GUNS, RIFLES, AMMUNITION.—It is well to bear in mind that the tax on ammunition is considerable. While the present discounts on ammunition are those obtaining at the time of the budget enactment, it must be remembered that the 10% luxury tax is to be added, as well as the one per cent. war tax. This, of course, will apply to all orders filled on or after the 19th of May last.

American guns and rifles are now selling at 105% over list.

Ten Per Cent. Added to Price Key Blanks

Montreal.

An increase of 10% is effective for all kinds and styles of keys and key blanks. As the list is so very extensive it is impossible to outline any definite prices now obtaining.

Good Summer Stove Trade; Wares Are Firm

Montreal.

STOVES AND WARES.—Prices are firm on stoves. Summer oil and gasoline stoves are moving actively and are held on a firm basis. The difficulty which is now greatest is that of obtaining the necessary supplies. Stove increases, and of a substantial nature, are being forecast, and it will not be at all surprising if these come at any time. perhaps very soon.

Summer wares are in quite active demand, watering pots, refrigerators, and other "seasonables" going forward in round quantities to the dealers, who, in turn, are experiencing good business.

Increases Are Made on Oils and Gasoline

Montreal.

OILS AND GASOLINE.—"There may be an early revision upward." "An increase for refined products may come at any time." These two definite forecasts appeared last week in HARDWARE AND METAL'S market item on these products, and the changes have been since registered. Coal oil has advanced to 29 to 32c per gallon, and the undertone is strong. Motor grade gasoline has joined in these increases, and the basis for this is now 39½ cents per gallon. There is an active demand for the same.

Tax May Make No Lower Rope Prices

Montreal.

ROPE AND CORDAGE.—In view of the reduction that would naturally come through the withdrawal of the 7½% war tax on raw fibres or manufactured cordage imported, HARDWARE AND METAL is informed that operating costs have so increased, that there is little or no likelihood of the rope basis being any easier. Some have stated that the difference is negligible when these factors are figured. Present conditions in a business way are better than for some time and the movement is very satisfactory. Prices are: Pure manila, basis, 35½c; British and Beaver, 28c and sisal 22½c.

Nails Still Holding at $5.85 Per Hundred

Montreal.

NAILS AND WIRE.—Prices have remained firm on wire nails, but are unchanged. The standard wire nail basis is still $5.85, and that for cut nails $6.35. Difficulties still are met in supplying requirements of the trade.

WIRE PRODUCTS. — Considerable movement of various wire products i smanifest and there is some shortage of certain supplies. The market is steadily firm without change.

Steadily Active Sales of Most Lead Products

Montreal.

LEAD PRODUCTS.—Sales of sheet lead, lead traps and bends, and lead pipe have been fairly heavy, and the trade is absorbing quantities of these lines. There is a steady market, with no definite changes made in a quotable sense.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	List plus 30%

50-50	0 47
Zinc sheets, casks	0 16½
Do., broken lots	0 17

Not Easy to Get All Sizes Iron and Steel

Montreal.

IRON AND STEEL.—Prices have not changed in any sense on iron and steel and there has been considerable activity. Jobbers state, however, that there has been more or less difficulty in obtaining some sizes of iron in the desired quantities. Considerable tonnage of this product is being employed in the reinforcing of concrete work.

IRON AND STEEL

Iron finish machinery steel	$4 95	
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50

Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 55
Refined iron, per 100 lbs.		5 55
Mild steel		4 90

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Who Has Steel Sheets May Get Ready Buyers

Montreal.

SHEETS AND PLATES.—Prices on steel sheets have, of course, been maintained at high levels. As a matter of fact the situation is very difficult and early relief is not looked for; is doubtless impossible. The jobbing trade have certain gauges for a time, and then are sold out, while to renew stocks is really out of the question. Holders of stock may sell at good prices, with a premium paid over in many cases.

BLACK SHEETS—

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Arrival Old Metals Tends to Weakness

Montreal.

OLD MATERIAL.—Prices have been tending to sag, due, it is stated, to the receipt of supplies from country dealers, and whose shipments have been in excess of the demands of manufacturers for this class of stuff. The movement is limited at present and revisions downward are not improbable.

Dealers' Buying Prices.

Still Uninteresting Is Ingot Metal List

Montreal.

INGOT METALS.—Little interest attaches to ingots, and the importers state that the volume of trade is small, for the most part.

COPPER.—Some business is being transacted, and while the market is a trifle firmer there has been no actual advance. Electrolytic, 23½c; Casting, 23c.

TIN.—London prices have settled down again, and there has been no change of moment during the week. There has been but limited buying under the prevailing conditions of recent weeks. Local quotation still holds at 63c.

ANTIMONY.—Very dull and quite unchanged. Price 12½ to 13 cents per lb.

ALUMINUM.—Little new interest attached to this during the week and the price remains at 35 to 38c per lb.

SPELTER.—Is slightly firmer, and quoted at 11 cents.

LEAD.—Still holding at 11¼ cents per lb. There is little new in this metal.

TORONTO MARKETS

TORONTO, June 3.—The peak for higher prices has apparently not as yet been reached and higher prices continue to be made. Ready roofing, building paper, tarred and carpet felt and straw sheathing, all have again come up for further higher prices. Carriage heaters have also been marked up. Gasoline and coal oil have been advanced one cent per gallon, and the tendency is still upward. Machine oil has been marked up 4 cents per gallon. Hose bands, couplings, nozzles and lawn sprinklers are scarce. Stove pipes and stove pipe elbows, scythe snaths, 1847 silver flat ware, and boiler tubes have all been revised upwards.

Now that the real meaning and effect of the new taxation is more clearly outlined as a result of two weeks' discussion it is evident that a large number of additional sources of revenue are being located.

Freight transportation continues to be very slow, although with the lifting of the freight embargo shipments are coming to hand more readily.

Collections continue to come forward freely and business is reported excellent. Jobbers state they are having great difficulty in securing supplies, and warehouse stocks are getting very low.

Gasoline and Coal Oil Have Been Marked Up 1c

Toronto

GASOLINE AND COAL OIL.—As predicted in previous issues of HARDWARE AND METAL higher prices have again been made on gasoline and coal oil, and many are of the opinion that prices on this commodity have not as yet reached the peak and the tendency is still upwards. It is hard to state the direct factors bearing on the case as there are so many phases to the situation, and while the price on crude oil has remained firm, higher cost of refining, handling and hauling and other charges have increased, it is stated. Coal oil is now quoted at 30½c per gal. for the best grade, while the second grade is quoted at 27½c per gal. Gasoline has been revised upwards, and the new selling price to the dealer is 38c per gal.

Machine Oil Has Been Advanced 4c *Per Gallon*

Toronto.

MACHINE OIL, in line with other kindred products, has also been revised upwards. The new price is very firm and the tendency is still upwards. The black summer oil now costs the dealer 25c per gal., while the black winter oil has been marked up to 25½c per gal., being an advance of approximately 4c per gal.

Higher Prices Again Made on Ready Roofing

Toronto.

READY ROOFING has again come up for revision of prices, and new quotations are current. The Everlastic roofing is now quoted at: One-ply, $2.25; 2-ply, $2.75, and 3-ply, $3.20. The Panamoid also costs more, the 1-pdy being $2.10 per roll, while the 2-ply sells for $2.55, and the 3-ply $2.95 per roll.

Carpet and Tarred Felt, Etc., Have Higher Prices

Toronto.

CARPET AND TARRED FELT have been advanced and new and higher prices are now in effect. The heavy tarred straw now sells for $5.60 per hundred lbs., the heavy dry straw $5.45 per hundred lbs. Carpet felt has also been revised upwards and will now cost the dealer $9.00 per hundred lbs.

Building Paper Has Again Been Revised Upwards

Toronto.

BUILDING PAPER.—Some lines of building paper have again been revised upwards and stocks are none too plentiful, it is stated. The dry No. 1 now costs the dealer $1.50 per roll; the No. 2, $1.05 per roll. The tarred No. 2, $1.22 per roll, and the No. 1, $1.60 per roll. The Surprise has been marked up to $1.10 per roll.

Hose Fittings Scarce; Stocks Coming Slowly

Toronto.

HOSE FITTINGS.—There is a very great scarcity on nearly all kinds fittings for garden hose, including hose clamps, hose couplings and hose nozzles. One jobber stated that his requirements had been booked approximately one year ago, but so far he has been unable to obtain any shipments whatever, and also stated that his stocks were becoming very low.

The very favorable warm weather which has recently set in, has stimulated the demand for hose and hose fittings, and many gardens and laws are being attended to this year.

LAWN SPRINKLERS are also very stocks on hand are not nearly sufficient scarce and some are of the opinion that to cover the requirements of the trade, and little hope is held out for immediate delivery. Hose couplings are being quoted at ½ inch, $2.65; 3-4 inch, $2.95 per doz., while the hose clamps, ½ x 3, are quoted at $4.00 per gross, and the 3-4 x 3, $4.50 per gross.

New Higher Prices Made For Carriage Heaters

Toronto.

CARRIAGE HEATERS.—New and higher prices have been made on carriage heaters, and Clark's brand will now cost more money for fall booking. The No. 5B has been revised upwards to $3.60 each; the 7C, $4.40 each, and the 7B, $5.25 each.

COAL for above heater has also been revised upwards, and will now cost the dealer $1.40 per doz.

Sand Screen Prices Firm; Good Volume Moving

Toronto.

SAND SCREEN.—The demand for sand screen is said to be a very heavy one and good quantities are moving. Stocks are none too heavy, and some are having difficulty securing replacements, it is stated. The 2½ x 2½ inch mesh is quoted at 65c per yard; the 3 x 3 inch mesh is quoted at 85c per yard, and the 4 x 4 inch mesh is quoted at 85c per yard.

Garden and Lawn Hose Has Heavy Demand

Toronto.

GARDEN HOSE.—A very heavy demand is current for garden hose of all kinds, and all in the trade are enjoying a very good business. Manufacturers, however, state that hose is becoming very scarce and that they have great difficulty in keeping pace with the present demand. One manufacturer stated that he may be compelled to put his product up 250 ft. to the reel, in place of the former 500 ft., with the result that those ordering 500 ft. would only be able to secure half the quantity desired. hTe following are the present quotations:

Garden Hose—½ x 3, 14½c per foot; ¾ x 3, 19c; ½ x 4, 16c; ¾ x 4, 21c.
Corrugated—½, 23c per foot; ⅝, 26c; ¾, 29c.

Stove Pipe Elbows Have Also Been Marked Up

Toronto

STOVE PIPE ELBOWS.—New and higher prices have again been made on stove pipe elbows, the light 6 inch is now quoted at $2.75 per doz., while the 7 inch is quoted at $3.00 per doz. The heavy 6 inch is selling at $3.60 per doz., and the heavy 7 inch at $4.00 per doz., while the galvanized No. 7 is sold for $6.35 per doz.

ADVANCE ON WOOD SCREWS

As HARDWARE AND METAL goes to press it is learned that an advance has been made in the price of wood screws, the flat head iron now being quoted at a discount of 70 per cent. in place of a former 72½ per cent. discount. Round head and oval head iron wood screws have also been advanced by lowering the discount from 70 per cent. off the list to a new discount of 67½ per cent. of the present list.

7-inch Stove Pipes Now Cost Dealer $31.85 C

Toronto.

STOVE PIPES have also been marked up. The 7 inch light is now selling for $28.85 per hundred, the 6 inch heavy selling at $29.70 per hundred, and the 7 inch heavy have been marked up to $31.85 per hundred.

New Prices Made on Various Scythe Snaths

Toronto.

SCYTHE SNATHS.—As already reported by HARDWARE AND METAL scythes and smaths have been revised upwards. The new prices are now available and are as follows:—

Patent Swings, No. 00, $15.60 per doz.; No. 1, $15; No. 2, $14.40; No. 3, $13.20. Ring and Wedge, $18; No. 2, $13.20; No. 3, $12; Bush., $16.20.

Oiled and Annealed Wire Quoted at $6.15 Base

Toronto.

WIRE.—Oiled and annealed wire, continues to be a very scarce commodity, and jobbers state they have great difficutly in securing sufficient to supply the heavy demands that are being made on them. This is also practically true of all kinds of wire. The present quotation on O and A wire is $6.15 per hundred lbs. base.

1847 Silver Flat Ware Has Been Advanced 5%

Toronto.

SILVER FLAT WARE.—In line with advances in kindred commodities, the 1847 brand silver flat ware has been Star brick drills. The new price will approximately 5 per cent. over former prices.

Star Brick Drills Have Been Advanced 10%

Toronto.

BRICK DRILLS.—New and higher prices have again been announced on star brick mills, the new price will approximate 10 per cent. over former prices.

Cow Bell Prices Have Been Advanced

Toronto.

COW BELLS are also among the commodities which have new and higher prices this week. The new prices are approximately 10 per cent. higher.

Clothes Line Wire Prices Again Revised Upward

Toronto.

CLOTHES LINE WIRE.—In line with the advancing cost of nearly all kinds of wire, clothes line wire has again been revised upwards. The new prices are approximately 10 per cent. higher.

Wire Solder 1c Cheaper; Other Products Steady

Toronto.

LEAD AND ZINC PRODUCTS continue to hold at unchanged prices, although the tendency on the basic metals is somewhat weaker and is showing a sagging tendency. The demand, however, is very brisk and the large amount of building that is going up at present is stimulating the demand for lead waste pipes and lead traps and bands, etc. Solder is also moving very freely, and wire solder is 1c cheaper, the new quotation being 43c per lb.

It is not expected that any change in price will be made for some little time, it is believed, and this may be that while the raw materials are somewhat cheaper the heavy demand and high cost of manufacturing will have a tendency to keep the price steady. The following are the present quotations:—

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 44
Solder, strictly, lb.	0 38½
Solder, commercial, lb.	0 36½
Solder, guaranteed, lb.	0 44
Solder, wiping, lb.	0 36
Zinc sheets, per lb.	0 19

Boiler Tube Prices Advance

Toronto.

BOILER TUBES.—A heavy demand has set in of late and boiler tube stocks are becoming very low. This development, it is believed, is due to the embargo which has tied up freight to such an extent, and while it is true that the embargo has practically been lifted, at least in most points, the congestion is said to be so great it may be several weeks before all the cars are started and on their way to their destination.

This situation is alo affected by transportation of coal and raw material for the making of skelp. Some have it that some of the skelp mills have been closed down for several weeks, and in

the face of the heavy demand for boiler tubes and pipe, etc., has a great tendency to create a scarcity. Fair marine business is still being handled and other boilers, especially those used for heating purposes, are being overhauled so as to be ready again for the cold weather.

Jobbers state that in some cases it is necessary for them to go into the local market and pay premiums in order to get some sizes. The following prices are in a slight advance over the former, which is said to be due to the above situation:

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Corrugated Sheets Still Scarce; Prices Firm

Toronto.

CORRUGATED SHEETS.—The difficulty of securing flat sheets continues to be a great detriment to the manufacturer of corrugated sheets, who say they are having great difficulty in securing sufficient raw material to fill their orders on hand.

This situation is due mainly to the scarcity of steel and iron, although the recent freight embargo on the United States railroads has not been without its effect, and while it is true that the embargo has been lifted in many places, the congestion, it is stated, is so great that it may be several weeks before it will be all straightened out. The demand continues to be a very heavy one and the present quotations are very firm and are as follows:—

	Per 100 square feet	
Corrugated Sheets—	Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Famine for Sheets and Plates Still Prevails

Toronto.

SHEETS AND PLATES.—The famine which has prevailed on this commodity is showing little signs of immediate relief and jobbers generally state that they have no sheets to sell. Some state they have considerable tonnage in transit, which has been tied up for several weeks in the freight embargo in the United States, and that they are only able to obtain very light shipments, if any, that manage to trickle through.

Few, if any, expect to get shipments very promptly as it is believed that the congestion is so great that it may be some considerable time before it is straightened out and cars are again on their way to their destination. It is interesting to note that goods being ordered recently are coming in very promptly, and this indication that the goods ordered last will come in first may be carried out until the congestion is relieved, but which incidentally may hold up the delay of many carloads of sheets previously dispatched.

Owing to the great shortage, the following prices are quoted merely as a guide, as it is believed that very few could supply a full list of sizes, as it is necessary in many cases to pay premiums over these quotations, as jobbers often find it necessary to go into the local markets in order to secure stocks to fill their orders.

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
18 and 20	10 70	10 95	10 70	11 10
16	10 70	10 95	10 70	11 10
12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Iron and Steel Bar Prices Remain Firm; Unchanged

Toronto.

IRON AND STEEL BARS.—A big demand continues to be made for iron and steel bars of all kinds, and while it is difficult to get material jobbers state they are not losing any business on account of the mills not being able to supply them. It is believed, however, the mills are very busy and are booked up months ahead. The scarcity of coal has been a big factor in holding up production, and strikes and other labor troubles have also been a great drawback to the manufacturer, it is stated. In some cases it is believed that the mills are not accepting orders unless for long date booking as their capacity has already been reached. The present prices are firm, and no immediate change is expected. The following are the present quotations:—

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Weaker Tendency Noted for Waste Materials

Toronto

WASTE MATERIALS.—The downward sagging tendency which has been noted on scrap and waste material for several weeks has shown little change, and if anything the tendency is lower, it is stated. Dealers say they are unable to understand the present situation, and whether prices drop out or again begin to advance remains to be seen. No. 1 cast iron and stove plates, which have been very scarce for some time back, are also showing a weaker tendency, and the demand is slackening off, it is stated. It may be with the lifting with the embargo on the United States railroads that prices on these commodities will straighten and the demand again pick up, as the tying up of many industries is believed to be mainly the cause of the present situation. The following are the present prices:—

WASTE MATERIAL

No. 2 busheling	....	13 00
Stove plate, per ton	....	32 00
Yellow brass	....	0 10
Red brass	....	0 15¾
Light brass	....	0 08

Automobile tires	....	0 03
Heavy lead pipe	....	0 05¾
Tea lead	....	0 11

Some Lines Cotton Waste Marked Up 2c Lb.

Toronto.

COTTON WASTE.—Some lines of cotton waste have again come up for revision and new and higher prices are now in effect. Some of the new quotations are as follows:

Cotton Waste—White, XXX, 23c; XX, 21½c; X, 20c; XC, 18½c.

Colored—No. 1, 18c; No. 1A, 14½c; No. 1B. 12½c; No. 7, 16c; No. 8, 11c.

Tin, Lead and Spelter Weak; Unchanged

Toronto.

INGOT METALS.—Little change has been made on ingot metals this week, and while the tendency is still weak no lower prices have been made in this market.

TIN continues to hold at 60 cents per pound. Stocks are still very light.

COPPER shows no change and is still quoted at 24 cents per pound.

LEAD is also showing weakness, although no new prices have been made; the quotation remaining at 10½ cents per pound

ANTIMONY.—Stocks are none too heavy. The tendency is still weak and prices remain at 15 cents per pound.

SPELTER.—Prices show no change and the tendency is still weak, the quotation remaining at 10½ cents per pound.

ALUMINUM shows little activity, the demand being light; the price is still quoted around 37 cents per pound.

LONDON MARKETS

LONDON, June 3.—Higher prices continue to be made on important hardware lines, although some satisfaction is expressed over the fewer number of lines affected. 1847 silver flat ware has been marked up this week, the new quotation being approximately 5% higher. The wire nail situation shows little improvement. Poultry netting, screen wire cloth and kindred lines are becoming very scarce. A heavy demand is current for screen doors and windows, screen door hardware, lawn mowers, refrigerators, Paris green, paint and other spring lines. Lawn hose fittings are getting very scarce.

Business in the hardware stores has been exceptionally good during the past week. Prices continue firm. Collections are very satisfactory. Some confusion has been caused in the hardware stores regarding the luxury tax and some were not clear on what articles it applied, etc.; however, merchants are gradually becoming better informed as to the new legislation and what is required of them.

Wire Nail Situation Shows No Improvement

London, Ont.

WIRE NAILS.—Jobbers generally report a very heavy demand for wire nails and state their stocks are becoming very low with very little prospect of replenishing them in the near future. It is hard to say just yet what the mills will be able to do, as at present it is believed they are very heavily booked and it is the opinion of some that the mills will not be able to accept business for wire nails for some time to come.

Regardless of the advanced cost of building materials, many buildings are being erected and the demand for wire nails is becoming heavier instead of easing off. The present quotation on wire nails is $6.10 base while the cut nail is quoted at $7.50 base.

Poultry Netting Stocks Light; Little Coming In

London, Ont.

POULTRY NETTING.—The demand continues very heavy for poultry netting, although jobbers state their stocks are becoming very low and can see no immediate possibility of replenishing their stocks. They claim the mills are unable to cope with the present business offering. This is also true of wire nearly, all kinds, it is stated, the Canadian two-inch mesh poultry netting now being quoted at net list and the one-inch mesh is quoted at an additional 5 per cent. to the list.

Garden and Harvest Tools Still 50 and 10% Off List

London, Ont.

GARDEN AND HARVEST TOOLS.—The increasing number of gardens and lawns being kept this season has been a great stimulant for garden and harvest tools, and very large quantities are moving. The price remains unchanged. The present quotation is very firm, and is listed at 50 per cent. and 10 per cent. off the list.

Screen Wire Cloth Sales Seasonably Heavy

London, Ont.

SCREEN WIRE CLOTH continues to have very good demand and a good volume is moving. The painted black is still being quoted at $3.60 per hundred square feet and the galvanized at $4.75 per hundred square feet.

Screen Door and Window Prices Firm; Unchanged

London, Ont.

SCREEN DOORS AND WINDOWS.—The warm weather is greatly stimulating the already heavy demand for screen doors and windows and many are preparing for the fly season. Much of this class of business has already been done this season, it is believed. The following are some of the prices on some of the better-known lines:

No. 13, $4.80 doz.; 14, $5.15 doz.; 14½, $5.50 doz.; 15, $5.90 doz.; 16, $8.15 doz.; 1, $4.25 doz.; 2, $5.65 doz.; 3, $.20 doz.; 4, $6.60 doz.; 5, $7.25 doz.; 6, $7.85 doz.; 7, $8.40 doz.; 8, $9.05 doz.; 9, $10.00 doz.; 10, $12.00 doz.

Screen Doors

No. 1, grained only, $22.35 doz.

No. 21, mission style, $33.35 doz. Grained, filled and varnished.

No. 3, with brackets, $36.50 doz. Grained, filled and varnished.

No. 8, with panel, $39.35 doz. Grained, filled and varnished.

No. 9, with panel and oval, $47.40 doz. Grained, filled and varnished.

Firm Price Holds on Screen Door Hinges

London, Ont.

SCREEN DOOR SPRING HINGES.—In line with the big demand which is taking place for screen doors and windows, screen door spring hinges are also having a big sale. The present quotations are very firm. No change in price has recently been made. The following are the present quotations:

	Doz. prs.
No. 20, Japanned	$1.50
No. 7/11, loose pin	1.75
No. 50, double acting	5.45
No. 2255, sets	3.50

Screen Door Coil Springs Have Brisk Turnover

London, Ont.

COIL SPRINGS for screen doors are also having a big sale and the demand is steadily increasing. The present quotations are as follows:

Perfect, No. 2—65c doz.; No. 3—80c doz.; No. 4—95c doz.; No. 5—$1.05 doz.

Refrigerator Prices Firm; Demand Good

London, Ont.

REFRIGERATORS.—The very warm weather of the past few days has been a big stimulant to the sale of refrigerators, and all in the trade are very well satisfied with the business that is being offered. Some have it that there are more refrigerators moving this year than has been noticed for some years back. The household is being quoted at a discount of 40 per cent. off the list while the grocers' is quoted 35 per cent. off the list.

Rope Sales Brisk; Prices Remain Unchanged

London, Ont.

ROPE.—The sale of rope of nearly all kinds has been very satisfactory to nearly all in the trade, and many are looking forward to one of the biggest years that they have experienced for sometime back, and according to present indications this may be the case, it is stated. Prices remain unchanged and the following are the present quotations:

Pure manila	.35½ base
Beaver manila	.28 base
New Zealand hemp	.28 base
Sisal	.22½ base

Heavy Demand Causes Shortage of Lawn Mowers

London, Ont.

LAWN MOWERS continue to have a big sale and warehouse stocks are becoming very light, with difficulty experienced in replenishing. The quotations on some of the better known lines are as follows:

K 8 in. wheel, 3-blade—12 in., $6.55 each; 14 in., $6.80; 16 in., $7.10.

K 9 in wheel, 4-blade—12 in., $6.80 each; 14 in., $7.10; 16 in., $7.35; 18 in., $7.85.

C 10½ in. wheel, 4-blade, plain—14 in., $8.40 each; 16 in., $8.80; 18 in., $9.15; 20 in., $9.95.

BB 10½ in. wheel, 4-blade, ball bearing—14 in., $10 each; 16 in., $10.50; 18 in., $11; 20 in., $11.55.

The following figured net at 25% off list:

Daisy—12 in., $6.19 each; 14 in., $6.75; 16 in., $7.28.

Star—14 in., $8.03 each; 16 in., $8.55.

Woodyatt—14 in., $8.85 each; 16 in., $9.38; 18 in., $9.90; 20 in., $10.43.

Empress, ball bearing—14 in., $11.44 each; 16 in., $12; 18 in., $12.49; 20 in., $13.01.

Lawn Hose, Supplies Light; Big Demand

London, Ont.

LAWN HOSE also has a very good sale and a big volume is moving at pre-

sent. The present quotations are very firm and no changes have been made. Some of the present quotations are as follows:

3 ply—½ in., 14½c ft.; ⅝ in., 17c ft.; ¾ in., 19c ft.
4 ply—½ in., 16c ft.; ⅝ in., 19½c ft.; ¾ in., 21c ft.
5 ply—½ in., 18c ft.; ⅝ in., 21c ft.; ¾ in., 23c ft.
Corrugated—½ in., 23c ft.; ⅝ in., 26c ft.; ¾ in., 29c ft.
Corrugated in 500 ft. reels, less 5%.

Hose Fittings in Big Demand; Stocks Light

London, Ont.

HOSE FITTINGS.—In conjunction with lawn hose and other accessories for the upkeep of the gardens, lawns, etc., hose fittings of nearly all kinds are having a very big sale this season. The Canadian Gem hose nozzle is now quoted at $8.60 per dozen, while the Genuine is quoted at $12.75 per dozen. The following are the present quotations on hose clamps and couplings:

Clamps—½ in., 40c doz.; ⅝ in., 45c doz.; ¾ in., 45c doz.; 1 in., 80c doz.; 1¼ in., $1.50 doz.; 1½ in., $1.75 doz.
Couplings—½ in., $2.60 doz.; ⅝ in., $2.70 doz.; ¾ in., $2.75 doz.; 1 inch, $4.00 doz.

1847 *Plated Ware Has Advanced* 5%

London, Ont.

PLATED FLAT WARE.—The 1847 plated flat ware has again been advanced and this time the upward revisions amount to 5 per cent. over former prices. The new quotations, it is claimed, are a result of the higher cost of labor, raw material and many other factors that confront the present day manufacturer. The new quotations on some of the best known lines are as follows:

Tea spoons, $4.80 doz.; dessert spoons, $8.55 doz.; table spoons, $9.55 doz.; coffee spoons, $4.80 doz.; berry spoons, $1.85 each; cold meat forks, $1.15 each; butter knives, $1.00 each; pickle forks, 90c each; sugar shells, 90c each; No. 12 plain dessert knives and forks, $5.90 doz.; No. 12, table knives and forks, $6.10 doz.; No. 52, pattern dessert knives and forks, $6.45 doz.; No. 52, table, $6.80 doz.

Fence Wire Prices Have Been Withdrawn

London, Ont.

FENCE WIRE.—A very great scarcity continues to inconvenience nearly all in the trade and one jobber stated to HARDWARE AND METAL there are oftentimes when we are unable to procure even a few rolls of common black fence wire. This is significant of the wire situation throughout, it is stated, and many are wondering what the near future will show in the way of replenishing stock. The No. 9 and No. 12 galvanized, also barb wire prices, have all been withdrawn and prices are now being quoted on application only.

Paris Green Prices Firm; Demand Increasing

London, Ont.

PARIS GREEN.—The demand is gradually increasing for this commodity and all in the trade are looking for a heavy business during the season. The present prices remain very firm. No change has recently been made The present prices are quoted as follows:

½ lb. pkgs., 58c lb.; 1 lb. pkgs., 52c lb.; 25 lb. drums, 54c lb.; 50 lb. drums, 53c lb.; 100 lb. drums, 53c lb.; 250 kegs, 52½c lb.; 500 bbls., 52c lb.

Linseed Oil Prices Continue Unchanged

London, Ont.

LINSEED OIL continues to show a little change and the markets are said to be bare, and that few, if any, have linseed oil in any quantity to offer.

Usually, at this time of the year, linseed oil is around the lowest point for the ·ar. Many are hoping that this is not the case this season and are looking forward to lower prices. The present high price is solely attributed to the present scarcity of seed, and while it is true that crushers have purchased large quantities of seed, owing to the embargo and other situations which have developed, the seed has not been coming to the mills. However, it may be that this situation will soon show relief and as the seed comes in larger quantities many are hoping for the price to reduce. The present quotations are as follows:

	Raw gal.	Boiled gal.
1 to 2 bbls.	$2.87	$2.90
3 to 5 bbls.	2.86	2.89
6 to 9 bbls.	2.84	2.87

Less bbls. add 15c gal.

No Lower Turpentine Prices Have Been Made

London, Ont.

TURPENTINE.—The scarcity of turpentine continues to be causing great inconvenience to many and while importers state they have had shipments on the road for many weeks very little has come to hand. No lower prices have yet been made as was anticipated, but this is believed to be due to the freight embargo and other hold-ups which have not permitted the turpentine to arrive on this market. It may be that when the congestion which was caused from the transportation tie-up on the United States railroads is straightened out that turpentine will come to hand in better quantities and lower prices may be expected. The following are the present quotations:

	Gal.
1 barrel lots	$3.80
2 to 4 barrels	3.79
5 gal.	3.95

White Lead in Oil Has Firm Quotation

London, Ont.

WHITE LEAD IN OIL.—A good seasonable sale is being experienced for white lead in oil by nearly all in the trade, and the present prices, althougn very firm, remain unchanged. It is believed that some are looking for shortage of this commodity which they attributed to the heavy demand both foreign and domestic. However, whether this will be the case or not remains to be seen. The present price on pure in ton lots is $20.45 per hundred pounds, and less than ton lots is $20.80 per hundred pounds, while the Elephant pure is $20.95 per hundred pounds in ton lots and $21.30 per hundred pounds in less than ton lots.

WINNIPEG MARKETS

WINNIPEG, June 3.—Although some important and repeatedly advanced lines again appear for revision of price, in conjunction with the week's activities, the markets as a whole are moderately quiet on comparing same with previous weeks' changes. Metal products are again noticeably in the lead. Herewith are listed the more important of the newly revised lines, which involve Maydole hammers, spring hinges, finishing nails, plain wire, Yale padlocks, axle grease and oil, spring floor hinges, plaster Paris. Lead pipe, it is interesting to note, has declined slightly in price. An important and greatly discussed topic, is the new business Turnover Tax that is now offective, and as a result jobbers and manufacturers are required to pay one per cent. tax on all goods purchased. A luxury tax affecting the consumer has also been imposed, that it is, thought will prove an influencing factor on future prices and sales, although to what extent is difficult of conjecture. A good demand still continues on all lines, business in general, it is said, being of a very satisfactory nature, with seasonable goods moving rapidly.

Higher Revisions Made on Maydole Hammers

Winnipeg.

MAYDOLE HAMMERS. — Higher prices on Maydole hammers is the latest ruling of the markets and as a result this line shows a new advance of 15% on previous prices. Scarcity of raw material combined with increased operating costs, is said to be the chief factor responsible for the new raise. Prices now ruling on some styles are listed as follows; it may be accepted however that the raise is general and affects all styles.

Maydole Hammers. — Nos. 1, $27.00; 1½, $25.00; 11, $27.00; 11½, $25.00; 12, $23.25; 13, $20.75; 711, $27.00; 711½, $25.00; 71, $29.00; 72, $25.50; 74, $21.75; 76, $18.25; 42, $19.00; 43, $16.50; 44, $15.50 per dozen.

Spring Hinges Also Revised Upwards 25%

Winnipeg.

SPRING HINGES.—Bommer spring hinges also appear in the new revisions and are advanced 25% on old prices as a result. On reviewing the past stability and firmness of this line the new increase is to some extent to be expected, on considering the greatly advanced cost of raw material, manufacturing costs, etc., which it is said are the chief causes for the latest change. To-day's prices are quoted as follows:

Spring Hinges—Double acting, wrought steel Japanned finish, Nos. 29, $3.60; 30, $4.25; 33, $5.00; 36, $6.15; 39, $7.85. Bronze finish, Nos. 479, $4.75; 480, $5.75; 483, $6.75; 486, $8.60. Old Copper finish, Nos. 329, $4.75; 330, $5.75; 333, $6.75; 336, $8.60 per pair.

Finishing Nails Are Quoted at Higher Prices

Winnipeg.

FINISHING NAILS.—Revised prices appear for finishing nails, advancing same a further 9% on former lists, an occurrence brought about, it is said, by the present big demand for this commodity, which is being handicapped by the inability to secure sufficient replenishment of stock to meet the increasing demand. It is also said that all available stocks are being rapidly depleted, a condition that if not soon relieved to an appreciable extent, will occasion acute and serious shortage in the near future. The latest prices show:

Finishing Nails.—½ in., $0.36; ⅝ in., $0.27; ¾ in., $0.24; 1 in., $0.20; 1¼ in., $0.17; 1½ in., $0.17; 1¾ in., $0.15; 2 in., $0.15 per lb.

A Higher List Is Made on Plain Wire

Winnipeg.

WIRE.—Annealed and copper spring wire is again revised upwards, the new lists showing an average 4½% on previous lists. It is said the condition of the wire market is now at an acute stage and unless an appreciable increase to the present output is added, still higher prices are probable. The present quotations show:

Annealed Wire.—Nos. 0 to 9, $7.05; 10, $7.11; 11, $7.17; 12, $7.25; 13, $7.35; 14, $7.45; 15, $7.60; 16, $7.75 per 100 lbs.

Bright Market.—Nos. 0 to 9, $7.30; 10, $7.36; 11, $7.42; 12, $7.50; 13, $7.60; 14, $7.70; 15, $7.85; 16, $8.00 per 100 lbs.

Copper Spring.—Nos. 8 to 9, $10.86; 10, $10.93; 11, $11.00; 12, $11.10; 13, $11.21; 14, $11.33 per 100 lbs.

New Prices Are Named on Yale Padlocks

Winnipeg.

PADLOCKS.—New and higher prices appear for Yale padlocks, causing a general revision of this line and advancing same in price approximately 22%. Greatly advanced cost of raw material coupled with the present scarcity of same is said to be the chief cause of the latest increase. Owing to the wide range covered by this line only a few are listed and are quoted as follows:

Yale Padlocks.—Nos. 297, $8.00; 326, $15.00; 215, $10.00; 805, $18.50; 8454, $25.00; 813, $21.50; 863, $42.00; 873, $75.00; 853½, $36.00 per dozen.

Buffalo Axle Grease Also Advances 16%

Winnipeg.

AXLE GREASE.—In consequence of the recent upward movement of all oils, Buffalo axle grease also appears for revision and is advanced 22% as a result. The oil situation generally shows strong tendencies, and it is believed that even higher prices can be looked for at no distant date. The latest prices are quoted:

Buffalo Axle Grease.—Size lbs., 1, $1.46; 3, $3.75; 5, $7.50; 10, $13.50; 25, $33.00 per dozen.

Lubricating Grease.—25 lb. pails, $2.10.

Axle Oil.—1 pt., $3.50; 1 qt., $6.50 per dozen.

New Prices Quoted For Plaster Paris Are Higher

Winnipeg.

PLASTER PARIS prices show further revision in the week's changes, advancing this line a further 14% on old lists. The new prices appear to be of firm character, it is thought, although how long the present prices will remain in force is somewhat difficult to predict. The new prices are as follows:

Plaster Paris.—F, $6.50; FF, $6.75; Dental, $7.25 per brl.

Scarcity of Turpentine Is Reaching Acute Stage

Winnipeg.

TURPENTINE.—The situation is reported as becoming steadily worse, any supplies available being practically cut off on account of the embargo placed on all American lines, which is naturally affecting seriously all transportation of freight. A general survey shows greatly depleted stocks, and little hope is being held out on the possibility of securing further supplies of any appreciable quantity. Prices, it is expected, will shortly be showing further change of an advanced nature. Ruling prices are quoted at:

Turpentine.—Barred lots, $3.95 per gal. Cases, 2 5-gal. cans, $40.70; 1 5-gal. can, $20.45 each.

Lower Prices Now Quoted on Lead Pipe

Winnipeg.

LEAD PIPE.—In accordance with the latest market fluctuations on lead and lead products, it is interesting to note that lead pipe shows a decline of price, that if only of a moderate nature augurs well for possible future change in prices. The new prices show an approximate 8% off the old and are quoted as follows:

Lead Pipe.—$16.11. Lead Waste, $17.01 per 100 lbs.

Paris Green Holding Firm; Demand Increasing

Winnipeg.

PARIS GREEN.—Despite the lateness of the season, an increase is noted in the demand for Paris green, and it is expected will in the next few weeks show a good turnover, the demand becoming heavier as vegetable growth advances. The present listings are:

Paris Green.—1 lb. pkgs., $0.58½; ½ lb. pkgs., $0.60½ per lb.

(The above prices are for small quantities, for case lots deduct 1c per lb.)

Nail Scarcity Becoming Daily More Apparent

Winnipeg.

WIRE NAILS.—As has been previously stated, the acute shortage of standard wire nails is becoming more apparent now that building activities are well under way. Many dealers show greatly depleted stocks, while others report no stocks left at all in many standard sizes. Fresh supplies are hard to secure, it is said, and further increase of prices will evince little surprise on taking into consideration existing conditions. The ruling prices for the day quote:

Wire Nails.—Ft. William, $6.25; Winnipeg, $6.75 per 100 lbs.

Cut Nails.—$7.90 per 100 lbs.

War Tax Removal Reduces Barb Wire 20c Spool

Winnipeg.

BARBED WIRE.—A decline of 20 cents per spool has been made on barbed wire, due to the removal of the war tax, it is stated. Stocks continue light and the demand is greater than the supply in many cases.

Floor Hinges Also Take Upward Turn

Winnipeg.

FLOOR HINGES.—Matchless mortise floor hinges also advance an approximate 25% on previous lists, as a result of the activities at present noticeably af-

fecting this class of goods, resulting in new lists being quoted, which are as follows:

Spring Floor Hinges.—Matchless, Japanned, Nos. 12, $3.75; 13, $5.60; 14, $8.50. Bronze Plated, Nos. 042, $5.60; 043, $8.30; 044, $12.25. Old Copper Finish, Nos. 062, $5.60; 063, $8.30; 064, $12.25. Old Brass Finish, Nos. 052, $5.60; 053, $8.30; 054, $12.25 per set.

PITTSBURGH MARKETS

PITTSBURGH, June 3—A distinct improvement has now occurred in traffic conditions on the railroads. This is admitted by iron and steel producers generally, and as they have been quite cynical in the past as to reports and promises of improvements on the railroads their word can readily be accepted at its full import.

Of course the condition is still very bad, despite the improvement, for there is not much more than a trend in the right direction. There are better car supplies, but by no means adequate supplies. Freight is moving more expeditiously, or rather less slowly, to consignees, but there is almost as much material en route as there was, in other words several times the normal quantity, besides something like a million and a half tons of steel accumulated at mills and not shipped at all.

Production of pig iron and steel has increased only slightly. There is no great desire to increase production, it being much more important to increase shipment. Production of pig iron and steel may be estimated at close to 80 per cent. of capacity, on the assumption that the production rates in March, the highest attained since October, 1918, were 90 per cent. of capacity.

The activities of the Interstate Commerce Commission, which are chiefly responsible for the improvement in railroad conditions, have assumed a broader character. Various orders have been issued which are aimed directly at relieving congestion and improving car supply. In the matter of granting priorities for the movement of particular commodities, the commission has been very conservative. It ordered large numbers of box cars west, for the grain movement, but even after urgent representations as to the need of box cars for moving tin plate about ten days were spent in investigation before an order was issued giving a fortnight's priority to box cars intended for tin plate loading. In the case of coal there are claims and counter claims. At Washington it is claimed that orders for diversion and movement of cars have been issued such as should greatly increase the supplies of cars at coal mines, while on the other hand some Pittsburgh district coal operators express the opinion that the railroads are discriminating against the coal mines and in favor of the manufacturing industries. It is hinted, however, that this may be due not to the lack of orders on the part of Washington, but to the railroads being slow to comply with the orders.

The Pittsburgh & Lake Erie (New York Central system) is doing better. For a long time there were scarcely any operations on what used to be called "The Little Giant," on account of its density of traffic and shortness of line. From the iron and steel viewpoint it runs from Monessen, 25 miles up the Monongahela River, where are located the Pittsburgh Steel Company, Page Steel & Wire Company and National tin plate plant of the American Sheet & Tin Plate Company, through Pittsburgh and out to Youngstown. Now there is a fair amount of single car movement and a good bit of solid trainload movement on the road.

As to the rail strike itself there is not a great deal of change. A few more of the "vacationists" have returned to work, but there are not many of these men left. They are either back on their old jobs or they have secured employment elsewhere. The railroads have been breaking in new men, and on this process is their chief dependence. For a fortnight the Bessemer road has been functioning normally, after having been out a couple of weeks or so.

Canadian Prices Advanced

The Steel Corporation has advanced its Canadian prices $20 a net ton on sheets and tin plates and $2 a ton on bars, shapes and plates. Previously its Canadian prices had been the same as those charged to buyers in the United States, being the Industrial Board schedule of prices which became effective March 21, 1919. It has been the more common practice of the mills in the United States to regard the Canadian market as part of the really domestic market, rather than as part of the export market, which might preferably be called the overseas market. Inasmuch as the independent producers have been charging much higher than Industrial Board prices even to strictly domestic buyers, and of course also to Canadian buyers, the Steel Corporation was extending to Canada its efforts to hold down the steel market, and evidently has concluded that the thing went too far, particularly as British prices have been advancing from time to time. The new Canadian prices of the Steel Corporation are still much below those being obtained in overseas exports, and are as follows: Tin plate, $8 per base box, 100 pounds; black sheets, 28 gauge, 5.35c; galvanized sheets, 28 gauge, 6.70c; blue annealed sheets, 10 gauge, 4.35c; bars 2.45c; shapes, 2.55c; plates, 2.75c, all f.o.b. Pittsburgh, plus freight to destination. It cannot be assumed that the advance in Canadian prices foreshadows any advance by the Steel Corporation in the domestic market.

Stagnant Markets

All branches of the iron and steel market are extremely quiet, practically stagnant. Some of the independent producers state that they are in receipt of a very considerable volume of inquiry, but there is reason to suspect that the inquiry results from the conservative attitude of the mills as to making sales, whereby an inquiry is multiplied in importance by going the rounds. Much of the inquiry, probably, is of tentative character, put out to see whether the independents will recede from the prices they have been maintaining of late, since many consumers are looking for an eventual recession of the independent market to the Steel Corporation level. The independents are quite indisposed to cut prices, and perhaps they are strengthened in their views by the very fact that large quantities of unshipped steel, made on order, have accumulated. As the railroads limber up and this extra steel goes forward, it would be awkward if the customers developed an indisposition to take all the deliveries. Naturally the mills desire to clear off their order books as far as possible before any actual recession occurs in open market prices.

As to prompt deliveries, however, there is clearly a recession in price. Prompt deliveries were bringing so much more than the prices charged by large independents for deliveries in, say, two to five months, that this weakening has no particular effect upon the forward market.

There is a very involved situation in pig iron. On the surface prices show an advancing rather than a receding tendency, but the only market that exists is the prompt market, and it is one thing for prompt deliveries in small lots to command full prices, or even advanced prices, and quite another thing for consumers to be taking hold for late deliveries, say for the second half of the year. The latter they certainly are not doing. On small sales Bessemer is established at an advance of 50c, at $43, valley, basic remaining at $43.50, valley, and foundry at $45, valley. Freight to Pittsburgh is $1.40.

The coke movement is better. The by-product ovens are getting more coal, and as to the Connellsville region, the Connellsville *Courier* reports coke production in the week ended May 22 at 178,250 tons, an increase of 23,850 tons. Better car supplies since then suggest that the present rate of production is still higher.

U.S. Immigration to Western Canada

Canadian National Railway officials state that an average of 100 United States families a week are passing through Winnipeg to settle in Western Canada. Each family averages four persons, and has about $5,000.

Paint and Varnish Specialist Comes to the Front

"Age of Specialists" Applies to the Paint Department—Varnish Trade Important Factor in Developing Business From Local Building—Traveller and Dealer Visit Prospective Customer, Figure Costs and Get Substantial Paint Order—One Dealer Watches Farm and City Property Listings

A POINT raised by a hardware dealer at the recent "Save the Surface" convention in Toronto, was that in his opinion varnish was not receiving as much attention in the publicity being done as was paint. It was pointed out that varnish was receiving attention in due proportion to the amount sold as compared with paint, but the question brings out the point that in a great many stores the possibilities for developing varnish trade are somewhat overshadowed by reason of the fact that paint is the line which receives first attention.

Paint and varnish are too closely allied for the paint dealer to regard them with divided interest. They belong together naturally and their united business—bringing ability is worth cultivating. Therefore the same care should be exercised in selecting a stock of varnish as in sorting up a stock of paints and brushes or other painters' sundries.

Many dealers who are well posted on the various brands of paint know comparatively little about varnish. An established varnish trade is a valuable asset for the paint dealer—too valuable to be risked by putting in a stock of cheap varnishes which will hold only a temporary trade. Properly handled, the varnish trade need not be looked upon as a side line, but can be fostered and developed to an important department. Every salesman in the store should be as well posted as to the use of varnish as he is on paints, and in all the store publicity in the form of posters, window cards and local advertising, varnish should be linked up with every mention of paint.

A varnish stock should include a good interior finishing varnish, a medium quality varnish for general interior work; a good exterior varnish; a good floor finish; spar varnish; shellac varnishes and reliable equivalents for them.

There are also numerous varnish sundries for which there is a steady demand, including stains, stain finishes, enamels, automobile color varnishes for refinishing, etc. In keeping track of local building operations and making effort to secure paint business from such sources, varnish trade should also be kept in mind as it is a very important phase of trade in the paint and varnish department.

An Age of Specialists

The past ten years have seen a great many changes in retail business and today in practically every department of trade, it is the specialist who is coming to the front.

The hardware dealer who specializes on paint and varnish is the leader in his community in sales of these commodities, because he concentrates his efforts to increase sales of those products and he is winning out. Paint dealers are now becoming fully alive to the necessity of employing special efforts to boost sales and the custom of waiting for a patron to call for a few gallons of paint for the barn or the house, taking for granted that the consumer knew what he wanted and when he wanted it, has gone into the discard.

To-day it is the man who goes after the business who gets it.

Traveler Tries It Out in Ontario District

Illustrating this point, a traveler for one of the Canadian paint manufacturing companies made the statement at the recent convention in Toronto that following the making of this suggestion at the convention in Montreal, and while en route from Montreal to Toronto, he stopped off at a town of some 3,000 population and called upon a hardware dealer who was a customer of his. He asked as to the possibilities for getting business in the surrounding district by going out after it. The dealer was not very sanguine over the prospects, but agreed to go out through the rural district with the traveler to see what could be done.

After talking for some time with a farmer, the traveler and local dealer succeeded in getting the farmer to realize the importance of painting his house.

On casting his eye over the other farm buildings, the traveler remarked:

"How about painting up the barn as well?"

"Oh, no," replied the farmer, "That is an old building in a poor state of repair and I am planning on building a new one."

This information gave the traveler something to work on and he immediately set to figuring what it would cost the farmer to construct a new building.

This figure he compared with an estimate of what it would cost to put the barn in a good state of repair and have it thoroughly painted for preservation. The result was so much in favor of the latter plan that thirty gallons more paint was sold to paint the barn.

Warped Board Caused Much Damage

Another traveler told of how he had seen a house which had been considerably damaged because of the warping of a board in the roof cornice through lack of paint. The expense involved in repairing the cornice and resultant damage was more than it would have cost to paint the house twice.

The underlying idea of these illustrations is to show that there is a broad field for business for the specialist who realizes the potential value of his local district, from the standpoint of paint requirements, and goes out after this trade. By making suggestions and doing a little figuring, the houseowner or farmer may be quickly shown that it is very much in his interests to paint up.

The fact that every property owner will at some time need paint for his buildings is a fact that should not escape the paint dealer, and suggestions from him will go a long way toward helping a customer to decide what he wants and when he wants it.

Launching Clean-Up—Paint-Up Campaign

A number of Canadian cities and towns have launched Clean-Up and Paint-Up campaigns with varying degrees of success. Such campaigns require careful study of local conditions. Spring is the logical season to start the paint campaign, because then the clean-up fever is at its height, but the campaign can be kept up all summer with satisfying results.

Information as to the way the paints handled are manufactured, the materials used, the purposes for which each number is intended, how to treat old lumber, waxy lumber, rough walls, shingle roofs, should be secured from the manufacturer before such a campaign is put on. Various kinds of surfaces have to be dealt with by different customers, and they will all want such information. Information of this kind is filed by some dealers for reference on short notice. A little study by store clerks will put them in position to tell the customer the proper way to go about preparing a surface without referring to the file, and the trade will develop confidence in the store and its salesmen.

Planning the Campaign

In carrying out such a campaign the following plan was adopted successfully by a hardware dealer.

A number of cards were printed with the wording:

TO MY LITTLE FRIENDS

Take this card home and have your father help you fill it out, taking care to

(Continued on page 68)

Mooramel

A PERFECT WHITE ENAMEL

Made in GLOSS and EGGSHELL White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

MOORAMEL works easy, has perfect flowing properties, ENDURING whiteness and other qualities which make it the EXCELLING ENAMEL. It is without any question the most practical and also the most economical article of its kind ever manufactured.

MOORAMEL can be used with equal good results on either INTERIOR or EXTERIOR work and can be cleansed with soap and water as often as necessary without any injurious effects.

MOORAMEL SELLS AT A REASONABLE PRICE

MOORAMEL like all other MOORE PRODUCTS sells on its MERITS. We do not ask our Dealers to pay high prices to help pay the cost of EXPENSIVE and INEFFECTIVE advertising. We depend on QUALITY and PRICE to sell our products.

This is only one of the answers to the questions so often asked—

? HOW CAN MOORE'S SELL HIGH GRADE PAINTS AND VARNISHES AT PRICES SO MUCH LOWER THAN OTHER MANUFACTURERS ?

Write us for details of our splendid agency proposition and we will give you further reasons why we can do it.

"Save the surface and you save all"—*Paint & Varnish*

The Brush Department

The Outlook in Brush Manufacture

Bristles Bought in Primary Markets at Sharp Advance—Keen Paint Brush Demand—Difficulty in Getting Hardwood—Stocks Low Throughout the Country

"PRACTICALLY all supplies of bristles in the primary market in China, available any time this year, have been contracted for at prices very sharply in advance of anything previously paid on record," said L. W. Simms, president of T. S. Simms & Co., Ltd., in discussing the brush situation with HARDWARE AND METAL. "Considering the length of time necessary for these goods to reach this country and find their way into brushes, this means that the bristle trade and the manufacturers that have made these purchases are convinced that the supply is inadequate to meet anything like normal demand, and that these values have been established for a period extending into the early fall of 1921.

"Spot stocks in London and New York are very small, we are informed, but these markets are somewhat quiet at the present time, due to the fact that the manufacturers have temporary supplies and are doubtless affected by a cautiousness due to the wave of price-cutting in other commodities that has taken place, particularly in seasonable goods in the clothing line.

"This caution is displayed in spite of the fact of a keen demand for brushes, particularly in the paint brush line.

Lumber Situation Acute

"Regarding lumber, we are of course more closely in touch with the lumber situation here in the Maritime Provinces than elsewhere, but we understand that the situation is about the same everywhere.

"We have never experienced such a difficulty in covering our wants in hardwood lumber, which is the one chiefly used in the brush industry, as during this present season. There is keen competition from the United States; buyers seemingly being chiefly concerned with obtaining supplies, almost irrespective of price. Even after purchases are made there is a great deal of uncertainty as to whether deliveries will be forthcoming, and prices are decidedly on the upward trend and are very much beyond what costs are figured at.

Efficient Labor is Scarce

"Although we have reason to believe that the labor situation is much better in Canada than in any place in the United States, it is practically impossible to obtain any appreciably increased supplies, and the great majority of those seeking employment seem to be much more concerned with obtaining a maximum wage than for giving adequate return for same. In the face of a large demand for goods increased capacity has been impossible to attain to any extent on account of the inability to get efficient labor.

Stocks Low Throughout the Country

"Conversation with some of the leading manufacturers in our line reveals the fact that we are all working from three to four months behind, and the insistent call for goods on the part of customers seems to indicate that stocks are exceedingly low throughout the country for the most part.

"Reports from the United States indicate that more trade is being done there on the part of the manufacturers subject to prices prevailing at time of shipment, than hitherto, and the general impression seems to be that irrespective of the high price of paint compared with which even present prices on brushes are low, that the necessity to preserve property, not to mention the new building, has reached such a point that the demand will continue to be considerably in excess of the capacity of the manufacturers to supply for a good while to come. In many ways the present situation resembles conditions immediately following the armistice, as far as the bristles are concerned in that a temporary holding off is likely to be followed by a realization that the most important consideration will be to cover for next season's requirements, with a probable consequence of still stiffer prices.

Prices Not Lowered by Removal of War Tax

"The last month has seen a pretty general increase in the price of brushes on the part of the manufacturers throughout Canada, necessitated by the bristle advances already mentioned, and advances in practically every other material as well as in labor.

"The removal of the war tax of 7½ per cent. might naturally lead some to conclude that an appreciable reduction in cost would result. As a matter of fact, while there are some lines which were affected by a somewhat less advance taking place than might otherwise have been the case, the fact that a 1 per cent. excise tax is payable on all these goods as well as on all purchases of supplies and raw materials in the domestic market, coupled with the fact that a very large percentage of the items entering into the cost of a brush are not affected by said removal, because not imported, makes the net result so negligible in a great majority of instances as to be rapidly absorbed by advances that cannot be foreseen.

Increased Costs in Broom Manufacture

"Supplies such as handles, labor, etc., in the manufacture of brooms, are affected in just the same way as in the brush end of the business by constantly increased cost. The entire season has been marked by a demand in excess of our capacity to supply.

"Price levels on broom corn have not changed to any extent for the past two months. Great difficulty has been experienced in moving both corn and brooms in the United States, although the situation seems to promise to rapidly improve from this out. We have had reports of local price-cutting in brooms in some centres like Chicago, where certain manufacturers who depended for their trade on outside markets were compelled to compete with those having a more local market in order to turn over their goods during the extended period of the embargoes on the railroad. For the most part, however, there have been firm markets, and in fact appreciable increases in prices have taken place recently in some localities.

"The crop market reports indicate serious delays in planting and slow growth on account of the backward season, and whereas early corn generally comes on the market about July 10, it is not looked for before August 15 this year. Supplies on hand are very low and with cotton so high and an increased acreage going to that crop, there seems to be more than a likelihood that the new crop will be bringing higher prices than prevailing during the last year.

Asked for an Opinion on the New Taxation, Mr. Simms Stated

"We are probably not more fond of taxes than are most people, but we frankly approve of the fact that the Government is seeking to pay as it goes rather than do further borrowing. Our line being in the necessity class is not seriously affected; the minor adjustment necessary to conform to the law having been accomplished without undue difficulty."

Chicago Varnish Co. Bought by Dupont and Flint Concerns

E. I. du Pont de Nemours & Co. and the Flint Varnish and Color Works of Flint, Mich., have purchased the plant

A. Ramsay & Son Company

All Canadian Paint and Varnish Makers Since 1842

Experience, prestige and reputation count heavily in the volume of sales and turnover, as well as in the quality of the product.

It is but reasonable that in such a period of time improvements would be discovered in methods of production; in the product itself; and more advantageous distribution and co-operation with the merchant handling Ramsay Paints and Varnishes effected.

Ramsay advertising has multiplied the number of consumers who know its merit so that they are ripened into a receptive mood for Ramsay products.

You cannot have too many advantages in your favor—handle Ramsay's.

and business of the Chicago Varnish Co., in Chicago.

The Chicago Varnish Co. was founded in 1867 and Captain Morgan, president of the company, and one of its founders, has been active in the business since its formation.

No radical change in the factory or sales organization is contemplated. W. J. Scholinger, vice-president and general manager of the Flint company, will direct the policy and business of the two plants.

How Hardwaremen Advertise Paints---No. 10

REFINISHING the automobile is the point emphasized in this advertisement by Mills Hardware Company, Hamilton, Ont. Automobiles have greatly increased in price during the past few years—as have houses—and the argument that an adequate amount of paints and other finishes should be used to protect the automobile body is equally important.

It is pointed out in the advertisement that many of this year's models are painted in different colors—one color for the body and another color for the wheels. A point is also made of the fact that if the car owner is desirous of selling, that he will be able to sell much easier and to better cash advantage if the car looks bright and clean.

It will be noted that an effort is made to link up a personal contact with prospective paint purchasers. The argument advanced applies particularly to a certain class of car owners—the one that contemplates improving the appearance of his car in order to make an advantageous sale. The ad. also gives the information that it is this year's custom to paint the wheels a different shade from the body.

All other lines of paints and finishes are dealt with individually, full descriptive matter and prices appearing on each.

There is a big field for sales of automobile finishes at this time of year and advertising making a strong personal appeal along definite lines will be very helpful in securing this class of trade.

The Luxeberry Painter Says:

"WELL FINISHED IS HALF SOLD. I often remind people of this who are building to sell. It is necessary to economize on the building cost, let the finish be better than usual. Attractively finished interiors are investments that pay big dividends in quick sales and good prices.

"I know by experience there are no better finishing investments than Liquid Granite Floor Varnish, Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall Finishes, Luxeberry Spar Varnish, Berrycraft Stain Finishes, etc."

The great and always growing demand for Berry Brothers' products is based on their unquestioned merit.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 3.—Paint marketing continues active and there has been a steadily heavy business. Some real difficulties have been encountered in obtaining necessary raw materials, but manufacturers are taking the cheerful outlook and making the best of the situation. They have been able, for the most part, to take care of customers' wants promptly.

Linseed oil has not weakened in the least, as far as the quotable basis goes, and is selling still at $2.60 per gallon for raw and at $2.62½ for boiled. The differential on small quantities has been advanced from 7 to 10 cents per gallon. Some expect that within a week there will be a reduction in the basis of probably 10 cents a gallon. In the meantime seed is scarce and it has been only the arrival of English and other oil which has enabled the trade to fill dealers' requirements.

It will be thirty days, perhaps, before turpentine will be easier, and at that time some are suggesting that the basis will hold at 40 to 50 cents per gallon lower than the levels of to-day.

Dry and oil colors, owing to scarcity and advances for raw materials, have been ruling firm, but are unchanged as yet. Trade is very good for these lines.

May be Thirty Days Before Lower Turps.

Montreal.

TURPENTINE.—Little relief has been effected in the matter of turpentine deliveries. It is very doubtful whether any relief of consequence will manifest itself in the immediate future. At the same time within another thirty days some jobbers are expecting that a basis of 40 to 50 cents per gallon less than the ruling prices of to-day will be available.

Turpentine—	Imp. Gal.
Single barrels	....
Small lots	3 87

(Packages extra.)

Still Quoted $2.60; Oil May be Easier

Montreal.

LINSEED OIL.—While the bases quoted by crushers and jobbers have not changed in the least from the levels of last week, the situation is showing some slight improvement. Crushers look forward to a somewhat easier price basis reigning within the next ten days, or perhaps a little sooner. Supplies of seed are very difficult to procure, but some oil has come in from various other sources, including a supply of several hundred barrels from the English market. It is stated that while this oil has been sold in competition with oil crushed here, the price to import in large quantities landed at Montreal runs very close to $2.50 per gallon.

Raw—	Imp. Gal.
1 to 2 barrels	2 60
3 to 4 barrels	....
Boiled—	
1 to 2 barrels	2 62½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Despite Shortages Prepared Paint Moves

Montreal.

PREPARED PAINTS. — There has been no little shortage of various raw materials and these shortages are not yet removed. Despite such problems the manufacturers have been enabled, through extensive purchasing well ahead of their needs, and by absorbing such materials as have been available, even in small quantities, to keep abreast of orders. Business is still satisfactorily active and prices, while firm, are quite unchanged.

Putty and Glass Needs Still Absorb Quantities

Montreal.

PUTTY AND GLASS.—Seasonably large orders are being filled for putty. This commodity remains steady, though unchanged, and the markets have been somewhat bare of needed supplies of whiting, and oil has also been scarce and high.

GLASS. — Some considerable arrivals are reported to have reached this point from Belgium. This has relieved the situation, the demands having absorbed available stocks, particularly of larger sizes. At the same time it is stated that the present needs of the trade, coupled with unfilled orders that have accumulated, will mean that no price reductions are likely for the present.

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Steady Basis Ruling For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have been steady, and demand steadily seasonable. The movement has been really a heavy one all through the past season and there is still active enquiry, and sustained shipments are reported. The price of standard lead is as follows: Five-ton lots, per 100 pounds, $19.50; 1-ton lots, $20, and smaller than ton lots, $20.35.

Dry Colors Firm; Increases Deferred

Montreal.

DRY COLORS.—Prices are very firm on these, but no changes have been made by the makers and jobbers. The price of raw material and the difficulty of getting adequate supplies are said to be two outstanding features that will possibly bring a change, and this might become effective at an early date. In the meantime all undertones are strong, and the same applies to colors in oil.

TORONTO

TORONTO, June 3.—The scarcity of turpentine is one of the features of this week's markets, and those in urgent need of turpentine have been searching the district for any quantity from 1 gallon up. Linseed oil is also very scarce and little seed has been coming forward. The situation on the above-named commodities, however, may soon be relieved, as it is believed that freight is beginning to move throughout the districts affected by the embargo.

Paint and paint specialties of nearly all kinds are enjoying a very brisk turnover, and the very warm weather of the past few days has been a big stimulant for the paint and varnish business.

Glass stocks are still low, and replenishments are not coming forward, a situation which is attributed to the worldwide demand being larger than the capacity of the factories. Paris green sales are increasing with the growth of vegetation. Whiting is still scarce. Collections continue to come forward freely.

Putty Demand Quiet; Stocks Continue Light

Toronto.

PUTTY.—While the demand for putty is light at present, jobbers state their stocks are very low in comparison with normal times, and while there is considerable putty being made from the cheaper grades of whiting, the better grades are very hard to obtain, owing to the scarcity of English whiting, it is stated. The present prices, although

"Save the surface and you save all" *Paint & Varnish*

One Glidden Kind Calls for Another

The result is a steady Glidden demand. A good reputation created by constant advertising brings in the first orders. Then good results, coupled with *continued* advertising, keeps them coming.

Glidden Endurance Paint is a *new* kind recently added to the Glidden line. The same Glidden quality that vessel owners and manufacturers generally, have used for nearly 50 years is now available to the home owner.

If you are not already familiar with our special paint proposition, write us to-day.

THE GLIDDEN COMPANY, LTD., Toronto, Ontario

BRANCHES: Montreal and Winnipeg

If interested tear out this page and place with with letters to be answered.

very firm, remain unchanged and are quoted as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Paris Green Sales Daily Become Heavier

Toronto.

PARIS GREEN—With the new growth of shrubs, vegetables, trees, etc., Paris green is having a fair demand, which is daily increasing, it is stated, and many are looking forward to a very good turnover on this commodity. The present quotations are as follows:

Paris Green—	Per lb.
½-lb. pkgs.	0 58
1 lb. pkgs	0 56
25-lb. drums	0 54
50-lb. drums	0 53
100-lb. drums	0 53
250-lb. kegs	0 52½
600-lb. barrels	0 52

Glass Situation Shows no Change

Toronto.

GLASS.—The scarcity of glass continues to show little relief and many are concerned for future delivery in the fall, when the heavy rush is on. However, jobbers state they have sufficient stocks to handle the demand, which is somewhat lighter during this season of the year. It may be that glass will begin to arrive in better quantities in the near future, although very few are looking forward to any heavy deliveries.

PLATE GLASS.—The situation on plate glass is practically unchanged and very little plate glass is coming forward, it is stated. The demand continues to be very heavy and warehouse stocks are becoming very low. Jobbers find a great difficulty in securing sufficient supplies to fill their orders.

White Lead in Oil Firm; Requirements Heavy

Toronto.

WHITE LEAD IN OIL.—Some have it that there may be difficulty in securing quantities of white lead, and while it is believed that there is sufficient raw material, some have it that the demand is so heavy that the corroders have difficulty in keeping up with their requirements. The foreign demand is also said to be very heavy. No recent change has been made in the price, which is holding very firm, the quotation being $20.70 per hundred lbs. for the pure white, while the genuine is being quoted at $22.40 per hundred lbs.

Ready Prepared Paint Having Big Demand

Toronto.

PREPARED PAINT.—As previously forecasted, paint is having a very good demand and manufacturers and jobbers state that the present is one of the biggest seasons on record. The warmer weather is said to have greatly stimulated sales, and it is believed that dealers generally are experiencing a very satisfactory season. Manufacturers state that some ingredients are becoming difficult to obtain and are gradually advancing in price, although few are looking for any change in price at present, which are as per current quotation pages.

Light Stocks of Linseed Oil; High Price Holds

Toronto.

LINSEED OIL.—The situation on linseed oil remains practically unchanged, crushers stating they are receiving very little seed, and while it is true that considerable seed is tied up in the United States harbors, very little of this is coming forward owing to the congestion of freight on many of the railroads owing to the recent freight embargo. Many are looking forward to lower prices on this commodity, which, according to former seasons, should be in effect, but owing to the scarcity of seed and incidently oil, many are pleased to receive supplies regardless of price. The following are the present quotations:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
	Boiled	
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.

Turpentine Famine Shows No Relief

Toronto.

TURPENTINE.—Practically no relief has attended the local markets, and turpentine continues to be scarcer than ever. Jobbers state they have been able to get few, if any, shipments through by express or other means, and as they express it, any that does come to hand is only a drop in the bucket compared with the heavy demand that is current. However, it is expected that this situation may soon be cleared up as importers state they have some good shipments on the way, which have been tied up in the freight congestion on the United States railroads. Whether lower prices will be made it is hard to state at present owing to the scarcity which prevails on this market. However, it is expected that it is only a matter of time before lower prices are made. Owing to the present shortage on the local market prices are nominal and any turpentine available is selling at from $4 to $4.75 per gallon.

Turpentine—	Per imp. gal.	
1 barrel lots	....	....
2 to 4 barrel lots	....	....
5 gal lots	4 00	4 75

PAINT AND VARNISH SPECIALIST COMES TO THE FRONT

(Continued from page 60)

see that all questions are answered, and then bring it back to our store and we will give you a toy balloon for your trouble:

Does your house need painting?
Inside varnishing?
Wall paint or Alabastine?
Have you any rough walls that are hard to get in shape to paint?

JONES, THE PAINT DEALER.

A number of toy balloons with the store's paint advertisement printed thereon were secured and the cards then given out to the children.

When the cards came back, the name of the child's father was written on the reverse side, near the top, and filed alphabetically for future use.

After allowing a reasonable time for all the cards to be returned, the ball was started rolling by placing a strong paint advertisement in the local papers, emphasizing the service of the store which was free for the asking.

This was followed by sending out a personal letter to each party whose card was filed, wording it according to the information each card contained. Replies were put on record on the back of the card and when the list had been covered those who did not respond were personally canvassed.

This dealer also followed the plan of taking trips through the country, making notes of the different sets of buildings, as to whether they required paint, and if opportune, he called upon the farmers in their fields for a short business chat. After these trips he was in a position to talk paint, because he knew where paint was needed.

Use Farm and City Property Lists

Another source of business which this dealer used was the farm and city properties listed for sale. He got a list of dealers in the various properties listed for sale and went and looked them over. On finding a farm where paint on the buildings was required, he made a note of it and called upon the owner to talk paint, emphasizing the fact that a coat or two of paint would greatly improve the look of the property and be a valuable asset in making the sale.

Backed up by liberal advertising, window displays and store service, this dealer's plan produced much business. He was a specialist.

PRATT & LAMBERT OCCUPY NEW PLANT IN NEW YORK

The New York offices and plant of Pratt & Lambert, Inc., varnish makers, have been moved into new quarters just provided by the erection of a new plant at 393-407 Freeman Avenue, Long Island City. The New York office previously was at 185 Madison Avenue, with the plant located at 241 Borden Avenue, Long Island City. The change co-ordinates the New York office and works, and provides increased storage and shipping facilities for serving the trade in the New York district and Eastern territory.

Livingston

Specify the brand of Linseed Oil that has stood the test for "*Reliability*"

Don't say—"The basis of this paint is linseed oil, but rather Livingston Brand Linseed Oil," and be sure that it is.

Livingston Brand Linseed Oil has stood the test for reliability for over half a century and any paint which is made upon the Livingston basis will stand the test and defy the elements.

The Blue Barrel is the outward mark of the inward quality.

Livingston Brand: the kind your grandfather used.

C·C·M· Bicycles
Enjoy Wide-spread Popularity

C C M

IN competition for the bicycle business of your district the dealer who carries C. C. M. Bicycles is going to have a big advantage. Their graceful lines and superior quality and finish have made them extremely popular with bicycle riders throughout the country, making them an excellent line for the dealer to carry.

This fact, along with our present advertising campaign—the biggest of its kind in Canada in twenty years—is going to create new bicycle riders—riders who will be satisfied with nothing but one of these popular models.

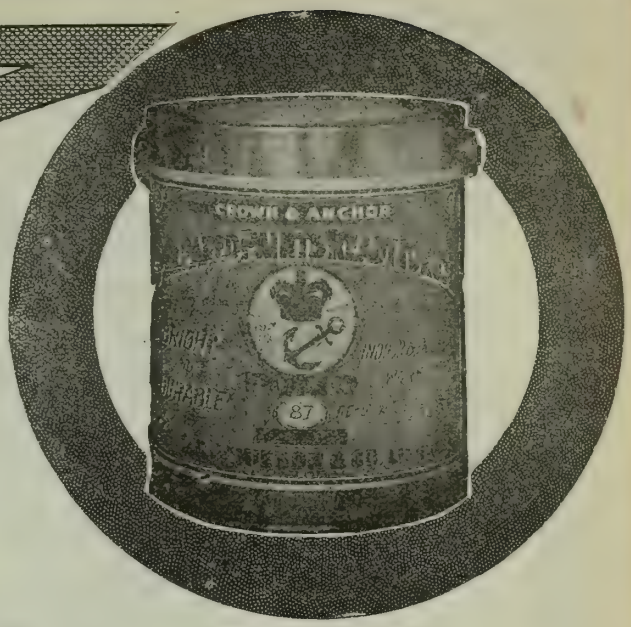
QUALITY

"Save the surface and you save all" Paint & Varnish



The *Practical* Value of Paint—

Is determined by the quantity and REAL body that is requisite to cover that surface that is sure to decay without a good coat to protect it from the weather conditions that will try the best of material unless it is covered with JAMIESON'S building preserving and protecting paints and varnishes, that have been at the forefront of paint sales in the enterprising and successful hardware store for over sixty years.

Both dealer and consumer have long since been educated to the fact that it pays to pay a little more for good paint especially when such a paint *returns this slight extra first cost by giving better and longer service.*

"Sixty years preserving properties, wherever a Jamieson product has been used."

Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian Woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.

There's a reason.

Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.

It pays to sell **STILL'S.**

J. H. Still Mfg. Company
ST. THOMAS -:- ONTARIO

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.

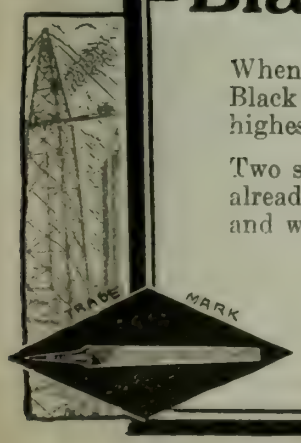
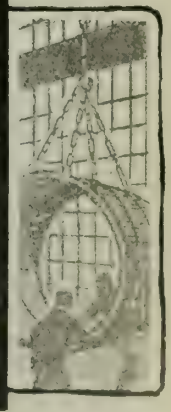
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.



Established 1863

Black Diamond File Works
G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Which do you prefer to save—the price of the Barn or the cost of the Paint?

When the barn raising is over and your fine, new building stands complete—paint it right away! Every day's work that the weatherman puts in on its unprotected walls is a day off the life of your barn. You'll pay for the paint whether you use it or not,—so you had better use it.

Stephens
REGISTERED TRADE MARK

BARN AND ELEVATOR PAINTS

are made by a Western firm for Western Barns, Granaries, Fences, Implement Sheds and all farm buildings. They are used by Railroads and Elevator Companies—a sufficient guarantee that you'll receive compound interest on every penny you invest in paint.

Nearest Stephens' Agent will be glad to estimate quantity and cost for you. Ask him for Color Cards.

"Save the surface and you save all" *Paint & Varnish*

63

G. F. Stephens & Co., Limited
Paint and Varnish Makers
Winnipeg Calgary Edmonton

The demand for Stephens Paints is daily increasing through the influence of advertisements such as the one herewith, which are appearing in the leading Farm Journals, including—Winnipeg Grain Growers' Guide; Farmers' Advocate; Nor'-West Farmer; Weekly Free Press; Weekly Telegram; Western Home Monthly; Calgary Farm and Ranch Review; Montreal Family Herald and Weekly Star.

An unusual opportunity is presented to dealers to increase their paint sales and gain the goodwill of their customers, by keeping a full stock of Stephens Paints, and having them well displayed, in their store.

If interested, tear out this page and keep with letters to be answered.

O-Rib-O

Round Coal Chute

This shows a wall in section so that our Round Coal Chute can be seen as it appears in place. The door of this serviceable coal chute is also made with a flange which fits over the rim of the frame, making it both wind and water proof. It is fitted with our self-locking device.

With walls under 12" thick, use No. 1 or No. 4. Over 12", No. 2 or No. 5.

O-Rib-O Manufacturing Co.

Winnpeg, Manitob

Let the Royal Prove its Merit in *Your* Store

THE real test of an electric cleaner is how well and easily it will do the work in the home. Will it get all the deeply imbedded dirt in the rug as well as lint, hair, threads, and litter on the surface? Will it clean under the beds, close to the base-boards and in the out-of-the-way places?

Will it remove germ-laden dust and dirt lodged in draperies, upholstery, mattresses, walls, ceilings, closets, stairways and other un-get-at-able places?

Is it light in weight, easy to operate, economical and thorough?

To thousands of women the Royal has proven a household blessing because it satisfactorily answers all of these questions.

Just a touch of the handy switch on the handle, and the powerful, cleansing air stream is ready to save hours of heart-breaking, back-straining household drudgery.

Let us send a Royal to your store and let you try it yourself. A few minutes trial will convince you that it is the one vacuum cleaner for you to sell. There's a good profit too.

Dominion twenty-twos

The Gopher

The gopher is about to make his annual spring bow to the farmer. This means that the farmer must take the time to kill him. The twenty-two rifle is the quickest and best means of getting rid of the pest, and besides offers no little sport. Remind the farmer of the fact and—

Increase Your Sales of .22 Cartridges and Rifles

Our stock of twenty-two rifles, both single shot and repeaters, for the boy and the man, is very complete, as is also our stock of twenty-two cartridges. Look over your rifle rack and cartridge shelves and make sure that yours is also complete, and if not order a supply at once from Ashdowns.

The Choice of Mechanical Men

Morrow

High Speed and Carbon Twist Drills

Mechanical Men prefer Morrow High Speed and Carbon Twist Drills because of the results they bring, the time and trouble they save, and their general efficiency.

Morrow High Speed Twist Drills are made from hammered steel bars, specially Morrow tempered. A graduated thickness of web gives more strength where strength is needed. "More holes with less regrinding"—a direct factor in lowering production cost.

John Morrow Screw & Nut Company, Limited

Ingersoll *London, England—7 Hop Exchange Southwark St., S.E.1.* **Canada**

"Oldest, largest, best equipped Plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-Finished Nuts."

"Sole Distributors for the Ingersoll File Company's Files"

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Elastigum Plastic Patching Cement

SUMMER is here, bringing with it an increasing demand for these Barrett Products. Be sure you are well stocked—make the Barrett name increase your reputation and your profits. That's just what it will do.

Everlastic Liquid Roofing Cement

UNEQUALLED for resurfacing worn-out felt and "Rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1 pint tins to 40 gallon barrels.

Elastigum Plastic Patching Cement

THE plastic cement of a thousand uses — tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions.

Elastigum is a popular repair material for which dealers will find a tremendous demand this year.

In 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. packages, ½ barrels (about 300 lbs.) and barrels (about 600 lbs.).

HERE are some other Barrett Products ready to make money for you. They all bear the Barrett name—and they're all Barrett quality. The popular Everlastic "Rubber" Roofing, Everjet Elastic Carbon Paint, Nox-Aer-Leek Boiler Setting Cement, Creonoid (Fly Oil) Lice Destroyer and Cow Spray.

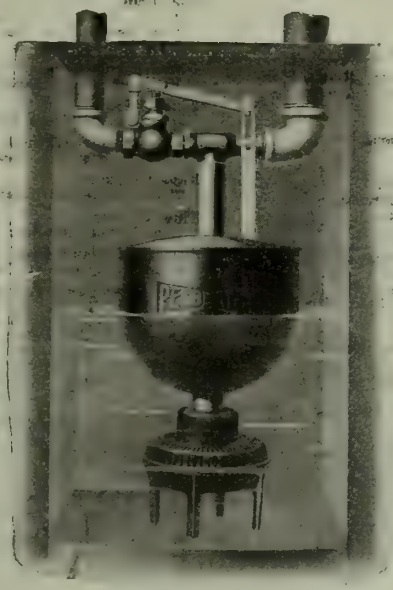
PENBERTHY

MARK.



Illustrating Penberthy Cellar Drainer Installed in Pit or Sump.

AUTOMATIC CELLAR DRAINER

ALL WORKING PARTS ABOVE WATER

LOOK OUT

FOR THE SPRING FLOODS!

Keep Your Basements Dry

There is no excuse for flooded basements or cellars when the Penberthy Cellar Drainer will keep them dry and sanitary.

WHAT IT IS FOR AND HOW IT IS OPERATED

A device for transferring liquids from one level to another with water under pressure or steam as power. The name Cellar Drainer is derived from its commonest use, that of pumping water from cellars, but its utility is not necessarily restricted to this usage. The construction of the Penberthy Automatic Cellar Drainer is admirably simple, being a highly efficient ejector or syphon jet to which is attached a quick-opening, float-controlled valve. Nor is there anything complicated about its operation. The Drainer is placed in the sump or place where the water or seepage collects, a line from the city water supply attached at one side and a line leading to your discharge point (sewer, gutter or wherever it may be) to the other side. Then turn on the water and forget it, for as the water rises in the pit the float is raised and when the right height is reached the valve is opened instantly, allowing the city water to flow through the ejector, cause a suction, and carry the sump water with it to the discharge. As the water goes down the float follows and when the low point is reached the valve closes to remain closed until enough water collects to again raise the float, when the whole operation is repeated.

35,000,000 Ads to help you sell

More than 35,000,000 advertisements are telling your customers about the dependability, efficient service and economy of

Champion

Dependable Spark Plugs

Every owner of every type of auto, truck, tractor, farm engine, motor cycle, and motor boat knows that there is a Champion for his particular engine—each one fitted with our "3450" insulator and patent gasket construction.

He is being told in no uncertain way that "3450" insulators stand hard usage outside the motor as readily as shock, vibration, expansion and heat in the motor.

The force of this tremendous advertising and selling campaign will mean the sale of more Champions for the dealer who carries a full line.

You cannot afford to lose your share of this profitable business.

Check up your stock and order from your jobber the Champions you need.

Champion Spark Plug Co.
of Canada, Limited
Windsor, Ontario

Largest factory in Canada making Spark Plugs exclusive y and the only factory making "Champions"

Champion "X" A-15, ½-inch **Price, 90c.** Adopted by the Ford Motor Co as standard equipment on Ford cars since 1911

Champion is Ford's selection and should be yours

Nearly half of the cars in Canada are Fords. Each one left the factory equipped with Champion "X" plugs.

The significance of this fact, and the proved efficiency of Ford cars, speak volumes to spark plug users in making replacements in Ford cars and those of other makes or in trucks, tractors, farm engines, motor-boats, or motor-cycles.

Service dependability is built into our "3450" insulator, which takes, without breaking, punishment and abuse that has been considered impossible in anything but metal.

90

Champion Heavy Duty JAS-43, ⅞-in. **Price $1.00** For use in heavy service motor cars, trucks, tractors and engines

"3450" Insulators Resist Knocks, Shocks, Heat and Expansion to a Wonderful Degree

They are so hard and tough that they stand up under treatment that is never experienced even in emergency use in a motor or engine.

You can heat them white hot, then douse them in water—knock them with a wrench—drive them through a cake of lead—drop them on the floor—and you won't find even a chip or crack in the glaze.

Champion Dependable Spark Plugs

all have "3450" insulators. There's a type that will help to increase the efficiency of your motor car, truck, tractor, farm engine, motor boat

They stand any service in any motor or engine

Champion

Dependable Spark Plugs

This includes low speed tractors, or high speed racing cars with all the intermediate speeds. Yes, and the careless handling outside the motor too.

By giving efficient service in heavy duty tractors, developing terrific heat and tremendous shock strain, Champions have earned the right to the name which has become another word for spark plug dependability. A special Champion plug has been developed to meet each peculiar ignition requirement in every type of gas engine, in motor cars, trucks, tractors, farm and stationary engines, motor boats, motor cycles and aeroplanes.

Dealers in motor supplies everywhere can furnish you with the right type for your motor.

Look for "Champion" on the insulator as well as on the box.

The safe way to select efficient Spark Plugs

Two hundred and eighty manufacturers of motor cars, trucks, tractors, farm and stationary engines, motor boats, motor cycles and aeroplanes, in Canada and the United States, have selected Champions as regular factory equipment.

They selected Champions to insure efficient operation of their motors—if you want that same dependable, efficient operation in your motor **demand**

Champion

Dependable Spark Plugs

Our famous 3450 insulators and compression-proof gaskets give to Champions a dependability that is greatly in excess of ignition service requirements.

Champion
AA-53
⅞-inch, 18 long
Price $1.00
For use in McLaughlin cars, tractors, trucks and stationary engines

Look for "Champion" on the Insulator

It is your guarantee of efficient, satisfactory and economical spark plug service.

It is the selection of over 280 manufacturers of motor-cars, trucks, tractors and gasoline engines in Canada and the United States.

Could proof of service value be more conclusive?

Champion

Dependable Spark Plugs

with 3450 insulators and our patented copper asbestos compression-proof gaskets, are a combination that insure perfect ignition and dependable service under the most adverse conditions.

They withstand shock, vibration, expansion and hard usage to an unusual degree, in or out of your motor.

The Name behind the Plug

For years we have been building a reputation for the dependability of Champion Spark Plugs. To-day "Champion" on the insulator of a spark plug is the world's synonym for dependability.

Champion

dependability is based on thousands of experiments and tests, resulting in our 3450 insulator, which, because of its indestructible quality, gives exceptionally efficient service in all types of gasoline motors and engines.

Champions are the choice of the world's largest manufacturers of motor cars, trucks, tractors, farm engines, motor boats, motor cycles and aeroplanes.

No matter what makes of motor you own, there is a "Champion" that will give efficient service under any condition the motor itself will stand.

Champion

Dependable Spark Plugs

Make Good Motors Better

Whenever you see "Champion" on a Spark Plug you can be absolutely certain that it will give you as near 100 per cent. efficiency as you may ever hope to obtain.

No matter how good your motor may be, or for what purpose it is used, "Champion" dependability will make it better.

This is due primarily to our famous "3450" insulator, which is practically indestructible, and to developing a special plug for each type of motor or gas engine.

Champion

Dependable Spark Plugs

The unfailing dependability of Champion quality construction has justified every claim made for it, even under the most adverse motor conditions.

There's a world of satisfaction in knowing that Champion 3450 insulators stand shock, vibration, heat, expansion and rough usage to an unusual degree, especially when you require emergency service.

The best indication of the satisfactory, efficient service of Champions is contained in the fact that they are regular factory equipment in 280 different makes of motors and engines in Canada and the U.S.

Make "Champion" on the insulator your guide to satisfactory spark plug service and you'll eliminate all worry, delays and costly experiments.

Get them where motor goods are sold

Champion Spark Plug Co. of Canada, Limited
Windsor, Ontario

Largest Factory in Canada making Spark Plugs exclusively

Champion Heavy Duty
JAS-43, ⅞-inch, 18, Price $1.00
For use in heavy service motor cars, trucks, tractors and engines

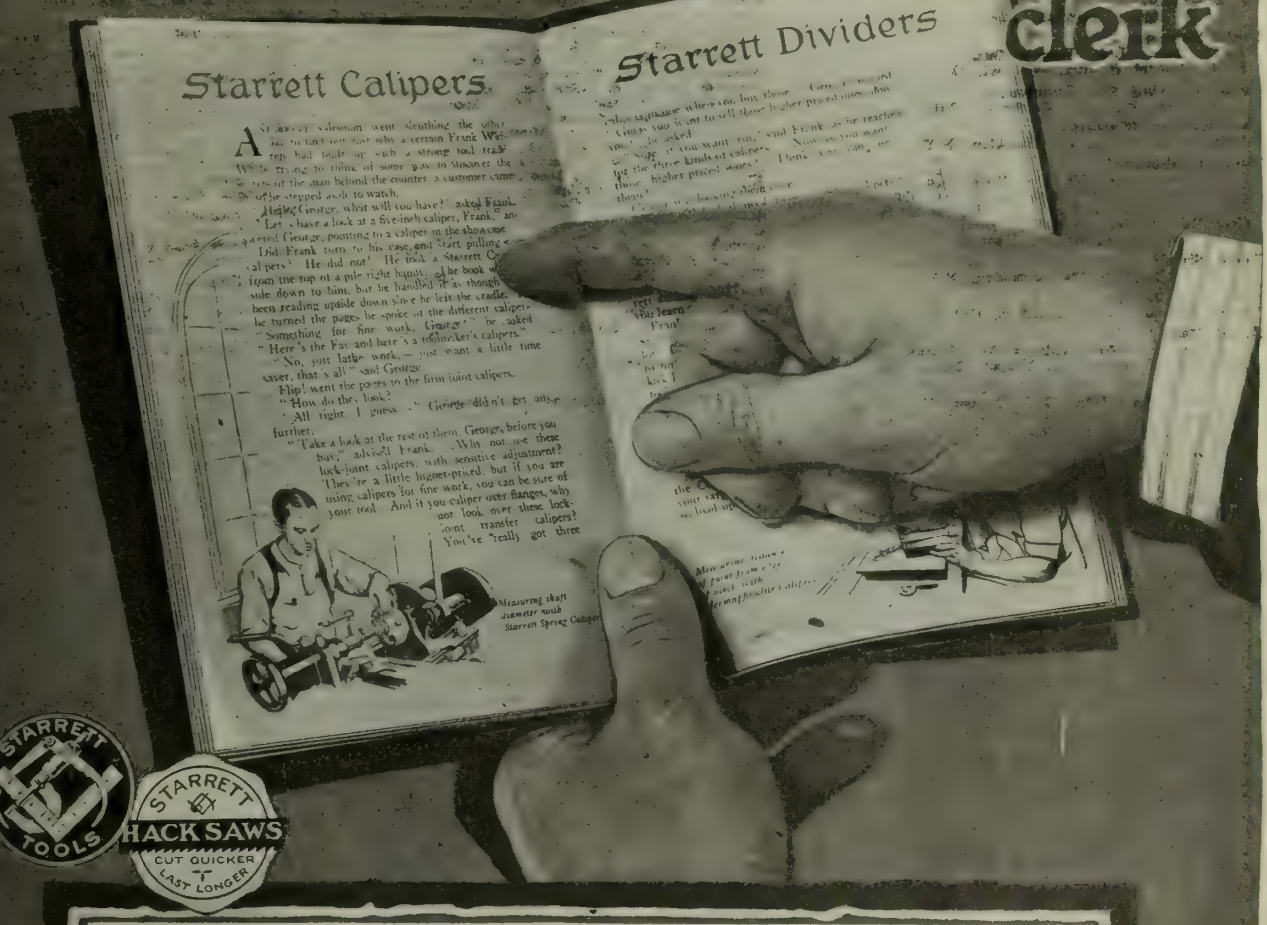
For You—
the hardware dealer and his clerk



STARRETT TOOLS

STARRETT HACK SAWS CUT QUICKER LAST LONGER

THE TOOLS MECHANICS BUY

Is the title of a booklet that will help hardware men sell Starrett Tools.

"Give me a surface gage," says the machinist. If he knows exactly the gage he wants—all right. But—

There are five kinds of Starrett surface gages. Take, for instance, No. 57 and No. 257. They look alike. Both are excellent tools. But if that mechanic needs a surface gage as a locomotive guide liner No. 57 will be almost useless to him. It's up to you to find him the right gage.

Talking points on Starrett Micrometers; the fine points of Vernier Calipers; Height and Depth Gages and Test Indicators; points about Starrett Surface Gages, Rules, Tapes, Gages and Starrett Transits and Levels; all these and more are covered in this book.

"The Tools Mechanics Buy" is a readable little book; full of pointers about building trade through Starrett tools by assuring satisfaction to the men who buy them. No matter how well you know your stock, "The Tools Mechanics Buy" will interest you.

Ask us today for as many copies as you have clerks—and don't forget to get one for yourself. Sent free upon request.

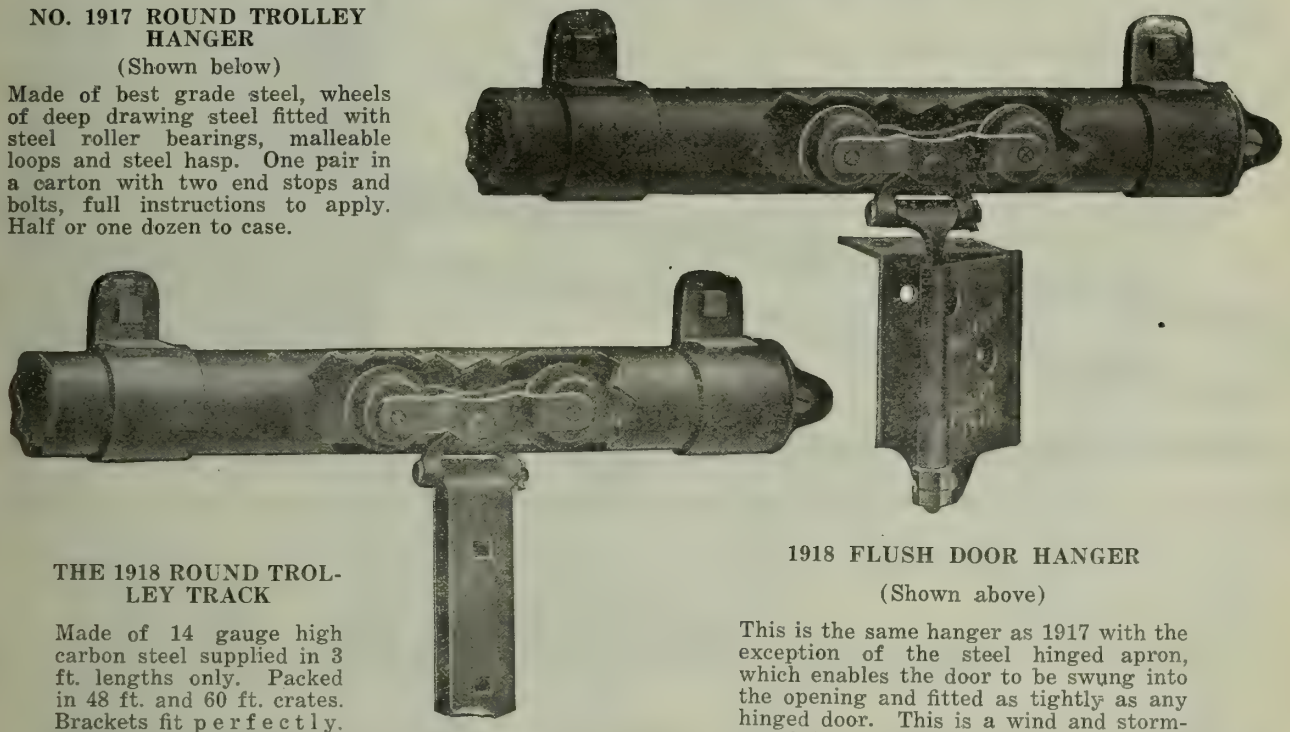
Round Trolley Hangers

1917 *and* 1918

NO. 1917 ROUND TROLLEY HANGER

(Shown below)

Made of best grade steel, wheels of deep drawing steel fitted with steel roller bearings, malleable loops and steel hasp. One pair in a carton with two end stops and bolts, full instructions to apply. Half or one dozen to case.



THE 1918 ROUND TROLLEY TRACK

Made of 14 gauge high carbon steel supplied in 3 ft. lengths only. Packed in 48 ft. and 60 ft. crates. Brackets fit perfectly. Brackets required every three feet.

1918 FLUSH DOOR HANGER

(Shown above)

This is the same hanger as 1917 with the exception of the steel hinged apron, which enables the door to be swung into the opening and fitted as tightly as any hinged door. This is a wind and storm-proof feature which should not be overlooked.

The Ideal Hanger for Saw Mill or Flour Mill use, where dusts of any kind are liable to corrode crevices (absolutely self-cleaning.)

Easy Operating - Weather Proof

The Round trolley hangers and track have jumped into popularity in the past few years very largely because of their excellent wind and storm proof features. The round track has no grooves to hold dirt or water, is self-draining and cleaning. There is absolutely no possibility of the hanger jumping the track, no binding, always runs smoothly.

Canadian weather conditions make this style of hanger and track a good one to push. Fit up a demonstrating door in some convenient place to show your customers.

Ask for our new Catalog showing complete line.

NOTE.—We can make immediate shipment of these two-style hangers and track.

EASY TO HANDLE— ALWAYS DEPENDABLE

The Empire Aluminum level is the popular tool of the quality workman. It is unusually light in weight, its wide hand openings offer easy and convenient grips, the dustproof vial cases present a clear view of the level glasses under all conditions, and—of primary importance—its hair line accuracy can absolutely be depended upon. These are some of the many features that make the Empire Level the most talked of tool of its kind on the market to-day.

Empire Aluminum Levels are made in three different styles; the Adjustable Level with vial cases that can be adjusted to level and plumb off angles, the Stationary Level with vial cases fixed in one position, and the Millwright's Level with a grooved leveling surface for use on pipes and machine parts.

If your dealer hasn't got them write us.

EMPIRE LEVEL MANUFACTURING COMPANY

313 First Ave. **Milwaukee, Wis.**

Canadian Office:
140 McGill Street, Montreal, Que.

PEERLESS
Lawn Fencing

is the finish, the last word to beautify, protect and to enhance the value of your property. It safeguards your children, keeps out marauding dogs, animals and destructive chickens, protects the lawn, shrubs and flowers, and prevents trespassing. It is built of open hearth steel wire, galvanized, and when not otherwise ordered, we paint all fencing with a coat of high grade white or green paint. It looks well and lasts long. **Send for Catalog** of many designs, also Farm and Poultry Fencing. A complete line for all purposes.

Proof of merit—

Over 4,500,000 cans have been sold in less than five years.

Make your motoring FREE from cooling system troubles

FROM the way some car-owners neglect the cooling system you'd think they really welcome trouble—instead of wanting to duck it. For instance, when they are miles from nowhere with the radiator leaking badly and the engine heating up rapidly they "curse the luck." But that has never yet helped.

Wouldn't you think they'd get wise to the simplest way of keeping the cooling system practically trouble-proof?

"X" Liquid kept constantly in the water means *no more leaks—no more Rust or Scale*—proper engine cooling and better engine performance.

The next best thing to keeping "X" always in the water is to keep a can of "X" in the tool kit. Then if a leak develops at any time—anywhere in the cooling system—"X" is simply poured into the water and the repair is made while the car is running.

Eliminates Rust and Scale!

The man who knows every inch of his car realizes the dangers of a rust-choked, scale-clogged cooling system. That's why he uses "X" in the *first* place to loosen all Rust and Scale. And then he uses "X" *constantly* to prevent *new* Rust and Scale from forming.

The verdict of American car-owners is that "X" Liquid *improves the cooling system of any water cooled car.* It keeps the system LEAKPROOF—RUSTPROOF and SCALEPROOF.

Not a Radiator Cement!

Don't class "X" Liquid with radiator cements, flaxseed meals, and such "dopes" in powder or semi-liquid form. "X" cannot clog the fine water passages. Be safe. Get the *original* "X" Liquid. See that the big "X" is on every can.

TO DEALERS

It is recognized as good business to *concentrate* your capital and your efforts. Sell the one product that you are satisfied is *best* for your customers.

Over 25,000 dealers sell "X" Liquid—many sell "X" exclusively. They find that it is not only the most satisfactory to sell but leaves them a *good profit.*

Order the Special Assortment with the Extra Free Profit from your jobber to-day.

Hardware and Metal

Vol. XXXII. No. 24. THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE : TORONTO, CANADA JUNE, 12, 1920

FILE COPY FILE COPY

Pride and Pocketbook

These are the two big reasons for Razor sales.

PRIDE in a product that will bring to every customer shaving satisfaction.

PRIDE in a Safety Razor that guarantees a better shave or money back.

PRIDE in a Double-Bevel Blade correctly ground—that blade in the greatest holder ever held in your hand.

PRIDE in a Holder that can be readily adjusted for a smooth or a close shave.

PRIDE in a Safety Razor sufficiently advertised to secure the interest of thousands of discriminating men who are looking for shaving satisfaction.

And all this business is being cared for *through the dealer.*

POCKETBOOK—Say that very thing through the word PROFIT is the measure of a merchant's real efficiency.

The Penn Adjustable Razor with its perfect Double-Bevel Blades is sold to dealers on a business basis—a fair business basis on which you can make a real profit.

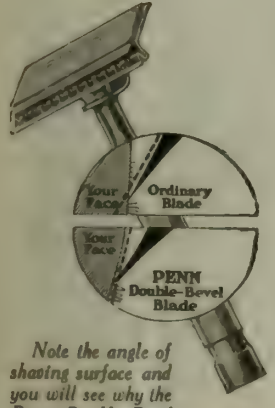
Ten per cent. of your razor customers should be beginners—new shavers.

Ninety per cent. of your sales are made to dissatisfied customers, men who are not satisfied with the way their faces have been treated in the morning shave period.

Adopt our slogan, "A Better Shave or Your Money Back."

It is time to tune up to the fastest growing razor business in the world.

For PRIDE and POCKETBOOK—PENN ADJUSTABLE RAZORS with PENN DOUBLE-BEVEL BLADE.



Note the angle of shaving surface and you will see why the Penn Double-Bevel Blade does not dig into the skin.

A. C. PENN, Inc.

135 Jackson Street Newark, N.J.

Penn Razor

The Safety Razor
with the Double-Bevel Blades

1 3/10 Per Cent

During a recent investigation into high prices, the newspapers severely criticized a large chain of restaurants for raising their prices and for profiteering.

The owners opened their books to the Food Administration in order to show that their profits were not exorbitant. They were making exactly one-and-three-tenths cents profit on each meal they served. Think of it!

The knowledge that a restaurant could exist on a profit of only one and three tenths cents per meal came as a surprise to many people. But—the answer is, that their turn over is probably more rapid than in any other business.

The thought we wish to bring out with the foregoing illustration is — that although O-Cedar polish pays much more than 1-3/10 per cent. profit, its greatest claim to a merchant's consideration lies in the feature of "turn over." O-Cedar's rapid and constant "turn over" may be justly attributed to the perfect satisfaction it renders every user. And to extensive advertising of O-Cedar merits in foremost newspapers and magazines.

Dealer signs, Hangers, and Window Displays are a few of the methods of co-operation we fully extend to dealers in O-Cedar products.

Is your stock of O-Cedar Polish and O-Cedar Polish Mops complete?

CHANNELL CHEMICAL Company, Limited, Toronto

CLEANS AS IT POLISHES

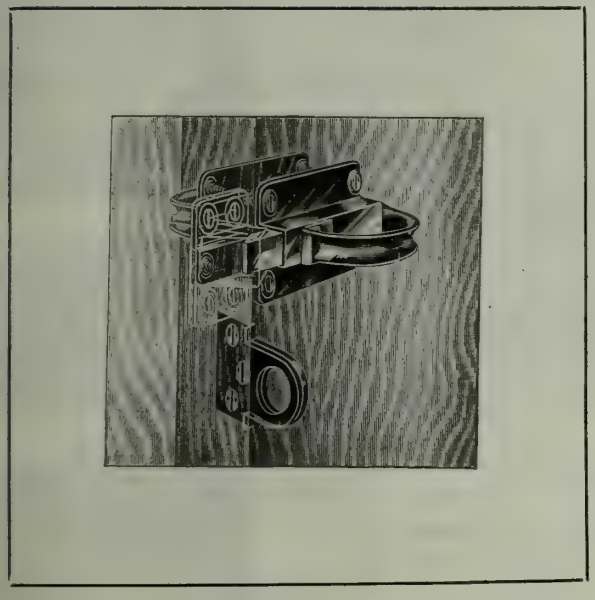
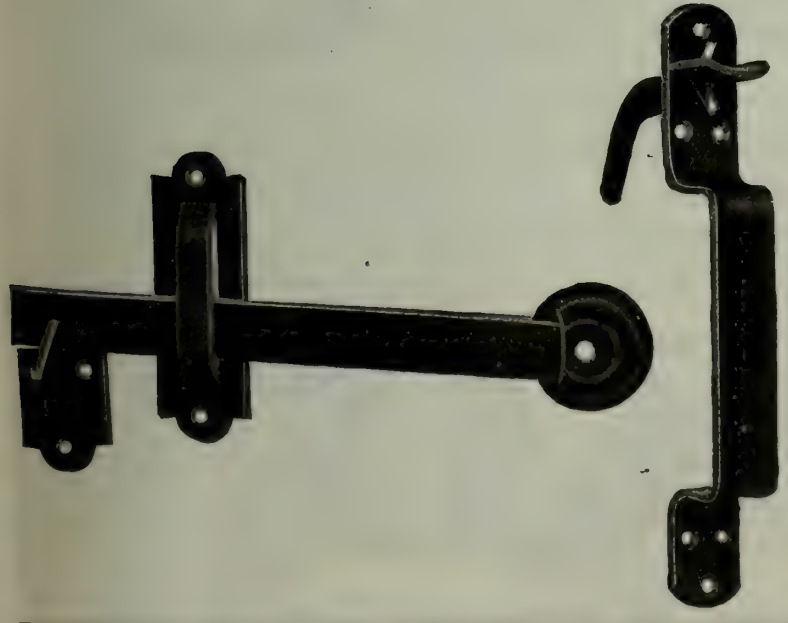
The Door to Prosperity Opens With C.S.G. Co.'s Latches





No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, common-sense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value—selling points—than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place. Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

A·G·M·CO
VIKO
ALUMINUM

Viko, a Saleable Line

Aluminum cooking utensils have long since passed out of the realm of "new fangled things" and have become a staple, standard product which every merchant who deals in household goods carries as a matter of course.

But just as there are degrees of saleability in other standard products, so are there degrees of saleability in aluminum ware.

VIKO, The Popular Aluminum, is an uncommonly fast seller: first, because it is attractive, durable, and improved in design; second, because it is popular in price.

And the line is extensive. Everything you need for completeness of stock, can be found in Viko. For full information about Viko—

SELL HACK SAW SATISFACTION

Selling hack saw *satisfaction*, not merely hack saw blades, is the Starrett policy. We want every package of Starrett blades that goes across your counter to be the means of gaining you a satisfied customer.

To show hack saw users how to get the full value out of the blades they buy is the idea back of "Hack Saws and Their Use," the newest Starrett Book.

Based on a long series of experiments at the Starrett plant, checked with the tests made by other manufacturers, it is the first practical book on that much misunderstood tool. It has 64 pages, and many charts and diagrams.

"Hack Saws and Their Use" is furnished to dealers for free distribution. Give it to the men who buy blades from you. It will bring you big returns in satisfied customers.

Put in a Stock of Aloxite Cloth— Then Oil Up the Cash Register

ALOXITE is so far and away superior to the ordinary abrasive or finishing cloth that machinists, garage men, general mechanics everywhere need it—want it. They can use it in a hundred and one different ways on all kinds of metals and the minute they appreciate how fast and clean it cuts—how uniformly it finishes—how much more work it will do in a given time—they will come at you with the repeat orders.

Aloxite Cloth is the Cloth that Cuts

Put in a stock in economy rolls and sheets. Let your patrons know you have it and the cash register does the rest.
Glad to send you samples. Try it out yourself. And, remember, we have plenty of mailable matter to help boost your sales.

Columbia's Ads Sell Dry Batteries to Vacation Folks

IMAGINE the sales to vacation folks that are bound to result from these ads! The ads will appear in mediums that reach millions of people.

Attractive posters will help further to pile up new Columbia Dry Battery sales records.

Electric lighting for campers will be played up.

Motor boat owners will read these ads. They will see posters in their towns. All the ads and posters tell why Columbia Waterproof Multiple Dry Batteries give the one best current for motor boat ignition and lighting.

Ads and posters will tell Ford owners why the hot, fat spark from Columbia Hot Shot Batteries makes starting easier.

This advertising works for you. It will increase your sales. You can get your share of these profits easily. The "Columbia Team Work Plan" will tie your store tight to the big advertising and selling plan.

IS your store located in a railroad town? Do you realize there's a chance here to do a thriving business in Carhartt Gloves by selling them to the trainmen? Nearly all the men on the road wear Carhartt Overalls and Carhartt Gloves and if the article bears the well-known heart-shaped brand—that's all they want to know.

But Carhartt Gloves are by no means confined to railroaders; we have them for drivers, motorists, gardeners, engineers, firemen—for every kind of job where gloves are used. Get a sample assortment; display them in the store and in the windows along with tools, lanterns, etc., and then watch your sales grow?

Frost Fence

The history of FROST FENCE is the story of a steady growth of confidence between the manufacturer, the dealer and the man who pays out his good money for its service. This is the "kernel" of the success of FROST FENCE.

The statement made in an advertisement or in a letter, or the argument of a salesman behind a counter would avail nothing if the quality of the article did not live up to that statement. We endeavor to put into FROST FENCE those good qualities which will please the man who actually uses it and which will enable FROST FENCE to render him long and faithful service. For FROST FENCE, after all, must fight its own battles.

We put our best into FROST FENCE not only to satisfy the user, but to help the dealer, by giving him something better to sell. Nor do we stop here. To have a successful business, the people upon whom the dealer depends for his trade must know about FROST FENCE if they have never used it. Our advertising policy is being shaped so that the user can learn about FROST FENCE more quickly, conveniently and completely, and so that the dealer can make more and more profitable sales.

FROST FENCE will draw many new and loyal customers to your store.

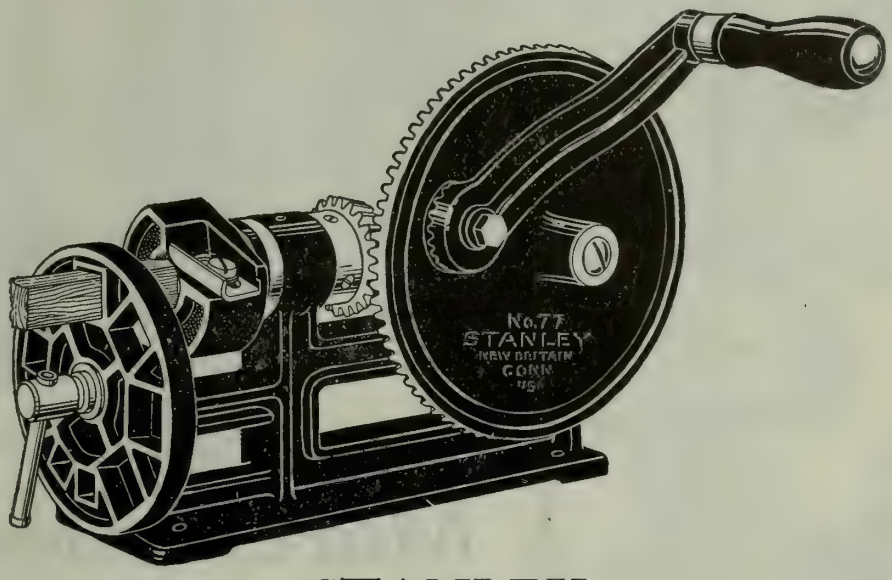
Stanley Tools



STANLEY
DOWEL AND ROD TURNING MACHINE
No. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them, and, furthermore, of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy.

A Profitable Tool for you to Carry.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

More Sales With Butterfield Tools

They Satisfy

Sales of a well-known, strongly established product like Butterfield Tools mean much more than the single sale accomplished. Butterfield Tools are marked and a connection is formed between the well satisfied consumer and the store where he bought the satisfaction. He comes back. He buys Butterfield again and again, and his confidence in the store leads to the purchase of other lines.

Butterfield superiority has a multiplying effect on the merchants business.

Story for Week Dated June 12, 1920. **Being No. 9 in the Series**

The Nimble-Fingered Girls Who Fill the Boxes With Eddy's Matches

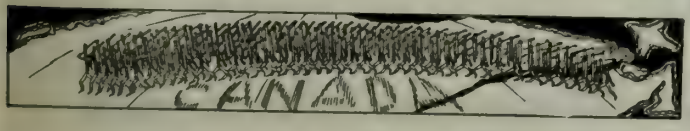
MACHINES can do marvels, but even more marvellous is the speed with which human hands can keep pace with the steady stream of millions of matches through those wonderful match-making machines.

Feminine fingers are very quick and sure, and constant practise makes their nimbleness almost unbelievable. The girls who handle the matches in the Eddy plant begin with slow-moving machines taking care of steadily flowing match supplies that offer small risk of fumbling. In a few weeks they are expert and able to take their places in the busy array of girls who keep pace with the fastest match-making machinery in the British Empire.

The matches dipped, and tipped, and dried—as nearly perfect as matches can be—come pouring down long, narrow chutes, on each side of which sit the girls. The Eddy Company takes especial care of the comfort, right height and right position of the girls' seats, for such details make a difference in the way the girls feel at the end of a busy day. They are happy girls, working swift and bright in an ideal atmosphere.

Supplies of the Eddy Match Boxes, with which every retailer is familiar, are kept abundantly within the girls' reach, and as the matches come streaming along the channels each girl grasps and boxes them by handfuls, patting down the full boxes, and placing the protective strip of card that keeps them from falling out. The covers are slipped on, and the well-filled boxes pass on to be packed in cases.

From 8 or 10 to 14 or 15 girls can take care of the output of each one of the twelve great machines that turn out the Eddy Company's seventy million matches per day. Boys take care of their supplies of match-boxes, the making of which is another of the Eddy marvels of manufacture.



70 Million a Day

Over 30 Brands

The hardware dealer has over 30 brands to choose his stock from. There are matches to suit every requirement, long matches, short matches, smoker's matches, household matches, etc. The name Eddy on the box is your assurance of customer satisfaction. Ask about the Eddy "Silent 5s"—the perfect match. No flying heads or afterglow. Will not ignite if stepped on. The match the customers buy.

70 Million a Day

What Asbestos Roofing does for you

THROUGH Asbestos Roofing, you can take your roofing business out of the competitive class. Because you can interest an entirely new kind of prospect — those to whom first cost is less important than durability and fire-safety.

Asbestos Roofing is a distinctive product. Its quality is unequalled. It does not dry out, rot or disintegrate. It is immune to heat or cold, rain, sleet or snow, because it is all mineral. It is fire-safe.

Johns-Manville Asbestos Roofing will give your customers wonderful service.

Where competition is fierce and price cutting is making a hole in the profits, why not carry a roofing that you can strongly recommend—at a price that you know *won't* be cut?

Johns-Manville Roofings are sold under a policy that protects your profits. For over a quarter of a century, Johns-Manville have led in the development of Asbestos products. As experts in roofing manufacture, making even the cheaper types, Johns-Manville can help in the decision not only as to what to apply, but how to apply it.

Every Johns-Manville Asbestos Roof, registered with us, has behind it the Company's obligation to see that it gives the service promised. This backs up the above statements to your customers.

Johns-Manville Asbestos Roofings are made in many types of ready roll-roofing, in shingles, in "built-up" form for flat roofs, or corrugated for skeleton frame buildings.

Canadian Johns-Manville Co.,
Limited

Montreal Toronto Vancouver Winnipeg
Hamilton London Ottawa

Johns-Manville Asbestos Roofings are sold through distributors all over the country.

Johns-Manville Asbestos Roofings are approved by the Underwriters' Laboratories, Inc.

Are there too many lines to know about?

HUNDREDS of people go into auction rooms every day and come away with things they never intended to buy.

As a hardware dealer you necessarily have to carry a great many lines of goods and your natural thought is that you carry too many to pick out the special advantages of any particular one.

The auctioneer has also "many lines" but he manages to seize on the chief selling point or advantage of each, and so concentrates the attention of his buyers on the advantages of the particular item he is selling at the time, that he "creates a demand" in their minds, with his enthusiasm.

You will find that if you take one of the GTD line of tools such as the *"Gun" Tap* with its obvious advantages and instil its superior qualities in the minds of your salesmen and make them "enthusiasts," your store will soon be showing gross sales and "turnover" extraordinary for a supply house and be known to local manufacturers as "The House of Specialty Tools."

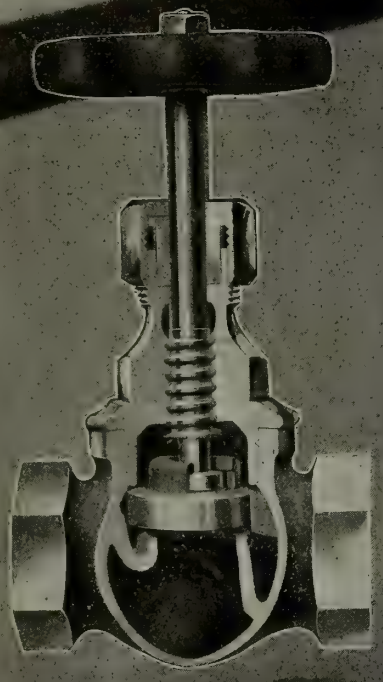
FAIRBANKS-MORSE



An Achievement in Mechanics

EACH individual department of The Canadian Fairbanks-Morse Company, Limited has given industrial Canada a new conception of achievement in mechanics. Each department has established a 100% quality and service standard. This is what enables Fairbanks valves to stand pre-eminent wherever valves are used.

When an engineer specifies Fairbanks valves, he knows that he has selected not only quality of material but workmanship that guarantees perfect operation.

He is satisfied with the reputation and service of the institution that stands behind them. He acknowledges an achievement in mechanics.

Wherever pipe lines are laid—in Canada's great industrial plants—in her immense water systems—in mines and mills—Fairbanks valves are giving a service that is marked by the 100% seal of quality, the standard of The Canadian Fairbanks-Morse Co. Limited.

Our nearest branch will give you the benefit of this service, Our experts will help you in selecting valves and everything mechanical that you require. Make our catalogue your buying guide.

BRANTFORD
ASPHALT SLATES

Artistic Roofing for Substantial Homes and the Better Class of Buildings

The coming roof for churches, homes and the better class of buildings is the beautiful, modern Brantford Asphalt Slate.

People look twice at a home covered with these softly-colored slates of reddish brown and dark green, which harmonizes with the surroundings and are so suggestive of permanency.

Brantford Asphalt Slates are as lasting as they look. When laid they form a thick, strong layer of crushed slate and asphalt that defies rain, snow, frost and the burning sun, even fire itself. They lie closely and firmly to the roof, and their crushed slate surfaces retain their natural color year after year.

Let us furnish you with samples, prices and further information about this highly efficient and attractive all-Canadian Roofing. Let us show you pictures of beautiful Canadian homes roofed with Brantford Asphalt Slates.

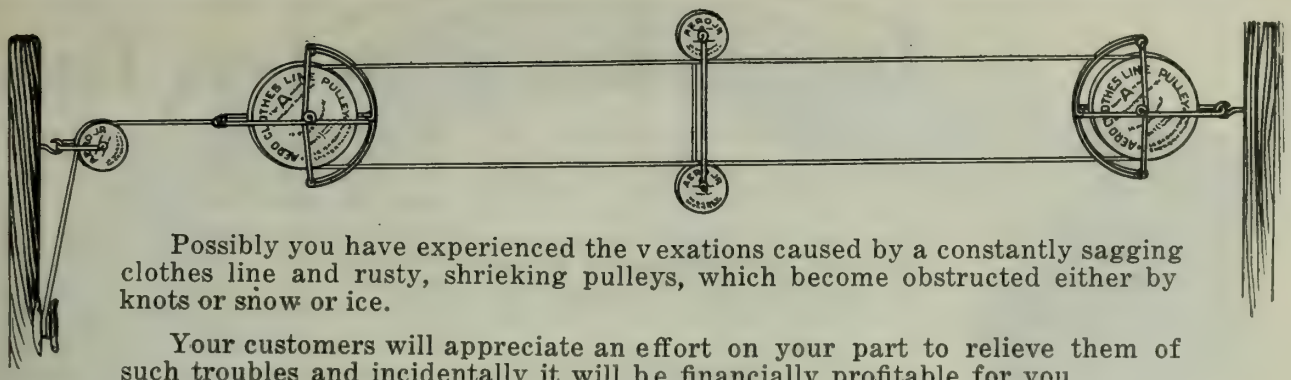
DAVIDSON

If interested, tear out this page and keep with letters to be answered.



Possibly you have experienced the vexations caused by a constantly sagging clothes line and rusty, shrieking pulleys, which become obstructed either by knots or snow or ice.

Your customers will appreciate an effort on your part to relieve them of such troubles and incidentally it will be financially profitable for you.

AERO Clothes Line Pulleys manufactured of waterproofed hardwood are 6 inches diameter, with deep V-shaped groove, giving perfect friction to varying diameters of line, are self-lubricating, rustless, knot-passing and will run noiselessly under all weather conditions, and are guaranteed for ten years, if oiled annually.

The **Aero** method of installation as per above cut is a departure from common practice, but a glance at it will convince you of its practicability in securing a taut clothes line at all times without splicing the line itself. If desired, the line and pulleys may be taken in after use.

The Aero Line Support prevents sagging in the center when carrying heavy loads.

Your jobber probably has these in stock. If not, communicate with us direct or with our Western Agents—H. L. Perry Co., Ltd., Winnipeg, Man.

Teaching Boys to Buy Good Tools

MANUAL training courses in our schools are teaching boys and young men how to do good work with tools.

These boys, as a result, are coming to appreciate good tools more than ever. They make up a class of tool-buyers that it is distinctly worth while to cultivate.

We are telling these young amateur carpenters and wood-workers about the quality of Disston Saws and Tools.

To do this, we are using the magazines to which they look for information on mechanical subjects — "Popular Mechanics," "Popular Science Monthly," "Scientific American," and "Industrial Arts," etc.

We send the Disston message to more than three-quarters of a million readers of magazines of this kind. The exact number of subscribers is 781,067.

These boys constitute by no means a small market for sales of quality saws and tools.

Telling this market the story of Disston Saws and Tools is another instance of our thorough cultivation of all classes of buyers to increase public demand for high-grade saws and tools.

Next month we will tell you how we reach another class of tool-buyers—the "handy man around the house."

Disston Saws and Tools are constantly advertised in magazines and agricultural publications with a total circulation of 8,497,003 copies each issue.

Important Change in Taxes on Hardware Lines

Practically a New Budget Issued by Finance Minister—Modification of Luxury Taxes to Lighten Burden on Common People—Plated Ware, Sporting Goods, Chandeliers, Etc., Affected—Tax on Amount in Excess of Exemptions Stated Instead of Tax on Total Value.

WHAT is described as practically a new budget has been introduced by Minister of Finance Sir Henry Drayton, and many important changes affecting hardware lines have been made. Modifications of a far-reaching nature in the luxury taxes are proposed, the alleged object of the Government being to lighten the burden placed upon the common people by the taxes as imposed in the original budget speech. The changes as summarized herewith are not in effect until notice is given.

The principle of collecting a tax on the total value of any of the taxable articles on which an exemption amount was mentioned has been changed, and a higher percentage of taxation on the amount above the exemption is substituted. New levies on lines which are distinctly luxuries will be imposed to make up any deficit in revenue. Confusion is sure to result from this announcement. Thousands of dollars have been collected since the taxes became effective on May 19 and the Government has promised to refund this money if at all possible. For a few days at least the taxes announced on May 18 will still be in force.

Replying to questions Sir Henry explained that the proposed changes, if adopted, could not be retroactive and would not go into force until resolutions embodying them were formally introduced.

The new proposals as they affect the hardware trade are as follows:

Ebony and imitation ivory toiletware which were formerly included in the tax of 20 per cent. collected by the retailer are now listed in the class on which a tax of 10 per cent. is to be collected.

Only Silver and Gold Plated Ware

One of the most important rulings is that under the new taxes the item of plated ware in the 10 per cent. list is changed so as to confine the item to articles plated with gold or silver not otherwise provided for as used in the household or office. As a result the tax is dropped on nickel-plated articles of all kinds.

Clocks and Watches

Clocks and watches in excess of $10 each are added to the list.

Ash Trays, Pocket Knives, Etc.

The following articles are combined so as to fall within the 20 per cent. list: Cigar and cigarette cases; ash trays and match boxes of gold or silver; humidors and smoking stands; hunting and bowie knives; gold and silver handled pocket knives and pencils and gold fountain pens; gold, silver and ivory toiletware; articles of silver not otherwise provided for as adapted for household or office use; silver or gold deposit ware.

The regulations provide that any person, firm or corporation whose chief business is the retail sale of jewelry shall obtain a special license to sell jewelry and other articles specifield in the resolution, in which case the tax payable shall be 10 per cent. on the value of the total sales of such establishment or branch under regulations to be made by the Minister of Customs.

Alter Tax on Chandeliers—To Be Paid Now by Manufacturer

The tax on chandeliers, which at present stands at 20 per cent. except when selling to churches, is altered to provide for a tax of 10 per cent. **to be paid by the manufacturer.** This tax was formerly collected by the retailer. Exemption of $12 each is made for chandeliers, wall brackets are to be taxed on the excess over $3 each and gas and electric light fixtures in excess of $3 and not elsewhere provided for, are to be charged on the excess of $3 each.

Pianos, Organs, Etc.

Further suggestions will be made later with reference to pianos, organs and other musical instruments.

Automobiles

It is proposed to increase the tax on automobiles adopted for passenger use retailing at $3,000 each, from 15 per cent. to 20 per cent.

Playing Cards

It is proposed that the tax on playing cards be changed as follows: For every 54 cards or a fraction of 54 in each package when selling at $24 or less per gross package, 15 cents per

Will Increase Army of Peddlers and Agents While Established Wholesales Will Decline in Number

Such Will be Effect of New Taxes, Say Retail Merchants—Customers Already Suspicious of Retailers' Tax Charges—95 Per Cent. of Turnover Tax Coming Out of Retailer's Pocket—2 Per Cent. Discounts Cut to 1 Per Cent.—Will Encourage Sales From Wholesaler to Consumer

A NUMBER of important points concerning the application of the luxury and turnover taxes to the retail hardware trade, were dealt with by the deputation of retail merchants which waited on the Minister of Finance. A brief summary of the comprehensive resolution was given in June 5 issue of HARDWARE AND METAL, but some further details showing what is transpiring in the collection of the tax, how the retailer is affected, and who is paying it, are given in the more complete statement now available. Some excerpts from this statement are as follows:

Retailer is Absorbing Turnover Tax in His Costs

"With regard to the tax on the sales of manufacturers and wholesalers, we feel that while it may appear that the manufacturers and wholesalers are paying this percentage of taxation, as a matter of fact they are not paying it, but passing it along to the retail merchant, and the percentage is so small that it cannot be absorbed into our cost, and so about ninety-five per cent. of it comes directly out of our profits and our pockets, and we are helpless to protect ourselves.

2 Per Cent. Discounts Now Cut to 1 Per Cent.

"In many cases since this new sales tax came into operation, we find that manufacturers who formerly gave us two per cent. discount are now only giving us one per cent., which means they are taking their tax out of the retail trade.

Wholesalers Have Favored Retail Customers

"Then again, there are a number of manufacturers who claim to do their business entirely with the wholesale trade, but who reserve to themselves certain favored retail accounts. In addition to the advantage these retailers now enjoy, they will be able to save an additional one per cent. to the disadvantage of those who are not allowed to buy directly from the manufacturer, and the Government will also lose the tax on all of these sales.

Number of Manufacturers' Agents Will Increase

"Then again, this same loss will take place with regard to the sales made by a host of persons who have no particular place of business, but who travel from place to place and who are known generally as manufacturers' agents. They are in reality wholesale dealers, but they sell direct from the manufacturer to the retailer, and they only carry samples. This class, in our opinion, under the system of a tax on sales, will multiply, and the wholesale dealers who carry stocks and who pay taxes will decline. There are other objections in connection with this proposed tax, that, no doubt, will be called to your attention from time to time.

TAX REFUNDED ON GOODS

Question: What action can be taken in regard to the turnover tax when a wholesaler fills an order which is returned by the dealer on the claim that the goods were unsatisfactory? Also what is done by the jobber when he makes a clerical error in an invoice? In either of these cases where does the jobber stand in making a credit note?

Answer. It is ruled by the Inland Revenue Department that the wholesaler is empowered to make adjustments of the tax in such cases as these. In retail stores the whole amount of the goods purchased and the tax collected thereon is returned to the purchaser if desired on presentation of the bill showing the two amounts separate.

Will Increase Sales From Wholesaler to Consumer

"At the present time, a large number of wholesale merchants and manufacturers throughout Canada, although having no retail counter, and who pretend to do only a wholesale and manufacturing trade, sell direct to the consumer. Under the proposed Luxury Tax, this system will increase by leaps and bounds, and it will be absolutely unfair to the retail trade to attempt to compete with this unfair competition, either as to the sale price or the amount of the Luxury Tax.

"Since the new tax came into operation, a few days ago a retail merchant from a neighboring town, who was in a Toronto wholesale house, saw a lady buying silk by the yard over a wholesale counter. The question is, did the Government get the ten per cent. Luxury Tax, and if not, what provision is made for transactions of this character? This will apply to nearly every line covered by the Luxury Tax.

Will Greatly Increase Army of Peddlers

"There are thousands of dollars' worth of goods which come under the Luxury Tax which are sold by peddlers and agents all over Canada direct to the public. This new tax will greatly increase this army of peddlers of clothing, and other lines, who have no permanent location, and no provision has been made in the act to collect a tax from these people.

Sales of Second-Hand Goods

"Neither has any provision been made with regard to the sales of second-hand goods, and this proposed tax will, no doubt, largely increase this class of business.

Nickel-Plated Alarm Clocks a Luxury

"It seems, also, unfair that the Government should determine what are and what are not luxuries without first having prepared a list and submitted it to the trade, which might easily have been done before presenting the budget. At the present time an alarm clock comes under the list of luxuries if nickel plated, no matter how cheap it may be, while an oil painting or engraving, costing a thousand dollars, is exempt. A great many cases of this kind could be mentioned.

Makers of Good Quality Merchandise Will be Out of Work

"There are a great many lines of goods the prices of which will be very much higher in the fall than they are at the present time, and, with the sales that have been made from year to year, of goods that were purchased before the war, the decreasing of these stocks, and more goods being required, the prevailing high rate of wages and raw material, it will be impossible to reduce the price of any lines of goods to the consumer, no matter what luxury tax may be placed upon them. If, on the other hand, the Luxury Tax should have the effect of preventing customers from buying goods upon which they have to pay the tax, and they purchase goods upon which there is no tax, the artisans who are now making good quality goods and securing good wages, will either be thrown out of work or they will be placed upon the manufacture of cheap and poorly made goods at reduced wages, and, in our opinion, the amount which is contemplated to be secured by the Govern-

International Reciprocity of Motor Licenses Will Bring Army of U. S. Motorists to Canada

Reciprocity of Motor Licenses Between Canada and the United States and Between Provinces in Canada Established—Michigan Pikes Ass'n Tour of Ontario Will be Vanguard of Army of U.S. Tourists to Come—2,000,000 U.S. Automobiles Within Day's Run of Ontario

THROUGH the establishment of international reciprocity in motor vehicle licenses, thus eliminating difficulty and expense in crossing the border between the United States and Canada on a motor tour, there will be a great inflow of U.S. tourists into Canada during this summer. There has also been established in Canada an inter-provincial license exchange so that plates issued in any one province can be used in other provinces of the Dominion. The period for which this privilege is extended to visiting motorists varies from three months in the case of Ontario, Quebec and Nova Scotia, to twenty days in Alberta. On the expiration of the period fixed by the law for the province, the visiting motorist is required to register his car if it is to be used there for any further length of time. He must pay the full annual fee and display the number plates of the province he is visiting on his car, removing the plates issued to him in the province in which he resides.

Ontario Extends Three Months' Exemption

While Ontario extends a three-month exemption to motorists from Quebec, for example, the exemption in the case of an Alberta motorist would be only twenty days, because the motor vehicles act stipulates that the privilege of exemption from registration is to be extended only so far as a similar privilege is accorded Ontario motorists in the province where the motorist visiting Ontario resides. Reciprocity between Ontario and the other provinces of Canada, and reciprocity between Ontario and the states of the United States is marked by one clear difference. A car entering Ontario from the States is exempted from registration when used for touring purposes only. A car entering Ontario from Quebec may be used for any business purpose as well as touring, and be exempted from registration in Ontario. Reciprocity with the states of the United States in automobile licenses has a 30-day limit for any one car in any one year, so far as Ontario is concerned. Reciprocity has been arranged with the states individually, and at present 33 have entered a reciprocal agreement with Ontario with respect to motor vehicle licenses. The reciprocal arrangement has had much to do with increasing the volume of tourist traffic between Ontario and the United States.

A number of the most important accessory lines for seasonable trade are displayed herewith. Headlight lenses are being emphasized in view of the new laws in Ontario enforcing the use of headlight dimmers.

Spring Cleaning for the Car

This is the time when one thinks of getting the car out, and there are many things the car owner can do himself to get it in shape to run, and with very small cash outlay

Our very complete stock of Motor Accessories include everything necessary to renovate your car Do it now, we will be glad to help you.

GLIDDEN'S AUTO ENAMEL

You can make a nice job of it yourself—hundreds of car owners do it and are highly pleased Simply clean the surface, rub down any rough spots, give it one coat of Glidden's Auto Enamel and it's done One qurt of black @ $2 40 is sufficient for any car We also stock it in red yellow, grey and green

NATIONAL AUTO BODY DRESSING

If your car doesn't need repainting this preparation is the finest thing we know of to use after washing to restore the original lustre to the finish—Try it Price 50c

AUTO TOP DRESSING

For rubber and imitation leather top we stock a suitable dressing for every kind of top. Let us show you how to use it. Price $1 15, $1.00, 55c.

STICK-TITE AUTO TOP PATCH

If you have been unfortunate enough to tear your top or curtains "Stick-Tite" patching materials are just the thing to mend it quickly and permanently. Price 50c

ACCESSORIES YOU CAN PUT ON YOURSELF

Champion Spark Plugs..... 90c
Porcelains for above 50c
Hub Caps for Ford or Chevrolet ..35c
Radiator caps, Ford 40c
Radiator hose, Ford or Chevrolet 20c-15c
Antirattlers Ford 50c
Head Light non-glare lenses $5 00 $2
Columbia Batteries always fresh 45c
Electric Bulbs for headlights, tail or dash lamps 65c, 45c
Celluloid Replace Lights for curtains..... $1 25, $1 00 50c
Oil gauge for Ford ..... 90c.
Long handle oil tap wrench (Ford) 50c
Auto Lock Switch for Fords $5.00
Fan Belts all cars from 50c.

WHAT ABOUT TOOLS

A small bench with a vise, even if it's a very cheap one will be found very useful to every man with a car.

We have Vises in 4 or 5 styles from $6 50 to 50c.
Ball Pein Hammers, 2 lb $1.50, 1½ lbs $1 75; 1 lb $1 25.
Valve Grinder $1.00; Valve grinding compound 60c
Mossberg Wheel Puller, Ford or Chevrolet $1.75
Tallman Double Acting Pump 2.75
Auto Jacks, :. $6 50, $2 50, $1.45
Wrenches for every kind of job at lowest prices.

MOTOR OILS AND GREASES

We stock a full line of highest grade oils and greases and we have an intelligent idea of what is most suitable for your particular car. And our prices are right.

Polarine Motor Oil, medium and heavy, in bulk per gal $1, per pint 15c, in lots of five gallons 90c
En-ar-co National Motor Oil in five gallon lithographed tins $5 25, in bulk $1 00 gal. or 15c pint
Veedol Motor Oil has been added to our line this year because of a demand coming from many car owners for an extra high grade oil Veedol is chemically different from other lubricants, and is actually heat-resisting to the extent that it reduces sediment 86 per cent And of course you need to use very much less oil Veedol in bulk @ $1.45 gal., 20c. pint.
Artic Cup Grease, five lb Tins $1.25, 1 lb 30c
Black Transmission Oil per gal. 65c, qt. 25c.
Oil or Grease Guns $1 25

HENDERSHOT HARDWARE

A Seasonable Accessory Ad.

Great Tourist Possibilities Face Canada

Two million automobiles are owned in the United States within the limits of a day's run of Ontario, and nine out of ten are used for touring purposes. It is therefore evident that there are great tourist possibilities facing every part of Canada during this summer, and in future years when Canada's attractive scenery and summer resorts become more widely known.

The situation presents unlimited pos-

Retailor Must Give Sales Slip Showing Both Price and Tax

In Addition He Must Collect the Tax at the Time of Sale—Department Issues Ruling Prescribing Vendor's Duty.

Ottawa, June 2.—An important ruling dealing with the collection of luxury tax has been issued by the Department of Customs and Inland Revenue. The ruling provides as follows:

"Retail merchants and other vendors of articles subject to the luxury tax who sell to the purchaser for consumption or use are advised that upon the occasion of each sale of a taxable article the following requirements must be fulfilled, viz.:

(1) An invoice or sales slip showing the price at which the article is sold, exclusive of tax, and as a separate item the amount of luxury tax thereon, shall at the time of sale be delivered by the vendor to the purchaser.

(2) The vendor shall at the time of sale collect from the purchaser the amount of the luxury tax shown on the sales slip. No merchant is authorized to advertise or announce that he is paying the tax for the purchaser, as in point of fact he is required to collect the tax from the customer.

sibilities for trade in automobile accessories. It is estimated that United States motor tourists will spend millions of dollars in Canada this summer. This will contribute materially to the restoration of a normal rate of exchange, besides providing extensive business in accessories for Canadian dealers.

Good Roads Association Tour of Ontario

Cities and towns in Ontario and Michigan are making vast preparations in connection with the tour of the Michigan Pikes Association tourists from July 14-29 in connection with the International Good Roads campaign.

The tour starts from Detroit on the night of July 14, visiting the Border cities on July 15, where a "get together" dinner is to be held at the camp on the outskirts of Windsor at which automobile and accessory manufacturers will be represented. Chatham, London, and Hamilton will next be visited up to the 16th and then the tour is north to Orillia, Burk's Falls, Bracebridge and Espanola. Arrangements are being made for the entertainment of the tourists at each of these centres. The Nipissing Motor League and civic bodies of North Bay will banquet the good roads enthusiasts and representatives from as far north as the Cobalt district, will be on hand.

Sault Ste. Marie, where the tour spends a day on July 24, is planning special celebrations and it proceeds then into the State of Michigan.

The tour is in the interests of good roads and this is a movement which is deserving of much support from the trade. It is only by the extension of good roads that the automobile industry will make the maximum development, and the more good roads there are the wider will be the field for trade in automobile accessories. Dealers along the route of the tour will benefit from what business is brought, both directly and indirectly. Other dealers will benefit from the business which will come from tourists who will follow the lead of this movement in visiting Canadian points during the touring season. And lastly by encouraging the idea of good roads the whole trade will benefit by a consequent increase in retail business.

WILL INCREASE ARMY OF PEDDLERS

(Continued from page 36)

ment from this tax will be very disappointing. The cost of collection will be excessive. It will have a tendency to develop the inclination, which is common in human nature, to evade the tax, and its ultimate object will be defeated.

Increase Government's Revenue by Decreasing People's Earning Power

"One prominent retail merchant, in forwarding his opinion of the Luxury Tax, stated that if the Government intends to dislocate the business of the Dominion, he is quite sure that they will succeed. Their method will create hosts of idle salespeople, and people who have been engaged in the manufacture of goods that now come under the Luxury Tax, and the business of the country will be seriously crippled through this ill-considered measure. Another prominent merchant writes that the new Luxury Tax will smash the retail trade and ruin Canadian industries, while another retail firm states that this tax, rather than raising revenue, will hamper commerce. If anyone should undertake to buy cheap goods, which are always the most expensive in the end, where is the Luxury Tax coming from? Can it be possible that this Luxury Tax was framed with the idea of increasing the revenue of the Government by decreasing the earning power of the people?

Destroy Value of Counter Check Books

"It is also pointed out that this system of taxation will destroy the value of hundreds of thousands of dollars' worth of counter check books.

Customers Suspicious of Retailers

Already we find a number of retail merchants complaining that customers are suspicious when they are asked to pay a luxury tax as to whether the amount that is asked by the merchant is correct or not, and as they have no means of finding out what the tax should be it results in the loss of a great many sales."

WILL SECURE DEFINITE INTERPRETATION OF NEW TAXATION

The announcement of further changes in the budget coming at a time when hardware dealers were becoming acquainted with the provisions of the original taxation, has caused much confusion. Under the circumstances it is difficult to secure a definite interpretation of the various imports, but such will be secured for the hardware trade by Hardware and Metal at the earliest possible moment and published for the guidance of dealers throughout the country.

Safety Razors Exempt

The Editor, "Hardware and Metal,"
Toronto, Ont.

Dear Sir:—

Mr. A. A. Bittues, our managing director, desires the writer to draw your attention to page 37, paragraph 2, column 1, of your issue of May 29th, 1920, wherein it is stated inter alia that Safety Razors were to be considered as plated-ware, and inferentially subject to the luxury tax.

He has no doubt, whatever, that this paragraph was inserted in good faith and based upon information which, at the time, you considered to be authentic.

The contrary, however, is correct, as a decision rendered by the Department of Customs and Inland Revenue, dated June 7th, is distinct on the point. It is as follows:—

GILLETTE SAFETY RAZOR,

"You are informed that this article is exempt from the luxury tax."

This decision, while specific as applying to ourselves, covers all safety razors and straight razors, and indicates a general exemption of these particular commodities.

We may state that the 1 per cent. manufacturers' sales tax is entirely absorbed by us, and although we cannot control the wholesalers in this respect, where at all possible, we urge the protection of the buying public from the payment of any sales tax whatever—thus doing everything in our power to maintain the prices so long standardized by us.

Trusting that with your usual courtesy you will give this matter attention.

Yours very truly,
Gillette Safety Razor Company of Canada, Limited.
T. A. O'Reilly, Sales Department.

Hardware Section of Winnipeg R.M.A. Meets

Winnipeg.—The hardware section of the Retail Merchants' Asociation met recently to discuss the luxury tax. No recommendations were made and action was deferred until the officers of the section have made further investigations.

June "The Bride's Month" is Here

Social Custom Prescribes the Giving of Gifts at "Showers" and at Marriage—Fruitful Business for Hardware Dealers—Some Suggestions for Developing This Class of Trade.

THE month of June is "the bride's month," and there is no reason to assume that Cupid has been less attentive during the past winter than in past years, so that during the month now entered upon there will doubtless be a substantial number of happy culminations to his winter's work.

Whether due to the prolonged cold winter or the fact that 1920 is leap year is doubtful, but it is a fact that the outlook for a large crop of June marriages is very promising. The hardware dealer can therefore plan to advantage to secure his share of what business in gift lines is available.

Social custom has been turned to advantage a good many times by the resourceful merchant, and it is doubtful if any other such custom has been responsible for bringing rewards as is that of giving gifts to the bride at the time of marriage. As the merchant learns to take advantage of this custom a larger number of dollars find their way into the tills of the hardware trade each year.

"Showers" of Household Requirements

No sooner is the wedding date announced by the bride of to-day before girl friends are planning numerous "showers" to see that she is well provided for in respect to personal and household requirements. The latter take the form of kitchen utensils, electrical appliances, chinaware, etc., and many other lines dealt with in the hardware store.

To "cash in" on this trade many dealers plan windows for May and June that will catch the attention of the shower shopper. Oftentimes a neat display on a table in the store covering everything that could be given to the bride, from the aluminum roaster to the wooden potato masher, will be effective.

Dealer Can Make Suggestions

Dealers are often called upon to make suggestions for gifts to be given at showers. The store salesman should be sufficiently acquainted with what is wanted to be able to make an appealing suggestion. In this connection it has been suggested that a typewritten list of shower suggestions be kept, grouping the articles according to the price range so that the customer who gives some intimation of what she wishes to spend can immediately have a complete list of articles to choose from. In smaller centres where the hardware dealer knows the party for whom the gifts are being purchased, and who will very probably supply the bigger proportion of such gifts, can keep a list of the gifts purchased in order to avoid any duplication.

Use Windows and Cards

The use of window displays and local newspaper advertising are potent factors in securing this business. Given an early start, such publicity will oftentimes have the effect of originating interest in such matters as well as maintaining enthusiasm during the height of the marriage season.

The Wedding Gifts

Following the gifts for the shower comes the wedding gifts proper. The dealer's wife if she is a reader of the social column in the local newspaper can very likely tip him as to such events.

Silverware is a common wedding gift and an important point to remember is that different guests purchasing silverware always desire to have it of the

A wide range of gifts for the bride are shown in this display. Such a window will do much to stir up enthusiasm for gift giving in any community.

same design if possible. The dealer having sold the first piece of cutlery or other silverware can, therefore, get the names of other guests and advise them so that the pattern scheme can be maintained uniformly.

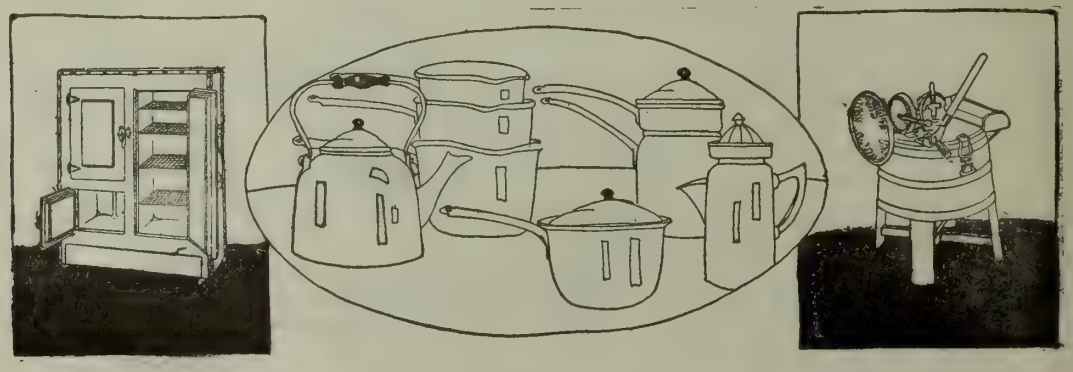
Advertising in the local newspapers can run in conjunction with the window displays. Herewith is shown a newspaper ad. by a Toronto dealer headed "The Gift Unusual." It makes a point of the fact that gifts can be selected at the store which reflect personality and are of practical value — a ready choosing from a skilfully assembled collection. The ad features carving sets, silverware, cut glass, electrical appliances. The range offered is very wide, varying from nickel and silverware and aluminum ware to fireless cookers and laundry equipment.

Follow-up Business in House Furnishings

Another important phase of this matter is the follow-up business which can be secured when the married couple take up housekeeping for themselves. Much good-will can be built just prior to the wedding when everyone is in high glee and susceptible to congratulations. Every newly-married couple should receive a letter of congratulation from the dealer, and this can include an invitation to visit the store and inspect the line of household requirements that are offered.

This duty can be delegated to some of the store help, who should watch the papers closely and send out the form letter in each case. The name can then be placed on a card for follow-up at the time when wedding presents and household furnishings will be required.

The "bride's month" is a big business month for the hardware dealer who makes the best of the opportunity by following some such plan as that outlined.



EDITORIAL COMMENT

CHANGE IN TAXATION MEASURES

A NUMBER of important changes have been made in the application of the new taxation, according to the announcement of the Minister of Finance. On first thought there has been some condemnation of the Government for having put certain taxation into effect and collecting money before the system was in working order, which condition has made necessary the changes which have been made, but it is a difficult matter to take into consideration every small detail in framing the budget, and it is only when a complete expression of opinion from experienced men representing all branches of trade is available that the regulations can be made most equitable. It is therefore gratifying to note that the Government has taken note of the representations made and has acted upon them by making substantial reductions in a number of lines sold in the hardware and other trades.

WESTERN INDUSTRIAL EXPANSION AMAZES EASTERN MANUFACTURERS

REPRESENTATIVES of Eastern industrial enterprise, now visiting the West as delegates to the convention of the Canadian Manufacturers' Association in Vancouver, are amazed at the rapid development of manufacturing in the West during the past ten years, prior to which agriculture was the predominating industry which characterized Western Canada. Eastern manufacturers are learning something of the importance of the West from an industrial standpoint and the industrial congress will, it is hoped, have the effect of bringing East and West into closer harmony and co-operation for the further development of manufacturing.

Figures for 1917, showing the production of industries in the Prairie Provinces, indicate an increase of 100 per cent. in totals for Manitoba as compared with 1915, an increase of 133 per cent. in the case of Alberta, and an increase of 180 per cent. in the case of Saskatchewan.

It is pointed out by Western manufacturers that the people of the West are still maintaining thousands of workers at industrial points in Eastern Canada in producing goods which could be manufactured in the Prairie Provinces, particularly in view of the fact that material for these goods is now shipped from that territory into the industrial centres and again returned. Such a process also increases the cost of manufactured products to the Westerner in whose country the raw materials are produced.

Another evidence of Western industrial growth is the fact that the Prairie division is one of the most flourishing divisions of the Canadian Manufacturers' Association. In the three Western provinces the association has a membership of 516, or one-eighth of the total membership. Many new industries have been established in recent years and many Western plants are carrying out enlargements to meet the needs of the day. Steel and iron products, paints and specialties, building materials, etc., are among the leaders in industrial expansion.

EDITORIAL NOTES

THE INCREASE of the basis of workmen's compensation under the Ontario Act from 55 to 66 2-3 per cent. must be regarded as an encouragement to idleness, under certain conditions. Employees who can draw two-thirds of their present high wages and do nothing, are not likely to be in any hurry about getting back to work.

* * *

THE PRINCIPLE of taxing sales adopted by Sir Henry Drayton has been inaugurated in France, where there is a levy of 1 per cent. on every business transaction from the small purchase by the housewife to deals involving millions. It is estimated that France will raise around $2,000,000,000 by this method.

* * *

A SASKATOON hardware store has a sign on its window "Our first sale in six years." This could truly be called a sign of the times, as many retailers are reducing their stocks. The action of the banks may be expected to make some of the others realize the need for careful buying at a time when prices seem on the peak.

EVENTS IN THE TRADE

Business Changes

London, Ont.—Chown Hardware is discontinuing business.

Toronto. — Hodgson's Hardware has been sold to A. H. Snell.

Milverton, Ont.—The Finkbeiner Hardware has been sold to Robert Schrenk, of Milverton.

Fire Losses

Meaford, Ont.—Wm. Butchart & Co. suffered loss to their hardware stock by water in a fire which broke out in their tinshop.

St. Catharines Backs Homebuilding Scheme

St. Catharines.—The City Council has endorsed a proposal of the Chamber of Commerce to erect 50 houses. The city will guarantee 80 per cent. of the bonds of a company to be formed for that purpose. The houses are to cost $3,000 to $4,000. The first payment by the intending householder will be $500, and the balance like rent.

B. F. Kastner Dies as Result of Accident

Stratford.—Announcement is made of the death in Toronto of B. F. Kastner, hardware merchant of this city, following an operation in the General Hospital. Mr. Kastner was hurt in a curious automobile accident on May 6. His car refused to start from the electric starter, and he got out to crank it. As soon as the car was cranked it started, as the catch holding the clutch and the brake pedal jarred loose, letting the clutch in and started the car as the brake was in mesh. Mr. Kastner was unable to get out of the way, and was carried across the market place and dragged beneath the wheels when the car mounted the curb.

Mr. Kastner was in his 58th year, and was born in Ellice. For twenty-five years he conducted a general store in Sebringville. For the past nine years he had been a resident of this city, and interested in the Perth Flax Co., and a hardware store here.

Commence Building Immediately After Fire

Moncton, N.B.—The Record Foundry and Machine Company, which suffered another serious loss through fire last week, amounting to in the vicinity of $60,000, have started the erection of a new concrete building 350x50 feet. This is only part of their plan for a new and up-to-date foundry.

Ottawa Merchants to Have Saturday Half-Holiday

Ottawa.—The hardware dealers of Ottawa closed their stores on June 5, at 1 p.m., in accordance with the agreement just entered into between them to give their employees the benefit of a Saturday half-holiday during June, July and August. An advertisement was inserted in the local press signed by W. A. Rankin, Ltd., The Capital Hardware, W. G. Edge, Ltd., A. Workman & Co., Ltd., Cuzner Hardware Co., Ltd., The Gray-Harvey Co., C. H. Blythe, Mulhall Hardware, Ltd., The Plaunt Hardware Co., McKinley and Northwood, and McDougal's, Ltd., announcing the early closing.

Housing Congress Meets in London

London.—Housing problems, made acute all over the world, by the war, are being studied here by several hundred delegates to the first inter-allied housing and town-planning congress. Representatives of Canada and other British dominions, France, Spain, Sweden, Holland, Belgium, Finland, Denmark, the United States, Czecho-Slovakia, Italy, Japan, Poland, Chile, Rumania, Siam, Uruguay and Jugo-Slavia are in attendance.

Collection and co-ordination of available information as to the construction of dwellings and stimulation of official effort are among the objects of the meeting. One of the chief aims of the congress will be the formulation of a scheme of international application, by which every family may be provided with proper housing within a period of twenty years.

New Charge by London Gas Company

London, Ont.—The City Gas Company has notified the Finance Committee of the City Council that a new "service" charge of 85 cents a month is to be enforced against every customer hereafter. The company recently applied for the right to increase its rates for gas, but City Solicitor E. G. Meredith advised the committee that the Council had no jurisdiction. The company has evidently reconsidered the situation and determined the simpler process of recouping its losses is to reach every customer on a new service charge.

More Freight Moving Than in Past Eight Weeks

"More shipments of iron and steel are moving, principally because of the release of loaded cars which have been penned behind embargoes, than at any time in the eight weeks of the freight blockade," says the "Iron Trade Review." "New consignments leaving producers' plants also are increasing, though practically no progress yet has been made in clearing away the heavy accumulated stocks of finished material. Gradually this extending traffic is working its way back to the mills and works in the form of deliveries of coal and other raw materials, and operations are beginning to respond."

"Indications in Great Britain are that iron and steel prices are passing the peak, according to the weekly cable. Some products are easier. An interesting feature of the export market is the increased negotiations by German interests for American raw and semi-finished material, including pig iron, sheet bars and wire rods."

Canada's Trade Grows

Ottawa.—Canada's trade continues to increase, as shown in the figures for May prepared by the Dominion Bureau of Statistics. Imports for May, 1920, show an increase of more than two hundred million over the corresponding month of last year, and of more than one hundred and fifty million over May, 1918. Exports show an increase of more than twelve millions for 1920 over May, 1919, but there is a decrease of $216,000,000 as compared with 1918.

Imports from the United Kingdom totalled approximately $141,000,000, and from the U. S. approximately $822,000,000. Exports to the United Kingdom were $472,000,000, and to the U. S. $466,000,000.

AN EXPLANATION

In the May 15th issue of HARDWARE AND METAL, the name of John Bertram & Sons appeared as distributors of the goods of the Rajah Auto Supply Co. The name of John Bertram & Sons was inserted in error, and as they are not the distributors of this line, this explanation appears in order to avoid any misunderstanding in the matter.

Brantford.—Williams Tool Corp., and S. C. Johnston & Co., Ltd., have obtained their charters of incorporation.

NEWS OF WESTERN CANADA

Over 300 Merchants Attend Saskatchewan R.M.A. Convention

MOOSE JAW, June 8 (Special).—The seventh annual convention of the Saskatchewan Retail Merchants' Association opened here this morning with an attendance of over three hundred. The president, S. D. McMicken, was in the chair. At the morning session reports were presented and were followed by a discussion. In the afternoon the convention was addressed by F. Hedley Auld, Deputy Minister of Agriculture.

A ten-minute talk was also given by J. R. Banfield, Dominion president of the Retail Merchants' Association, on greater co-operation. In the course of his remarks he expressed the opinion that there was still some chance for changes in what he termed the lawyers' budget.

"When we are sick we do not ask a hardware man or a grocer to prescribe for us, we want a doctor. Surely the same proposal should apply in a case like this, when lawyers are allowed to draft legislation which is essentially within the scope of retailers," remarked Mr. Banfield.

On Tuesday evening, Hon. W. E. Knowles, of the Saskatchewan Legislature, addressed the entire assembly on the subject of commercial law.

A feature of Tuesday's session of the Saskatchewan convention of the Retail Merchants' Association was a severe criticism of the Board of Commerce and of the new taxation imposed by the original budget.

"The new taxation is the biggest problem which the retail merchants have to face to-day," said J. A. Banfield, Dominion chairman of the Retail Merchants' Association, who pointed out that he had been informed by officials at Ottawa that changes would be made in certain of the taxes before they were put through the House. This prediction has been borne out by the announcement made in this issue in regard to the changed taxation imposed on various lines in the retail hardware trade.

Mayor Hamilton of Moose Jaw stated that concerted effort was necessary on the part of retailers against the Board of Commerce and other restrictive bodies if they are to be enabled to make a profit from their business.

S. D. McMICKEN,

President of the Saskatchewan R.M.A., who is presiding at the convention in Moose Jaw.

The Board of Commerce also came in for criticism from President S. D. McMicken, when in opening his address he stated that the Board was a body lacking the slightest conception of merchandising methods.

Winnipeg R.M.A. Dissatisfied With New Taxation

Retail merchants of Winnipeg, in expressing dissatifaction with recent taxation, state that the expense of collection is too great, and that there is a degree of uncertainty that all will be collected. It is also claimed that it places a restraint on trade, and will put some lines out of business through lack of business rising therefrom. As an alternative to the present taxation, they would suggest a tax on invoices of manufacturers and importers, when goods are billed out at a rate per cent., sufficient to raise the amount desired. Then again, if it is desired, to tax goods held by jobbers and retailers, the Retail Merchants' Association of Winnipeg would place a tax on all sales of jobbers and retailers, for a period of two years, and then place the tax on manufacturers and importers only. This plan would be very simple and keep business moving.

Merchants of Vonda Organizing

Vonda, Sask.—The R. M. A. organizer for Northern Saskatchewan, addressed an enthusiastic meeting of the local merchants at Vonda, Sask., recently, and completed the organization of a branch of the Saskatchewan Retail Merchants' Association, which gives promise of developing into a strong and active body, judging from the enthusiasm which was evident.

The following officers were elected:—President, Eugene Clark; vice-President, Joseph E. Simberg; secretary, W. McIntosh.

Saskatchewan Merchants Discuss Work of R.M.A.

Hazenmore, Sask.—The merchants of Hazenmore and Kincaid have, during the past month, got together to discuss the work of the R.M.A. and the district branches, and at both places they turned out in good numbers and took great interest in the explanation of the work of the Association by Mr. D. S. Saunders, the secretary of the Assiniboia District.

At Kincaid an organization was set on foot, those present unanimously agreeing that a get-together meeting once a month, and even oftener, if necessity arose, for the discussion of their problems, would be an excellent idea and of great benefit individually. Mr. Finlay (hardware merchant) presided, and Mr. Williams (general merchant) was appointed secretary.

Western Credit Men Score the Budget

Winnipeg.—Sweeping condemnation of the methods adopted by the Government in the new budget to obtain increased revenue was expressed at a meeting of the Winnipeg branch of the Canadian Credit Men's Association.

Sectional Meetings in Saskatchewan Convention

MOOSE JAW, SASK.—Sectional meetings were instituted this year for the first time in connection with the seventh annual convention of the Saskatchewan branch of the Retail Merchants' Association held here this week. The program followed out was as follows :

Tuesday Morning, June 8th.

Registration and Distribution of Badges
Address of Welcome by His Worship Mayor Hamilton and Mr. Walter Thorne, President Board of Trade, Moose Jaw.
President's Address.
Treasurer's Report.
Secretary's Report.
Announcements.
All Sessions start promptly on time.
For information ask anyone wearing a Red Badge.

Tuesday Afternoon, June 8th.

SECTIONAL MEETINGS.

IMPLEMENT TRADE SECTION.

Address by Col. H. Davidson Pickett, Barrister. Subject: The Farm Implement Act as it Affects Retail Dealers.
Discussion: Questions and Answers.
Discussion led by Hugh Rorison, Moose Jaw. Subject: Present Day Margins.
Discussion led by W. J. Keller. Subject: Advantages of the Wholesale Contract over Consignment Contract.

* * *

Deis and Leboldus of Vibank, Sask., has purchased the hardware and implement business of Huch and Leboldus.

* * *

William Surgeson is opening a hardware store at Jonesville, Sask.

Protest From Winnipeg

Winnipeg, Man.—The Manitoba Board of the Retail Merchants' Asociation has sent the following wire to all Manitoba members of Parliament: "Merchants here recommend excise tax be placed on manufactures and imports only, and have them absorb it in their invoices. The plan will raise more money and save retail trade annoyance, loss and confusion."

Winnipeg.—H. V. Lellor, representative of the Boeckh Co., Ltd., is making a six weeks' trip to the Pacific Coast.

$80,000,000 MAY BE INVESTED IN CANADA

Winnipeg.—Eighty million dollars of British capital probably will be brought to Canada as a result of the visit of inspection Count de Toper of London, England, and Nice, France, is making to Winnipeg and the West, the Manitoba "Free Press" says: "There is no doubt that the resources are here, and if, after this trip through the West, I am satisfied that circumstances warrant, I shall go back to England and satisfy my friends that they will be justified in investing between £15,000,000 and £16,000,000 in this country," he declared.

Western Industrial Development Amazes Eastern C.M.A. Delegates

Members of C.M.A. Now on Western Tour for Convention in Vancouver—Manufacturing Establishments Increased from 429 to 4,082 in Seventeen Years

WINNIPEG.—Eastern industrial representatives and members of the Canadian Manufacturers' Association are now on a tour through the West and will hold their annual convention in Vancouver. A great many of these manufacturers have been amazed to learn of the phenomenal industrial growth of Western Canada since 1900. As an evidence of the industrial growth of the West it is noted that:

There are now 516 members of the Canadian Manufacturers' Association in the Prairie Provinces. The number of manufacturing establishments has increased from 429 in 1900 to 4,082 in 1917, and the number of employees has increased in the same time from 6,387 to 42,404.

The Government's definition of an industrial establishment is fairly broad. It includes, for example, tailor shops, blacksmith shops, millinery establishments, and many other small concerns. These are not actually factories in the popular acceptation of the term. The Canadian Manufacturers' Association does not admit to membership any concern which employs fewer than five persons in its mechanical department.

Among the foremost industries of Western Canada must be ranked the milling and packing house industries, which are, in a sense, the natural outcome of agricultural expansion. A recent estimate places the investment in the milling industry in Western Canada at $72,000,000, while last year the mills turned out approximately 45,000,000 barrels of flour and 35,000 tons of mill feed.

The number of plants using steel and iron as their raw material is surprisingly large, and the variety of products turned out quite extensive. There are foundries engaged in making bridges, agricultural implements and elevator machinery. There are factories manufacturing gasoline and kerosene engines, batteries, pumps, windmills, fencing, metal siding, corrugated pipe, feed and water troughs. In fact, some of these establishments rank second to none in the character of their equipment and the quality of their product.

As for building materials, these are supplied practically exclusively by Western industries, there being cement works, brick and tile plants and woodworking establishments in operation, as well as paint and varnish factories.

Latest Industries

New industries are constantly being launched in Western Canada and more are bound to follow as population increases.

In the meantime many Western plants already established are carrying out enlargements to meet the needs of the day. In this respect they are sharing to the full with the industries of the East and great demand for all manufactured lines. The industrial expansion of the Prairie Provinces forms another interesting chapter in the history of Western development and is destined to become a still greater factor in national progress as the years go by.

Western Branch of C.M.A. Shows Big Growth in Ten Years

Substantial Membership Increase Since Last Visit of Eastern Manufacturers in 1910—Expansion of Association Coincident With Industrial Growth

Winnipeg.—It is ten years since the Canadian manufacturers as a body toured the West. In 1910 they crossed the country to Vancouver, where their annual convention was held. There has been a notable change in the Canadian Manufacturers' Association in the intervening decade. The membership has increased from 2,600 to 4,100, or about 58 per cent. The growth was most marked, however, in the west, where the membership has increased by 447, or 190 per cent. In 1910 there were in the province of Manitoba 102 members; there are now 343. Alberta and Saskatchewan had together but 16 members; they have now 173. British Columbia's membership has grown from 113 to 162.

The expansion of the association in Western Canada, while coincident with the industrial growth of the country, has been greatly assisted by the adoption of the policy of establishing branch offices to care for the needs of different sections of the country. The association has for some years operated offices in both Winnipeg and Vancouver, which have been specially charged with looking after the interests of the manufacturers of the Prairie Provinces and of British Columbia. Under the reorganization of 1919 these offices have become respectively the headquarters of the Prairie and Pacific divisions. In addition, and to localize the work still further, branch organizations have been formed in all the leading industrial centres of the country.

PASS ALONG THIS HINT TO AUTO OWNERS

Here's how a little aluminum paint may be employed to lengthen the life of inner tubes. Many automobile owners permit their rims to become badly rusted. The rough particles of rust and scale act like sand-paper on the inner tube and a prematurely worn tube or blow-out is the result. An occasional coat of aluminum paint on the rims will greatly prolong the life of the tubes.

IMPORTANT CHANGES IN TAXES ON HARDWARE LINES

Continued from page 35

pack. When selling in excess of $24 per gross package but not in excess of $36 per gross package, 25 cents per pack. When in excess of $36 per gross package, 50 cents per pack.

Abandon Stamp Tax on Medicinal Lines

It is proposed to abandon the present stamp taxes now collected on patent and proprietary medicines, perfumery, etc.

Reduction in Sporting Goods Taxes

Reductions are also proposed in connection with the sporting goods list. Under that list at present children's toys, games, etc., are exempt, as are articles not over 50 cents in value. The exemptions are extended as follows:

Baseball bats and baseballs in excess of $1.25, baseball masks and gloves in excess of $1.50, skates in excess of $2 per pair, toboggans and hand sleds in excess of $3, footballs in excess of $3, lacrosse sticks in excess of $1.50, hockey sticks in excess of 75 cents.

Newsy Notes From Here and There

E. T. Dean, president of Stewart and Wood, wholesale paints, etc., is in Montreal this week on business for his firm.

W. J. Lind, vice-president of the Independent Cordage Co., Ltd., Toronto, is making a business trip this week.

Geo. M. Rice, hardware merchant, of Whitby, Ont., is a visitor in Toronto this week.

A. W. Perkins, hardware merchant, of Unionville, Ont., made a business trip to Toronto during the week.

Geo. Padget, of the hardware firm of Padget & Hay, Agincourt, Ont., made a business trip to Toronto this week, accompanied by E. Barrows, of the same firm.

E. Barrows, of the hardware firm of Padget & Hays, Agincourt, Ont., has returned to business after an extensive honeymoon trip.

H. J. McAdie, sales manager of A. Ramsay & Son Co., Montreal, is in Toronto on business this week.

Listowel, Ont.—Mr. and Mrs. Arkins A. Peffers have gone to Toronto. Mr. Peffers has taken a position with the Rice Lewis Hardware Company.

Paint Firm Inaugurates Aeroplane Delivery

Montreal.—A unique delivery of a special order of paints was made on Friday last from the factory of Brandram-Henderson, Limited, Montreal, to their agent at Three Rivers, P. A. Gouin.

Plans had been made well in advance to institute what is expected to be a regular delivery of paints and kindred products to various agents in this part of Canada by the Brandram-Henderson Company. In view of the fact that this unique delivery had been widely advertised in Three Rivers, a formal reception by prominent citizens of Three Rivers, headed by the Mayor of that city, was arranged for the arrival of the machine piloted by the company's own pilot, S. M. Bradfield.

The new machine is owned by the Brandram-Henderson Company, and has been named "B.-H. No. 1," and is of Curtiss biplane type. The flight started from Dominion Park and, due to a rather serious wind, the journey was accomplished in 50 minutes.

Hardware and Metal understands that this flight has inaugurated a regular service to Brandram-Henderson Company's agents in the central division. It is also stated that similar services will be arranged for other divisions throughout Canada.

Three Rivers.—J. Lucien Rousseau, son of Mr. E. Rousseau, hardware merchant of Nicolet, Que., is opening a hardware store at Three Rivers, at the corner of St. Philippe and St. Georges Streets. Mr. Rousseau is now receiving stock from various wholesalers.

Montreal.—The Canada Paint Company's annual summer picnic was held this week at Lavaltrie, where the whole day was given over to sports, etc. John Richardson, of Richardson and Bureau, Montreal, is this week in Toronto and other Western points. W. F. Duffield, of the Reading Hardware Co., Ltd., was this week in Montreal. B. Frankel, of Frankel Bros., wholesale scrap metals, returned to town this week.

Potato Bug Rumors Are Groundless

Montreal.—Rumors have been spreading in certain parts of Canada, and particularly in the Province of New Brunswick, Hardware and Metal understands, to the effect that potato bugs are very scarce this year and that practically all of them are dead. This information will probably lead some dealers to feel that there will not be a demand for Paris green or other insecticides after tubers have made their appearance above the ground. In discussing this phase of the situation with a large manufacturer who is in possession of information from the Dominion Government Department of Agriculture, Hardware and Metal has been informed that these rumors are absolutely groundless. He said, in part:—"There is absolutely nothing to this rumor, and in fact potato bugs have never been known to die. Unquestionably millions of them are sleeping peacefully under the ground waiting until the potato plants are green on the vine, when they will emerge from their trenches and attack the tubers in force, and the only way to prevent the entire loss of potato crop is to have sufficient stock on hand in the form of Paris green and other insecticides to combat with the destructive onslaught of the army of beetles which never fail to come every spring. It is folly for anybody to follow this poor advice as contained in these rumors."

A report just received by Hardware and Metal states that since the foregoing was written, the bugs have already made their appearance in parts of New Brunswick, and that steps will be taken to prevent the usual destruction by the pest.

Montreal.—Harold Fischler, Chicago Spring Butt Company, Chicago and New York, called on the Montreal trade this week. J. O. Notman, of McKinnon Industries, St. Catharines, Ont., was a Montreal visitor this week. J. Lucien Rousseau, of Three Rivers, was in Montreal purchasing stock for his new store that is being opened at Three Rivers. J. M. Davidson has joined the road-selling force of Lewis Brothers, Ltd., and will cover Ontario territory for this firm in connection with automobile accessories.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, CANADIAN GROCER, Toronto, Canada. Please quote reference number when requesting addresses.

917. **Canned lobsters.**—A firm in Gothenburg, Sweden, ask for the addresses of the principal Canadian packers of canned lobsters.

918. **Flour.**—A Glasgow firm ask to be placed in touch with any mills not yet represented in Scotland, and desiring an export outlet.

919. **Flour.**—A firm (Leith and Glasgow) are anxious to get in touch with an enterprising and up-to-date flour-milling establishment in Manitoba or Ontario, and invite offers of strong flour (Manitoban) and soft household flours (Ontarian winter wheat product). Good business is promised.

920. **Rye Flour.**—A Glasgow firm desire to extend their connections in Canada with exporters of rye flour, with a view to good business when conditions improve.

921. **Canned goods, all kinds.**—A Glasgow correspondent is anxious to get in touch with any exporters of above, not already fully represented, with a view to buying on a very large scale, or obtaining agencies.

922. **Grocers' packet specialties.**—A Glasgow firm ask to be placed in touch with exporters of above.

923. **Preserved fruits.**—A Glasgow firm desire to get in touch with shippers of preserved fruits.

924. **Foodstuffs.**—A Roman firm wish to get in touch with Canadian firms dealing in the above products.

926. **Foodstuffs.** — A firm in Turin are anxious to get in touch with Canadian exporters of liquors, jams, sweets, dried fruits, colonial goods, chocolate, soap, etc.

927. **Foodstuffs.**—An old established firm in Rome desire to hear from Canadian firms wishing to do business with Italy in foodstuffs.

928. **Foodstuffs.**—A Milanese house desires to hear from Canadian firms exporting foodstuffs.

929. **Dried and fresh fruit, dried vegetables.**—A Milan firm would be glad to hear from Canadian firms dealing in dried and fresh fruit and dried vegetables.

930. **Preserved fruits, canned fish.**—A Milanese house are anxious to secure an exclusive agency for the whole of Italy for preserved fruits and canned fish.

931. **Colonial products: Canned fruits, fish, etc.**—An important firm in Milan would be glad to import from Canada the foregoing products.

932. **Confectionery.**—A commission agent in St. John's, Nfld., asks for the names of Canadian manufacturers of marshmallows and one-cent candies.

Hardware Letter Box

STERLING FOOD CHOPPERS

J. H. Slater, Esq., Ridgetown, Ont.—What is the name of the maker of Sterling Food Choppers?

N. R. Street & Company, Rochester, N.Y., make a food chopper by this brand. —Ed.

HAND LEVER PUNCHES

Geo. H. Dahmer, Esq., Conestogo, Ont. —Who are the manufacturers of hand lever punches for punching holes in heavy band iron, etc.?

The following are manufacturers of the kind of punch you refer to: Pratt and Whitney Co., Dundas, Ont.; Brown Boggs Co., Hamilton, Ont.—Ed.

GOLD WINDOW LETTERS

Dundas Bros., Cobourg, Ont.—Please give us the name of some firm in Toronto who handles gold window letters?

J. E. Richardson, 147 Church Street, Toronto, Ont., could supply these.—Ed.

EGG CRATES

Cunningham Hardware Company, New Westminster, B.C.—Please give me the address of Canadian manufacturers of egg crates.

The following list of manufacturers make crates of this sort: Wm. Cane & Sons Co., Newmarket, Ont.; E. B. Eddy Co., Limited, Hull, Que.; Otterville Mfg. Co., Limited, Otterville, Ont.; Canada Foundry & Forgings, Limited, Brockville, Ont.; Wakyte Mfg. Co., Ltd., Winnipeg, Man.; Canada Wood Specialties Co., Limited, Orillia, Ont.; Jas. Neill & Sons, Limited, Fredericton, N.B.; Forest Basket Co., Limited, Forest, Ont.—Ed.

OIL CAN TAPS

E. T. Wright Co., Ltd., Hamilton, Ont. —Where could we purchase oil can taps manufactured in Canada?

The following make taps of this kind: James Morrison Brass Mfg. Company, Toronto; Empire Mfg. Co., London, Ont.; Wolverine Limited, Toronto; H. Mueller Mfg. Co., Sarnia, Ont.; Wallaceburg Brass & Iron Mfg. Co., Wallaceburg, Ont.; Canadian Brass Mfg. Co., Limited, Galt, Ont.; Taylor & Arnold Limited, Toronto, Ont.; Penberthy Injector Co., Limited, Windsor.—Ed.

ONWARD MFG. CO.

Martin, Finlayson & Mather, Limited, Vancouver, B.C.—Please advise us the address of the Onward Sliding Shoe Mfg. Co.

The company's present style is the Onward Mfg. Company and their address is Kitchener, Ont.—Ed.

METAL MARKING INK

Norman Kydd, Esq., Vancouver, B.C. —Where can I procure metal marking ink suitable for marking tools, etc.?

The S. S. Stafford, Inc., 9 Davenport Road, Toronto, Ont.—Ed.

THE OIL INDUSTRY

The oil industry, according to the views of two prominent Standard Oil men, A. C. Bedford, chairman of the board of directors of the Standard Oil Co. of New Jersey, and Col. R. W. Stewart, chairman of the directors of the Standard Oil Co. of Indiana, is at the beginning of a period of unprecedented expansion and development.

BUILDING LAW STANDS

Sarnia.—Sarnia's original building by-law will stand as it is now. The word of the Building Inspector will be final in all issues and discussions on buildings in the Imperial City.

Catalogues and Booklets

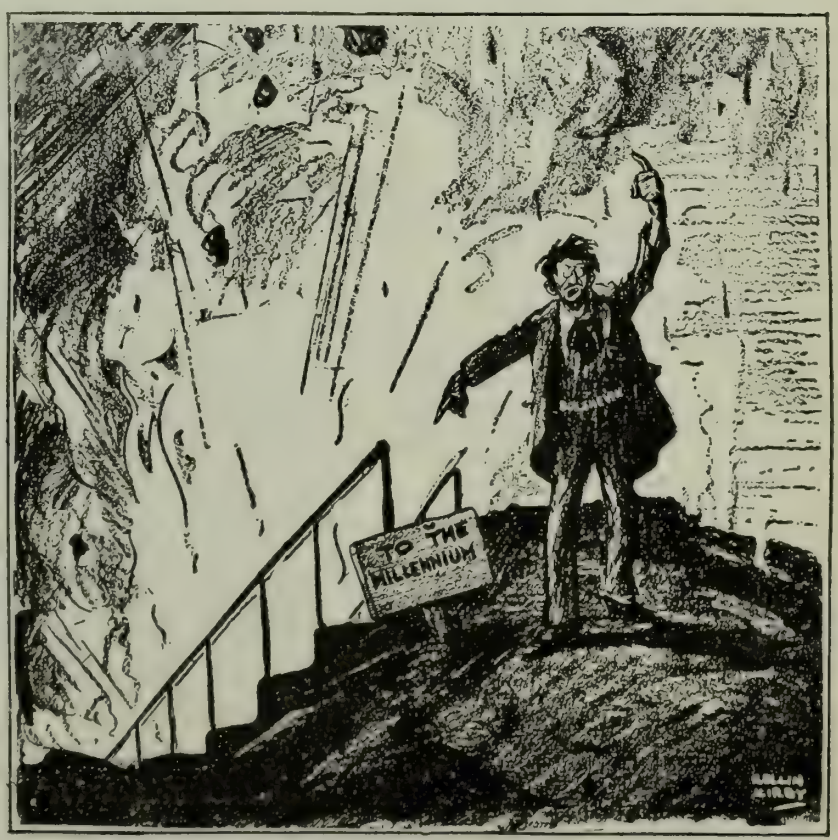
Towe & Towe, London, Ont., have issued a very attractive automobile accessory and hardware catalogue containing 22 pages, well gotten up on the loose-leaf system and permits of easily adding more pages, etc. The catalogue covers many lines of accessories, including patches, anti-rattlers, locks, air check, fabric, patching, grinding compound, jacks, and tools of many kinds, also polishes, tire removers, piston rings, and many other lines. Readers of HARDWARE AND METAL may have copy of this on request from the manufacturers.

The Hall-Zryd Foundry Co., Ltd.

The Hall-Zryd Foundry Company, Limited Hespeler, Ont., have issued a very attractive booklet on their Pilot Pipeless furnace. This book contains 15 pages and the illustrations contain many sectional cuts showing the special features of the furnace, such as the principle of operation, how the heat travels from room to room, how one register does the work, and also many other explanatory features about the furnace. There is also a table giving sizes made, as well as the dimension of the parts and the estimated heating capacity per cubic feet. Readers of HARDWARE AND METAL may have a copy of this booklet from the manufacturer on request.

Canadian General Electric Co.

Canadian General Electric Company, Toronto, Ont., have issued a very attractive broadside. The cover has the slogan, "Do It Electrically," and also shows numerous household electrical conveniences. There is also a white space left for the dealer's name. One page is solely devoted to electric fans and brings out many good selling points. Lists of the branches of the company are also shown, while one page is devoted to reproductions of ads. which are suggested to help the dealer. Altogether it is a very neat circular and may prove interesting to those interested in this class of goods. Readers of HARDWARE AND METAL may have copies from the manufacturers on request.



—Kirby in the New York "World."

POINTING THE WAY

NEW HARDWARE GOODS

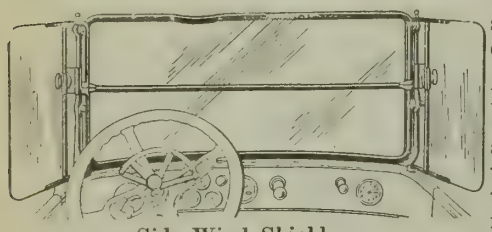
OFFERED TO CANADIAN HARDWAREMEN

Side Wind Shield

The Perfection Windshield Co., Indianapolis, U.S.A., are offering to the Canadian trade their side wind shields for automobiles and which they state will keep snow, rain, dust and wind from striking the passengers in the car, and also prevent the back draught from annoying pasengers.

The manufacturers have the following to say regarding their product:

Perfection Side Windshields consist



Side Wind Shield

of two auxiliary windshields, which are clamped securely to either side of the regular windshield. They make a solid assembly and will not rattle. The clamping device is designed to permit of an easy adjustment of the side windshields to any desired position.

When in the protection position they prevent the back draught from striking the backs of those riding in the front seat, and at the same time afford protection to those who ride in the tonneau. In this position, the auxiliary windshields also keep out snow, rain, dust and insects. Another feature is that drivers find they can get away from the use of front curtains. When desirable, in warm weather, the side windshields may be adjusted to admit air, without slowing or changing the pace of the car. The manufacturers also claim that the metal parts are made of a good quality of stamped steel, the glass is supported in metal channels at both top and bottom in such a way as to eliminate breakage from vibration, bumps in the road or any similar rough usage. The metal parts are finished in either black enamel or nickel plate, consisting of zinc, copper and nickel to overcome the possibility of rust.

Transmission Band Adjuster

A new automobile accessory has been placed on the market by Mattauch & Strong Co., 207 Sixth Ave., Des Moines, Iowa. The new accessory is called the Strong Transmission Band Adjuster, which the manufacturers state is a practical, essential and convenient device for adjusting and tightening the bands of Ford cars and will eliminate accidents caused by loose brakes.

Other features pointed out by the makers are that the brakes may be adjusted in a very short time, the new way eliminating the possibility of dirt wrenches, or other articles dropping into the crank case, which frequently cause such long delays. In tightening the transmission bands, the new system avoids getting them too tight or causing them to become glazed or baked on the surface and allowing them to slip or chatter as a result.

The manufacturers also claim that the life of the transmission bands are lengthened by keeping the brakes properly adjusted and that wear and tear on the tires will also decrease. They also state that these adjusters are made from cold rolled steel, each being turned down on lathes so as to be exact, the pins being pressed in by power press so as to avoid the possibility of them dropping out. The washers are a special designed lock washer, made from a good quality material.

To instal, the makers give the following instructions: Remove six transmission cover screw; take off Ford band adjusting unit; pull out pedal and shaft;

Transmission Band Adjuster

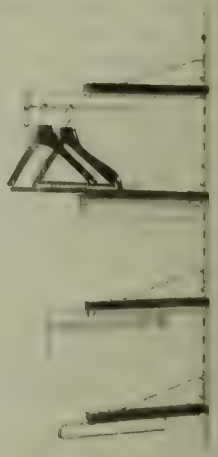
remove pin from shaft and shaft from pedal; file a shallow notch in outside of pedal to engage pin in band adjuster; insert Transmission Band Adjuster; put on washer and nut furnished. To operate, raise foot-board and turn the adjuster to right to tighten—to left to loosen.

Closet Garment Fixture

A new style of garment hanger is being offered the trade by the Barney Moore Company, Inc., State and Lake Building, Chicago, Ill. This new style of garment fixture goes under the trade name of The Rite-Way System, and is composed of a heavy channel bar with a sliding fixture which has a rail attachment for holding the garments.

It is made of solid steel, nickel plated and polished, is easily adjusted to closet shelves of any size or shape. It also has hard fibre rollers to minimize friction and eliminate noise, say the manufacturers.

It is also claimed by the makers that this system allows the hanging of twice the quantity of clothes in a wardrobe closet, on account of the systematic arrangement of the device. Another feature pointed out by the manufacturer is that the fixture may be drawn out of the



Garment Fixture

closet into the light, so that any particular garment desired may be readily selected and for this purpose a special attachment has been designed to prevent the garments from falling off the hanger. They also state that this system eliminates the annoyance of removing several garments to find the one desired and protects the clothes from mussing and crushing and that a neater closet arrangement may be attained.

Transveyor Brake Attachment

The Cowan Truck Co., Holyoke, Mass., state that they have recently made improvements on their transveyor truck brakes and describe the brake attachment for their transveyor as follows:

There is a pendant swinging from the bracket on the transveyor handle and when it is desired to apply the brake this pendant is allowed to engage in the casting, which is fastened to a strip of spring steel lined with raybestos. In practical use when it is necessary to apply the brake, all that is required of the operator is to press down on the handle. And the greater the downward pressure brought to bear in this manner the greater is the braking effect.

When use of the brake is not desired the pendant is swung up out of the way and is held to the handle by a spring clip in order not to interfere with the operation of the truck.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE price tendency on nearly all hardware lines is still upward and advances on many important basic lines have again been made this week. Carpet and cut tacks have been revised upwards; clout nails are also higher. Enamelled, galvanized, japanned and tin wares are also included in the list of higher revisions. Other lines that have new higher prices are stove pipe wire, stove pipe and elbows, flat and round head iron screws, valves, lubricators, brushes, pine pitch, carpet beaters, wood jacketed oil cans, building paper, veneered wood chair seats, steel wool, lamp burners, children's cycles, rifles and shot guns, wheelbarrows, sand paper and spading forks. Turpentine and linseed oil has declined in some localities.

A number of important amendments are being made in the application of the new taxation according to the announcement of the Minister of Finance. According to the new ruling the tax will be made on the amount in excess of exemptions stated instead of taxing the total value.

The difficulty of securing sufficient supplies continues to be the chief drawback to all concerned and jobbers state that their stocks are gradually dwindling and few replenishments are coming forward. This may be partly due, however, to the recent tie-up of the American railroads, and it is stated that the congestion has not yet been overcome and some shipments have been on the road for a long period.

There has been considerable rain throughout the Western provinces and considerable drought has been reported in some localities. Collections continue to come forward freely, and finances of the consumer do not seem to have been affected by the tightening up of loans.

MONTREAL MARKETS

MONTREAL, June 10.—Prices have not only firmed on many commodities but they are definitely advanced in numerous instances. Shoe threads are up 5 per cent. Packing has advanced, for the genuine Rainbow grade, to 75c per lb. An advance of about ten per cent. is looked for on shoe findings. Tack discounts are changed and the prices, in consequence, are higher. The packing charges are also higher. Stove pipe wire is up, and stove pipe and elbows are also higher in price. Screws are revised, the discounts now applying making prices higher all round. Jenkins' valves are now on a list basis. Nearly every kind of brushes are marked higher. Pure pine pitch is much higher. Carpet beaters of ordinary grade are advanced this week. A twenty per cent. advance has been made for lubricators. Nails are very firm, but are still holding at $5.85 per keg. They are extremely difficult to obtain. Solders are lower through a gradual decline in the price of pig tin. Various wares such as galvanized tubs, pails, shovels, etc., are marked higher. Ingot metals are decidedly quiet and some are rather softer. Considering the difficulties of obtaining goods, business is remarkably good, particularly for seasonable summer merchandise.

Advance Is Made For Shoe Thread

Montreal.

SHOE THREAD.—Prices are marked up on shoe thread. Both Barbour's and Acadia are increased in price 5 per cent.

Packing Has Advanced to 75 Cents Pound

Montreal.

PACKING.—Higher prices are now quoted on rubber packing, genuine Rainbow now selling at 75 cents per pound.

Ten Per Cent. Increase Made on Shoe Findings

Montreal.

SHOE FINDINGS.—A change in the list of shoe findings is being made this week, although definite lists are not yet printed. An increase of about 10 per cent. is looked for.

Tack Prices Have Been Moved Upward

Montreal.

TACKS.—An advance has been made in jobbing circles owing to an increase by the manufacturers for tacks. The former discount of 70 per cent. has been superseded by one of 60 and 15 per cent.

EXTRAS, for packing, have been advanced, and these are as follows: 1, 5 and 10 lb. papers, $2 per 100 lbs. net; half pound, $3; ¼ lb., $4, and ⅛ lb., $5.

Advance Is Made on Stove Pipe Wire

Montreal.

WIRE.—Stove pipe wire is now revised to higher level, and No. 18 is selling at $10 per 100 pounds, and No. 19 at $19.50.

Jenkins' Valves Are Now on Net List Basis

Montreal.

VALVES.—An advance has been made in the price of Jenkins' patent valves, which are now selling on a net list basis.

New Range Discounts Advance Screw Prices

Montreal.

SCREWS.—Revised discounts have moved screw prices upward this week, and the following discounts are being quoted: Flat head, bright, 70 per cent.; oval head, 67½ per cent.; round, 67½

Scarcity of Sheets and Plates World Wide —Should Buy Sparingly

In the memory of some of the oldest merchants, iron and steel sheets and plates were never so scarce or deliveries more uncertain for such a period of time as at present.

A. T. Enlow, president of the Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., in discussing the whole situation with HARDWARE AND METAL, stated:—

The whole world is short of sheets, but particularly are stocks in Canada depleted now. The automobile interests have had their fill while others waited, and now a better supply may reasonably be expected to flow again in accustomed channels, but at what price is a matter of conjecture.

It is, perhaps, a somewhat trite statement to make, but nevertheless true, that one cannot with any accuracy foretell coming tendencies in the steel world, and particularly as to black and galvanized sheets.

Will Production Increase?

The market will undoubtedly be most largely influenced and governed by events occurring in the United States, and if there was any considerable production for a decent period I am quite confident that United States sheet prices would recede.

The question remains—Will production resume in large volume, or will strikes, embargoes, laziness, politics, and innate "cussedness" continue to hamper and reduce it?

Buy Sparingly

I am still of the opinion that at present "topnotch" prices one should buy only for immediate and reasonably sure resale and let the future take care of stock at prices which will certainly be much less than at present.

Play the Game

It is not wise, however, to miss a sale and a profit, however high the price may be, and people must have a certain amount of steel sheets to enable them to "carry-on." Play the game, but don't get "caught napping" off the base.

per cent.; flat head, brass, 55 per cent.; oval head, brass, 52½ per cent.; round head, brass, 52½ per cent.; flat head, bronze, 50 per cent.; oval head, bronze, 47½ per cent.; round head, bronze, 47½ per cent.

Various Brushes Have Moved Higher

Montreal.

BRUSHES.—An advance of 5 to 10 per cent. is being made this week in various lines of brushes, including paint, varnish, scrub, horse, clothes brushes, etc.

Pure Pine Pitch Sells at High Price

Montreal.

PITCH.—Pure pine pitch has been advanced in price owing to the various factors of limited transportation, short stock as a consequence, and increasing prices at point of production. Present price per barrel on pure pitch, $14.25.

Increased Prices For Carpet Beaters

Montreal.

CARPET BEATERS.—An advance is made for ordinary carpet beaters, and No. 1 are selling at $1.25 per dozen, and No. 3 at $1.60.

Lawn Mowers Firm; Best Grade in Demand

Montreal.

LAWN MOWERS.—There has been an exceedingly good demand for lawn mowers this year. Jobbers report, however, that the higher grades and more costly machines are in demand. Prices are naturally very firm although there has been no actual change during the week.

Lubricator Prices Show 20% Advance

Montreal.

LUBRICATORS.—Improved standard lubricators have advanced about 20%. The following prices are now effective: Half pint, each $14; one pint, $17; two pints, $21. Polar, one-third pint size, each, $11; half pint, $11.50.

Nail Prices Strong; Limited Supplies

Montreal.

NAILS.—While no improvement is noted in the wire nail situation, prices have held without change during the week. There has been some agitation tending to an advance, but manufacturers as well as jobbers are endeavoring to hold off any increase as long as it is possible, they state. It is stated that the cost of production is very close to the present selling quotations, which are for standard wire, $5.85 per keg, and for cut nails, $6.35.

Steel and Iron Bars Firm and Are Active

Montreal.

IRON AND STEEL.—The market is active and steel and iron bars are selling well for this season of the year. The tendencies are firm, of course, but no advances are suggested this week. It has been more or less difficult to procure the necessary sizes and quantities wanted.

IRON AND STEEL

Iron finish machinery steel		$4 95
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		4 90
Tire steel		5 10
Toe calk steel, per 100 lbs.		5 80

Harrow tooth steel		5 05
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 55
Refined iron, per 100 lbs.		5 55
Mild steel		4 90

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Scarcer Than Ever Are Black Sheets

Montreal.

SHEETS AND PLATES.—There is great difficulty in obtaining the necessary supplies of steel sheets. This is particularly the case with black sheets, and the man who wants them has invariably to pay a premium over the nominal market quotations. Galvanized sheets may be had in some gauges, but the market is nominal there, too.

BLACK SHEETS—		
10 gauge		9 00
12 gauge		9 05
14 gauge		9 10
16 gauge		9 35
18-20 gauge		9 40
22-24 gauge		9 45

28 gauge		12 10
26 gauge		10 75
22 and 24 gauge		11 55
20 gauge		11 55
18 gauge		11 55
16 gauge		10 25
English Standard—		
26 gauge		12 25
28 gauge		12 50
24 gauge		11 65
22 gauge		11 30
18 and 20 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Solders Are Lower Owing to Decline of Tin

Montreal.

LEAD PRODUCTS.—Owing to the fluctuations on tin, and particularly owing to declines that have been made within the past short while, solders have declined and are now selling two cents below previous prices. This applies to bar solders, and the wire solder list has also been appreciably reduced. Revised quotations will be found below.

Lead pipe, per 100 lbs.	....	17 00
Lead waste, per 100 lbs.	....	18 00
Note.—Lead pipe is subject to a discount of 10%.

Zinc sheets, casks	....	0 16½
Do., broken lots	....	0 17

Sales of Cordage Still Satisfactory

Montreal.

ROPE AND CORDAGE.—Prices are steadily held on cordage without change. There has been a satisfactory volume of trade and the manufacturers have some difficulty in getting shipments forward. Prices are: Pure manila, per pound, 35½ cents; British and Beaver manila, 28 cents, and sisal, 22½ cents.

Firm Coal Oil and Gasoline Markets

Montreal.

COAL OIL, GASOLINE.—Prices have been very firm on coal oil since the advance, and there is nothing to indicate any condition but a strong one. According to grades, prices range from 29 to 31 cents per gallon. Gasoline is an active seller and the importers are taxed in supplying this demand. Gasoline is quoted at 38½ cents per gallon, motor grade, others selling up to 44½ cents. The market is active and strong on auto lubricating oils.

Stove Pipes Higher; Elbows Go Up As Well

Montreal.

PIPES AND ELBOWS.—Stove pipes have been advanced in price again, the 6-inch selling at $22.27 per one hundred lengths, and 7-inch at $23.87. Elbows of 6-inch diameter are $3.75 per dozen, and 7-inch, $3.

Some Wares Higher; Stoves Very Firm

Montreal.

WARES AND STOVES.—Galvanized buckets have advanced in price and are selling to the trade at these prices: Flaring pattern pails, 11-quart, per doz., $6.45; 12-qt., $7.25; 13-qt., $8.25, and 14-qt., $9.60. Dufferin pattern, 12-qt., $5.80; 14-qt., $6.45, and 16-qt., $7.40. Galvanized tubs are priced, for the ordinary grade, No. 1, per dozen, $18; No. 2, $19.60; No. 3, $22.35.

FIRE SHOVELS.—No. 56 are priced at $1.45 per dozen; 57, $2.40, and 70, $1.05.

WOOD JACKETTED OIL CANS.—Five-gallon size are selling at 90 cents each; I. C. flaring pails, 10-qt. at $3.60 per dozen.

Old Materials Are in Quiescent State

Montreal.

OLD MATERIALS. — Market conditions have been of a very quiet nature for several weeks and the volume of trade here is confined within small and limited bounds. Prices have been quite unchanged, but have tended to soften, and there may be revisions downwards in most of the lines. The absence of buying activity on the part of the large manufacturers has served to cause a feeling of uninterestedness on the part of old material buyers, for the outgo to these manufacturers is limited.

Dealers' Buying Prices.

Automobile tires	0 02½	0 03

Ingot List Is Dull; Pig Tin Is Lower

Montreal.

INGOT METALS. — Altogether the whole list is a dull one, there being but a limited sale for various ingots. There is a decided softening in tin prices.

COPPER.—The price on electrolytic is now 24 cents, and that for casting 23½ cents. Trading is limited and there is said to be somewhat of a scarcity locally.

TIN.—London markets have been easing for a long time. The local demands are but limited, and price this week is 61 cents per pound.

ANTIMONY.—At 12½ to 13 cents there is some trading, but this is limited

ALUMINUM.—Still quoted at 35 to 38 cents, with sales light.

SPELTER.—The quoted basis here, for this, is 11 cents, and a fair though limited trading is effected.

LEAD.—Pig lead is in rather a peculiar position. London markets are easier but Trail lead is being held quite steadily. Price 10¼ cents.

TORONTO MARKETS

TORONTO, June 10.—The price tendency on hardware commodities continues upward and higher prices have again been made on important hardware lines. enamelled, tin, galvanized and japanned wares have been marked up about 5 per cent. to 10 per cent. Carpet tacks also have higher prices by a lowering of the discount. Stove pipe wire has advanced $1 per 100 lbs. Excelsior brand spading forks have also been advanced. Sand paper prices are higher and navvy wheelbarrows also cost the dealer more.

The demand for nearly all hardware commodities continues to be a heavy one and jobbers and manufacturers state that the shortage of raw material, as well as the finished product, is causing much concern and little hope is held out for immediate relief of the situation. However, lines that are available are moving very satisfactorily.

Freight shipments over the United States railroads are not coming forward as promptly as might be expected. This, however, is mainly due to the recent embargo which was the cause of badly congested shipping centres. Many are hoping this situation will soon be relieved, as numerous firms state they have considerable freight tied up in transit and their customers are in urgent need of the material.

The proposed amendments to the recent tax legislation may cause some confusion; and many lines will again be involved when the amendment becomes effective.

Collections continue to come forward very freely.

Navvy Wheelbarrows Now Cost $67 Doz.

Toronto.

WHEELBARROWS are among the lines that have been revised upwards this week and will now cost the dealer more. The navvy with the steel wheel has been marked up to $67 per doz., while the garden will now cost the dealer $59.40.

Sand Paper Prices Have Been Marked Up 10%

Toronto.

SAND PAPER has again been revised

WARES ADVANCE.—Nearly all lines of wares have again been revised upwards. The new prices embrace nearly all lines, although some lines have not been advanced to the same extent as others. The new prices are said to be due to the great shortage of raw materials. Iron and steel, in nearly all shapes and gauges, is daily becoming harder to procure, it is stated.

The advance on enamelled ware is approximately 5 per cent., although some lines have been marked up 7½ per cent. Stamped wares are also higher. Below is a list of the new quotations:

Britannic, advance 55%.
Scotch Grey Ware, 45%.
Colonial, 15%.
Imperial Ware. 15%.
Pearl, 15%.
Premier, list, plus 17½%.
Canada Ware, list, plus 17½%.
Crescent, 45%.
Diamond, plus 17½%.
White Ware, 35%.
Japanned Ware, list, plus 25%.
Japd. Ware, White, list, plus 35%.
Plain and Japanned Sprinklers, list, plus 25%.
Stamped Ware, plain, 40%.
Stamped Ware, retinned, 33 1-3%.
Copper Bottoms, plus 35%.
Tinners' Trimmings, plain, 33 1-3%.
Tinners' Trimmings, retinned, 33 1-3%.
Tinners' Trimmings, general, list plus, 40%.
Factory Milk Cans, list, plus 60%.
Milk Can Trimmings, list, plus 75%.
Cream Cans, list, plus 40%.
Railroad Cans, list plus, 33 1-3%.
Sheet Iron Ware, list, plus 45%.
Pieced Ware, ordinary, list, plus 60%.
Pieced Tinware, C.B., list, plus 80%.
Fry Pans, Acme, 10%.
Fry Pans, Quick Meal, plus 25%.
Spiders, steel, plus 25%.
Fire Shovels, japanned, list, plus 45%.
Steel Sinks, galvanized, list, plus 35%.
Steel Sinks, painted, list, plus 35%.
Light Galv. Pails and Tubs, list, plus 45%.
Heavy Galv. Pails and Tubs, list, plus 35%.
Hollow Ware, add 30%.
Garbage Pails, list, plus 30%.
Jap. Coal Hods, list, plus 60%.
Galv. Coal Hods, list, plus 75%.
Paper Lined Boards, 20%.
Wood Lined Boards, 5%.
Copper Boilers, list, plus 25%.
Copper Tea Kettles, list, plus 50%.
Copper Tea and Coffee Pots, list, plus 50%.
Stove and other Pipe, list, plus 75%.
Stove Pipe Thimbles, 40%.
Stove Pipe Elbows, black and galv., list, plus 45%.

upwards, the new advance will be approximately 10 per cent. over former prices. The reason given for the change is the higher cost of paper, although other factors have a bearing on the matter.

Garden Hose, Fittings, Etc., Are in Great Demand

Toronto.

GARDEN HOSE continues to have a good demand and good volume is moving. Manufacturers are concerned for the future if the present demand keeps up, as they state they are very busy and find difficulty in keeping up with the requirements of the heavy orders that are coming in. The present quotations on some of the better known lines are as follows:

Garden Hose—½ x 3, 14½c per foot; ¾ x 3, 19c; ½ x 4, 16c; ¾ x 4, 21c.
Corrugated—½, 23c per foot; ⅝, 26c; ¾, 29c.

Wire Nail Scarcity Still Prevails

Toronto

WIRE NAILS.—The situation which has developed in wire nails has shown little relief, and wire nails are still very hard to procure, it is stated. Jobbers state that the mills are booked up so far ahead with orders that they are unable to place orders for immediate delivery. If the amount of building being done this year is as heavy as predicted, it is stated that there may be a famine for wire nails. However, it may be that the manufacturers will be able to find some way to solve the difficulty and catch up with their orders. The present quotations are very firm and wire nails are quoted at $6.10 per keg base and $6.85 per keg for the cut.

Summer Stoves Are Having Big Demand

Toronto.

STOVES. — No change in price has been made on stoves recently, although the present quotations are very firm. Manufacturers state they are looking for a heavy demand during the coming Fall and are busily engaged preparing for the coming busy season. Summer stoves are having a heavy demand and particularly oil stoves are moving very freely.

A Further Jump in Price Of Stove Pipe Wire

Toronto.

STOVE PIPE WIRE.—The shortage of wire of nearly all kinds has been very pronounced, and stove pipe wire is no exception, it is stated. This may have had an influence on the price and stove pipe wire has been revised to new and higher prices, the new advance being approximately $1 per hundred lbs. The No. 18 now costs the dealer $10 per hundred lbs.; the No. 19 is quoted at $10.50 per hundred lbs.

Rope Sales Brisk; No Price Changes

Toronto

ROPE.—Little hope is being held out for lower prices on rope, even with the removal of the war tax. Manufacturers state their operating cost is such that coupled with other taxes they are required to pay they are practically no better off than previously. The present demand is very brisk and considerable rope is moving. The present prices, while unchanged, remain at firm quotations and are as current quotation pages.

Spading Forks Have New Price of $15.50 Per Doz.

Toronto.

SPADING FORKS of the Excelsior brand have been revised upwards and a new higher price of $15.50 per doz. is now being quoted.

Carpet Tacks Have Again Come Up For Revision

Toronto

CARPET TACKS.—New and higher prices have again been made on carpet tacks, the new quotation now being 60 per cent. and 15 per cent. discount from the list in place of a former 70 per cent. discount from the list.

Clout Nails	Blued Lb.	Tinned Lb.
⅜ in.	0 32	0 35
4 8 in.	0 26	0 30
⅝ in.	0 25	0 29
6/8 in.	0 25	0 29
⅞ in.	0 24	0 29
1 in. and larger	0 23	0 28

Corrugated Sheet Prices Firm, Supplies Scarce

Toronto.

CORRUGATED SHEETS.—The market for this commodity is considerably disrupted, and manufacturers state they continue to have great difficulty in securing sufficient flat sheets, and while it is true that small shipments are coming, it is stated that these are not sufficient to cover the orders that are daily coming forward. The shortage of steel is causing much inconvenience, as well as the shortage of the finished products and the general loss of business and many are hoping for the situation to soon show some relief. Although the present quotations are very firm, they remain unchanged and are as follows:

	Per 100 square feet	
Corrugated Sheets –	Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Sheet and Plate Famine Shows no Improvement

Toronto.

SHEETS AND PLATES.—The lifting of the embargo has shown little relief for the famine on sheets and plates which has prevailed, and manufacturers and jobbers state that shipments are coming in very slowly. This may be the case on account of the congestion caused by the recent embargo and some are not looking hopefully for any quantity of sheets to arrive for some time to come. In fact, one jobber stated that the orders that were the last to go in are still the

first to come out, and it is believed that these are carried right straight through rather than mixed up with those already congested at the different terminals.

Owing to the great shortage which is prevailing, the following prices are quoted merely as a guide, as it is stated that very few could supply a full list of sizes, and it is often they find it necessary to pay premiums over these quotations, especially when the jobbers find it necessary to go into the local markets in order to secure stocks to fill their orders.

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
18 and 20	10 70	10 95	10 70	11 10

12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Boiler Tube Prices Firm; Stocks Getting Low

Toronto.

BOILER TUBES. — The recent embargo on the United States railroads and the present congestion of freight as a result of the tie-up has had a tendency to cause light warehouse stocks of boiler tubes. This is due also to the shortage of skelp, it is stated, and it is believed of some that scarcity in boiler tubes may be the result. The present demand has slackened off somewhat, although fair quantities continue to move.

Jobbers state it is often necessary for them to go into the market and purchase boiler tubes at a premium in order to fill their orders; especially is this so of special sizes, and for this reason the present quotations are more or less nominal:

BOILER TUBES—	Seamless	Lapweld
1 inch	$2[illegible] 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Iron and Steel Bars Firm; Price Unchanged

Toronto.

IRON AND STEEL BARS continue to have a steady demand and large volumes are moving out. The present quotations are very firm. No change has recently been made in the price and no lower prices are looked for at present.

Jobbers state they still have some difficulty in securing bars, although they state they nearly always can manage to get enough to fill their orders and are not suffering from any scarcity. Warehouse stocks are said to be fairly heavy, although it is believed that in the case of replenishments several months are required by the mills to make delivery. The scarcity of coal continues to be a big factor in holding up production and the fact that some mills have had labor trouble may also have been a detriment to production. The present prices are firm and are as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 76
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Lead and Zinc Products Unchanged; Price Firmer

Toronto.

LEAD AND ZINC PRODUCTS.—The present quotations on lead pipes, waste pipe and sheet lead, etc., continue to hold steady, and if anything the tendency is somewhat firmer. The demand continues to be a fairly heavy one and considerable volume is moving. Solder is also holding steady at the prices quoted below. Little change in price is immediately looked for, although, owing to the fluctuating tendency of the basic materials on the primary markets little surprise would be evinced if this market should become unsettled. The following are the present quotations:

Lead pipe, list, per lb.		0 17
Lead waste pipe, list, per lb.		0 18
Do., over 8 in., list, per lb.		0 19
Lead traps and bends	....	add 30%
Lead wool, lb.	....	0 16
Lead sheets. 4 to 6 lbs., sq. ft., in rolls, lb.	....	0 13

Solder, commercial, lb.	....	0 36½
Solder, guaranteed, lb.	....	0 44
Solder, wiping, lb.	....	0 36
Zinc sheets, per lb.	....	0 19

Waste Materials Still Show Weak Tendency

Toronto.

WASTE MATERIAL.—The price tendency is still for weaker quotations, although no recent change has been made. No. 1 cast iron and stove plates, which have been very scarce for some time back, are also showing a weaker tendency, and the demand is slackening off, it is stated. It may be with the lifting of the embargo on the United States railroads that prices on these commodities will straighten and the demand again pick up, as the tying up of many industries is believed to be mainly the cause of the present situation. The following are the present prices:—

WASTE MATERIAL

No. 2 busheling	....	13 00
Stove plate, per ton	....	32 00
Yellow brass	....	0 10
Red brass	....	0 15¾

Automobile tires	....	0 03
Heavy lead pipe	....	0 05¾
Tea lead	....	0 11

Metals Have a Light Buying Movement

Toronto.

INGOT METALS. — A light buying movement is prevailing on this market for ingot metals and the tendency of nearly all metals is downward, although no changes have been made in the prices this week.

ANTIMONY stocks remain light and the price tendency is somewhat weaker, although no change has been made, 15 cents per lb. still being the quotation.

TIN has shown declines in the primary markets, although the increase in exchange rate offsets this decline and local quotations are unchanged, the price still holding at 60 cents per lb.

LEAD.—Little surplus lead is to be found, it is stated. Although the tendency is still downward no change has been made in price, however, this week, and the quotation remains at 10½ cents per lb.

COPPER. — The present market for copper is somewhat duller, although the quotation remains unchanged and is holding at 24 cents per lb.

ALUMINUM shows little demand, the quotation of 37 cents per lb. still holding.

SPELTER.—A weak tendency is still noted for spelter, although the demand is very light. The present price shows no charge and is holding at 10½ cents per lb.

Stove Pipe Prices Re-Adjusted as Below

Toronto.

STOVE PIPES.—The new quotation on stove pipes is: 6 inch, $22.28 per 100 and 7 inch, $23.87 per 100. These prices are for present delivery where supplies are available and are not booking prices. It will be noted that these prices are lower than the prices quoted last week, due to a revision of prices.

LONDON MARKETS

LONDON, June 10.—Many hardware commodities have again come up for revision this week and higher prices on many important lines is the result. Enamelled, galvanized and tin ware have advanced about 5 to 10 per cent. Winchester shot guns and rifles will also cost the dealer more. Carpet and cut tacks, also clout nails, are approximately 12½ per cent. higher in price. Flat and round head iron screws have lower discounts, making an advance on the net price. Go-cycles, Banner lamp burners, steel wool, wood veneer chair seats, carpet and roofing felt, also building paper, all have new higher quotations.

The scarcity of nearly all of hardware is gradually becoming more pronounced and jobbers state they are unable to readily replace many lines. Present quotations are generally very firm and the tendency is still upward. Prices on some lines have been withdrawn and are quoted on application only.

The turpentine and linseed oil situation has shown little imprvement, although it is expected that an early adjustment is at hand and lower quotations are being looked for.

The hardware stores continue to enjoy good business and seasonable lines are all in good demand. Lawn hose and fittings, also garden wares and tools, have been the big sellers during the week. Collections continue to come forward promptly.

Wood Jacketed Oil Cans Now Cost Dealer $1.15

London, Ont.

WOOD JACKETED OIL CANS have been revised upwards this week, and the new price will bring the quotation on this commodity up to $1.15 each.

Flat and Round Head Screws Climb Upwards

London, Ont.

WOOD SCREWS.—Ten per cent higher revision has been made on the price of iron wood screws, the new advance being approximately 10 per cent. higher. The new discount on flat heads is now quoted at 70 per cent. off the list in place of a former 72½ per cent., while the round head is now quoted at 67½ per cent. off the list in place of the former 70 per cent. discount. Blued knob screws are also higher, having advanced 40 cents per gross net.

Veneered Wood Chair Seats Now Cost More

London, Ont.

CHAIR SEATS. — Veneered wood chair seats have been revised to higher prices. This is said to be a direct result of the situation which has developed in wood of nearly all kinds. The labor and other factors also have a bearing on the situation. The following are the new quotations:

14 in., $1.90 doz.; 15 in., $2.15 doz.; 16 in., $2.40 doz.

Building Paper and Felts Have Again Advanced

London, Ont.

BUILDING PAPER.—Further revision has again been made on building and roofing papers of nearly all kinds and in line with former revisions is of a higher nature. There seems to be no indication that lower prices will be made on this commodity, the present indications being that the present price is more liable to hold firm. The following are some of the present quotations:

Plain Paper, No. 2, $1.05 roll; No. 1, $1.50 roll; Tarred Paper, No. 2, $1.22 roll; No. 1, $1.60 roll; Surprise or Stag, $1.10 roll; Tarred Felt, $5.70 per 100 lbs.; Carpet Felt, $9.00 per 100 lbs.

Steel Wool Quotations Are on Higher Level

London, Ont.

STEEL WOOL has also been revised upwards and is solely attributed to the higher cost of producing this material. The new prices are quoted as follows:

Small size pkgs., $1.25 doz.; No. 0 in 1 lbs., 92c lb.; No. 1 in 1 lbs., 80c lb.; No. 2 in 1 lbs., 65c lb.

Banner Lamp Burners Have Been Marked Up

London, Ont.

LAMP BURNERS.—New and higher prices have been made on lamp burners, and the Banner brand will now cost the dealer more. The No. 0 has been revised up to $1.25 per doz. The No. a also is quoted at $1.25 per doz.; No. b is quoted at $1.50 per doz., and the No. d will now cost the dealer $3.15 per doz.

Carpet and Cut Tacks, etc., Have Advanced 12½%

London, Ont.

TACKS.—The advancing cost of iron and steel is having considerable effect on nearly all commodities manufactured from these materials, and this week shows an advance in carpet tacks. The new quotation is about 12½ per cent. higher than formerly and is quoted at 60 per cent. and 15 per cent. off the list. Some of the net prices figured at this discount are as follows:

Net prices figured at 60/15% off the list on some of best sellers.

Blued Carpet Tacks—6 oz., 65c doz. pkgs.; 8 oz., 82c doz. pkgs.; 10 oz., $1.00 doz. pkgs.

Tinned Carpet Tacks—6 oz., 75c doz. pkgs.; 8 oz., 97c doz. pkgs.; 10 oz., $1.18 doz. pkgs.

Cut Tacks—1 oz., 26c doz.; 1½ oz., 34c doz.; 2 oz., 37c doz.; 2½ oz., 39c doz.; 3 oz., 43c doz.; 4 oz., 51c doz.; 6 oz., 72c doz.; 8 oz., 90c doz.; 10 oz., $1.06 doz.; 12 oz., $1.21 doz.; 14 oz., $1.42 doz.; 16 oz., $1.62 doz.; 18 oz., $1.82 doz.; 20 oz., $2.05 doz.

Clout Nail Prices Advance About 10%

London, Ont.

CLOUT NAILS have also been revised upwards and both the tinned and the blued will now cost the dealer more. The following is the list of the net prices:

Clout Nails	Blued Lb.	Tinned Lb.
⅜ in.	0 32	0 35
4/8 in.	0 26	0 30
⅝ in.	0 25	0 29
6/8 in.	0 25	0 29
⅞ in.	0 24	0 29
1 in. and larger	0 23	0 28

Barb and Galvanized Wire Prices Still Withdrawn

London, Ont.

FENCE WIRE.—The scarcity of wire of nearly all kinds continues to be causing considerable inconvenience and wire is holding at high firm prices as a result. The No. 9 galvanized, also barb wire, prices have been withdrawn. The oiled and annealed No. 11 is quoted at $6.37 per hundred lbs., while the No. 12 is quoted at $6.45 per hundred lbs.

Go-Cycles Have Been Revised Upwards

London, Ont.

GO-CYCLES also come up for a higher revision of prices. The two-wheel with the iron wheels are $10.50 per doz. The three-wheel, $13 per doz. The two-wheel rubber-tired are now quoted at $13 per doz.

Putty Quotations Remain Unchanged; Price Firm

London, Ont.

PUTTY.—A firm price continues to hold for putty and for this season of the year a very good sale is noted. The scarcity of whiting and also the linseed oil has been the means of keeping the price very firm, it is stated. The following are the present quotations:

Standard 100-lb. drums, $8.30 per 100 lbs.; 25-lb. drums, $8.55; Pure 100-lb. drums, $10.80; 25-lb. drums, $11.05.

White Lead in Oil Firm; Price Unchanged

London, Ont.

WHITE LEAD IN OIL. — A heavy movement is noted for white lead in oil and the demand seems to be gradually increasing. Corroders seem to be very busy handling the present demand and some jobbers state they have had some delay in receiving their shipments from the corroders, who state they have difficulty in keeping up with the present de-

mand. The pure in ton lots is still quoted at $20.45 per hundred lbs., in less than ton lots $20.80 per hundred lbs. The Elephant brand $20.95 in ton lots per hundred lbs., and in less than ton lots $21.30 per hundred lbs.

Turpentine Very Scarce; Price Unchanged

London, Ont.

TURPENTINE.—The stocks continue to be very light and a famine is prevailing at the present time. Jobbers and importers state that it is almost impossible to get turpentine in sufficient quantities, and any that does come forward has little bearing on the situation. Some have been able to procure small quantities by the use of automobiles and light express shipments, but it is believed that these were mainly for cases of extreme necessity.

However, with the opening up of the railroad transportation again, many are looking for turpentine to come in very freely and that prices will soon ease up a little. The following are the present quotations:

	Imperial gallon
1 barrel lots	$3 80
2 to 4 barrels	3 79
5 gal.	3 95

Linseed Oil Stocks Light; Price Unchanged

London, Ont.

LINSEED OIL.—No improvement as yet has been shown on this commodity and a scarcity still prevails. Although crushers state they have purchased considerable seed, owing to the freight tie-up and congestion, etc., seed is not yet coming in to the mill in large enough quantities to relieve the shortage or affect the price. However, it is believed that this situation will soon be overcome and many are hoping for lower oil prices in the near future. The following are the present quotations:

	Raw	Boiled
1 to 2 barrels, gal.	$2 87	$2 90
3 to 5 barrels, gal.	2 86	2 89
6 to 9 barrels, gal.	2 84	2 87

Less barrels, add 15c gallon.

Scarcity of Wire Nails; No Improvement Shown

London, Ont.

WIRE NAILS.—A big demand continues for wire and cut nails and heavy volumes are moving, although jobbers state their stocks are becoming very light, and are very much concerned for the future, as there seems uncertainty regarding future deliveries. It is believed that the mills are unable to handle the business being offered at present and are booked considerably ahead. However, it is hoped that this situation will adjust itself in the near future. The present quotation on wire nails is $6.10 base and the cut nail quotation is $7.50 base.

Rope Sales Continue Heavy; Price Unchanged

London, Ont.

ROPE.—Jobbers state they are very well satisfied with the present demand for rope and a good volume is moving out daily. Prices continue firm and steady and no longer prices are looked for, at least not immediately, regardless of the dropping of the war tax. It is stated that manufacturing costs and other taxes and conditions will not permit of lowering the price on rope at least at the present time. The following are the present quotations:

	Base
Pure Manila	0 35½
Beaver Manila	0 28
New Zealand Hemp	0 28
Sisal	0 22½

Poultry Netting Firm; Supplies Getting Scarce

London, Ont.

POULTRY NETTING.—A heavy demand continues to be made for poultry netting and a very good movement is noted, although some difficulty has been experienced in securing sufficient supplies and jobbers state their stocks are becoming very low, and that they are unable to state any definite period ahead when they can ship orders on account of the shipments from the mills being so unsatisfactory, and irregular, it is stated. Especially is this true of the one-inch mesh. The present price is very firm and the Canadian two-inch mesh is still quoted at net list, and the one-inch mesh is at an additional 5 per cent. to the list.

Some English poultry netting has been coming in, which may help to relieve the situation. The 24-inch by ½-inch mesh is quoted at $16.50 per roll, the half-inch mesh by 30 inch, $20.25 per roll, and the 36 inch, $24.25 per roll.

Winchester Rifles and Shot Guns Advance

London, Ont.

RIFLES AND SHOT GUNS.—Notwithstanding the previous advances made on firearms of nearly all kinds, some lines have again come up for higher revision of price. Among these is the Winchester brand, and some of the new quotations are listed as follows:

Rifles—Model 1890 x 22 calibre, $46.13 each; Model 1902 x 22, $15.38; Model 1904 x 22, $18.45; Model 1906 x 22, $42.03; Model 1892 x 25/20 cal., rd. bbl., $52.28; Model 1892 x 32, W.C F. rd. bbl., $52.28; Model 1892 x 38, W.C.F. rd. bbl., $52.28; Model 1892 x 44, W.C.F. rd. bbl., $52.28; Model 1894 x 32/40, rd. bbl., $49.20; Model 1894 x 38/55, rd. bbl., $49.20; Model 1894 x 32, Special rd. bbl., $56.38; Model 1894 x 30, W.C.F. rd. bbl., $56 38; Model 1907 x 351, rd. bbl., $90.20.

Shot Guns—Model 1897, take down, 12 ga. or 16 ga., $75.85 each; Model 1897, solid, 12 ga. or 16 ga., $71.75 each; Model 1912, take down, 12 ga. or 16 ga., $86.10 each.

Enamel, Galvanized, and Tinware All Marked Up

London, Ont.

WARES.—New and higher prices have been made on galvanized enamelware and tinware. This is said to be the result of a higher cost of raw material, the shortage of supplies and a higher cost of manufacture as well as other factors, it is stated. The new quotations vary, however, as manufacturers state it was necessary to raise some lines as much as others. The new quotations are as per current quotation pages.

Black and Galvanized Screen Wire Cloth Firm

London, Ont.

SCREEN WIRE continues to have a big demand and considerable black and galvanized are moving. The black painted continues to be quoted at $3.60 per hundred square feet, and the galvanized at $4.25 per hundred square feet.

Garden and Harvest Tools Firm; No Change in Price

London, Ont.

GARDEN AND HARVEST TOOLS continue to have a good demand and a good quantity is moving out daily. The present price continues to be very firm, although no change has been made, the quotation remaining at 50 per cent. and 10 per cent. off the list.

Hose Fittings Sell Well; Some Lines Scarce

London, Ont.

HOSE FITTINGS are also in big demand and the volume moving is said to be very satisfactory to all concerned. Hose nozzles, couplings, etc., are rather difficult to procure, especially in quantities, very few having satisfactory stocks, it is stated. The Canadian Gem nozzle continues to sell at $8.60 per doz. and the American Gem at $12.75 per doz.

Lawn Mowers Have Steady Sale; Price Firm

London, Ont.

LAWN MOWERS. — Jobbers state that their stocks of lawn mowers are inadequate to supply the present demand and state they have difficulty in securing sufficient mowers from the manufacturers, who in turn state they are booked well ahead. The present demand shows little signs of abating, and it is the belief of some that it is becoming heavier if anything. The following show prices on some of the better known lines:

K 8 in. wheel, 3-blade—12 in., $6.55 each; 14 in., $6.80; 16 in., $7.10.

K 9 in wheel, 4-blade—12 in., $6.80 each; 14 in., $7.10; 16 in., $7.35; 18 in., $7.85.

C 10½ in. wheel, 4-blade, plain—14 in., $8.40 each; 16 in., $8.80; 18 in., $9.15; 20 in., $9.95.

BB 10½ in. wheel, 4-blade, ball bearing—14 in., $10 each; 16 in., $10.50; 18 in., $11; 20 in., $11.55.

The following figured net at 25% off list:

Daisy—12 in., $6.19 each; 14 in., $6.75; 16 in., $7.28.

Star—14 in., $8.03 each; 16 in., $8.55.

Woodyatt—14 in., $8.85 each; 16 in., $9.38; 18 in., $9.90; 20 in., $10.43.

Empress, ball bearing—14 in., $11.44 each; 16 in., $12; 18 in., $12.49; 20 in., $13.01.

WINNIPEG MARKETS

WINNIPEG, June 10.—Greater activity occurs in the markets, and many important and well-known hardware lines again appear for revision of price as a result, among which will be found, rifles shot guns, revolvers and pistols, axes, annealed and bright wire, tubular rivets, staples, angle steel, barbed wire, cow bells, fork handles and bull rings. Needless to mention all changing lines show an advance on former prices, a somewhat contradictory attitude for the markets to adopt, in the face of the present rumors that the summit of high prices has been reached and a general reduction of price is to be looked for. It can be safely accepted, however, that such an occurrence seems far from being practicable or probable, the general trend and condition of many of the most important commodities indicating this only too clearly. Further, it can be said in connection with this that unless considerable increase in the output of many important lines can be accomplished within the next few weeks, the increasing shortage, it is said, may tend to create even higher prices than are at present existing. Business continues good, the new taxes as introduced making little noticeable difference to date in business generally, as at first thought probable. Collections also are good.

Rifles and Shot Guns Have New Higher Lists

Winnipeg.

RIFLES AND SHOT GUNS.—Sweeping changes occur among rifles and shot guns by which many well-known makes and styles are higher priced as a result. The new revisions are general, embracing all gauges and calibres, and show an average 7 per cent. increase. Some of the lines affected are: Rifles—Stevens', Remington, Winchester, and Savage. Shot Guns—Smith, Fox, Winchester and Trojan. The wide range covering these lines does not permit the tabulation of sizes, etc. The advance can be accepted as general, however, and embraces all sizes. Advanced cost of raw material is named as the chief cause for the new quotations.

Revolvers and Pistols Join March Upward

Winnipeg.

REVOLVERS AND PISTOLS.—Following rifle and shot gun advances, revolvers and pistols are also repriced, having also upward tendencies to the extent of a 5½ per cent. on old lists. The lines affected are: Iver Johnson revolvers, Colts and Savage automatic. All styles and calibres are included in the advance, the changes as in rifles being general. Advanced cost of raw material again applies as the cause for the new increase, it is said.

Plain Wire Inclines To Higher Levels

Winnipeg.

ANNEALED AND BRIGHT WIRE has further tendencies to advance, the latest change showing a 15 cent raise per 100 pounds over old prices. The demand at present, it is said, is of a heavy character, sufficiently heavy in fact as to make great inroads into the already deplorably low stocks. The new prices show a tendency to firmness, although how long the same will hold is difficult to surmise. To-day's prices are:

Plain Annealed Wire.—Nos. 0 to 9, $7.20; No. 10, $7.26; No. 11, $7.32; No. 12, $7.40; No. 13, $7.50; No. 14, $7.60; No. 15, $7.75; No. 16, $7.90 per 100 lbs.

Plain Bright Wire.—Nos. 0 to 9, $7.45; No. 10, $7.51; No. 11, $7.57; No. 12, $7.67; No. 13, $7.75; No. 14, $7.85; No. 15, $8; No. 16, $8.15 per 100 lbs.

Tubular Rivets Are Re-marked Upwards

Winnipeg.

TUBULAR RIVETS.—An advance occurs on tubular rivets, raising this line a further 30 per cent. on old lists, an exceptionally high figure at first glance, yet one that must be considered as feasible when the present cost of manufacture is taken into consideration. Ruling prices for to-day show:

Copper Tubular Rivets—Sizes ¼ in., $2.60; ⅜ in., $2.85; ½ in., $3.05; ⅝ in., $3.30 per dozen boxes.

Assorted Rivets.—$1.68 per dozen boxes.

Copper Staples Are Also Higher Priced

Winnipeg.

COPPER STAPLES.—Following the new revisions on rivets, copper staples also aviate to the extent of 2 cents per pound on previous prices, the reason for which, it is said, are the high prices at present prevalent in the major market, the condition of which is little to be desired, and at present shows little tendency to change. The new prices are quoted as follows:

Electrical Staples, Copper Wire.—Sizes, ½ in., 19c; ⅝ in., 18c; ¾ in., 17c; 1 in., 16½c per lb.

Angle Steel Prices Are About 14% Higher

Winnipeg.

ANGLE STEEL.—The week's activities also involve angle steel in the list of new prices, showing an advance on this commodity to the extent of a further 14 per cent. on recent lists. The steel situation generally remains very much the same, little increase in output being realized. The present heavy demand is quite seasonable, it is stated, the chief difficulty at present being experienced, it is said, in the inability to secure sufficient supplies to meet the demand. Present prices ruling are:

Angle Steel.—Size ⅜ in., $6.10; 5-16 in., $6.75; ¼ in., $6.75; 3-16 in., $6.75; ⅛ in., $7 per 100 lbs.

New Prices Are Named on Holstein Cow Bells

Winnipeg.

COW BELLS again appear in the changes of the markets and show higher prices to the extent of an approximate 8 per cent. Higher prices now ruling on the basic metals, combined with increased manufacturing costs, is said to be the chief reason for the new advance. Prices appear firm and are as follows:

Cow Bells—Holstein, No. 0, $14.40; No. 1, $12; No. 2, $9.60; No. 3, $7.20; No. 4, $6.60; No. 5, $6; No. 6, $4.80 per dozen.

Slight Decline of Price Is Made on Barb Wire

Winnipeg.

BARBED WIRE.—An important feature occurring in the latest changes is the slight decline of price occurring on barbed wire, the extent of the decrease, although only 20 cents per 100 pounds, is worthy of note in consideration of the repeated and heavy advances of this line in the past, to which can be added the prolonged scarcity of same. Whether or not this unusual change augurs well for future quotations, or whether the same is only a temporary respite, has yet to be ascertained. The ruling prices are now quoted at:

Barbed Wire.—Lyman, Winnipeg, $5.80; Fort William, $5.45. Baker, Winnipeg, $5.50; Fort William, $5.15. Glidden Cattle, Winnipeg, $5.60; Fort William, $5.25 per 100 lbs.

Bull Ring Prices Are Revised Higher

Winnipeg.

BULL RINGS.—New prices advance on bull rings to the extent of 11 per cent., an increase that, although not necessarily heavy in itself, places this line at a high level on account of previous and recent advances occurring. The responsibility of the new increase, it is said, is attributable to present existing conditions prevailing in the major markets, which must eventually and necessarily influence the manufactured article. New prices quote:

Bull Rings.—No. 21, $4.25; No. 51, $3.75; No. 22, $5.50; No. 31, $5.50; No. 51, $4. Bull Snaps, $14.50 per dozen.

Higher Quotation Made on Chopping Axes

Winnipeg.

CHOPPING AXES.—An advance in price occurs affecting single, double bitted and handled axes, which results in a further addition of $1 per dozen to

the old price on a general scale. The latest prices appear firm and steady and are quoted as follows:

Axes.—Single Bitted, weight, 1¾ lbs., $17.25; 2 lbs., $17.25; 2½ lbs., $18; 3 lbs., $19; 3½ lbs., $19; 4 lbs., $19 per dozen.

Double Bitted—Mann's, weight 3½ to 4½ lbs., $24.50 per dozen.

Handled Axes.—Weight 3½ to 4½ lbs., $24.75 per dozen.

Beaver Board Is in Good Demand

Winnipeg.

BEAVER BOARD.—General building activities, it is said, are creating a heavy demand for beaver board; orders, dealers report, are increasing daily, and even heavier business, it is expected, will materialize before the season advances to any noticeable extent. To-day's prices have a tendency to firmness and are quoted at: 500 ft. lots, $49.50; less, $50.50; broken quantities, $52 per 1,000 sq. ft.

Fork Handles Are Higher By a Further 10%

Winnipeg.

FORK HANDLES.—Somewhat sweeping changes occur on fork handles and show among the week's changes an approximate 10 per cent. increase as a result of this change. Very little improvement occurs in the general lumber situation, if any; stocks are low and supplies difficult to procure, with repeated advance of prices. This, it is said, is responsible for the new increase appearing on fork handles, which are quoted at: Hay, straight, 4 ft., $4.20; 4½ ft., $4.70; 5 ft., $5.50; 5½ ft., $6.25; straw, bent, 4½ ft., $5.40; 5 ft., $6.25. Manure, long, $5.75; D, $9.85; with strap and ferrule, $12.85; rake, $5.10; hoe, $4.10 per dozen.

10% Advance Made on Nearly All Wares

Winnipeg.

WARES.—Enamelware, tinware, galvanized and japanned ware all have been revised upwards and will cost the dealer an average of about 10 per cent. more.

Sheet Zinc Marked Up to 25 Cents Per Lb.

Winnipeg.

SHEET ZINC.—Higher quotations have again been made on sheet zinc, the new price having been advanced from 18 to 25 cents per pound.

5% Advance on Tie-out Chains; Road Scrapers

Winnipeg.

TIE-OUT CHAINS have been advanced 5 per cent. as a result of the higher cost of manufacture, it is stated.

ROAD SCRAPERS are also up 5 per cent. over former quotations. The scarcity of iron and steel continues to affect many commodities manufactured from these materials.

PITTSBURGH MARKETS

PITTSBURGH, June 10.—Production of pig iron in May was at the rate of about 35,550,000 gross tons a year, this comparing with rates of 33,650,000 tons in April and 40,050,000 tons in March, the March rate having been the highest since October, 1918. Recovery from the effects of the rail strike and the congestion it produced has been greater than indicated by the mere comparison of the figures, since the rail strike did not greatly affect production until about the middle of April, while production increased during the second half of May. The low point in production may be estimated at somewhat under 30,000,000 tons a year about the third week in April, and the rate at the end of May about 37,000,000 tons. By this time the 40,000,000 ton rate of March is probably closely approached, and before the end of the month that rate may be exceeded, for it is a case now, not of any strike, but of working off the congestion.

Traffic Conditions

The rail strike is practically over, so far as there being left many strikers or "vacationists." The men have either gone back to their own jobs or have secured temporary or permanent work elsewhere, with the exception of groups of men here and there. The railroads may still be undermanned to an extent, in point of numbers, but more important is the point that they have some new recruits, not fully trained to their work. Of much more importance still is the fact that the yards and sidings are congested, and it is slow work making the start to relieve them. After one-third the work has been done, the other two-thirds will be accomplished much more expeditiously.

As to how many cars are out of normal service, either through having gone astray or through still being loaded with freight and not arrived at destination, no estimate can be made, as there is widely variant testimony on this. For instance, of two furnace interests not far apart, one reports that it has a large tonnage of Connellsville coke en route to it, but largely stalled, while another reports that it has very little, hardly as much as the average when traffic conditions are normal.

From all quarters one secures the statement that traffic conditions have been improving, although slowly. There are better supplies of empties all around for loading, but the supplies increase almost imperceptibly from day to day. Movements are somewhat better, and there seems to be more loaded cars received by consignees each day than are dispatched by shippers, but the difference is not very great.

Generally speaking, the steel mills are hardly as yet shipping as much steel as they are making, but there is almost an even break in this respect, and probably there will be within a fortnight. As to moving the accumulated steel, perhaps over 1,500,000 tons all told, that is for the future. There are exceptions, however. One mill is reported to have shipped in the past week twice as much steel as it made, but this is probably a little bit of an exaggeration.

Production

Production of steel, on the whole, has not increased much in the past week or two, but it was not particularly important that it should be, the chief desideratum being to move the steel already accumulated. In the Mahoning and Shenango Valleys, however, where output was greatly restricted, there has been much improvement, and the valleys are now operating, in the matter of making crude steel, at about 70 per cent. of capacity. In the case of the valleys and of some mills elsewhere, not all the steel currently made is being put into material in shape for shipment, as there is accumulation of ingots and of partly rolled steel, it being advantageous to hold steel in such forms rather than carry it to the last degree of finish when it cannot be shipped. As a rule finishing departments can stand some overload, and the partly finished steel can be picked up a little at a time from week to week and carried through.

The rate of steel production may be estimated at about 85 to 90 per cent. of the rate attained in March, which in turn was 85 to 90 per cent. of actual capacity. The percentages refer to steel making rather than steel finishing.

Quiet Markets

The various branches of the finished steel market are quieter, or in other words they are more completely stagnant. There is a moderate volume of business being placed by regular customers of mills for forward deliveries, but this business is chiefly with the Steel Corporation, in whose prices the consumers have confidence on account of their being lower than the independent prices. The independents that are filled with business for from two to four months are not booking a great deal, although they are booking some. As to prompt deliveries, there is now relatively little business done in that line, but there is enough to keep prices from sagging entirely to the price level ruling for deliveries a few months hence. The premiums for prompt shipment are simply declining.

As to cancellations, there are no reports of cancellations except in the case of the automobile trade, which is reported to have cancelled some orders for sheets, also some orders for special grades of cold-rolled steel. Details of these operations are not procurable, but it is quite probable that the cancellations refer to particularly high-priced orders in which deliveries were not made according to contract, the buyers having curtailed their consumption so that they can get along with their regular deliveries, purchased previously at lower prices.

Big Profit in June and July Paint Trade

Enthusiasm of March Should Not Shrink to Indifference in July—Will be More Painting in Mid-Summer This Year Because of Scarcity of Decorators—Many People Doing Their Own Painting Will be Busy During Vacation Months.

THE pep and enthusiasm with which the average paint merchant commences his campaign in March often shrinks to something bordering indifference in July. The warm weather, vacations and a natural business shrinkage all tend toward creating an impression that sales possibilities are diminishing. Yet, if the truth were known, it would be found that many enterprising merchants are able to keep up the peaks in the sales chart which looked so encouraging earlier in the season by just that little extra effort which is often needed to put across a business successfully.

This year conditions are especially encouraging because the inability of the average property owner to secure painters caused him to postpone his decorating until summer. Moreover, because of labor difficulties, many people are doing their own painting—and July being the month of vacations means that much work of this kind will be done during the month.

Picks Up Trade From Other Stores

It is surprising, too, when one sits down seriously to consider new channels of trade, how many there are before him. One merchant, who finds paints and varnishes profitable all the year round, makes it a point each July to pick up new trade among other storekeepers. Strangely, this is a field often overlooked. Nevertheless there are so many surfaces in and about the average retail store which actually require more paint than the average home—for instance, shabby ceilings and walls to be renovated and floors to be varnished or oiled, window backgrounds to be finished up. Then, again, as merchants are coming to realize the importance of neat, attractive stores and well-displayed shelving, there is a field for finishes for decorating the counters and other fixtures. When you call on your fellow merchants, impress upon them the value of painting their shelving a dull black to accentuate the color effect of the labels. Take along other bright hunches of this kind and you will be surprised what trade you can unearth

Then July the first marks the date of reduction in the number of colors of house paint and many important lines. This means special effort will be required, perhaps, to dispose of the odd, discontinued colors.

Planning Future Trade

There is the future trade, too, to consider. July is the month of picnics, outings and other festivities. Some merchants have a regular practice of inviting their customers to a big party at which refreshments, music and some form of entertainment are provided. There is usually a guessing contest. Every youngster gets a bag of candy. And if you explain your plan to the manufacturers whose merchandise you sell, they will doubtless be glad to cooperate and arrange for some special demonstration or exhibit.

During the summer, when people are not usually rushed, you have the opportunity of developing the personal side of your business and getting acquainted with prospective customers. This is a good time also to think of the mailing list for your fall and winter campaigns and carefully select the names of people you would like to have on your books, as well as a few interesting facts which will give you the right information on which to base your selling appeal.

Keep Up the Enthusiasm With Use of Windows

Windows will play just as important a part in the keeping alive of paint enthusiasm during the summer months as at any other time of the year. Persistency is one of the essential points of good advertising and as windows are a medium of advertising the intelligent and persistent use of them will convince even the most stubborn customer that it is his duty to paint up.

It used to be that customers were expected to ask for what they wanted. Then people usually asked only for the necessities, but now they are induced through various forms of advertising, one of which is the window, to ask for things they not only need but have been led to believe they need. Unless the dealer nails up the shutters he cannot prevent the windows from advertising. The windows are there and they advertise the merchant either as a live, successful dealer or otherwise.

An expert has said that four-fifths of the rent should be charged to the store windows. This being the case how many dealers are there who are making the

Continued on page 62

Livening Up the Summer Paint Trade

In order to introduce the personal element into his advertising, a merchant in a country trading centre ran a series of advertisements introducing each member of the force, and telling what each specialized on. The series went so far as to include "Helen," the stenographer and bookkeeper—told where she received her training, that her office equipment included —— —— typewriter, —— adding machines, etc. "If you want to know how your account stands, see Helen"; "If you like itemized statements, tell Helen," were the closing remarks in this advertisement.

Types Letters on Varnish Labels

Form letters are apt to become rather stale and unexciting when used for a period of years. A retailer who was working up a campaign on floor varnish, hit upon the happy idea of typing letters on the back of varnish labels. The manufacturer from whom he obtained his varnish was very glad to accommodate him—and the results justified the expenditure on both the part of the manufacturer and merchant.

Varnish Brush For Best Varnish Ad.

Getting rather tired of preparing copy for his newspaper ads., a paint and varnish dealer wrote a couple of lines, offering a varnish brush for the best varnish ad., written by a customer, and was so well pleased with the results that he decided to stage a competition each month which furnished enough material for the coming month's insertions. This is not a strictly advertising idea. Yet it originated with the ad. man. Noticing that some goods remained from one year's inventory to another, he devised the idea of placing gold stars on the label of the shelf slackers. This singled them out from other merchandise and helped in speeding up the turnover.

Odd Uses of Paint and Varnish

What odd uses have you developed for the paints and varnishes you sell? Often some freak application lends itself cleverly to advertising and free newspaper copy. Now that the price of shoes has been boosted skywards, one paint merchant advertises and sells considerable floor varnish in small packages, which is applied over the soles of one's shoes. Possibly the idea has some merit.

Mooramel

A PERFECT WHITE ENAMEL

Made in GLOSS and EGGSHELL White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

MOORAMEL works easy, has perfect flowing properties, ENDURING whiteness and other qualities which make it the EXCELLING ENAMEL. It is without any question the most practical and also the most economical article of its kind ever manufactured.

MOORAMEL can be used with equal good results on either INTERIOR or EXTERIOR work and can be cleansed with soap and water as often as necessary without any injurious effects.

MOORAMEL SELLS AT A REASONABLE PRICE

MOORAMEL like all other MOORE PRODUCTS sells on its MERITS. We do not ask our Dealers to pay high prices to help pay the cost of EXPENSIVE and INEFFECTIVE advertising. We depend on QUALITY and PRICE to sell our products.

This is only one of the answers to the questions so often asked—

? HOW CAN MOORE'S SELL HIGH GRADE PAINTS AND VARNISHES AT PRICES SO MUCH LOWER THAN OTHER MANUFACTURERS ?

Write us for details of our splendid agency proposition and we will give you further reasons why we can do it.

The Brush Department

Unmixed Display Best With Brushes

Ontario Dealer, With Large Brush Trade, Finds Confinement of Window Displays to Brushes is Best When Pushing This Line—Brushes Important Enough to be Shown Exclusively

"CONFINING the window display to brushes only has always produced for us much better results than mixing up lawn mowers, washing machines or some such lines with the brushes," said an Ontario hardware dealer to HARDWARE AND METAL recently. "When we make a drive on brushes we show brushes only and we get immediate results. A good window display is one of the most effective plans we have for 'pulling' business and we have never failed to get good results from our displays confined to brushes alone."

This statement emphasizes an important point which there is a tendency to overlook. Brushes are considered by some in the trade to form too unimportant a branch of their business to be shown exclusively in the window for any period. If this is the attitude of the dealer towards the brush department it is evident that his brush sales will never be very extensive, because the department is not given a fair show for development.

Employees on Alert For Brush Trade

Continuing the discussion this dealer pointed out that he always shows a good class of brush at a reasonable price. The employees of the store are always on the alert to find out about any building or repairing work being done on which painting will be required, and it is significant of the ignorance of the average handler of paints that they have a very little appreciation of the comparative value of certain brushes on various jobs.

"Many of those starting a job do not know that by using this brush or that brush that they can not only save time but can get a much better job. We show them why certain brushes will do certain work better and save time and trouble. We find most people appreciate all the help we can give them in the way of suggestions and they do not mind paying a reasonable price for a brush that will do all that we say it will. Of course if the customer insists on a cheap class of brush we have something to meet their demands."

Price Ticket on All Brushes

This dealer finds it a good plan to let people know the prices of all brushes and so puts a neat price ticket on each class. When a window display of brushes is arranged it has been found helpful to arrange another window display of paints. He finds that service is a big factor in the sale of brushes and the building up of a permanent class of trade.

Not only in the window is the value of display appreciated in this store, for interior displays are also given much attention. "You cannot let the people see too much of your stock," said the dealer. "By keeping the goods out where people can see them we sell a lot more than we could in any other way. The goods sell themselves. People come in to buy a can of paint or other finishes, and while going through the store see an attractive array of brushes displayed, each with its price ticket indicating a good range in quality and value. The tendency is to point out that if they have been calculating on using an old worn brush that it would pay them better to buy a new one of a medium grade to make a better job of the work to be done. If they have forgotten about brushes altogether, as many amateur painters do, it serves as a reminder.

This dealer finds that there is a continuous tendency among his customers to pay the price for quality in brushes as in other lines of goods. As he points out it is a question of which is "cheaper in the long run."

Germany, Short of Linseed Oil, Puts Ban on Exports

A shortage of linseed oil in Germany is reported because of very small importation. It is proposed to allow the export of linseed oil only by exporters who furnish bill of lading and customs declarations showing the amount of linseed they have imported.

Ninety per cent. of the imported linseed will be allowed to be re-exported when these exporters declare the remaining 10 per cent. exclusively for domestic consumption. Exportation through persons other than importers will only be allowed provided the importer consents to include this amount in the 90 per cent. which he is permitted to export.

Paint Association Deals With Budget

Linseed Oil May be Easier Western Trade Notes

Montreal.—At a special meeting of the Canadian Paint, Oil and Varnish Association held in Montreal on Thursday, May 27, the following resolution was passed:

It was moved, seconded and resolved that a memorial be sent to the Government with regard to the new budget tax, in which the following points should be embodied:

1. Collection dates specified are too frequent. Suggest once every three months, for period completed thirty days previous.

2. It should not be necessary for companies who have certified auditors to furnish the Government with a copy of every invoice. A recapitulation should be satisfactory.

3. The words at the end of clause 7 reading, "where it is not included in the purchase price" are ambiguous, and it is suggested they be deleted.

4. It is assumed that in the case of goods and for containers actually returned, provision may be made for the remission of the tax.

5. What rule should be followed in the case of fractional amounts shown in the following examples:

Amount of Invoice	1% Tax	To be paid
$ 4.52	.0452	.04 or .05
3.49	.0349	.03 or .04

It was also decided to assist the Canadian Institute of Chemistry in establishing an institute in Canada to work in conjunction with similar bodies in Great Britain and United States.

Care Re Trade Marks

Registered Trade Marks and Proprietary Trade Names: This subject was brought up by a communication from one of the paint companies, in which it was suggested that to avoid duplication of trade marks or trade names, the secretary be furnished with complete data, and that members wishing to establish new trade marks or names, first make enquiry of the secretary.

IMPORTATIONS FROM U. S. OF MIXED PAINT AND ZINC OXIDE

During the month of March, 1920, ready mixed paint to the extent of 1,656 gallons, valued at $4,294, was imported to Canada from the United States. Varnish imports were very small, while imports of zinc oxide amounted to over one million pounds, having a value of $91,340.

BOECKHS

Ideal Waxing Brush

NOT only Ideal in name but ideal in use. It has the features and the selling points that attract, sell and satisfy the consumer and the Boeckh name and trade mark brings him back again for other purchases. With the Boeckh trade mark every sale is a link between your store and the customer's mind—a link in a chain of future sales.

Boeckh's Ideal Waxing Brush is provided with a reversible handle secured by a ball socket that permits convenient adjustments of the handle for different uses. The grooved top surface of the brush permits depression of the handle to even below the horizontal, making it possible to work under very low furniture with ease. The equally distributed weight increases the polishing surface presented to the floor. Write for catalogue and prices of Boeckh Products.

Points to Remember

The Reversible Polished Handle and the Heavy Protectors to Protect Furniture. Equally Distributed Weight increasing the Polishing Surface. Aluminum Finish.

BIG PROFIT IN JUNE AND JULY PAINT TRADE

Continued from page 58

correct allocation of the responsibility for the production of business?

Average Householder Not Consistent in Paint Buying

The average householder does not buy paint and varnish often enough to get the habit of supplying his needs from any particular store. When he sees something in a window that appeals to him about the time he is thinking of painting up a bit, he buys. You are not a mind-reader and can't tell when he is going to be in that receptive mood, so the safest thing to do is to keep something new and interesting in your windows all the time.

You will find that if your windows are attractive and changed often, people will get into the habit of watching them and will go out of their way when downtown to see your latest display. Women are always interested in how to beautify their homes and some of your window trims, particularly if you suggest ways to decorate interiors, will suggest desirable changes to the woman who has a room she does not like or is planning to change.

Price cards are valuable. The people who will buy without knowing the price will not be deterred by knowing the price, and there are a great many who want to know the price.

LINSFED OIL MAY BE EASIER

Montreal.—While linseed oil is holding at $2.60 and $2.62½, raw and boiled bases, respectively, the situation is showing some improvement this week. There appears to be some division of opinion as to the extent of the improvement, but conditions have changed for the better in some quarters, and the receipt of certain quantities of English oil has served to relieve the situation somewhat. Early this week between 700 and 800 barrels arrived from the English market, and this was very welcome to manufacturing and trade circles in view of the shortage of seed for crushing in this market.

Almost frantic have been some of the efforts put forth to move supplies of seed en route to Canada from the Argentine. As before pointed out in HARDWARE AND METAL, much seed was on the way from the South American Republic but could not be moved owing to the congestion in the port of New York and in other American centres. To get the ear of transportation officials is a difficult thing, and even when this is accomplished the crusher can get but little infor-

How Hardwaremen Advertise Paints---No. 10

THE wastefulness and the monetary loss sustained through sparing paint is emphasized in this ad. by Northern Canada Supply Co., Ltd., Timmins, Ont. Everyone is interested in saving money and too many are practising a false economy by saving money which could be put to better use in buying paint. For this reason the heading "Save Money by Using Paint" attracts attention.

"Spare the Paint and Spoil the House" is the sub-head, followed with the statement that the generous use of paint is true economy for the householder. It continues to point out that while the line of paint carried is a beautifier, that it is also a preservative for woodwork and other surfaces and makes for cleanliness and sanitation.

A complete description of the finish required for various kinds of work is given followed with a little talk on service, in which the co-operation of the store staff is offered in assisting the customer to make the right selection. It is a well-planned ad., touching on a number of vital points in paint advertising.

Save Money by Using Paint

Spare the Paint and Spoil the House

The generous use of paint is true economy for the householder. Sherwin-Williams Paints are more than beautifiers—though they are that all right—they also preserve all woodwork and other surfaces to which they may be applied, and further, make for cleanliness and sanitation. Usually it is not the question, Can you afford to paint? Rather it is, Can you afford NOT to paint?

Sherwin-Williams have a Paint and Varnish for Every Purpose

REXSPAR

The S-W. Varnish for outside work. Woodwork exposed to weather and water should certainly be protected with Rexspar. It is absolutely waterproof and will not turn white. Especially suitable for outside doors, porch furniture, store fronts and boats.

S.-W. FAMILY PAINT

For inside and outside use. Durable. Easy to apply. Dries with a fine gloss. Will give general satisfaction. Just try it once.

S.-W. OUTSIDE PAINT

Made to Paint Buildings With. Made from the best materials. Will look well, last well, please every time. Easy to apply. Full directions with every can.

All ready for use. Let us show you our big line of paints for all purposes. All ready for use with directions for applying, etc.

S.-W. FLOORLAC

A combination of stain that is non-fading and good floor varnish which is tough and durable and will not show scratches and heel marks readily. Preserves the wood. Retains its natural brightness. Big variety of shades. Let us talk it over.

FLAT-TONE PAINT

A durable oil paint for the artistic decorations of interior walls and ceilings. Produces a flat, velvety finish. Absolutely sanitary. Can be cleansed with soap and water. In all colors. Let us explain all about it to you.

SCAR-NOT

S-W Varnish for Furniture and Woodwork. Makes old furniture look like new. Preserves and protects. Unaffected by hot dishes or the spilling of hot water.

MAR-NOT

The S-W varnish for floors. Walking, dancing, scuffing feet or spilling hot or cold water on it will not mar the handsome wood floor protected with Mar-Not. A money saving preserver of woodwork.

INSIDE-FLOOR PAINT

Dries over-night, with a good gloss. Will stand all sorts of hard wear. Easy applied. Come in and see what you will need in this line.

You will never make a mistake in Paints or Varnishes if you ask for Sherwin-Williams every time. Just tell us the purpose and we will tell you the S-W product that will just fill the need.

Nothing requires more thought and care than the selection of colors and effects to use in the decoration of the home. One may want to finish the rooms in soft, restful shades which harmonize with one another, but it is frequently difficult to know beforehand how the various colors will look when the decorations are completed. We help people who are interested in decorating or re-decorating, to choose more easily color schemes which will be harmonious and thoroughly satisfactory.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 10.—Lower prices on turpentine and linseed oil are the features of the week as far as prices go. Some are selling oil at ten cents a gallon less than last week, while a drop of 25c per gallon has been made in other quarters for turpentine. This indicates an easier buying condition, with the promise of conditions improving as time proceeds. The tendencies are somewhat more favorable all around.

Prepared paints and varnishes are active and are moving out well from week to week. Both these lines are firm, with production costs higher all around and raw materials difficult to obtain. White lead in oil and putty are both active. The general situation is buoyant and the outlook very satisfactory.

Turpentine Lower in Some Quarters

Montreal.

TURPENTINE.—Prices have softened somewhat in one or two quarters this week and quotations are ranging about 25c per gallon less with some paint firms. This is due to the arrival of some stock, while others state that prices are unchanged over the week and that delivery is still slow and uncertain. If deliveries continue to improve there will be an easing of the price still further, but much depends upon delivery.

Turpentine—	Imp. Gal.	
Single barrels	3 35	3 60
Small lots	3 70	3 90
(Packages extra)		

Linseed Oil Lower Ten Cents a Gallon

Montreal.

LINSEED OIL.—Prices are easier on linseed oil, the present market being easier to a limited extent in two or three quarters, but extensive relief not being manifest in any quarter. However, this relief is welcome and still lower prices may be effected within another week or two. This tendency is in very definite accord with the forecast made in Hardware and Metal last week, when it was stated that "Oil May be Lower." There is a fairly seasonable demand.

Raw—	Imp. Gal.	
1 to 2 barrels	2 50	2 60
3 to 4 barrels	....	....
Boiled—		
3 to 4 barrels	....	....
1 to 2 barrels	2 52½	2 62½

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Putty Sells Well; Prices Remain Firm

Montreal.

PUTTY.—Prices are firm on various kinds of putty, and the tendencies are strong, but no suggestion is made of an imminent advance in the market. The movement is a very active one at present and the following quotations are being made to the retail trade:

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Much Paint Sold; Varnishes Firm

Montreal.

PAINTS AND VARNISHES.—Prices are firm on varnishes and the market shows no sign of weakness. The outturn of supplies to the trade is steadily active. Paints are still going forward well and the manufacturers are more than delighted with the repeat business that has come forward. The market is really very active for this season of the year.

Trade Still Buying White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have been well maintained on white lead in oil, and the market is altogether unchanged in a quotable sense. The corroders report very active selling right along and supplies are forthcoming in fairly satisfactory quantities. The following quotations prevail: Five ton lots, per 100 lbs. $19.50; ton lots, $20; and smaller quantities, $20.35.

TORONTO

TORONTO, June 10.—Little change has been made in the paint and varnish markets this week, although present quotations are firm. A heavy volume of paint is moving and the present demand is said to be very satisfactory for all concerned. One jobber stated that his sales for May were over a hundred per cent. higher than the same period last year. Many are looking for improvement in the linseed oil and turpentine situation, and should larger stocks come to hand their hopes may be realized. Paris green sales are fair. White lead in oil is also having a good turnover. Whiting stocks are light and few shipments, if any, of the better grades are coming forward. Collections are good and altogether trade is said to be very satisfactory.

Corroders of White Lead Are Kept Very Busy

Toronto.

WHITE LEAD IN OIL.—Prices on this commodity continue to be very firm and good volume of business is moving at the present time, and corroders and jobbers are very well satisfied with the continuation of heavy business which started out in the early spring. There is also said to be a heavy foreign demand. The present quotation remains unchanged and is quoted at less than ton lots, $20.70 per hundred lbs., for the pure, while the genuine is being quoted at $23.40 per hundred lbs.

Prepared Paint Sales Brisk; Pigments Scarce

Toronto.

PREPARED PAINT.—Business still continues active on ready prepared paints, and paint specialties and manufacturers and jobbers express great satisfaction over the season's trade. The steady warm weather has been one of the necessary stimulants, and it is believed that most merchants are seeing their best hopes filled for one of the best seasons for some time. The shortage of some of the raw materials is said to be causing the manufacturer some concern and no little inconvenience. Some pigments are gradually becoming scarcer and more difficult to obtain. The present quotation on paint is as the current quotation pages.

Glass Shipments Tardy; Scarcity Still Felt

Toronto.

GLASS.—Notwithstanding the lifting of the embargo, glass shipments are still tardy and little is coming forward. This may be, however, on account of the congestion which has not yet been straightened out on the railroads. The present demand is a heavy one, and future prospects are very bright, providing the glass comes to hand.

PLATE GLASS.—The situation on plate glass remains unchanged and ship-

There's Profit for You in Enamels

Provided you sell the kind of enamels that repeat—the kind that brings customers back for more without any effort on your part. Sell GLIDDEN ENAMELS and you can be sure of serving that kind of satisfaction, too.

There are two kinds of Glidden Enamels—Superior White and Velvet White. Superior White is a very durable, glossy enamel and for all ordinary purposes it is the most practical enamel that can be used. For decorative work of the finer sort, Glidden Velvet White should be used. Velvet dries to a dull velvety finish absolutely without rubbing. In four coats it does the work of seven ordinary coats.

The name Glidden on a can of Enamel is assurance of satisfaction. Send for our proposition to-day.

If interested, tear out this page and keep with letters to be answered.

ments are harder than ever to secure. The present demand is a very heavy one and jobbers, importers, etc., generally are doing their best to cope with the present situation, they state.

Putty Quotations Firm; Price Remains Steady

Toronto.

PUTTY.—The past week has seen a fairly heavy demand for putty, especially for this season of the year. Jobbers state this augurs well for the coming season. Whiting is still very hard to procure, it is stated, especially better grades, and this has a tendency to keep the price very firm. Linseed oil scarcity is also another factor to contend with, as well as the prevailing high prices. The following are the present quotations on putty:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.
Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Paris Green Sales Good; Some Stocked Light

Toronto.

PARIS GREEN.—Although sales are daily increasing in Paris green, it is the belief of some jobbers that many dealers have not covered themselves sufficiently for this commodity, and should a heavy season prevail some are of the opinion that there may be a shortage owing to the general light stocks. The present quotations are as follows:

Paris Green—	Per lb.
½-lb. pkgs.	0 58
1 lb. pkgs	0 56
25-lb. drums	0 54
50-lb. drums	0 53
100-lb. drums	0 53
250-lb. kegs	0 52½
600-lb. barrels	0 52

Linseed Oil Prices May Soon be Lower

Toronto.

LINSEED OIL.—Some improvement has been shown regarding more stocks of linseed oil and some flaxseed is coming to hand; crushers state they are still having difficulty in securing sufficient seed. It is hoped, however, that in the near future, seed which has been already bought and is in transit will come to hand, and if this be the case many will be looking for lower prices. What the future holds in the way of lower prices is hard to forecast as present conditions are so irregular, and few, if any, care to express their opinions. However, many are looking for lower prices on linseed oil in the near future. The present quotations are as follows:

Linseed Oil—		Raw
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
		Boiled
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal nigher than single barrel price.

Turpentine Shipments Are Slow to Arrive

Toronto.

TURPENTINE. — Little relief has been offered in the present famine of turpentine, and jobbers say they are having great difficulty in securing supplies. The congestion on the railroads, the result of the recent embargo, is said to be the cause for tying up considerable turpentine in transit, and many importers are anxiously waiting for their stocks to come in. In the meantime it is believed that some are getting small shipments by express or automobile. However, it is hoped that this situation will soon right itself and that turpentine will again come in in better quantities, and should this be the case many are looking for lower prices in the very near future. The present quotations are as follows:

Turpentine—	Per imp. gal.	
1 barrel lots	....	....
2 to 4 barrel lots	....	....
5 gal lots	4 00	4 75

LINSEED OIL MAY BE EASIER

Continued from page 62

mation of a definte nature as to when his supplies will arrive. It is a continued matter of car shortage, and as one crusher pointed out to HARDWARE AND METAL this week, "We were informed while in the United States last week that if the strike was settled today it would take three months before the accumulated orders for transportation of freight now in hand would be cleared up."

HARDWARE AND METAL is able to say that if present plans can be matured the oil situation will be considerably easier within the next week or ten days. Some believe that while prices will reduce to some extent the reduction will not go much below the $2.50 mark.

IT CAME IN HANDY

When the representative of the Health Board called to remove the quarantine sign which had been put on the house to warn people of influenza there, he was met by the lady-of-the-house, a negro mammy.

"Doan yo' take that down—they ain't been no collectahs roun' heah sence that went up."

The Public's Choice

It has taken years of study and experiment on the part of our engineers to put that refined grace and superior finish into C.C.M. Bicycles. The QUALITY was always there.

That the superiority of C.C.M. Bicycles is appreciated by the public is evident from the sales

If you are not already selling C.C.M. bicycles, drop us a line for terms, etc.

Prompt Shipment

You know that old stuff about "a bird in the hand being better, etc.,"?

Well, this efficient washer is not only the much superior washer that you are in search of, but we can guarantee immediate shipment from stock!

By special effort at production to meet the demand we have 800 ready to ship—a service you can't get elsewhere to-day.

The Red Star Washer

with Wringer

is a "bird in the hand" beside being easy to sell because of its many advantages mechanically and in construction. The legs are bolted on—not formed by extending the staves, the latter is a great strain on the tub. It is easy to operate—cut gears and two sets of ball bearings. It far more than satisfies.

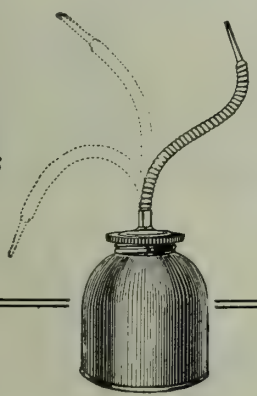
Beautiful Everlasting White Porcelain Enamel

ON SPECIAL IRON

Stronger than China, outwears all Imitation Paint Enamels or Celluloid finishes, at a price within the reach of all.

American Enamel Products Co.

CHICAGO, ILL.



Saves 50% on Oil Bills

The "All-Way"

Machine Oiler No. 6

A feature that partly accounts for the successful sales that hardwaremen everywhere are having with this efficient, well-designed oiler.

The spout is flexible and self-cleaning, so that it may be bent to reach inaccessible places and is always free and open ready for instant use.

See also the All-Way Oiler, R.R. Oiler, Funnel and Filler, and Oil Gun.

The All-Way Oiler Mfg. Company

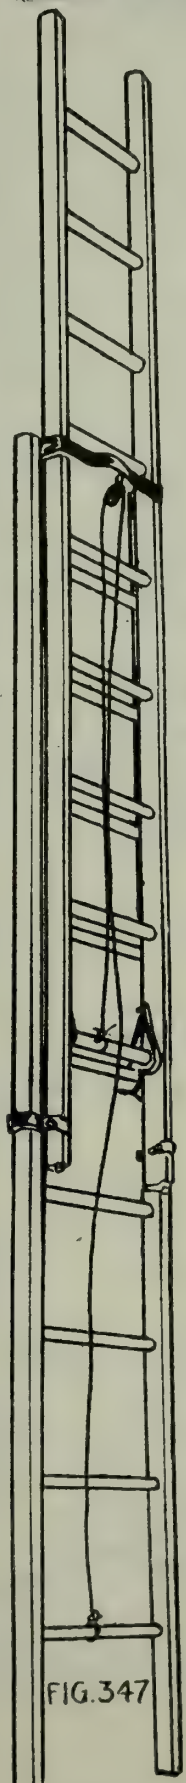
Beatty Bros. Limited Bulletin

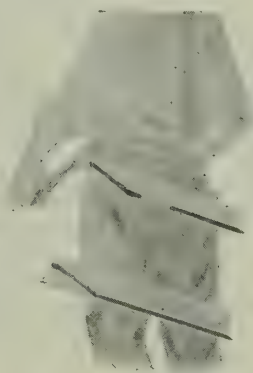


Ladders That Last

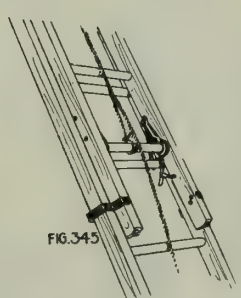
At this season of the year, there is a big demand for **good** Extension Ladders.

BT Extension Ladders can be relied on. They are made of only the best selected material.

The rungs are made of Maple, carefully shouldered and fitted to the risers.



BT Extension Ladders are trussed with 3-16 inch high carbon steel wire drawn as tight as a piano string by means of a ⅜ bolt and nut. As shown above these wires can be tightened from time to time. The ladder is light and yet has the strength of steel.



The sure-working, malleable lock works automatically and does not need a second rope to operate it. It is attached so that there is no risk of splintering the risers where the lock is attached. It will sustain any strain which the ladder is capable of bearing. Write for prices and circular to our nearest branch.

TINKER TOM'S TALKS.

Talk No. 263

Sheet Metal Stocks

everywhere throughout Canada are reduced to undreamed of points.

Scrap sheets were eagerly used, small pieces utilized, in fact, anything resembling a sheet found a use.

This means that it will be a long while before any fair stocks can be accumulated by either jobbers or manufacturers. In the meantime and as conditions improve, our facilities are, as ever, at the command of our jobbing and manufacturing customers. Don't hesitate to ask for rush service in emergencies. We are only too glad to serve where possible.

TINKER TOM.

DOMINION SHEET METAL CORP. LTD

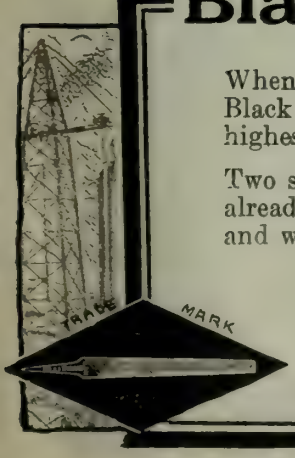
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

"Save the surface and you save all" — Paint & Varnish

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

A Reliable Washable Paint

for spring re-decorating. SILKSTONE Flat Wall Colours have earned the reputation of being dependable in every way and each season are in demand by discriminating householders and painters.

Therefore, it behooves every particular merchant to carry an ample stock of SILKSTONE Flat Wall Colours for their customers' immediate satisfaction.

SILKSTONE Flat Wall Colours dry very smooth and hard, and can be washed without impairing the surface—a quality appreciated by the consumer.

Shipments of all colours can be made promptly.

McKinnon and Perfex Radiators

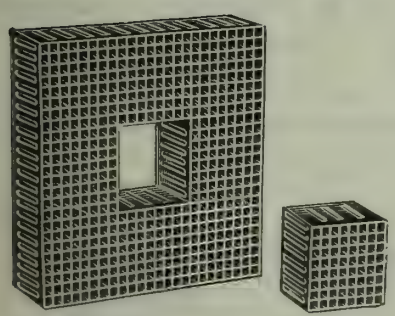
For Ford Cars

The McKinnon radiator is the only one now produced in quantity which is really cellular. It is constructed to provide proper radiation (cooling of the water around the water-jacketed engines). The cellular type is a combination of individual cells made of metal as thin as .0025 of an inch without tearing or stretching the strips.

McKinnon—For Fords

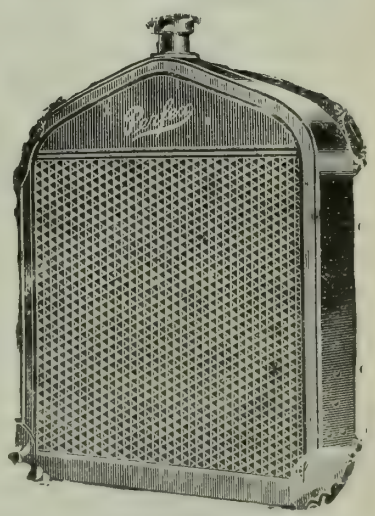
It has been carefully tinned inside and out; the sides of water tubes are corrugated; the cells are individual.

Powerful and Handsomely Constructed



Showing how damaged section of the "Cellular" can be cut from core and new cells made ready to fit in.

The Perfex Radiator is a patented product embodying the following features—handsome appearance, flexible core construction, heavy tanks, patented spring bracket suspension, highest grade materials, tanks are made of a heavy special mixture of bronze with 18-gauge material; castings riveted and soldered.



Perfex—For Fords

LACO TUNGSTEN AND NITRO LAMPS

ARE

BACK AGAIN

After a period of nearly two years during which, it has been practically impossible to secure them, we are again in a position to fill your orders for these well known lamps.

And there is no difference between the lamp we can now ship you and the previous ones except that, whereas they were formerly made in Holland, they are now made in Canada.

The quality and efficiency are the same. When you supply a customer, with one of these lamps, you are not guessing, **you know** that you are supplying him with lighting satisfaction, you have our guarantee as to that. So if you have not arranged for your supply, do so now.

Barrett Roofings, Cements Industrial Paints etc.

THESE Barrett Products are widely advertised in farm and technical publications throughout every province. The demand created by this advertising, *plus* the requirements of thousands of users who have already proved the superiority of these products, means easy sales for dealers who are alive to the opportunity.

We can fill your orders promptly, if you send them *now*.

Everlastic "Rubber" Roofing

THIS is the biggest selling roll roofing on the Canadian market.

It is popular with users, because moderate price and long service mean sound economy.

It is popular with dealers, because quick sales and satisfied customers mean larger profits and more business.

Long years of manufacturing experience and the use of carefully selected materials insure the uniform high quality of Everlastic "Rubber" Roofing. It is *always* good.

Everlastic "Rubber" Roofing is made in three weights; light (1-ply), medium (2-ply) and heavy (3-ply), and put up in rolls containing 108 square feet. Nails and cement are packed with each roll.

Everlastic Liquid Roofing Cement

FOR renewing the life of old and worn-out felt and "rubber" roofing, Everlastic Liquid Roofing Cement is positively without an equal. It is easy to apply and forms a new wearing surface that is smooth, tough, waterproof and so durable that it makes the old roof good for several years of extra service.

Although Everlastic Liquid Roofing Cement is a comparatively new product, roof owners have been quick to recognize its value and it is a big seller everywhere.

If you want to save money for your customers you should sell them this remarkable Barrett Product.

Everlastic Liquid Roofing Cement comes ready for use in packages of various sizes, ranging from 1-pint cans to 40-gallon barrels.

The Barrett Trade-Mark stands for high quality products, moderate prices and fair dealing.

It pays to handle goods bearing the Barrett label.

Other Barrett Products are: Creonoid (Fly Oil) Lice Destroyer and Cow Spray, Elastigum Plastic Patching Cement, Everjet Elastic Carbon Paint.

Morrow

High Speed and Carbon Twist Drills

"Make their mark" in every shop and plant so definitely that they are purchased in ever increasing quantities. When a chart is made, or a curve plotted to represent increased production at lowered cost, Morrow High Speed and Carbon Twist Drills are a direct factor.

Morrow High Speed Drills are made from hammered steel bars, and are Morrow tempered. These reliable drills increase production and reduce cost by giving more holes with less regrinding. Morrow Carbon Drills are made from Sheffield (England) steel.

John Morrow Screw and Nut Company, Limited

Ingersoll *London, England—7 Hop Exchange, Southwark St., S.E.1.* **Canada**

"Oldest, largest, best equipped Plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-Finished Nuts."

"Sole Distributors for the Ingersoll File Company's Files."

MARBLE'S

Outing Specialties for Fishermen

These two items will sell to every fisherman. Outdoor men want all the other Marble's Equipment—Safety Pocket and Camp Axes, Hunting Knives, Gun Rods and Cleaning Implements, Gun Sights, Compasses, Waterproof Match Box, Shell Extractors, Auxiliary Cartridges and Recoil Pads.

These prices are list—liberal dealer's discounts—order through your jobber. Be sure you have our catalog.

CLINCHER GAFF—Surer, safer, quicker than a landing net. Holds any fish from ½ to 20 pounds. Polished steel, heavily nickeled, 18 in. long, 7½ in. between points. Strong, durable. List price, $1.10.

SAFETY FOLDING FISH KNIFE—Does all work necessary to prepare fish for the pan—dandy all-round knife. Safe and rigid when open. List price, $1.50.

Marble Arms & Mfg. Co., 5350 Delta Ave., Gladstone, Mich.

PICKS

No. 5

Made of best high-grade, open-hearth steel, hammer forged and correctly tempered. Finished in black with polished points.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

Practically all good buyers of hardware in Canada are readers of HARDWARE AND METAL.

How Well Do YOU Know Canada?

Gripping
Amusing
Informative

MACLEAN'S
"CANADA'S NATIONAL MAGAZINE"

One of the best edited publications in the world.

Contents of the Big June 1st Issue

"Parliamentary Dog Days." J. K. Munro. Illustrated by Lou Skuce. Canada's wittiest and shrewdest political writer gives us his regular monthly summary of the situation at Ottawa—replete with "inside information."

"Bertie and the Bolshevik." By A. Raymond Mullins. Illustrated by C. W. Jeffreys. A most humorous tale of an English soldier in Canada who gets "taken in" by a bunch of Bolsheviks.

"The Parts Men Play." By Arthur Beverley Baxter. Illustrated by H. Weston Taylor. Another gripping instalment of this great Anglo-American-Canadian serial.

"They're All Alike." By Mary E. Lowry. Illustrated by D. G. Summers. A delightful love story, with the scene laid in a big Canadian city.

"The British in Italy." By Brigadier-General Mitchell, formerly Chief of the Intelligence Staff of the Canadian Army. Illustrated by photographs. The first authorative recital of the part the Canadian troops played in the Italian campaigns.

"The March of the Overall." The Canadian Press, from Coast to Coast, treats in a fecitious manner with the craze for Blue Jeans.

"The Little Warrior." By Pelham Grenville Wodehouse. Illustrated by C. W. Jeffreys. A long, absorbing instalment of this masterpiece of humor—the finest serial story MACLEAN'S has ever run.

"A Safe Bet." By W. A. Fraser. Illustrated by R. M. Brinkerhoff. It's about a horse race in Montreal, and it's one of the best stories this world-famous sporting writer has ever written.

"Is Era of Wildest Prosperity Ahead of Canada Today?" Canada is in the strongest economic condition of any country in the world, says Agnes C. Laut, famous international authority, in a strikingly prophetic article which you'll keep for future reference.

Review of Reviews

"Will Colored Hordes Submerge the World?" By Lothrop Stoddard.

"Why Gasoline is High." By John K. Barnes.

"Eccentricities of a Despot." By A. C. Jewett.

"Holland is Too Wealthy." By Oscar T. Schweriner.

"To Probe Secrets of the Air." By Lloyd V. Turner.

"Russia is Turning to Germany." By Baron Eugene De Schelking.

"Odd Marriage Custom in Ireland." By Albert E. Knash.

"Embassy Mistakes." By A. Maurice Low.

"Two Million Extra Women." By William Ord Barker.

"Dangers of Spiritualism." By Doctor Mary Scharheb.

"How the Triple Entente Was Formed." By Count Iswolsky.

"Dread Disease Sweeping West." By A. E. McCullough

"Huge Fortunes in Popular Songs." By E. M. Wickes.

"Putting Socialism Into Practice." By Henry G. Alsberg.

The demand for MACLEAN'S MAGAZINE always exceeds the supply. Get your copy NOW!

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the most economical saws to buy in the long run. They stand hard usage and wear exceptionally well, hold their cutting edge and temper longer than the ordinary saw and do not bind in the kerf. Lumbermen prefer the Simonds Crescent Ground Cross-Cut saw because they have proven that it will cut 10 per cent. more timber than other brands.

Eight of Every 13 Motorists Use

IMPERIAL

Polarine

MAKES A GOOD CAR BETTER

OVER 62% of the motor cars that pass your door are lubricated with Imperial Polarine.

Motorists depend on dealers along the way to supply their needs. They know the quality of Imperial Polarine is the same everywhere.

This passing trade alone creates a big market for Imperial Polarine. And in addition there is a steady demand by automobile and tractor owners in your territory.

Altogether you have right at your door a market already developed for hundreds of dollars' worth of Imperial Polarine each year—for you make a minimum profit of 33 1-3% on every sale.

Make your store headquarters for Imperial Polarine. Carry a complete stock. Imperial Polarine is sold in three grades for cylinder lubrication. Imperial Polarine, Imperial Polarine Heavy, and Imperial Polarine A. Also Imperial Polarine Oils and Greases for effective transmission and differential lubrication.

Put up in half-gallon, gallon and four-gallon lithographed sealed cans, 12½-gallon steel drums, half-barrels and barrels.

T-1595

IMPERIAL

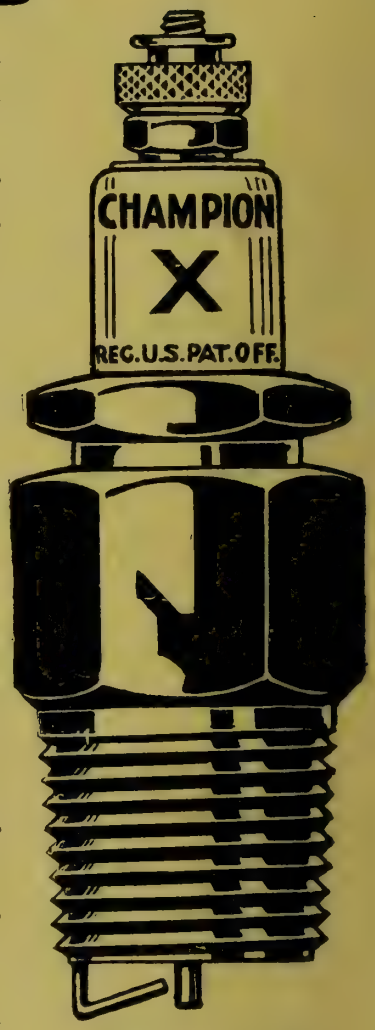
The World's Most Popular Spark Plug

The unfailing dependability of Champion quality construction has justified every claim for it—to-day it is the world's most popular spark plug.

Our "3450" insulators, and our patented copper asbestos, compression-proof gaskets, form a combination that insures for Champions a dependability far in excess of ignition service requirements.



Champion "X"
A15—½ inch
Price - 90c

Adopted by the Ford Motor Co. as standard equipment on Ford cars since 1911.

Champion

Dependable Spark Plugs

with "3450" insulators are practically indestructible—and there's a special plug for every type of motor or gasoline engine.

Making a feature of Champion dependability is bringing big business to dealers in automotive equipment.

Why not get in line for your share of this business by tying your store to our advertising.

Have a full line of Champions in stock so you will be able to supply all demands.

Trapshooters used twenty-four million shells last year

7 out of 10 use DU PONT

SMOKELESS SHOTGUN POWDERS

THE Trapshooting Clubs of America average 1500 shells a week each during the season. Twenty-four million targets were thrown during 1919.

A goodly portion of this profitable business is yours if you go after it. Get in touch with your local gun club. If you haven't one in your neighborhood it's a simple matter to start one. We will help with a plan of organization, trophies and advertising.

Get this business! Seven out of ten shooters use shells loaded with Du Pont Powders. Let them know you are the Du Pont Dealer in your town and they will come to your store. Stock the complete Du Pont line in the popular Trapshooting and Field loads. It means no dead stock—quick turnover and bigger profits.

And, remember this: seven out of ten of the shooters of America use Dupont, Ballistite or Schultze Powders, the three best-known brands in the world. All three are made by Du Pont, backed by the accumulated knowledge of 118 years of powder production.

Specify—and be sure you get—
Du Pont Powders when you order your next lot of shells.

Every Sale Starts *a Chain of Sales!*

That motorist—to whom you sell a SHALER 5-Minute Vulcanizer—then and there becomes your steady customer—

Regularly thereafter—he is *bound to come back* to your store—to buy Patch-and-Heat Units for use with the SHALER Vulcanizer.

When you sell a SHALER 5-Minute Vulcanizer—that sale is only the *beginning of a Chain of Sales*—every sale of this chain brings liberal profit.

SHALER 5-Minute Vulcanizer

Brings Customers Back for "Repeat Sales"

Like compound interest on the money you have at the bank, your profits from selling SHALER 5-Minute Vulcanizers mount up. Every sale brings good profit—and—over and above that—it establishes a continuous, repeat-sale business that *automatically brings profits.*

Sell the SHALER and Make These Big Profits

It brings customers to your store, who also buy other goods; it makes bigger customers of your old ones; it builds business; it makes sales and repeat-sales—and increases your profits. You make *one* sale of a SHALER Vulcanizer—and the SHALER *automatically makes dozens more.*

The SHALER is nationally advertised—nationally known—and motorists call for it by name. Simply display it where they can see it—and the SHALER will sell itself. Keep a sufficient stock—

Order from your jobber today or write us at once

The Standard Spark Plug of the World

Your customers will never demand as much of AC Spark Plugs as Tommy Milton did in winning the recent 50-mile Los Angeles Speedway race at an average of 111.8 miles per hour. But there's a world of satisfaction in knowing that the spark plugs you sell will stand up under such terrific punishment. Moreover, the achievements of AC's—spectacular and everyday—have given them a pronounced preference, both as factory equipment and as replacements. Write today for complete dealer information.

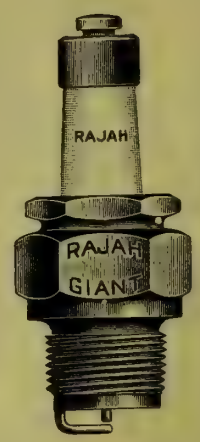
Champion Ignition Company, FLINT, *Michigan*

NEW RAJAH PRICES
SPARK PLUGS

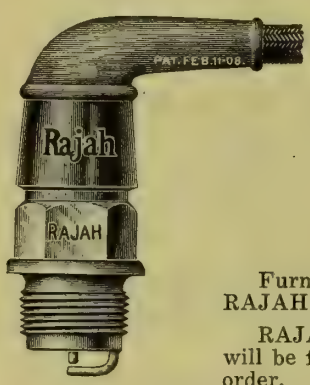
½" No. 2
Specially adapted for Ford, Overland, Studebaker. Can also be used in any motor made for ½" Standard plug.
Price, Plug, $1.25.
Price, Porcelain, 60c.

The Rajah Auto Supply Company assumes the difference in exchange.

Race drivers use Rajah Plugs for a quicker pick up, more power and higher speed. Special button top and quick detachable Rajah Terminal eliminate old style, inconvenient Thumb Screw. Simple construction, easily taken apart, cleaned and replaced. Parts interchangeable. Sturdy electrodes. Patented knife edge bushing adjusts itself to shoulder of porcelain, and permits heat expansion without injury to porcelain. Insulation highest grade, hard-fire, heat-resisting porcelain.
For all passenger cars, trucks, tractors, marine, stationary, motorcycle and airplane engines.



Also 7/8-18 Long and 7/8-18 Extra Long—firing point 1¼".
A big, sturdy, heavy duty type of plug for pleasure cars, trucks, tractors, marine and stationary engines.
Exclusive equipment Advance-Rumely Tractors.
Price, Plug, $1.50.
Price, Porcelain, 70c.



The New WATERPROOF RAJAH PLUG

Furnished in all the standard thread sizes, with regular RAJAH Terminal fitting any cable.

RAJAH Ferrule Terminals, making a neater connection, will be furnished if a sample of cable is included with the order.

Used extensively during the war in aviation.

Specially recommended for Unprotected Motors—Marine Tractor, Stationary, Airplane, Motorcycles.

Price, Plug, $1.75. Price, Porcelain, .60.

Box Assortment Rajah Terminals
A very attractive silent salesman

Rajah Regular Clip Terminal
Fits any size cable

Rajah Thrust Clip Terminal

Rajah Hook Clip Terminal

Rajah Short Clip Terminal

Rajah Primary Terminal

Thumb Nut
With all Rajah plugs unless otherwise ordered.
Also Ball and Stud Adapters.

The Rajah Thrust Clip, Hook Clip, Short Clip and Primary are furnished with ferrules to fit any size cables.

TO JOBBERS: We will gladly furnish further information. Electros in appropriate sizes for newspaper and catalog use supplied on request.

Quick Sales—Satisfied Customers

You don't have to "drive" a sale. Backed by the endorsation of the British Government, who used them on submarines, they are accepted by all buyers of batteries. The absolute freedom from "battery trouble" will delight your customers. You can sell a Hart Battery knowing that it will give complete satisfaction.

The Hart Battery

We are distributors of Partridge Tires to the trade. Send in your order now for immediate delivery.

is the best battery for you to handle. It is Canadian-made, and should abuse cause a breakdown, you can have the trouble adjusted at once by us. There is still some good territory open. Write us for prices and terms to dealers.

We do expert vulcanizing. Estimates given before work is commenced if requested.

Big Increases in Auto Mirror Sales

The enormous increase in the sales of "Hindview" Auto Mirrors in 1919 and 1920 prove conclusively that motorists now consider the Auto Mirror an indispensable aid to safe driving, rather than a mere fad.

Auto Mirrors are now required by law on all trucks in the Province of Ontario.

Hindview **AutoMrisror**

are substantially made—guaranteed to be free from defects, and absolutely waterproof. Clamps are large and firm; the Ball Joint—and exclusive "Hindview" feature—allows instant and convenient adjustment. There is a "Hindview" for every type of motor car and truck.

Dealers handling the "Hindview" are making big profits.

May we send you literature?

Have You Had Trouble With Your Tires?

MOST tire troubles can be traced to either too little or too much air pressure. Keep the pressure at the exact point recommended by the tire-maker and your tires will give less trouble and more mileage—to say nothing of greater riding ease. The Schrader Universal Tire Pressure gauge enables you to test the pressure easily and quickly anywhere, anytime. It is one of the indispensables for every motorist.

Price $1.75 anywhere in Canada.

O.P.W.

Trade Mark Registered

"Paints and Varnishes for Every Purpose."

For Silos and Farm Buildings

O.P.W.

Roof and Barn Paint

The hardwareman to-day may profit by being keenly alert to farm requirements for paint.

The vast amount of valuable equipment—both for agricultural and domestic use—on the modern farm has aroused a new appreciation on the farmer's part of the value of painting to prevent deterioration of buildings and equipment.

O. P. W. Roof and Barn Paint fills the bill for silos and farm buildings as nothing else can. The farmer is being convinced of this by O. P. W. advertising in his favorite farm papers. There is good business for you in systematically studying the farmer's needs and being there with the right goods.

O. P. W. Dealer-Agents Prosper—
May We Show You Why?

V

is for very valuable virtues and vantages of the veteran O.P.W. varnishes and paints which veritably vanquish every vestige of vagrant-looking vehicles and vagabond villas in villages.

The versatility of O.P.W. visibly verifies volume and value for its vendors.

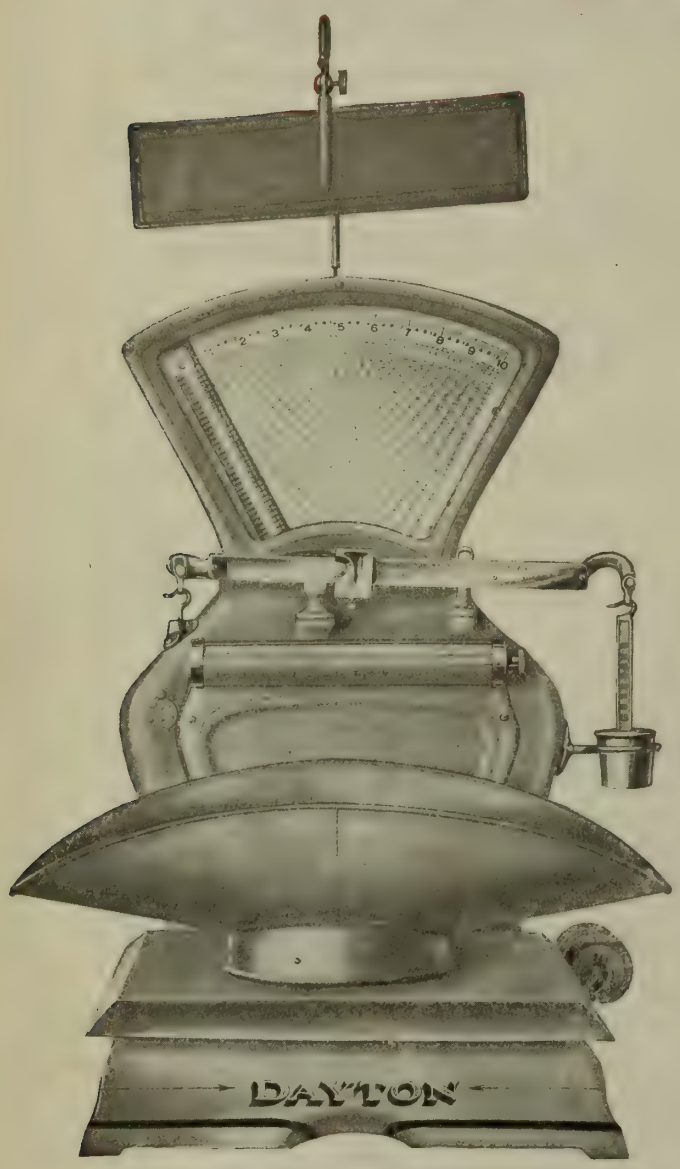
Just like throwing a kiss to a pretty girl in the dark



She doesn't know it so there isn't much satisfaction in it. Many merchants give away goods something like that. Half an ounce here—an ounce there—the customer doesn't know it—doesn't appreciate it. If you want to give away goods—give your customer a present at Christmas time. He'll see it and thank you for it.

DAYTON
Hardware Scale

Cuts out the murderous down weights. You get paid for every fraction of every ounce you weigh. Instantaneous and visible price calculations. Wonderfully rapid, too, with goods sold by count instead of weight.

Pays for itself in less than a year. Handsome and durable as the Pyramids. Let us send you folders.

Have You Room for More Money in Your Till?

You will find "Aladdin" Dye Soap to be one of the finest money-makers that has ever been offered you.

Aladdin's money-earning capacity will be ensured by a tremendous advertising campaign which we have already contracted for. Aladdin Dye Soap will be advertised in newspapers and magazines. The advertisements will be large and of striking appearance.

Aladdin Dye Soap does two things at once. Aladdin washes and cleans at the same time as it dyes. It gives a clear, true color. Its use results in a fresh and new-like garment. Any lacy, frilly thing that can be washed can be dyed with Aladdin and it colors the household draperies equally well, in any conceivable shade.

The final proof that Aladdin Dye Soap is bound to be a winner, lies in the fact that the same well-planned marketing methods and the same whole-hearted co-operation with the dealer that resulted in the success of O-Cedar Polish, is back of Aladdin Dye Soap.

Order one and a half gross and get the Revolving Display Stand, which makes the selling of Aladdin a quick and easy matter.

The charm of bright hued fabrics may now be obtained by the magic of Aladdin Dye Soap that colors as it cleans.

Made in fifteen beautiful colors. Sells at 15c a cake. Costs you $14.40 gross.

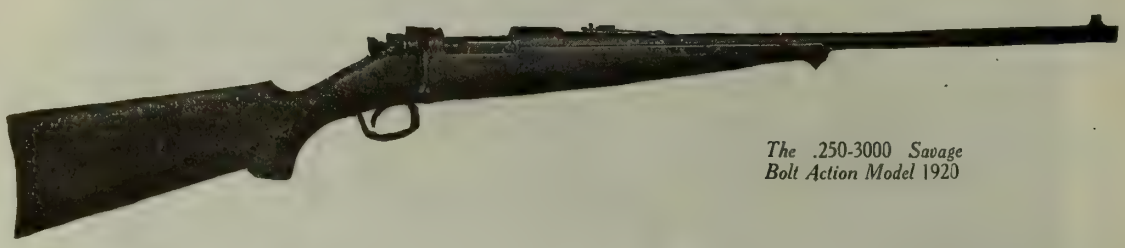
SAVAGE QUALITY TRADE MARK

SAVAGE



The .250-3000 Savage Bolt Action Model 1920

Are You Ready for the Hunting Season?

HERE'S the answer—the last word in rifle completeness—a bolt action .250-3000 SAVAGE.

You already know—have handled—the .250-3000 lever action Savage. You know what it can do. Now you have both kinds. You can satisfy everybody, because this new model has all the qualities of the old—just as reliable—just as convenient—but with bolt action like the military rifle.

You've always wanted—needed—a bolt action repeater. We're going to show it to the sportsmen for you by concentrating two entire months of our advertising campaign of this new step in rifle development. For two solid months, more than thirteen million potential buyers will see our announcement referring them to you.

And you will be able to sell it on the spot—right across your counter—if you have stocked the NEW SAVAGE BOLT ACTION SPORTING RIFLE, CALIBER .250-3000.

Don't fail to carry a stock of all the SAVAGE Models in rifles and pistols. The complete line—and each one is particularly built for a particular job. That's what the Savage Trade Mark stands for, "The Finest Tool for the Finest Work."

SAVAGE SERVICE IS BEHIND ALL SAVAGE PRODUCTS.

SPECIFICATIONS

22 inch tapered high pressure steel barrel with integral front sight base, checked pistol grip stock and fore-stock, pistol grip capped, oil finished one-piece stock, corrugated trigger, corrugated steel shotgun butt-plate, white metal front and flat top sporting rear sights, magazine capacity five cartridges, weight 6 pounds.

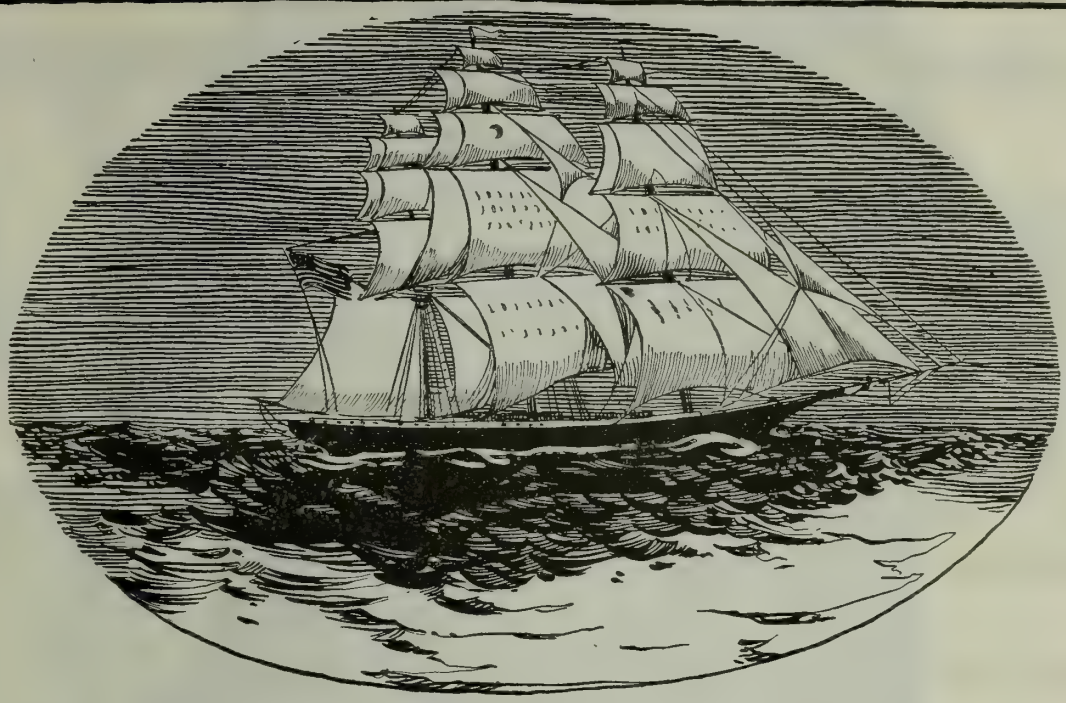
Sharon, Pa. Detroit, Mich.



WHEN THE "SOVEREIGN OF THE SEAS" BROKE THE WORLD'S RECORD

FOLLOWING shortly after the discovery of gold in California in 1849, came the first of the famous clipper ships. Long, narrow and with sharp, hollow or concave bows, these ships established a new schedule for trans-oceanic service.

The "Sovereign of the Seas" made 3144 sea miles in 10 days, breaking all previous records, while somewhat later the "Lightning" made 436 nautical miles in 24 hours.

But their speed was not due entirely to their peculiar design, but rather to the daring of their skippers, who drove them through fair weather and foul with all sail set, and to the strength and dependability of their sails and rigging, for many of these ships were Plymouth equipped.

The day of the sailing ship is long past, and a new merchant marine is taking its place. Plymouth is serving these new ships as it did three-quarters of a century ago, for today, as yesterday, Plymouth is the rope you can trust.

Your business—next year

AS A MERCHANT, you like to look ahead. A big day today doesn't make you feel particularly good if you expect a slump in business next month.

Advertising is coming to be a kind of slump preventive in modern business. It is used to stabilize trade—tomorrow—next year—a few years from now.

The Westclox advertisement your customer reads in his magazine this evening is planting an impression in his mind that may not lead to an actual purchase until next winter.

A customer who bought a Westclox alarm this morning may have been influenced by the advertisement he read last night, or a year ago last night.

Think of Western Clock Company advertising this way. Its job is to stabilize your business as well as ours. To prevent business slumps.

Advertising will always work this way—at least as long as your customers are human beings and need to be reminded.

Western Clock Co., Ltd., makers of Westclox

Cord or Fabric.

Give the Following Information To Your Customers and They Will Want To Buy

"PARTRIDGE TIRES"

They ride easier, because they are made of the purest rubber compounds, which gives them the maximum of resiliency.

They look better, because the finish is perfect and is one of the most important parts of their manufacture.

They last longer than ordinary tires, because they are made by hand, of the very highest quality of material, from start to finish.

For better-looking, easier-riding, and longer-lasting tires, equip a car with **Partridge Non-Skids** on the rear wheels, and **Partridge Guide Tires** on the front wheels.

All last year adjustments on Partridge Tires amounted to less than one-half of one per cent. Most motorists know that this percentage of adjustment is a record, and is absolute evidence that Partridge Tires are in a class by themselves.

Partridge Tubes are of the same high quality as the tires.

Story for Week Dated June 19, 1920. **Being No. 10 in the Series**

Making Eddy Match Boxes at the Rate of 400 a Minute

A WAY back in 1854, when Ezra Butler Eddy began match manufacturing at Hull, the making of the boxes to hold his matches was a tedious process carried on entirely by hand.

French-Canadian women were employed in making match boxes in their homes. The boxes were made by hand of coarse, heavy paper pasted together over a wooden form the shape of the match box. Women and children worked at the making of them, earning very welcome wages for their work, and every morning a procession of women would arrive at Ezra Eddy's little plant with big bed ticks crammed full of new-made match boxes, an enormous-looking but quite light burden on their backs.

To-day a great array of marvellous machines at the Eddy Plant take care of the production of match boxes, and do it with almost human dexterity. So perfectly are they designed for their purpose that they hardly require watching at all, though the ones turning out the smaller match boxes work at the rate of four hundred boxes per minute.

All the machines require are rolls of the tough, resilient paper prepared for them in the Eddy paper mills, and exactly of the right color and thicknesses for the particular match boxes required. The machine takes the paper rapidly off the roll, folds it into the square tube shape for the cover of a match box, prints it on both sides, cuts off the right length securely fastened and ready for service, and delivers through hoppers to the girls who box the matches.

Simultaneously in another type of machine the drawers or container portion of the match boxes are being as rapidly made from rolls of Eddy-manufactured paper, and these are delivered through the proper hoppers as fast as an output of seventy million matches per day demands. Very different from the day of the hand-made match boxes delivered every morning in a bed tick, but just another of the Eddy Company marvels of manufacturing development.

Manufacturing Experience and Your Trade

Why Eddy Matches Sell

Here are the three chief reasons; first, wood; second, machinery; third, experience. Only the choicest soft, smooth-fibred pine is used, therefore they are uniform, perfect in the highest degree. There are no slivers, headless or half matches among the Eddy matches. They will not explode if stepped on. Years of experience have eliminated these unpleasant features. This is why Eddy matches sell.

Your Friends for Life

MILLERS FALLS Bit Brace No. 732 is several tools in one. With it you can drive screws, countersink and ream as well as bore holes. Its ratchet, patented chuck and 'feel' in the hands have made it "the carpenter's favorite."

A MAN who owns fine tools is never lonesome. He enjoys a companionship with them that grows through the years.

Many a good workman would actually feel the loss of a thumb less than if he had to part forever with the prized contents of his tool chest.

This attachment is easy to explain. By doing work that hands cannot do, fine tools become a part of a man's creative self.

Millers Falls Tools are fine tools. For fifty years they have been making life-long friends of people who do things with their hands. Carpenters, craftsmen, repair men, mechanics—all swear by Millers Falls Tools, and so do the leading hardware men of America who sell them.

Amateurs often buy cheap tools. That's why they are amateurs. It takes a real expert to do a good job with poor tools.

But whether amateur or expert—select Millers Falls Tools. They will be your friends for life.

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.

MILLERS FALLS TOOLS

"You're No Stranger!"

Insert shows ½ page advertisement from the May 29th SATURDAY EVENING POST

ALLS TOOLS

If interested tear out this page and place with letters to be answered.

"You're No Stranger!"

—is what this new customer is saying to the drill being shown him. He recognizes it as a reliable old friend from Millers Falls. Its brother tools from Millers Falls—hack saws, braces, auger bits, mitre boxes, vises, and more—all have served him well. Like a friendly face in a strange land, the sight of this Millers Falls tool gives him confidence in the dealer's knowledge of good hardware.

Millers Falls tools are friendly tools. Their strength, sureness, ease of operation, make them real partners with skilled workmen.

This is the message of a campaign of national advertising for Millers Falls tools appearing every four weeks in the *Saturday Evening Post*. Thousands of men, who like to work with their hands, will learn of this line of tools. If your store is Millers Falls headquarters, it will be their source of supply for many items of house and garage hardware as well.

Let Millers Falls tools make friends for *you*.

Concerning Trade-marks

A trade-mark on an article is the manufacturer's bond that he is willing to stand behind his product.

Trade-marks are of vital importance to the dealer. They safeguard him against dissatisfied customers. They are the symbol of uniformity and quality.

In handling C.G.E. goods the one predominating feature which stands out above all others is consistency. People now-a-days are impatient of men or commodities that work well, to-day, and not quite so well to-morrow.

It is an ever-increasing source of satisfaction to the dealer, no matter whether it be Electric Labor-Saving Devices, Automobile Accessories, Electric Lamps, Electric Cooking or Wiring Devices, to know that in selling his customers C.G.E. Products, he is building up a good-will that eventually will be one of his greatest assets.

Dealers everywhere sell C.G.E. Products.

The Salesman's Delight

The KRIBS Electric Unites Simplicity with Efficiency

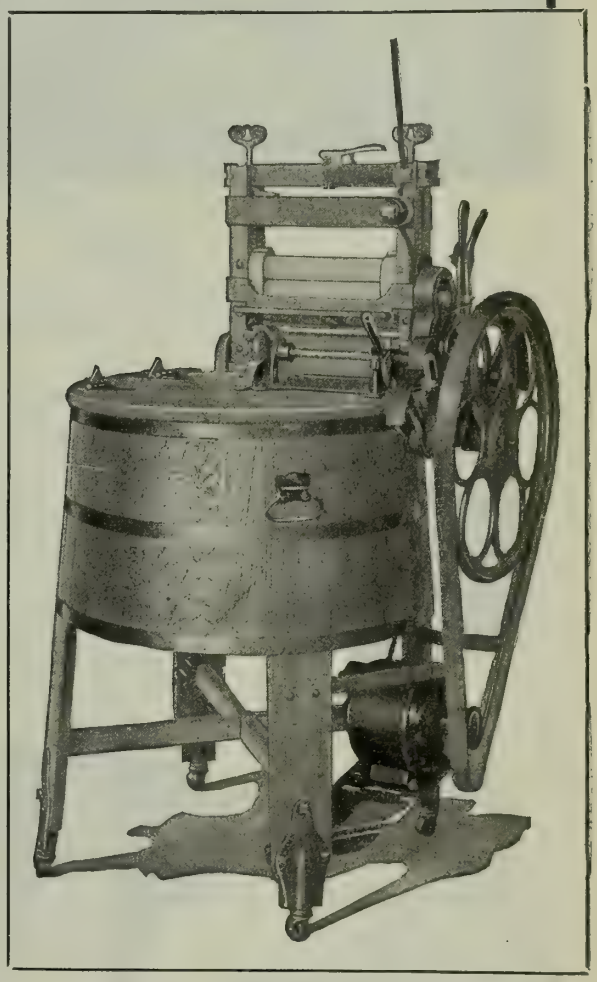
There is real joy in selling the KRIBS ELECTRIC because of the knowledge that quality and performance stand behind these machines, in the most absolute manner.

After all the "frills and fol-de-rols" have been investigated, it is easy to see that the principle on which the KRIBS operates is the correct one, and its work bears out that conclusion.

The salesman can put true enthusiasm into his talk on the KRIBS: *Ease of operation, absence of all danger,* smoothness and perfection of construction, and best of all—*beauty of results.* These are all outstanding points of claim which are more than fulfilled.

Then again each buyer becomes a booster.

Over and over again it has been found that these machines "sell more." The delighted user can't keep still about it, but tells friends and neighbors.



IMPORTANT TO EVERY DEALER IN CANADA

Watch for ANNOUNCEMENT EXTRAORDINARY in this paper within the next few weeks. There will be a message of UTMOST INTEREST to each Canadian dealer in washing machines.

T-slots make Hubbell Equipment Interchangeable

In some plug caps the flat blades are set parallel.

And in other caps they are "tandem", or in line.

Now Parallel Blades cannot plug into tandem slots, nor tandem blades fit the parallel slots.

So Hubbell has combined the slots and called it the T-slot.

This convenience is yours *only* in *Hubbell* Flush and Porcelain Receptacles and Current Taps.

Ask for further details. The Hubbell line is full of such time and work saving electrical specialties.

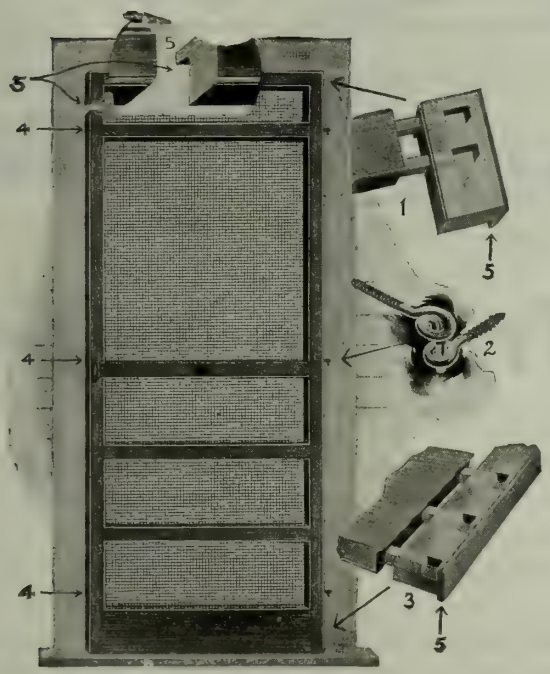
DOORS & HARDWARE
KASEMENT
SKRENE DORE CO
TORONTO
PATENTED 1916-1917-1918

"Kasement" Screen Doors



Six Convincing Reasons Why They Sell

1. **Kasements are the only doors guaranteed not to sag.**
2. **They are easily hung by the householder—no extra labour.**
3. **Strongest and lightest doors made.**
4. **Cost no more than the better-grade, old style doors.**
5. **Ideal for tenants—can be taken from house to house and will fit.**
6. **Allow maxium ventilation—yet stand the wear.**

Retail Salesmen

can convince the customers that the Kasement Door is the most satisfactory screen door made, in a very few minutes. The ease of convincing customers quickly and inducing prompt purchase is a direct saving in selling cost—one of the qualities that wins promotion for retail salesmen. The Demonstrating Model for Kasement Doors closes sales quickly. It shows how easy "Kasements" are to hang; a sample joint-section shows how the mortise and tenon joints are made—there are 26 such joints in the "Kasement." It also shows the quarter-sawn, or edge-grain, stile lumber, etc.

Put a Kasement Model on your counter. Write us for electros, circulars and selling helps.

"Lively and Lasting"

RELIABLE
TRADE MARK
Canadian Products

Are True To Name

"Reliable" products are true to name. Made with infinite care in Canadian factories by Canadian workmen and thoroughly tested to insure high uniform quality, they never fail to give that efficient, eagerly-desired service that insures satisfied customers and increased business.

For instance, the "Reliable" Ignition Unit is easily a leader. Made of "Reliable" Dry Cells, bedded in pitch and set in a box which is perfectly moisture proof, it always gives dependable, high-grade ignition service in automobiles, power boats, gas engines or tractors.

The No. 6 "Reliable" Battery is also full of power and can be entirely depended upon to give every ounce of its tightly-packed energy whenever used—in motor, engine, bell or telephone.

The Big Brass Cap—a feature in all "Reliable" batteries—prevents waste of energy, gives a maximum spark and puts all the power to work.

Stock the complete "Reliable" line. There is a type and size of battery and flashlight for every requirement. The complete satisfaction of customers who buy these products will tell its inevitable tale in better and bigger battery business.

If interested, tear out this page and keep with letters to be answered.

Do You *Sell* Your Customers or Do They Just Buy From You?

MANY a dealer is content to fill his shelves and then join the hopeful smilers behind their counters waiting, like Micawber, for something to "turn up."

Yes, we know that some stores keep busy, just filling orders—so long as no hustling competitor adds an extra man or two as an "outside" salesman.

Look out, then, Mr. Hopeful Smiler. The customer you expected to drop in when he needed anything may be just the one the outside salesman called on and he may stop dropping in so often that his business will be lost.

Better have a talk with John, that junior clerk you're so hopeful of and send him out next week to make a few calls. You'll find that the business he'll bring in will pay profits enough to hire another inside man in his place.

Try John on selling the "*Acorn*" Die, a GTD specialty. Explain its features to him and let him call on a few manufacturers you know ought to be using it.

That one tool alone has put many of the big supply houses on the map. Fill in the coupon and we'll send you the printed matter you need to start *your* selling campaign for your own territory.

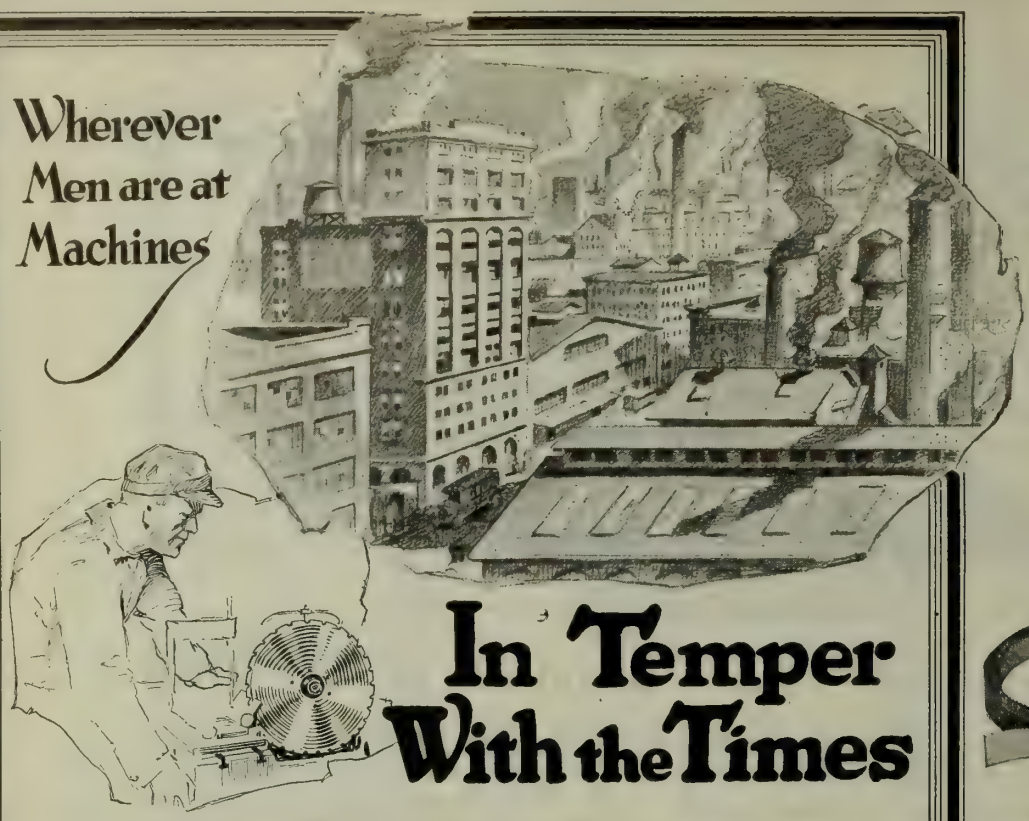
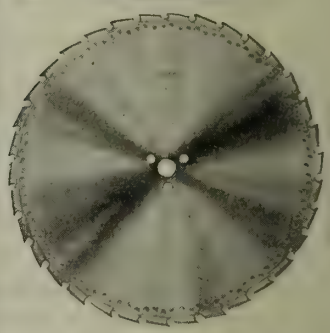
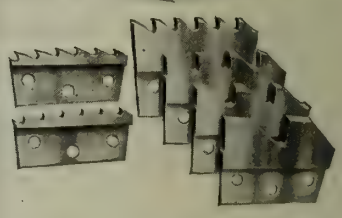
Wherever Men are at Machines



In Temper With the Times





Huther Brothers Inserted Tooth Milling Saw
Coarse Pitch Type

A SAW guaranteed to increase the production of any cut off machine. During the World War, when the great Ordnance Plants required milling saws to cut the great cannons, several of the largest plants chose

Huther's Inserted Tooth Milling Saws

and they were wise in their judgment, for they are guaranteed to be the fastest, freest cutting, thinnest, inserted tooth milling saws on the market.

The inserts may be worn down to about 3/16 inches from the heel before it is necessary to replace them. This allows you over 1 1/4 inch wear, which means that you can get more day in and day out use from this saw than any other in the market.

The inserts are made of the very best quality high speed steel, according to our patented process, perfected through fifty years of "know how."

Write us for Catalogue and Price List.

STACK HEATER

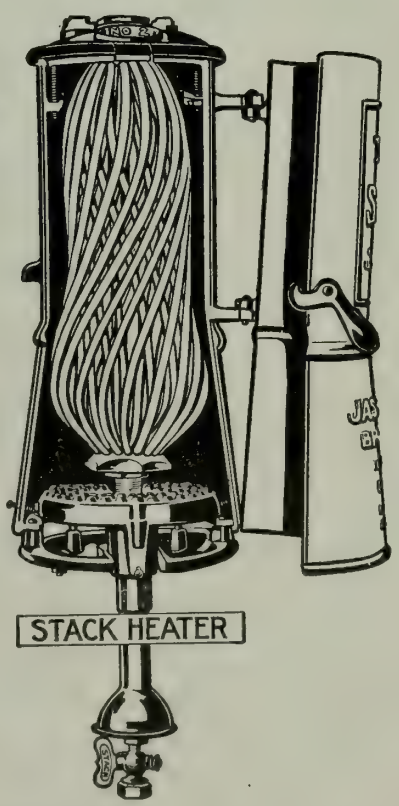
True Economy

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

The Stack Hot Water Heater will heat water in one minute. These are the strong points which make easy selling for the Stack Heater.

When your customers see how the water passes into the numerous small pipes exposed to the hot gas flame, they understand. It requires no technical knowledge to see that the water will heat faster in the numerous small pipes than in one large coil.

More hot water with a smaller consumption of gas—that's true economy.



Send for Stack Heater Display Card.

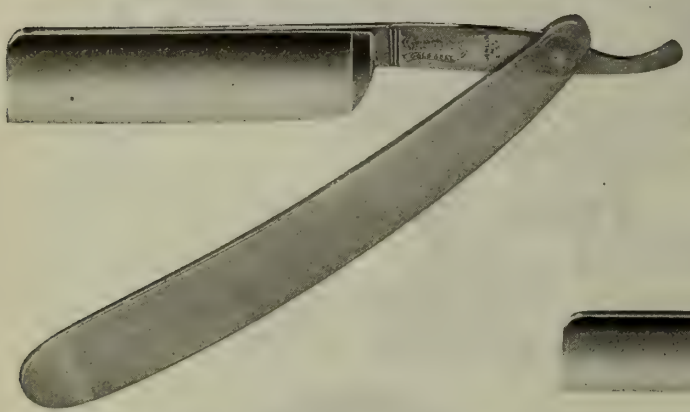
Genco RAZORS

REG. U.S. PAT. OFF.

TWO GENCO FAVORITES



GOLD STEEL

Ground full concave, blade finely polished, back and tang heavily **Gold Plated.** Transparent amber handle.

The beautiful combination of blade with gold plated back and tang, and transparent amber handle produces a handsome razor in the Gold Seal.

FLUID STEEL

Ground full concave, blade finely polished, back and tang finished dark **Gun Metal** by our anti-rust process. Handle imitation ivory.

Contrast between an ivory-white handle and dark gun metal back and tang makes the Fluid Steel unusually attractive.

When your customer buys a razor that shaves him smoothly and comfortably again and again—one with an edge that can be tuned up for each shave by a few strokes on a good strop—he is thoroughly pleased with his purchase.

GENCO Razors are guaranteed to please men in just that way. Your men customers are familiar with the guarantee:

"Genco Razors must make Good or we will"

They see it continually in Genco advertising appearing in the Saturday Evening Post and a list of other national publications.

Add to this guarantee of quality the splendid appearance of the Genco Gold Seal and Genco Fluid Steel styles and you will know just why so many of these two popular Genco Razors are being sold.

Most Jobbers Carry Genco Razors in Stock. If yours do not, write us.

GOODELL-PRATT

1500 GOOD TOOLS

Mr. Punch says :

Nobody has figured yet exactly how many good tools every one thousand people ought to buy per year, but Goodell-Pratt Toolsmith dealers come closer to knowing than the rest.

When Goodell-Pratt tools have passed rigid factory inspection—when on the bedrock of best materials and workmanship the uniform extra high-grade finish has been placed—the perfect tools that then pass into the stockroom are no less attractive the day they are received by dealers.

All shipments of Goodell-Pratt tools are made in strong, new cases. Each tool is also carefully wrapped, for your further convenience and your customer's protection, in its own individual marked carton.

Great care is used in double checking of shipments with the original order. Thus avoiding any errors, which might otherwise occur.

A line of jewelry couldn't be handled more carefully from stockroom to store window. Goodell-Pratt consider that Toolsmith dealers are worthy of every consideration a scrupulous manufacturer can give them.

Pilot Superior Pipeless

Convinces the customers, because it is easy and inexpensive to install; only one opening to be cut in the floor; no network of pipes; cold air is removed from the house—not the cellar—keeping fresh, moist, warm air circulating, a protection against coughs, colds and sore throats; keeps the floors warm so that children may safely play on them, and leaves the cellar cool for storage.

The Pilot Superior Pipeless burns hard coal, soft coal, coke, wood or natural gas. The construction with inner and outer casings and asbestos linings insures cold kept out and warmth kept in.

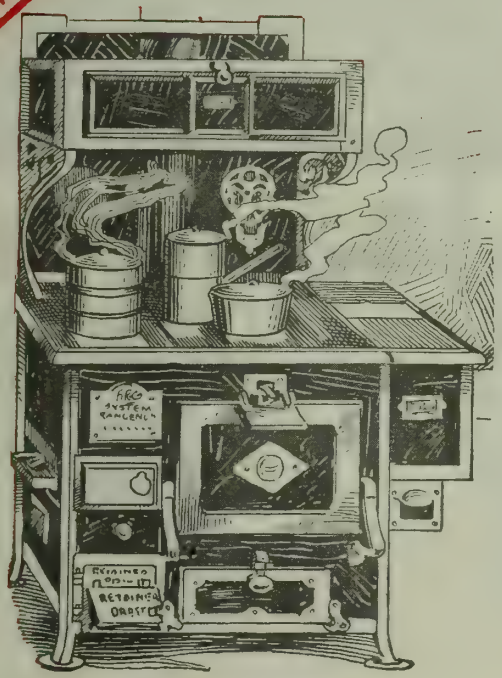
The house is heated throughout with an abundance of heat; 25% of your fuel is saved.

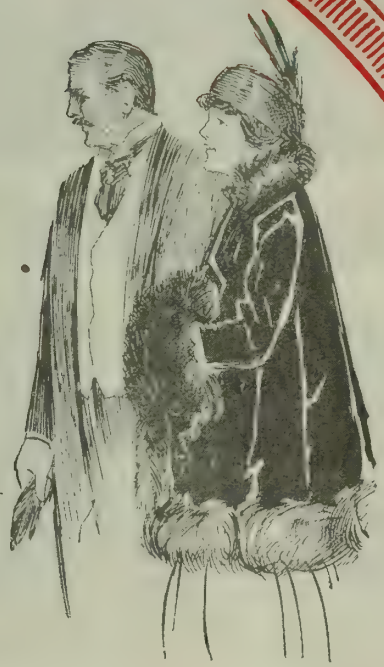
A profitable line for the dealer—get a start with it early.

The Hall-Zryd Foundry Co

Winnipeg

TRADE FiReCo REG'D MARK





The "Trade Mark" of a Money-making Line

Fireco makes good money for dealers because it has such convincing selling points and closes so many sales. It is the latest up-to-date model stove construction with every advantage in design.

Fireco saves fuel because it conserves heat; makes combustion complete; prevents the flues being filled with soot; gives absolute control of the fire and no gas can escape from this range.

Customers are interested to know that Fireco requires 50% less labor, 50% less ashes carried out, and gives delighted owners 100% more cooking and heating satisfaction.

We demonstrate in your store.

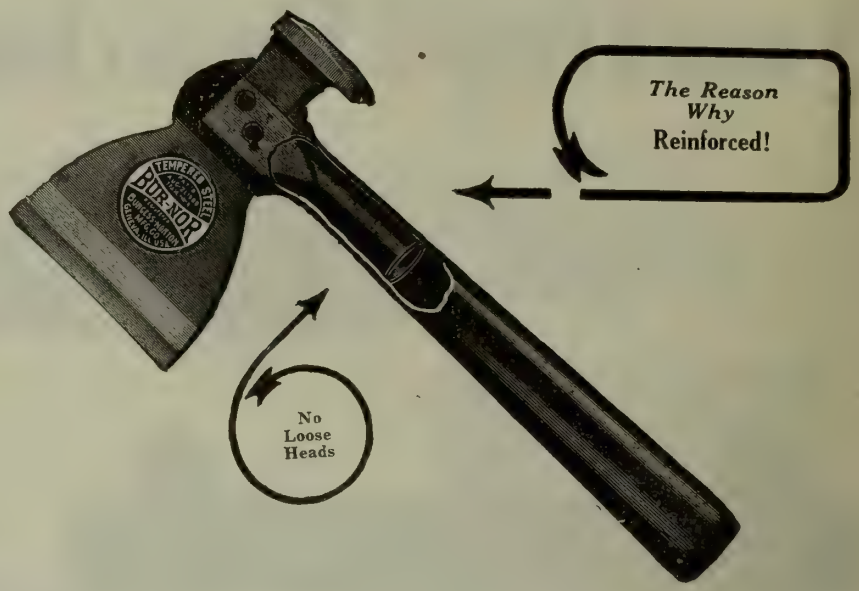
BURGESS-NORTON MFG. CO. BUR-NOR TRADE MARK GENEVA, ILLINOIS, U.S.A.

Bur-Nor
Famous Hardware Specialties

All-Steel Hatchet

Bur-Nor Steel hatchets are a great improvement over the old style wooden-handled affair. The hollow steel handle is so reinforced and riveted under high pressure that the heads cannot loosen or come off—an all too familiar characteristic of the old-style, wooden-handled hatchet.
The line has proved itself a good seller and satisfying to the consumer. The well-known "Bur-Nor" trade-mark links your store with the consumers satisfaction and holds his future trade. Trade-marked goods are easier to sell and reduce selling cost for the merchant.



Automobile Accessories

Ford Radius Rods

Our Ford Radius Rods are constructed of tapered tubing with drop-forged ends carefully machined and threaded. Perfect threads mean freedom from trouble, annoyance, and delay.
The ends are correct length and finished; the rods are accurate in size and guaranteed in quality—quality that makes "Customer satisfaction." Finished in black enamel and weigh 7¼ lbs. each. Packed six in a bundle, or twenty-five in a crate or box, for export.

Motorists Look for this Hall-mark of Quality on Tires, Tubes and Accessories

The exceptionally high quality of all goods bearing our name has caused motorists to look upon it as a guarantee of quality. They are quite right—we could not afford to place our name on any goods that would not give perfect satisfaction. Sales are easier when you show your customer tires or accessories bearing the name "Gutta Percha."

Cord Tires
and
Fabric Tires

Whichever your customer selects, he is sure of a service record that will exceed his fondest expectations. On heavier cars it will pay you to strongly urge the use of cord tires. The extra mileage will delight the motorist and give him confidence in your store.

We have Created the Demand You only Need to Supply it

For years we have been building a reputation for the dependability of Champion Spark Plugs. To-day "Champion" on the insulator of a spark plug is the world's synonym for dependability.

Spark plug users have come to realize that "Champion" means satisfactory, efficient spark plug service.

Champion

Dependable Spark Plugs

have been selected as regular factory equipment by over 300 manufacturers of automobiles, trucks, tractors, farm and stationary engines, motor boats, and motor cycles in Canada and the United States.

The demand for "Champions" is already established. All you have to do it to supply that demand, and take your share of the business our advertising has created for you.

Keep your stock of Champions complete that you may be able to, at all times, supply the demand.

Champion "Heavy Stone"

B-13, ½-inch B-53, ⅞-18 long
B-43, ⅞-inch, 18 B-73, ¾-inch
B-83, ¾-in. long

Price $1.25

Specially adapted for heavy service cars, tractors, trucks, farm and stationary engines.

Champion Spark Plug Co. of Canada, Limited

Windsor, Ontario

Largest factory in Canada making Spark Plugs exclusively and the only factory making "Champions."

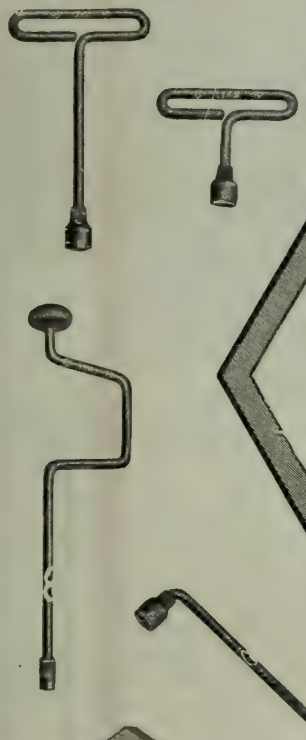
MOSSBERG

ALL STEEL WRENCHES AND TOOLS

BY INVITATION MEMBER OF
NEW YORK U.S.A.



More Sales — More Satisfied Customers

How often is it necessary to turn away the prospective purchaser of a wrench because you are unable to supply the particular type of wrench desired?

The progressive dealer overcomes this handicap by stocking the Mossberg line of All Steel Wrenches. Its completeness makes the possibility of a sale greater. Whatever the size of nut—whether square or hex., there is a Mossberg wrench to handle it. No matter how unusual the purpose for which the wrench is needed, there is a Mossberg to meet the demand.

The garage man, the motorist, the expert machinist, the marine engineer, each with his particular needs, can find the right wrenches among your Mossberg stock. And he knows that the Mossberg may be relied upon. He is familiar with its reputation for strength and service.

Send for complete 1920 catalog.

DESOLVO AND COLD WATER

Saves time and money

Desolvo, the handy cleaner for sewer and drain pipes, mixes with cold water and generates a very high temperature; it will thaw out frozen rain water leaders, frozen drains and soil pipe stacks, without injuring the pipes or plumbing fixtures.

Desolvo will do the work quicker, and with less effort and expense, than any other method. It saves time and money.

We have had 20 years experience in the chemical manufacturing industry and we guarantee results if instructions are carried out. Carried by the leading jobbers in Canada. Write to-day.

"—draw your own conclusions"

"Gentlemen," concluded Mr. Fred Hall, President of The Northwestern Chemical Co., "you have just seen how SE-MENT-OL works in badly leaking radiators. Before you is the result—draw your own conclusions."

Seventeen representative auto supply jobbers, assembled in Marietta, Ohio, had just seen a radiator, spurting water from many leaks, completely and **permanently** repaired in **seven minutes** by SE-MENT-OL. Other conclusive tests proved to them that this self-acting radiator repairer could not clog or injure the cooling system in any way.

This demonstration was concluded by completely renewing the appearance and efficiency of the old and very shabby car with other products of the NORWESCO line.

If your jobber was among those present, he will advise you to **stock** SE-MENT-OL and NORWESCO products and **concentrate** on them. He knows they are **right.**

This NORWESCO demonstration was filmed, and will be shown everywhere through the courtesy of the jobbers.

THE NORTHWESTERN CHEMICAL CO.

2106 State Street, MARIETTA, OHIO

Canadian Factory: Montreal

SE-MENT-OL retails at 75 cents, Liquid or Powder. One can is enough for even the largest cooling system.

IF YOU had the time to note the tire equipment on automobiles these days, you would believe, as we do, that

1920 IS A DUNLOP YEAR

¶ The ascendancy that shows on our sales record, naturally tallies with the "road" record.

¶ You may not know where rubber comes from, but after a purchase you'll soon know that it goes into *Dunlop Tires.*

¶ Try *"Traction"* or *"Ribbed."* The verdict on these two exceedingly popular tires is—

1. That the Quality Never Varies.
2. That the Mileage Keeps Adding Up.
3. That the General Serviceability is Matchless.

Character—

You judge a person's character largely by his outward appearance. Just so is the character of your store largely judged by the appearance it presents to the buying public. Cleanliness—one of the greatest assets of any store.

Imperial Floor Dressing helps you enhance the character of your store. It keeps your store and its merchandise clean—dust *cannot rise* from the floors when treated with *Imperial Floor Dressing*. One gallon covers a floor surface of 500 to 700 square feet, and one application will last for months.

Imperial Floor Dressing preserves the surface of wood, linoleum or oil cloth. It is non-gumming and non-evaporating. The only sanitary and satisfactory way to dress your floors.

Selling in Summer

Many dealers find the summer season one of the BEST for selling Gillette Safety Razors!

It is obvious enough that the trade is waiting for the dealer, who, by his window display and other means at his disposal, suggests the convenience of NO STROPPING—NO HONING to men planning their vacation requirements.

The summer hotel, the holiday camp, the cruise in canoe, launch or yacht, the wayside inn—none of these furnish the home conveniences for shaving, and men know it.

If you catch them now with a reminder that the Gillette Safety Razor will give complete satisfaction wherever and whenever it is used, you will make many extra sales.

Manufacturers' Sales to Trade Pay 2% Sales Tax

Further Important Amendments to Each Item Results From Debate in House of Commons—Original Budget Still in Effect Until New Bill Prepared—No Refund of Overpayment of Taxes Under Original Resolution

TAX AMENDMENTS NOW EFFECTIVE

The changes in the taxes as outlined in this issue are now in effect. As we go to press, word is received that the bill incorporating all the amendments to the original resolution is now officially regarded as read. The trade is from June 16 held responsible for the collection of taxes on the new basis. No refund of taxes collected under the original resolution is to be made.

An additional list of exemptions was prepared at the last moment but the only item affecting the hardware trade was the granting of exemption to fibre used in the making of binder twine.

Taking the schedule as outlined in May 29 issue of HARDWARE & METAL and making a note of the changes outlined in June 5 and June 12 issues will give a correct basis for tax charges. Next week a completely revised schedule of tax charges will be published in these columns.

SOME interesting discussion has been taking place in the House of Commons in connection with the amended resolutions put forward by the Minister of Finance in regard to the budget of new taxes. In the last issue of Hardware and Metal were outlined the proposed changes. These changes are not yet in effect, but the hardware trade will be well-advised to keep in touch with the latest developments as outlined in press reports, for these will be the only warning given and the only outline of procedure to be followed. At the present time the resolutions as amended are being debated in the House of Commons, but as soon as they have been formed into a bill to amend the War Revenue Act 1915 and introduced, the new resolutions will become effective and the retail trade will be held responsible as from that time.

The budget resolutions have been adopted in committee of the whole in the Commons and each section has been fully discussed by the members, and the Minister of Finance has stated that the new amendments will be effective either from the time of the introduction of the Bill, as outlined above, or at a specified time to be mentioned later.

No Refund of Overpaid Taxes

The question of a refund of overpayments of taxes made under the original resolution was brought up in the discussion, and the Minister of Finance intimated that there might be no refunds of such taxes.

Recognizes Middleman in Turnover Tax

One additional important amendment to the budget taxation resolutions calls for a variation of the one per cent. tax on sales. The original resolution provided that a tax of one per cent. in addition to the present duties of customs and excise be levied on sales by manufacturers and wholesalers and on importations. The Finance Minister's proposal would add a proviso to the resolution reading: "That in respect of sales by manufacturers to retailers or consumers, or on importation by retailers or consumers, the tax payable shall be two per cent."

This means in cases where manufacturers sell to retailers or directly to consumers, or where retailers or consumers import goods, the tax will be two per cent. instead of one per cent.

In the debate on this point it was indicated that this action gives official recognition to the middleman.

Stamp Tax on Advances From Bank

A further amendment provides that whereas under the original resolution a stamp tax of two cents was payable on every bill of exchange or promissory note for $100 or less, with an additional tax of two cents for every additional $100 or fraction of that amount, this tax will be applicable to "advances made by a bank by way of overdraft."

Auction Sales

The Finance Minister has ruled that the luxury taxes are not applicable to sales made by auction.

Snowshoes Off Taxable List

W. S. Loggie in the debate on the budget called attention to the fact that snowshoes were used by lumbermen in their business and the Finance Minister agreed to exempt them from the Luxury Tax.

Still Higher Exemption for Some Other Sporting Goods

Baseball requisites and lacrosse sticks, on which an exemption of price of $1.50 was mentioned last week, are taxable only on the excess over $2.00 each, according to the resolution as finally adopted by the House of Commons. This includes baseballs, masks, pads, mitts, bats.

Pianos, Organs, etc.

Last week we stated that further suggestions were to be forthcoming in regard to the tax on pianos, organs, phonographs, etc. It is now stated that the following items are taxable at 5 per cent. up to the exemption price and 10 per cent. on the excess of the exemption price mentioned: Pianos $450; organs $1500 (except for religious purposes); 10 per cent. on mechanical piano players, talking machines and records, music boxes and all jewelry over $5 in value. Wedding rings were exempted altogether from the jewelry tax. Gold-mounted fountain pens do not now come under the fifty per cent. tax on gold articles unless they cost more than $5. Musical instruments for bands are exempted.

Playing Cards

The scale of taxes on playing cards stands as outlined in last week's issue.

Glass

A. R. McMaster (Brome) wanted other kinds of glass besides cut glass taxed. The Minister said he had decided to take "etched" glassware and would be glad to add the name of any other fancy glassware.

Skis and Toboggans

Skis and toboggans have been added to the list of taxable goods under the sporting goods classification on the basis of the excess over $3.00.

Nickel and Brass-Plated Ware Exempt

The amendment to exempt articles plated in nickel or brass for household or office use, was carried.

May Collect Luxury Taxes by Stamps

A clause respecting collection of the excise tax come in for much discussion. J. A. Robb (Huntingdon) suggested that as the Minister was collecting the tax on bills of exchange by means of stamps, the merchants throughout the country should be given the same consideration and be allowed to affix stamps to the articles sold. This, it was stated, would reduce both the cost of collection and the amount of trouble to which the merchants would be put.

E. Pedlow supported this suggestion and said it would do away with the necessity of an army of officials going about the country checking sales. It would also be unnecessary under this plan for a merchant to make all his returns in triplicate.

Sir Henry Drayton said he hoped to be able to work out some system whereby stamps could be used. He would ask for power to do this in the Bill to be presented to the House.

Boats, Cameras

The taxes on boats and on cameras weighing over 100 pounds were carried in their original form after much discussion.

Manitoba Proposes to Survey Resources

Winnipeg.—A Bureau of Scientific Research, to analyze Manitoba's natural, industrial and commercial resources and to point the way toward their proper development, is being organized by the Provincial Government.

The bureau that is to take stock of this wealth, as well as the wealth represented in the farms and factories and commercial enterprises in the settled part of the Province, is to comprise an honorary board of Manitoba citizens, representative of agriculture, mining, fisheries, manufacturing and water power.

For organization purposes a fund of $10,000 is available, having been voted by the Provincial Legislature.

One of the first tasks the board is expected to undertake is an investigation of the recent discovery of oil near Dauphin. Another problem that the bureau probably will tackle is that of providing transportation facilities into the Rice Lake, Herb Lake and other goldfields.

The creation of this bureau is a measure of preparation for the great influx of settlers from the United States and Europe, which already has started and which is expected to increase steadily and rapidly.

"CREDIT THE CURSE AND DAMNATION OF RETAIL BUSINESS," SAYS GEO. MAYBEE

MOOSE JAW, June 10.—Straight jabs from the shoulder enlivened the address that George Maybee, Moose Jaw's shoe manufacturer, delivered to the retailers at their Wednesday evening session. Discussing the difficulties merchants face in competing with the catalogue houses, Mr. Maybee told them that the remedy was in their own hands, and that by improving their methods of doing business, and possibly forming a co-operative buying organization, they could put the mail order houses out of the running.

"First of all, though, you must eliminate the credit system from your business forever," said Mr. Maybee. "Credit is the curse and damnation of retail business. He used to believe we could tax or legislate the mail order house out of business. We can never do that because the mail order house is the consumers' friend and you will never get any legislation without the support of the consumer.

"But you can 'get' the mail order house if you want to. First, you merchants have to begin to like each other. Cut out local jealousies and show that you are big enough to go to the man you scrap with, shake hands, and say, 'Let's be friends.'

"Then you have to improve your business methods. A great many merchants who are in business to-day ought to be running circuses. You should establish a buying centre for yourself Meet the mail order man on his own ground. Have your own jobbing house and eliminate the middleman."

Vermilion, Alta.—J. Law, formerly of the firm of Nellis & Law, hardware merchants, has sold out his interests in that firm and has just recently purchased a hardware business at South Vancouver, B.C.

Trade-Marks Should Convey Vivid Impression

Trade-Mark Facilitates Memory of the Article, Aids Recollection, Assists Idenification—Many Recent Changes in Trade Symbol Procedure—Origin in Mediaeval History—Prominent Factor in Business Expansion of Modern Times—From the Buyers' Standpoint—Legal Requirements.

THERE are a great many interesting points concerning trade-marks, as to their origin, their usefulness, what they signify, and the reasons underlying their adoption, because of the fact that the majority of leading manufacturers and wholesalers now have some distinguishing mark upon the goods they manufacture or handle.

The function of trade-marks or trade-names provides the most striking instance of the importance of making a vivid and permanent impression. The mark or name facilitates the memory of the article, aids in its recollection at the moment of need, and assists in its identification at the time of purchase. Therefore, recollection and recognition may be said to constitute the primary functions of trade-marks. The more easily and correctly the mark or name is recalled and the more quickly it is recognized, the higher will be its value. In the main, trade-marks are made up of one or more of the following materials:

1. Pictures (Old Dutch Cleanser, Gold Dust, etc.)
2. Words (Keen-Kutter, Uneeda, Sapolio, etc.)
3. Geometrical Forms (star, triangle, cross, circle, crown, etc.)
4. Syllables or disconnected groups of letters (B.V.D., A.B.C., etc.)

Experiments have shown that pictures, words, forms and syllables differ widely in attention and memory value. It is found that pictures require fewest repetitions and hence have the highest memory value, both for recall and recognition. Next in order of difficulty come forms, then words, and most difficult of all, syllables. The latter are nearly six times as difficult to recognize as pictures. Words are nearly three times as hard to recognize as pictures.

Many Recent Changes in Trade Symbol Procedure

In recent years the growth of competition and the multiplication of brands has brought about many changes in trade symbol procedure as well as in laws governing the use of these devices. The natural tendency on the part of the purchaser to buy goods under trade names has made it necessary that these names be not only ornamental and printable, but also short, and easily pronounced.

The merchandising power of the well-chosen trade-mark is greatly enhanced if the name or symbol can itself suggest the qualities of the commodity. The name that is distinctive and unique has obvious advantages.

The trade-mark should perform a variety of functions. It simplifies the art of purchasing, facilitates identification, recognition and recall; protects the consumer and the manufacturer against substitution; crystallizes good-will and reputation as marketable qualities; acts as a direct sales force through its suggestiveness and holds the manufacturer to the maintenance of stable quality through its promissory character.

In addition to these characteristics, other factors to be considered in the selection of a trade-mark are the possibility of registration, the likelihood of infringement by or on other trade symbols, mechanical details connected with affixing symbol to the commodity or the container and the possibility of a later desire to capitalize the symbol more definitely by building up a family of products under the same name.

ADVERTISING HAS CHANGED VALUE OF TRADE MARKS

The use of advertising to such a degree for the performance of sales work has brought about an entirely different consideration of the trade-mark. In many cases where trade-marks were secured before advertising came into general use, it has been found that the trade-mark is a tax upon the memory and fails to perform its function as an identification of goods For this reason it has been necessary for advertising to be used either to establish a new trade-mark or to individualize the mark which previously did not give proper identification.

Easy to Confuse the Buying Public

One aspect of the problem of infringement is that of determining the tendency of two similar marks to "confuse the buying public" and hence to constitute an infringement case. In recent years the psychologist has been called upon to determine the probability of confusion between the members of such pairs of trade symbols.

History of Trade-Marks

Trade-marks might be said to have originated with the earliest adopted method of advertising, which was through the medium of the sign. Excavations made in various parts of the world bringing to light the conditions of life in the earlier civilizations have shown that it has been customary in all ages to designate by a symbol either the occupations or products made in a certain place or by a certain individual.

Advertising by signs was, of course, carried very much further in the time of the Romans, and these earlier symbols developed on the one side into the outdoor advertising and on the other side into the trade-mark protection for goods. Originally, the trade-mark was pictorial. Most of the people of those times were unable to read and write and therefore the mark required the pictorial representation to accomplish its purpose. The older trade-marks which can be traced show the use of the place, the environment or the name of the craftsman as the leading part of the design.

Modern Origin at Beginning of Industrial Expansion

While the trade-mark is a very old method of identification, in a modern sense its origin dates back to the beginning of the industrial expansion and the growth of international trade. Before that time so few of the products required by the people of various countries were distributed over any great distance that there was comparatively little use for this means of identification and little or no conflict in the similarity of marks.

Effect of Advertising on Trade-Marks

Advertising has exercised a marked influence upon the value of the trade-mark as it has extended the operation over a much wider field. It has also forced upon the manufacturer of products which pass through many hands, the adoption of this means of securing final identification of his product by the conunder these conditions.

From the Buyer's Standpoint

The trade-mark is fundamentally a buyer's protection. It is not considered at law as a protection to the manufacturer, save incidentally. It is obvious that a trade-mark is valuable only to a permanent business organization and that its value depends upon the value of the product. There would be no purpose in identifying the product except for the repeat buyer, the permanent customer. No customer is permanent unless value is given. The result is to give to the trade-marked product a presumption of quality of great value to the manufacturer.

Legal Requirements

The trade-mark law in Canada is based upon the common law right of the consumer to be protected against substitution in buying, and the rights of the manufacturer to the exclusive use of a trade-mark for that purpose.

It is not generally understood by sales and advertising executives that trade-marks are not property—they are merely an identification and cannot be transferred, bought or sold by themselves. Then they can be transferred only as part and parcel of a business.

Consolidation of Drop-Forging Plants

The stockholders of J. H. Williams & Co., manufacturers of drop-forgings and drop-forged tools at Brooklyn and Buffalo, N.Y., and of the Whitman & Barnes Manufacturing Co., makers of twist-drills, reamers, wrenches and drop-forgings, at Akron, Chicago and St. Catharines, Ontario, ratified the agreement providing for the consolidation of the wrench and drop-forging plants and business of Whitman & Barnes at Chicago and St. Catharines with J. H. Williams & Co., as outlined in Hardware and Metal some weeks ago. The Whitman & Barnes Manufacturing Co. retain their twist drill and reamer business and will continue, as an entirely separate organization and on an extended scale, the manufacture of these tools at Akron, Ohio.

The J. H. Williams & Co. business was founded in Flushing, L. I., as a partnership in 1882, by James H. Williams and Matthew Diamond, under the style of Williams & Diamond, later Williams & Brock. It located in Brooklyn in 1884, assumed its present name in 1887, and was incorporated in New York State in 1895.

The Whitman & Barnes Manufacturing Co. was founded as a partnership in 1846, by Augustus Whitman and Alfred G. Page, under the title Page, Whitman & Co. In 1868 the Akron factory was built and, in 1877, the business was combined with that of George Barnes & Co., of Syracuse, N. Y., the enlarged concern assuming its present name—The Whitman & Barnes Mfg. Co. The St. Catharines plant was acquired in 1882, and eleven years later the Chicago works were built.

The business will continue to be operated by those who have been continuously identified heretofore with the business of J. H. Williams & Co., and with the Chicago and St. Catharines plants of the Whitman & Barnes Manufacturing Co., the organization being as follows:

President and managing director, J. Harvey Williams; vice-president, A. D. Armitage; secretary and treasurer, W. A. Watson; controller, R. S. Baldwin; genl. sales manager, F. W. Trabold; Eastern dist. sales mgr., A. S. Maxwell; Western district sales mgr., W. E. Rowell; Buffalo district sales mgr., J. C. Cotter; Detroit district sales agent, A. M. Thompson; publicity manager, Hugh Aikman; general works manager, Capt. W. N. McMunn; chief engineer, Willard Doud; supt. Brooklyn division, R. J. Smith; supt. Buffalo division, T. F. Du Puy; supt. Chicago division, Barney Nelson; genl. purchasing agent, J. C. Scanlon; genl. traffic manager, J. B. Payne; Canadian manager, W. J. Elliott.

Advertising Keeps Most Retailers in Business

"One out of every 100 people in the United States earns his living by retailing" (the proportion in Canada is about the same), said Jesse M. Joseph, of Cincinnati, in addressing the retail section of the convention of the Associated Advertising Clubs. "In other words, there are more people in retail selling alone than in any other line of endeavor, except agriculture. Yet, after twenty years roll around, out of every 100 who have embarked in retail storekeeping, less than 5 still have their names over the door.

"The financial agencies show that 15,000 retailers fail each year, and 85 per cent. of them—12,250—did not advertise!

"Yet, the outstandng reason for the failure of more than 50 per cent. of these was over-buying.

"Over-buying means too much 'stick stock.'

"Now, if profits lie in quick turnovers, and failures are avoided by having money in the bank—and ADVERTISING will not only dispose of surplus stock, but also bring in the money to put in the bank—you can see not only the advisability, but also the absolute necessity of advertising.

"Some of you remember when there were practically no mail order houses.

"Some of you remember the time when all the mail order houses put together (and it was less than 10 years ago), did not do 4 per cent. of the retail business.

"How do they stand to-day?

Of the $15,000,000,000 worth of retail business done annually, the mail order houses do $1,500,000,000—10 per cent.

"And how do they do it?

"They ADVERTISE!

"The mail order houses and the department stores who advertise do more than 25 per cent. of all the retail business done in America and their proportion is growing all the time. Yet, altogether they only represent 30,000 of the retail stores in the country—or about 3 per cent.

"That's why I say "Advertising" is that force which puts 'The busy into business' and the 'sing into merchandising'—and takes the 'SIN' out of both.

"There is something in your store that is bigger than the store—bigger than the building—bigger than the merchandise. You will find it mentioned at the very beginning of the 22nd Proverb—

"'A good name is more to be chosen than great riches.'

"Some of you wear 'REGAL' Shoes.

"The Regal Shoe Company estimates its name as being worth $2,500,000.

"Some of you wear 'HART, SCHAFFNER & MARX' Clothes.

"It is a 'little thing to look for, but a big thing to find' that little fellow sitting on horseback, blowing a horn.

"Do you know what tune he is playing?

"He is playing $15,000,000.

"Some of you wear 'ARROW' Collars.

"Cluett, Peabody & Company estimate their good name as being worth $18,000,000.

"Some of you smoke 'LIGGET & MEYERS' Tobacco.

"Their good name is worth $39,000,000.

"Others may smoke 'AMERICAN' Tobacco products.

"Their good name is worth $54,099,430.

"F. W. Woolworth & Company, ten-cent stores, figure their good-will at $50,000,000.

"What is your good name worth?

"How do you stand in your community?

"The point I wish to make is this—

"Instead of shrieking 'SALES—SALES—SALES'—instead of eternally pounding on your merchandise and lauding your values—devote a little space to calling attention to your store; to your name; to your policies—you will be building infinitely more permanence to your establishment and its standing in the community.

"You would be less apt to fall among those 95 out of every 100 who go out of business inside of 20 years."

Must Register Colors in Trade Marks

Manufacturer Cannot Have Trade-Mark Registered in Black and White and be Protected if Later He Uses Colors—The Importance of Color in Designing Trade-Marks

Written for HARDWARE AND METAL by A. B. KERR

IN a recent issue of "Printers' Ink" (New York), there was an article by C. P. Carter on the "Registration of Color in Trade Marks," in which he said that there was a popular notion in the minds of trade-mark owners, patent attorneys, advertising agents and even among the judiciary that a trade-mark used or registered in black and white is protected against trade-marks of a similar or of the same design in any colors. Conversely, the notion existed that to use or register a trade-mark in certain specified colors is to limit one's rights. Hence, it was customary to register trade-marks that are always used in certain colors without any statement as to color. This lack of indication of color and the inability of the Patent Office to reproduce the trade-mark in its colors resulted in the publication of the trade-mark without reference to the colors in which it is used and was popularly understood to be a means of enlarging the scope of one's trade-mark and of making it an infringement to use the same or a similar mark in any colors whatsoever.

As far as Canada is concerned, I doubt very much whether the popular notion exists in the minds of the judiciary patent attorneys or advertising agents that a trade-mark used or registered in black and white is protected against trade-marks of a similar or of the same design in colors. Whatever the notion may be, which exists in the minds of those who have to do with these matters in the United States, it certainly does not exist in the minds of people who have to do with these matters in Canada.

The converse notion which exists in the minds of those in the United States that to use or register a trade-mark in certain specificed colors is to limit one's rights is not only a notion which exists in the minds of Canadians, but the practice which prevails in Canada when registering trade-marks in Canada. If the department for registration of trade-marks registered a trade-mark without any reference to colors, it would be assumed that the trade-mark would be in black and white. It is the custom to send to the Department an exact copy of the trade-mark to be registered; in this way the rights of the person or persons who resgisters are fully protected. If they send a trade-mark without color, then they cannot be protected if they use a trade-mark with color. The color scheme of any trade-mark lends the distinctiveness to the name or design of which immediately distinguishes the trade-mark among all other marks. If color is used in a trade-mark it is as important, if not more important, than the name or design.

Color Registration Important

Color, or combinations of color are the essential elements of a trademark when color is used. It is just as important to get the proper color and see that it is properly registered as to see that the name is properly spelled and the design the correct proportions.

The object of using color is to attract attention. National advertisers pay huge sums of money to develop and accustom the trade and general public in the use of trade names. They advertise to get merchants and the people generally accustomed to the habit of asking for the product by the trade name or accepting it when offered by the merchant or clerk. They spend money freely to impress this habit upon merchants and the consumer in all walks of life so that asking for and accepting this particular product becomes second nature, and the buyer becomes influenced sometimes conscious of the fact, but many times unconscious of the fact that he has been influenced. In many cases if you were to ask the merchant or clerk why he purchased and recommended a certain product, never having sold it before, he might say it was a good product; he might not be able to give a reason why it was a good product beyond the fact that he had seen it advertised in his business paper which he read closely for his business information.

This is the effect advertisers strive for, and those advertisers who use colored trademarks spend huge sums of money developing a mark with colors pleasing to the eye, easy to remember, and of distinctive design.

The Firemen's Trade Mark

In a great many Canadian cities our firemen wear red helmets. This immediately associates the firemen with the fire department. People who see the red helmet know without making enquiries that the man who wears it belongs to the fire department. That is the reason firemen wear red helmets. It distinguishes them from all others. For the same reason policemen wear blue helmets, and when you see a blue uniform topped by a blue helmet you do not have to be told the man who wears it is a policeman. These are distinguishing marks which distinguish the wearer from all the rest of mankind and are as essential to their departments as the men who wear them.

The average person has an eye for coloring in a suitable design. Some freak advertisers employ colors which are displeasing to the eye and jarring on the nerves. These are usually designed to command attention, but react as a rule on the advertiser. The person who sees them feels sorry for the artistic temperament of the designer who designed them. Such signs antagonize people and make them ill-natured and hard to deal with. Shrewd, calculating, advertisers do not use them. They employ something which pleases the eye and soothes the nerves; something that reaches the artistic sense of every one and puts them in a receptive mood. When they think of the design they think of it with pleasant feelings and not with any sense of jarring on their nerves.

Colors Produce Temperaments

Big executives have made a study of colors, not only for trademarks but for use where a large number of employees are engaged. In some of the largest telephone exchanges in Canada and the U.S. the color scheme has been worked out in great detail. A color pleasing to the eye is scientifically blended and put on the walls in a scientific manner by experts. Actual tests in different rooms with unsuitable colors has justified the wisdom of the trouble and expense involved in producing proper colors. In the telephone exchanges tests proved that the employees could work longer hours, were more courteous, and the percentage of attendance was higher in rooms properly colored than in rooms where no attention was paid to the coloring arrangements.

WILL ORGANIZE A RETAILERS' TRUST CO.

Moose Jaw, June 10.—It was decided at the convention of the Sask. R. M. A. that steps will be immediately taken to organize the Retailers' Trust Company, a charter for which was taken out some years ago. The new corporation will have an authorized capital stock of $50,000, of which $10,000 must be subscribed and $5,000 fully paid up before business can commence.

The company will be placed in charge of a competent and experienced trust company officer, and will be operated for the benefit of the retail merchants of the province, conducting a regular trust company business.

It was felt that merchants who get into financial difficulties would be much better protected in making an assignment to what would be essentially their own trust companies, although one or two merchants present warned against embarking upon an enterprise so fraught with difficulties.

The capital stock of the company will be offered to members of the association for subscription.

EDITORIAL COMMENT

BUSINESS CONDITIONS ARE SOUND

BUSINESS conditions in United States and Canada are fundamentally sound. Circumstances are not the most favorable, and there are many troubles that will not be removed for weeks and months to come. But, allowing for all that, there is nothing of the blue-ruin type in sight.

A representative of this paper attended a meeting of the Editorial Conference of Associated Business Papers in Chicago last week, where business conditions in all the fields represented were discussed by experienced business editors who were in close touch with the trade in their varied fields.

Many of the speakers made the point that the railway situation in United States, following the switchmen's strike, was the root of the trouble. The strike had been a vicious attempt to paralyze the nation's business in the shortest possible way, and for a time success was with the strikers. Canadian industries have a lot of raw material coming from United States. They can look for improvement before long, but the improvement will not be sudden, and it is likely that many months will pass before traffic is passing with the necessary speed between points in the two countries.

One point was brought out that shows a wheel within a wheel, in that the inability of the railroads under present circumstances to transport material to the shops making cars and engines would delay rapid recovery in the railroad problem. In other words, the poor physical shape of many of the roads is making it hard for them to help themselves.

The iron and steel industry has a large volume of perfectly good business on its books. Production is now around 75 per cent. of capacity, but when it is considered that capacity increased some 40 per cent. during the war, it will be seen that 75 per cent. production now is really greater than 100 per cent. capacity in the pre-war days.

The lumber trade reported declining markets, but there were factors that had been in operation to keep the markets from being filled up when these declines were on. Strikes and poor weather had kept the cut down. One expert on the situation claimed that the policy of the larger dealers in a declining market is to force the situation as much as possible and reach bottom at once, depending on past experience of reactions after sharp declines to bring them safely out of any troubles.

The feeling was also expressed that stability could be lent to the present situation in a marked way by a feeling that prices had gone their worst. Of course, there are exceptional cases where this cannot apply. In the main, though, it is worth serious consideration. Several cases were cited where large projects were hung up for the present, because those behind them were not inclined to go into the market for building or equipment, because they knew that costs would be so high that they would be unable to compete with the product of plants that had been built in pre-war times.

Business and banking circles reported that credits were being tightened rather than extended, but they claimed that the general effect was regarded as good. Makers of touring cars were being notified to cut down on their output, while builders of trucks and tractors were being assisted to go ahead. The reason was that the building of the latter would result in a greatly increased area of land being worked on the farms, and thus the new wealth of the country would be added to from year to year.

In all reports that were delivered, there was nothing to shake confidence, or to cause one to feel that the future had in store anything that sane common-sense could not surmount.

ADVERTISING BY THE MERCHANT A NECESSITY AND ASSET

SOME alarming statistics were presented to the recent convention of the Associated Advertising Clubs of the World, in regard to the retail business of the United States. It is very probable that similar conditions prevail in this country in proportion to population and the matter is therefore deserving of some serious consideration. The statement was made that out of every hundred retailers who start in business ninety-five of them are forced out of busi-

ness within twenty years. It was found that fifty per cent. of those who failed lost out through over-buying. This condition combined with the unintelligent use of advertising was responsible for the greater portion of the failure. These two reasons are somewhat co-related insofar as successful advertising will to a large extent overcome the faults of overbuying, providing this medium of moving the goods from the shelves is used intelligently. The situation therefore serves to emphasize the importance of the dealer having a thorough knowledge of advertising principles, so that his outlay for publicity will bring returns in good proportion and be looked upon as an important sales factor rather than a necessary evil which has to be figured in the overhead costs.

Edward N. Hurley, president of the Hurley Machinery Company, and one of the successful manufacturers in the United States, looks upon advertising as a necessity and an asset, and as the first step in developing business. He states that the time has come when the merchant must carefully figure advertising cost, carry it in his budget as an expense just as essential as rent or labor, properly charging it against each product and article. He points out that advertising has been hurt by emotional appropriations and by spasmodic flares by those who advertise only when they have spare money and never put out a line when times are dull and they need business. He states that the amount and nature of advertising is to be planned with the production scale in order that merchandising may be stabilized.

REVISED SCHEDULE OF TAXES ON HARDWARE TO BE GIVEN SOON

THE luxury and turnover taxes to be applied to all branches of trade in Canada, as originally outlined in the budget speech of the Minister of Finance on May 18, are still in an indefinite state owing to amendments which have been proposed as result of further discussion of the matter. A number of the proposed changes were outlined in the last issue of Hardware and Metal and still further changes due to discussion of the amendments while passing through the final stage of the House of Commons are outlined in this issue. The original basis of taxation as outlined in the schedule appearing in May 29 issue of Hardware and Metal is still in effect and will be until notice is given through the press that the changes have become effective. This will likely come on the completion of the Bill to amend the War Revenue Act which is being prepared embracing the changes authorized. It is hoped that before next week's issue goes to press the suggested changes will be authorized and Hardware and Metal will be in a position to give a revised schedule of how the taxes apply to the hardware trade.

ACTIVITY IN PROMOTING WESTERN BUSINESS INTERESTS

BUSINESS interests in Western Canada are moving rapidly these days in bringing about means to develop the prairie country through the medium of co-operation and intelligent study of problems. The Saskatchewan branch of the Retail Merchants' Association of Canada has just completed its annual convention in Moose Jaw, and this year has seen the inauguration of sectional meetings in the convention in order that the interests of the various trades might be better served in dealing with their own particular problems before joining in open convention. The plan has worked admirably and much good was accomplished at the gathering.

Another organization which is making headway in the interests of the West is the Western Canada Colonization Association, of which J. H. Ashdown, head of the J. H. Ashdown Hardware Company, Winnipeg, is a prominent member. The Association has for its specific purpose the peopling of some twenty million acres of vacant land in the Prairie Provinces, with the ultimate object of greatly enlarging production and expanding Canada's export trade. This is a worthy object and one which will result to the benefit of Canada as a whole.

EDITORIAL NOTES

THE UNITED States Government in the past has depended largely upon circulars when advertising property for sale or when asking for tenders, but tried the experiment recently of using the business papers to advertise the surplus property of the War Department. They got such eminently satisfactory results from this campaign that two other departments of the Government are now considering an extensive campaign of advertising in the business papers.

* * *

SASKATCHEWAN, with a population of about 750,000, has almost 59,000 automobiles in use, or an average of one to every twelve persons. This, in a community where the majority of its population is dependent on the products of the land, means agricultural prosperity, says the "Farm and Ranch Review," Calgary, and there will be general concurment in that opinion.

THE CLERKS DEPARTMENT

Started Remarkable Career as Hardware Clerk

Late E. C. Simmons, Starting in the Hardware Trade as a Boy, Developed a City Into the Greatest Hardware Centre on Earth

From "Men Who Are Making America" by B. C. FORBES

Editor's Note:—Announcement was made in a recent issue of Hardware and Metal of the sudden death of E. C. Simmons, founder of the Simmons Hardware Company of St. Louis. Mr. Simmons' career in the hardware trade was a brilliant one and represents a series of outstanding accomplishments. Every Canadian hardware salesman will therefore be interested in the following outline of how Mr. Simmons achieved such results.

"DON'T you want a boy?"

"What can you do, my lad?"

"I can do as much as any other boy of my age—where shall I hang my hat?"

"Well, my boy, if you work as quickly as you talk, we can use you."

The boy was Edward C. Simmons; the place, a hardware store in St. Louis; the time, the last day of 1855.

The boy DID work—worked so effectively that he made St. Louis the greatest hardware centre on earth, doing more business than New York, Chicago, Philadelphia, and Boston combined; worked so successfully that his house now sells three axes, two pocket knives, and several saws EVERY MINUTE of the year, supplying not only the United States with hardware and cutlery formerly almost wholly imported from Europe, but in peace times disposing annually of thousands of dollars' worth in cutlery—manufactured in Britain as well as in France, Germany, Russia, the Orient, Australia, South Africa, South America, and other civilized and semi-civilized parts of the globe; worked so intelligently that before many years passed he was employing more travelling salesmen than any other man in America; worked so efficiently that, to handle his output, there was erected, at his chief establishment, the greatest railroad traffic station of the kind ever conceived, capable of loading sixty cars at once.

The Bethlehem Steel Company is not more exclusively the product of Charles M. Schwab's energy and genius, and the Standard Oil Company is much less the fruit of John D. Rockefeller's individual efforts than the Simmons Hardware Company is the creation of one man, E. C. Simmons.

Infused Personality Into Business

How did he do it?

He put himself—his personality—into the nursing and developing of the business. He infused humanness into all his activities and into all his salesmen. Among his co-workers he inspired love; among his customers, something beyond respect—affection, even.

Then, too, he had vision half a century ago, when vision was rare among American business men. He was clear-eyed enough to see the buyer's side of a transaction as well as the seller's, and to grasp the now commonplace idea that a satisfied customer is the best asset. He was the first to teach the salesmen not to let his interest in a customer stop with the question, "How many goods can I sell him?" but to do everything possible to contribute to that merchant's success and prosperity. Often Simmons men render invaluable services to retailers, especially those just starting in business. He originated the epigram: "A jobber's first duty is to help his customers to prosper," which has become a recognized principle of trade. He could foresee trends and tendencies of the future, and he was optimistic enough, alert enough, progressive enough to become a pioneer in blazing the new trails called for by the never-ceasing evolution of mankind and of business.

When I asked Mr. Simmons who could give me an insight into his early business methods—the laying of the foundation is always the part that most interests me, since it is usually the most illuminating—he referred me to, whom do you think?

A man who served in his employ many years, *and then became one of the most aggressive and successful competitors?*

Any man who, near the close of life's day, can intrust the describing of his character, his methods, and his reputation to an old competitor, must surely have a clear conscience and a clean record.

Mr. Simmons has.

But don't jump at the idea that in the early days business morals and business practices were on as high a plane as they are today, or that Mr. Simmons was too sanctimonious, too punctilious, too highminded to enter the rough-and-tumble of the business fray, and play the game according to the rules then in force.

Thoughts of Life and Business

By B. C. Forbes

THE fellow who isn't fired with enthusiasm is apt to be fired.

Excess is an arch enemy of success.

If top-notch effort yields you no happiness, there's something wrong either with you or your efforts. Sit down and do some analyzing.

After all, you've got to give full, fair value. Or you won't last.

Carelessness and failure are twins.

The most valuable "system" is a good nervous system.

Saving is Having.

If you have half an hour to spare, don't spend it with someone who hasn't.

Don't simply see how you can "put in the day." See how much you can put into the day.

Never contrive to make it easy for your concern to get along without you.

Make sure the prize you chase is worth the price.

If you cultivate your talents you'll always find an opportunity to use them.

When in a fix, sweating will get you farther than swearing.

Let mules do the kicking.

Honking your horn doesn't help so much as steering wisely.

Don't expect poor work now to lead to brilliant work hereafter.

You have no idea how big the other fellow's troubles are.

It's all right to aspire to control others, but have you begun with Number One?

Notice that two-thirds of "Promotion" consists of "Motion."

The wages of idleness is demotion.

There is no higher rank than that of worker. No title can ever make a loafer a nobleman.

There must be output before there can be income.

Defeat is often a spur to victory.

The best reward is sense of worthy achievement.

Good times for all can only be the product of good work by all.

—From Forbes' Magazine.

WHAT IS YOUR STORE SLOGAN?

"IT PAYS TO DEAL AT ——" is one of the many popular slogans adopted by hardware stores. A good store slogan which conveys an appealing and permanent impression to the customer's mind is as valuable as a trade-mark providing the slogan does not exaggerate the service which is really given. Everyone knows the value of a good trade-mark. It is used to designate the standard quality of a line of goods and to facilitate identification. The store slogan will accomplish the same purpose, and there is an increasing tendency among hardware dealers to adopt them. For a free discussion of the merits of slogans and the outlining of suggestions to be used for this purpose Hardware and Metal wishes to publish as much information as possible from the trade on this subject.

Tell us what your store slogan is, why you adopted it, and what it has done for you. If you are thinking of adopting a slogan, send in your suggestion and see what others in the trade have to say about it. No names published if so desired. Address the Editor, Hardware and Metal, 143-153 University Ave., Toronto.

He was no mollycoddle. "Catch-as-catch-can," was the only motto or mode business then knew. Truthfulness, money-back-if-you're-not-satisfied, fair prices—such refinements of trade are modern. Mr. Simmons did his share in ushering them in a generation ago. His career covers both the old and the new era.

Had a Mania for Pocket Knives

He was born in Frederick, Maryland, on September 21, 1839, of Philadelphia ancestors, and trekked to St. Louis when a young lad. He had a mania for pocket knives, and no friend or acquaintance had one that he had not examined minutely. So, when he was turned into the world, at sixteen, to look for a job, it was natural that he should apply at a store where they sold knives—that of Child, Pratt & Co.,—where the colloquy which opens this article occurred. It was the largest wholesale hardware store in St. Louis, and his first weeks were devoted to taking all the goods from the shelves, dusting them, and putting them back again. His pay was $3 a week, or, to be exact, he served under a three year agreement, calling for a salary of $150 the first year, $200 the second, and $300 the third. He did the dusting so thoroughly that the boss complimented him, and promoted him to be an errand boy. Every opportunity found him familiarizing himself with the stock. His love for pocket knives in particular, and cutlery in general, had thus early begun to pave the way for the Simmons Hardware Company, owners and operators of the largest pocket knife factory in the world.

By the time his apprenticeship ended he was able to command a better position with another firm, Wilson, Levering & Waters, his theory being that with this smaller house he could make his work and personality tell sooner and more effectively. He had not been there many weeks when this conversation occurred:

Wanted to Carry the Key

"Mr. Levering, will you please let me carry the store key?" This key, by the way, was one of the old-fashioned sort, nearly a foot long.

"What do you want to carry the key for?" demanded the boss gruffly.

"Because the porter doesn't come down early enough. I want to do more work."

"What time does the porter get down?"

"Half-past seven."

"What time do you want to get down?"

"Half-past six."

"Well, if you feel that way about it, you may carry the key—but you will soon get tired of it."

He didn't. Young Simmons had already sensed opportunity. There were no salesmen in those days to go to buyers; buyers had to go to the sellers. Nor were there railroads. The boats on which merchants came to town landed at night, and the four principal hotels in St. Louis were all within three blocks of the store. The wide-awake young clerk, a very early riser himself, had noticed that country merchants, unable to sleep because of the city noises, often got up between five and six o'clock and walked around sight-seeing. Simmons figured that if he had the store open, some of them might drop in—and the early bird would catch the worm.

The very first morning a Missourian stopped to look at a pile of grindstones at the front door. Simmons went out and greeted him with an affable "Good Morning!" The Missourian was not averse to talking, and the enterprising young clerk diplomatically told him how this was the first morning of an experiment he had conceived and how anxious he was to make it a success.

Before the porter or anyone else came to start work, Wilson, Levering & Waters had sold a sizable bill of goods to the Missourian—and they continued to sell him regularly for many years.

The sign over the door soon was changed to read "Waters, Simmons & Company.". From this grew the Simmons Hardware Company.

How the Simmons Hardware business, starting humbly, has been built up to its present proportions, with buildings totalling enough to swallow up the great Singer Building of New York, is the main theme of the story.

WHO KEEPS THE MACHINERY OF BUSINESS MOVING?

The salesman who is a really true success and who meets his responsibilities—and we are all salesmen, whether we are advertising men or production men or merchants — is the one who has the idea of service to the customer strongly imbued within him. He is the man who keeps the fires burning back in the factory through the orders he sends in, and he makes it possible for the men producing the product and those dependent on them to make their living. It is a real responsibility and only a real man can live up to it. The successful and respected salesman is first of all a man in every sense of the word—a man giving service to his firm, to his customers and to the community. True salesmanship is a keen desire to serve, and not a deep anxiety to put something over—vision to see the future of our business and to make our business better.

Knew How to Handle Hardware and Human Hearts

Mr. Simmons early learned to handle both hardware and human hearts. He knew how to grapple both co-workers and customers to his heart "with hooks of steel." It was he who first introduced travelling salesmen in the business and for years he employed more than any other enterprise in the country—he now has over 500. How he has taught those salesmen; how he has fathered them, enthused them, developed them, and rewarded them, reflects his character and his genius.

He was and is an Optimist—with a capital O. He continually writes and sends out letters of encouragement and every week sends out a long, personal chat to the whole force—the Simmons weekly letter was in reality the first "house magazine" in our annals. It breathes optimism; it sparkles with wit and wisdom; it provides "small talk" for salesmen to use when meeting buyers; it supplies selling arguments; it gives the men helpful advice on life and morals without ever savoring of goody-goodyism; it is never a cold-business document, but a delightful letter from home, a welcome, cheering message from a large-hearted father who is speaking to aid his sons in making their way in the world.

"How we used to look forward to that weekly letter," one of the veteran ex-salesmen told me. "It did more than Mr. Simmons can ever know to keep some of us straight when we were away from home for six months or a year at a stretch. A lot of us stopped drinking because of his advice to us. He also taught us that trickiness wouldn't last, and that honesty would win out every time.

"He stimulated us wonderfully. After the 1873 panic, trade went to pieces. We salesmen were disheartened; we felt like giving up trying to do business. I well remember how Mr. Simmons, in his letters, related to us the old story of the two frogs that fell into a basin of milk and couldn't climb out, and how one gave up trying and was drowned, but the other kept on kicking and trying everything until its efforts churned the milk into butter and enabled it to jump up without any more difficulty. That put heart into every one of us.

"Every Christmas he had us all at dinner at his home—there were nearer 50 than 500 of us then—and this also helped to bind us close to him. He never did the "boss" act; he was just one of us, our elder brother, anxious to help us to get on."

His salesmen keep Mr. Simmons informed of what is going on among customers. A death has always brought from him a letter that was not a formality, but a genuine message straight from the heart, Mr. Simmons being one of the best of letter-writers. He has always found time for acts of thoughtfulness, largely because he has been, as he

Board of Commerce Hampers Retailers

Mayor Hamilton, of Moose Jaw, Sask., Himself a Retail Merchant, in Welcoming Delegates to the Seventh Annual Convention of the Saskatchewan R.M.A., Declared That the Board of Commerce Made It Difficult for Retailers to Carry on Successfully

(By Staff Correspondent)

MOOSE JAW, June 10.—Attacks on the Board of Commerce and criticisms of Sir Henry Drayton's new taxes on sales and on luxuries. were heard at the first day's session of the convention of the Retail Merchants' Association of Saskatchewan, although they were rather mild in character and only forerunners of what was to follow.

The attendance was not very satisfactory. Many merchants who had intended to come were detained at home by the lateness of the seeding in their neighborhood.

This was the seventh annual convention of the Association, but the first at which retail merchants in various lines met in sectional groups—grocers, hardware men, farm implement dealers, etc. The opening session was attended by all. however.

Mayor Raps Board of Commerce

Mayor Hamilton is himself a retail merchant in Moose Jaw, and in welcoming the delegates, he took the opportunity of stating that he too had grievances against the Board of Commerce. It was hampering retail trade, he said. 'If the retail merchant is to succeed if he is to make any money at all out of his business, it will be necessary for him to make some concerted efforts to rid himself of some of the things that are being put in his way. It may not be the intention of the Board of Commerce to stand in the way of business, but they have left us many grievances."

President S. D. McMicken, of Moose Jaw, also took a whack at the board. He outlined the efforts of the Retail Merchants of Canada to have a representative of their association appointed to the board. "Instead," said Mr. McMicken, "the Government appointed two lawyers and a labor man. Not one of them was ever had any experience in retail merchandising. How can such men get a proper conception of the needs of business?"

Association Progressive

Substantial progress has been made by the Saskatchewan association during the past year, said Mr. McMicken. New departments had been opened, broadening the service to merchants to a very comprehensive extent. New districts had also been organized within the Province.

Mr. McMicken stated that a meeting had been held between the retail merchants and the executive of the United Grain Growers. Little had been accomplished in a commercial way, but from a social and communistic standpoint a great deal had been done to level the animosity that had hitherto existed between the merchants and the grain growers.

J. A. BANFIELD
The president of the Retail Merchants' Association of Canada, snapped at the recent convention in Moose Jaw.

Mr. McMicken also outlined the interviews betwen the executive of the Saskatchewan R. M. A. and the Provincial Cabinet in regard to such legislation as the Egg Marketing Act, the Farm Implement Act and the Automobile Repairs Act, all of which would be discussed during the convention.

Value of Organization

D. S. Saunders, district secretary at Assiniboia, which was organized during the past year, spoke on the value of organization.

"The retail merchants of the West are pioneers in more ways than one. You came out here on the Prairies with your last cent invested in your stock, and you took a long chance of ever making good. You are entitled to a great deal of consideration, but unfortunately you seldom get that consideration. You are the most important men in your communities. You pay the highest share of your local taxes, and you have a right to have your interests protected," said Mr. Saunders, stating that loyal support of the Retail Merchants' Association, support that went further than the mere payment of membership fees, would give the necessary unity and co-operation to achieve their ends.

A. E. Tutte, who is district secretary at Kerrobert, said that co-operative work in his district was working out satisfactorily. Merchants who had previously refused to discuss business with each other were beginning to realize the advantage of co-operation.

Advertising Assistance

The report of F. E. Raymond, the provincial secretary, proved very interesting as it was an outline of the association's activities during a very trying period. Some of the chief points in his report were:

"Another new feature of our work is the installation of an advertising department in the Provincial Office, under the charge of W. R. Kell, one of our old stand-bys, who is an expert in his line of work. We are prepared to furnish any merchant with any form of advertising he may require, or to lay out a plan of campaign for any merchant who may not know just what line of procedure it is best to follow."

"What has been perhaps the most momentous period in the history of the retail trade in not only this Province of Saskatchewan but of the Dominion as a whole, has passed since we last met in convention, due to the extraordinary measures adopted by the various departments of the Government, both Provincial and Dominion, having a direct and important bearing in their effect upon the retail trade in that they throw a burden of responsibility upon retail merchants which is considered by many to be unfair because of the labor and expense involved in carrying out the provisions laid down.

"As an illustration of this I might mention the order issued by the Board of Commerce regulating the profit allowed on various lines of merchandise, and the returns required to be furnished monthly by different businesses—also the Luxury Tax recently imposed by the Federal Government in connection with which retail merchants are to a large extent required to act as collectors.

Membership Shows Big Increase

"As an indication of the fact that the work of the Association is appreciated we need only mention that our membership for the year shows an increase of 205. Our actual paid-up membership as at December 31, 1918, was 1,739, and at December 31, 1919, it was 1,944.

"I am sufficiently optimistic over the

Delegates to the seventh annual convention of the Saskatchewan Retail Merchants' Association in Moose Jaw last week. Seated in front is the executive for the coming year, consisting of George Matheson of Craik, 2nd vice-president; Garfield Wray of Regina, hon. secretary; J. A. Banfield, of Winnipeg, Dominion president of the R. M. A.; S. D. McMicken, Moose Jaw, president; W. P. Ball, Assiniboia, first vice-president; S. E. Fawcett, Saskatoon, treasurer.

success of our district branch work to believe that eventually we shall have as near to 100 per cent. of the merchants as members of the Association as it is possible by any means to secure, which therefore means that this form of organization is extended over the Province our membership will be very materially increased, due to the benefits that cannot help but accrue to the members individually and collectively.

"In my opinion it was never more necessary for retail merchants to become thoroughly organized in all respects than it is to-day, and on behalf of the Association I can truly state that we are endeavoring by every means within our power to develop our organization along such lines as will enable us, not only to give more efficient service but to accomplish greater results in anything that we undertake to do. We only need, and I feel that we are justly entitled to the support of every retail merchant in the Province of Saskatchewan, and I would claim this for what is being done in Saskatchewan alone irrespective of the protection that is being afforded to merchants in this Province by the continued watchfulness of the Dominion Board at Ottawa."

Notes of the Convention

W. G. Marshall, who welcomed the delegates on behalf of the Moose Jaw Board of Trade, was guilty of a pun when he stated that the troubles facing the retail merchants of Canada to-day provided a "budget of thought" for the convention.

Mayor Hamilton, of Moose Jaw, is a retail merchant himself. He is a coal dealer and lumber merchant.

The meetings of the association were held in a church. "The better the place, the better the deed," someone remarked.

In his annual statement, Provincial Secretary Raymond reported that as a result of representations made by the association to the Saskatchewan Government, it is now necessary for individuals whose chief business is handling produce on a commission basis to take out a bond for $2,000 with the Provincial Government.

"At the City of Ottawa you have a bunch of merchants that are the backbone of this association." This was President Banfield's tribute to the Ottawa R. M. A. "You don't know what the R. M. A. is doing for you at Ottawa," added the Dominion President.

More Sask. R. M. A. Members Should Support Fire Ins. Co.

Moose Jaw, June 10.—Members of the Mutual Fire Insurance Association, which is operated in connection with the Saskatchewan R. M. A., have their risks carried at a rebate of 25 per cent. from the "board" rates. That many of them have been quick to take advantage of this rebate was indicated at the annual meeting of the fire insurance association which was held on the Wednesday afternoon of the convention. The gross amount of insurance carried has increased from $882,200 a year ago, to $1,241,869 at December 31, 1919.

J. L. S. Hutchinson, of Saskatoon, president of the company, presented the annual statement, which showed total assets of $73,342, gross receipts for the year of $43,609, and insurance written during 1919, $1,446,675.

However, not enough of the members of the association are supporting the fire insurance company, said the president, and he stated that amount of insurance in force could be nearer $3,000,000 than one and a half millions as at present. Only by getting a wider class of risks, could a sufficient surplus be built up to enable the company to increase the amount of insurance allowed under each policy.

The meeting spent two hours arguing about the abolition of the $5 admission fee which is charged to new comers into the company, and a notice of motion was finally introduced to amend the by-law so as to abolish it.

W. Morgan of Delisle and W. P. Ball of Assiniboia, the retiring directors, were re-elected, this time for three-year terms.

S. D. McMICKEN

The re-elected president of the Saskatchewan branch of the R. M. A., snapped while attending the convention in Moose Jaw.

Invasion of Western Canada by U.S. Immigrants

Winnipeg.—An invasion of Western Canada by U.S. immigrants has commenced, and the number of them who will come to Western Canada this year to look for land is estimated at approximately 40,000 by Canadian missionaries who spent the winter touring the States and boosting Canada. Land agents have arranged for special trains and are putting out tons of literature to help the immigrants.

Western Notes

Daysland, Alta.—J. S. Orr, of Whyte & Orr, Ltd., has purchased the general hardware, plumbing and electrical supply business of Jas. E. Henderson, Wetaskinwin, Alta. H. S. Balsillie, formerly traveller for Jas. H. Ashdown Co., Winnipeg, is manager.

Camrose, Alta.—C. E. Morris, of the firm of Morris & Taylor, Camrose, Alta., is visiting his relatives in Charlottetown, P. E. I.

Merchants Carrying Too Much Stock

"Not Less Than Two Billions of Surplus Stocks Are Carried by Merchants of Canada and United States," Says Canadian Banker in Addressing Saskatchewan R.M.A. Convention

(Staff Correspondence)

MOOSE JAW, June 10.—The most helpful address delivered at the convention of the Saskatchewan R. M. A., was the clear exposition by Arthur W. Maybee, local manager of the Canadian Bank of Commerce, of the relations of the banks to the country merchant. And incidentally, Mr. Maybee took the opportunity to warn off the coming downward readjustment of prices that merchants must prepare for.

"The merchants of the West are carrying too much stock," said Mr. Maybee. "A well-informed authority tells me that not less than two billions of surplus stocks are carried by the merchant of the United States and Canada, and that one-half of this has been purchased since prices reached their present high levels. On their own statements, from 25 per cent. to 50 per cent. of the total assets of the merchants in the three provinces of Alberta, Saskatchewan and Manitoba consists of stagnant merchandise and uncollectible accounts.

Have Wisely Cut Stocks

"Manufacturers and wholesalers in most cases have wisely cut their stocks to the limit at the present time. That means that the country merchant is going to be the goat when the readjustment of values comes around.

"I don't think the drop in prices will be gradual. The rise has been gradual, but in all markets the downward trend is invariably precipitate. There is no precedent for a gradual readjustment downward of prices.

"The result in the case of merchants who have stocked up with goods bought at speculative prices is hard to foretell. It is the business of merchants to buy and sell and not to speculate.

Mr. Maybee, in discussing the relations of the banks to the merchants, cleared up many misunderstandings that have existed in the past. In part he said:

"Some people believe that because the banks loan the people's money, the people should have some say in the way the money is loaned. But the banks are responsible to the people for the money that is entrusted to their care and they must exercise discretion in loaning it.

"The first fundamental of a loan from a bank is that there should be security for its repayment.

Ready to Assist Production

"The banks are always ready to consider a loan to a party who will devote the funds to increasing production. We cannot loan money against fixed assets, lands, buildings, etc., as this would be invading the field of the mortgage companies. Because of the need of increasing production the principal classes of loans in the West are to farmers. Next to the farmers comes the business of the manufacturers and the wholesalers, because the standards of doing business in these cases is usually such as to make a low rate of interest possible. The bank suffers few losses.

"Then comes the business of the retailers and it is guided largely by past experience. This experience has, I am sorry to say, been extremely unfortunate in the past. The banks have had to face serious losses, largely through inefficiency in merchandising. The average country merchant has probably not had sufficient training to conduct his business on an accurate basis and it has been very difficult to get accurate information from retailers who have asked for loans.

Too Many Uncollectible Accounts

"Country merchants have given us no end of trouble by carrying down from year to year accounts long outstanding and uncollectible, and by including in their statements of assets merchandise that is quite unsaleable. This stuff accumulates like a rolling snowball.

"The merchant too seldom depreciates his fixtures enough. That cannot go on; the merchant who does not provide enough each year for depreciation will find some day that he will have to replace his fixtures from the profits of the current year.

"The merchant must keep his accounts collected. It is not the function of the bank to loan money to the merchant for him to loan to the farmers who deal with him, and yet that is just what it does when it loans money to the retailer who buys his goods on a 30 or 60 day basis and carries his farmer customers along for six or eight months. We have bank branches to carry the farmers when they need funds . If the farmer is entitled to a reasonable amount of credit there is no reason why the merchant should carry him. He should borrow from the bank and pay his bills."

Mr. Maybee also emphasized the necessity for retail merchants carrying sufficient fire insurance on their buildings and stock.

Convention of Winchester Clubs

The first annual convention of the National Association of Winchester Clubs is to be held in New Haven, Conn., June 28 to July 1. Over 1,500 active hardware dealers will be in attendance.

LEVY TAXES ON THE MANUFACTURERS INSTEAD OF ON THE RETAILERS

MOOSE JAW, June 10.—The Saskatchewan retail merchants at their convention here stood solid behind the demand of the Dominion Executive of the Retail Merchants' Association, in demanding that the new taxes should be levied at the source, that is on the manufacturers instead of on the retailers.

President J. A. Banfield led the onslaught on the budget, and in a lengthy address at the Wednesday afternoon session poured hot shot into the taxation proposals. "The plutocratic manufacturer," he charged, "whom I consider the profiteer of the age, gets off scot free, while the merchants turn tax collectors for the Government."

Mr. Banfield stated that the merchants were partially responsible for the taxes with which they had been burdened. He stated that when the Government asked for his opinion on the feasibility of a sales tax, he expressed himself as in favor of it. His opinion was concurred in by the Dominion Executive of the R.M.A., but when the suggestion was made public that there should be a tax on sales, retail merchants from all over the country who were not fully cognizant of the proposals of the executive wired to Ottawa protesting against the idea and the result was that the straight sales tax to apply to manufacturers, wholesalers and everybody was defeated and the present taxes submitted. "You got the luxury tax and now you are squealing," said Mr. Banfield.

"Now what we have to do is to frame a form of taxation that will be satisfactory all around and that is why we are asking that the taxes should be levied at the source, where collection will be much more economical."

"The present tax will have a tendency to make criminals out of merchants. When they have to make an invoice in quadruplicate for every ten cent sale of ribbon there is bound to be a great temptation to let things slide. It will take an army of inspectors to collect the taxes."

Five Main Essentials that Constitute a Legal Contract

N. R. Craig, Barrister, of Moose Jaw, Reveals Some Interesting Points in a Talk to Saskatchewan R.M.A. on the Elementary Features of the Law of Contracts

By Staff Correspondent

MOOSE JAW, June 10.—To the retailers present at the Saskatchewan convention one of the most valuable features of the program was an exposition of the elementary features of the law of contracts by N. R. Craig, a local barrister. Mr. Craig told of many little-known statutes that trip up the unwary merchant.

"There are five main essentials of a legal and binding contract," said Mr. Craig. "First and most important is that there should be two parties to the deal. Secondly, there must be what is known in law as 'offer' and 'acceptance' before the contract becomes a contract. Thus a merchant may offer goods in a letter for sale at a certain price. The offer becomes a contract binding on both parties when it is accepted in a letter by the second party, in fact, from the moment the letter of acceptance is placed in the post box. It is then irrevocable by any one of the parties, even should the party who makes the offer withdraw before receiving the acceptance which the other man may have already posted.

"A third essential of a perfect contract is the capacity of the parties to enter into it. An ordinary contract between a minor and an adult is illegal, although there are cases where it is binding on the adult and not on the minor. On the other hand, a contract by a minor to purchase necessary articles is binding upon him. A contract to purchase clothes, food, or such articles is binding, and in the case of an infant of affluence, a contract to purchase such an article as an expensive diamond ring would be binding, as the courts would deem it a fairly necessary article of adornment for a minor with the wherewithal to foot the bill.

Legality of Object

"A fourth consideration is the legality of object. Thus a contract to perform an illegal act would not or could not be binding under the law.

"There must also be some consideration mentioned in a contract. No contract is binding unless some consideration is mentioned, be it only a dollar, or an unimportant act. Moreover, in the case of a promissory note, the holder may not allow any extension of the time for payment or any other concession unless a consideration passes, or is alleged to pass on the note."

An Interesting Case

In this connection Mr. Craig mentioned an interesting case. A promissory note fell due. The payee endorsed on the back of the note, "This note is extended until November 15," and signed his name. Later he crossed out the word November, substituted the word September, and negotiated the instrument. When the alteration was discovered he was haled before the local magistrate and convicted of a forgery. The appeal courts, however, reversed the decision as they held that no material change had been made in the note, inasmuch as the extension of the time was not effective, owing to the lack of a consideration being mentioned.

Mr. Craig gave some hints about contracts that are of interest to retailers. All contracts should be in writing, whether the law requires it or not. Every contract involving the sale of land or goods to the value of $40 or over is required by law to be in writing. All contracts, too, should have a seal. The effect of the seal is not easily understood, but it has one important effect of extending the time under the statute of limitations from six to twelve years.

For Breach of Contract

A warning was also given concerning the proper method to collect a remedy for breach of contract. Should a party suffer loss by the failure of another party to deliver goods contracted for the party of the first part cannot collect damages for his loss unless he has gone into the open market and purchased the goods which the second party refused to deliver. And then he can only collect the difference between the contract price and the price he was forced to pay.

Mr. Craig also discussed the law of interest, and the most important observation he made was that merchants should state upon their billheads the rate of interest they will charge on over-due accounts, and should state it in per cent. per annum, as interest rates could not legally be stated in any other way. They should also give notice in writing concerning over-due accounts, and state the date from which interest is payable and the rate per cent. per annum of interest that will be charged.

SHOULD BE A REST ROOM IN EVERY STORE

Moose Jaw, June 10.—In his address to the retail merchants, J. A. Banfield, Dominion president of the R. M. A., again suggested that every merchant should have a rest room in his store.

He described the store of a retailer in a small town in Manitoba, where there is a small rest room, fitted up with a rug, a writing desk and a few comfortable chairs. There is never a day passes in the store when some committee of women in connection with local churches or other organizations do not meet in the rest room.

"Can you beat that for advertising?" asked Mr. Banfield. "Try it."

NEXT CONVENTION WILL BE IN SASKATOON

Next year's convention of the Saskatchewan Retail Merchants' Association will meet in Saskatoon. That was decided upon at the Thursday afternoon session. The dates of next year's convention will be decided by the executive, but they will be approximately the same as the dates of the 1920 meeting.

Few Changes in the Executive of Sask. R. M. A.

MOOSE JAW, June 10.—Only two changes were made in the personnel of the executive of the Saskatchewan R. M. A. in their elections. The officers for the ensuing year are as follows:

President—S. D. McMicken, Moose Jaw; first vice-president—W. P. Ball, Assiniboia; second vice-president—George Matheson, Craik; honorary secretary—Garfield Wray, Regina; treasurer—S. E. Fawcett, Saskatoon.

The A. J. Massie Agency Ltd., are vacating their old quarters and m(oving into new quarters in the Chamber of Commerce Building, Princess Street, Winnipeg.

Main Street, looking north in Moose Jaw, Sask.

Object to Sale of Oil and Gasoline to Farmers at Retailers' Prices

Hardware Merchants in Saskatchewan Convention Will Ask Oil Companies to Make Higher Charge to Other Buyers—Ask for Repeal of 1 Per Cent. Sales Tax on Oil in Barrels, as Containers Are Only Loaned

MOOSE JAW, Sask.—At a gathering of hardware merchants in connection with the Saskatchewan convention, G. F. Morrison, of the Moose Jaw Hardware Company acted as chairman.

Objection was taken by many of the retail hardware men to the practice of the oil companies in selling coal oil and gasoline to farmers and others who purchased in quantities of one barrel and upwards, at the same price that is charged legitimate retailers.

It was decided to ask the oil companies to make the selling price per gallon of oil to large consumers, three cents higher than the price to the trade.

The luxury taxes and the sales tax also came in for considerable criticism and some changes were suggested. One resolution asked that the 1% sales tax on oil barrels should be repealed. Oil barrels were in reality loaned, rather than sold, it was contended. A second resolution endorsed the action of the Dominion board of the R. M. A. in regard to the luxury tax.

A ruling will be asked from the Government on the ten per cent. luxury tax on "plated ware otherwise than provided for by other portions of this act, and adopted for household use." Some of the delegates pointed out that this would have the effect of making the tax apply to even the cheapest nickel-plated teakettles, etc., which could not equitably be classed as luxuries.

No action was taken on the matter of the reports required by the Board of Commerce of all merchants selling building material. The report was ordered tabled, and the action of the section in ignoring the Board's demands can be construed as lending its support to those merchants who have refused to make out reports.

A. E. TUTTE

Secretary of the newly organized Kerrobert district branch of the Saskatchewan R. M. A., photographed while attending the recent convention.

Electrical Convention in Vancouver

Vancouver, B.C.—A very successful convention of electrical dealers was concluded, at which every province in the Dominion was represented. A substantial representation from the United States was also on hand. The programme embraced a comprehensive list of subjects interesting to the general public as well as to the electrical experts in attendance. The convention was called under the auspices of the Vancouver Association of Electrical Contractors and Dealers, which is the only electrical organization in Western Canada. Addresses were given by Wm. McNeill, assistant general manager of the Western Power Company of Canada; O. H. Caldwell, editor of "Electrical Merchandising"; F. T. Cope; H. B. Kirkland, general manager of the American Conduit Co.; M Pike, general sales manager of the Northern Electric Co., Montreal; George Kidd, general manager of the B. C. Electric Railway Company; S. A. Chase, of the Westinghouse Electric & Manufacturing Co.

J. H. Ashdown Retires From Water District Board

WINNIPEG.—The resignation of acting chairman J. H. Ashdown, of the Greater Winnipeg Water District, has been accepted. Mr. Ashdown has been one of the principal figures in the work of the district since its inception in 1906. Mayor Gray expressed highest appreciation of Mr. Ashdown's work.

Winnipeg.—Wood Vallance are entering a team in the U. C. T. competition to be held at Winnipeg Beach on July 10, and expect to bring back the cup and prizes.

Banquet Closes Successful Sask. R.M.A. Convention

MOOSE JAW, June 10.—The banquet that closed the convention was the bright spot in a three days' meeting that consisted of hard work on the part of everybody present. A notable address by Premier W. M. Martin, of Saskatchewan, on the resources of his province, was the important event of the evening.

Premier Martin incidentally spoke of the optimism that is felt among Western merchants towards the crop situation. He had travelled during the past month through all the portions of the Province where there were near crop failures last year and he found everybody hopeful as to the future. Much depended on a good crop, he said, as only that would put business back to where it should be and place the farmers on their feet.

The Premier paid a tribute to the retail merchants, who had never asked for class legislation. Every time the R. M. A. had approached him in regard to legislation their proposals had been such as to merit the best consideration.

President Banfield, of the R. M. A., advised merchants to support the press at all time. "The community with an enterprising press is a community that can make a quagmire into a bed of roses. The press accelerates business. Support your local papers," he said.

The banquet was tendered by the Moose Jaw local branch of the R. M. A., of which R. B. Holden is the secretary. R. H. Clarke, local president, acted as chairman, and at the head table sat George Maybee, Mayor S. A. Hamilton, City Commissioner Mackie, and others.

Marshall-Wells Co. to Build in Moose Jaw

WINNIPEG.—Negotiations are said to have been completed whereby the Marshall-Wells Co., Ltd., of Duluth, Winnipeg and Edmonton, will establish a warehouse in Moose Jaw.

All negotiations have been carried on by the Moose Jaw Board of Trade, through Thomas L. Waldron, vice-president and managing director of the company. The company has purchased from the city lots 23 to 39 inclusive, Block 128, Plan Old 96, a property adjoining the Robin Hood Mills, on Manitoba Street West, and just to the east of the mill site.

Tenders for the erection of the warehouse are expected to be called for at an early date. At the present time no announcement is being made of the amount to be expended upon the initial unit, which will be constructed in time to take care of the fall business. It is anticipated that additions will be made as the business grows.

C.M.A. Discuss Important Trade Matters

Canadian Manufacturers' Association Convention at Vancouver Recommends Relief Measure for Firms Which Lost Money During War—Tariff Matters Discussed—Oppose Metric System—To Open Up Trade With the Orient

VANCOUVER, B.C. — The active work of the Canadian Manufacturers' Association convention has been brought to a close, though some Eastern manufacturers are still at the coast looking over the industrial situation. A feature of the closing business of the convention was a request directed to the Government for a measure of relief in the new excise taxes for those concerns which suffered losses during the period of the war and now are just commencing to reap profits from peacetime production. It is suggested in the measure that the Government deduct the losses of the previous years from the profits now obtained and tax the remainder.

J. R. Shaw said that during the war there were two classes of industries: Those which received war contracts had made large profits, and it was only right that they should be taxed on them. The other class of manufacturer found his production decreased during those trying times and the balance was on the debit side. It was for these concerns that he was pleading. There had been no dividends on the investments in these concerns and he thought it was only equitable that in the collection of the war profits tax this fact should be taken into consideration and deduction be made in addition to the ten per cent. exemption allowed on the capitalization.

Discussing the new budget taxes and stressing the need of more efficient means of Government collection, F. W. Stewart, Montreal, declared there was general antipathy to the payment of taxes when earmarked as such. He had discussed the matter with merchants all the way from Toronto to the coast, and found that taxes had resulted in a serious falling off in business. While it was felt that conditions would adjust themselves in time, he feared that before this many business failures would result.

Tariff matters occupied the attention of the convention for the greater portion of the morning. The appointment of a permanent tariff board was suggested to the Dominion Government by a unanimous vote.

An Empire Tariff Asked

There was no opposition voiced to a carefully-prepared resolution asking the Government to use its influence to hasten the adoption throughout the Empire corresponding to those now provided for in the customs tariff of Canada. This resolution was strongly endorsed by the manufacturers of British Columbia, who have been looking forward to a convention between Canada and Australia which will develop the already large trade between the two countries.

Oppose Metric System

Other resolutions adopted opposed any attempt to substitute metric system weights and measures for the present system in Canada and advised that proper displays of Canadian manufactured goods be placed in the countries to which trade commissioners are accredited.

The signing of a new trade treaty between Canada and France was urged, improved cable services were asked and a resolution called for the fixing of a label on all goods to show the country of origin.

In his valedictory, T. P. Howard, retiring president, predicted great advancement for the association and for industry in Canada during the next year, and expressed confidence that the association would have no difficulty in raising the fund which it was collecting for the purpose of amplifying its work.

"We in Canada must have trade with other countries," said the new president, J. S. McKinnon. "We must build up our traffic with the Orient, with Australia and New Zealand, and with South America. To do this we must have an enlarged and sufficient merchant marine to carry our goods, and it is only right that ships for the Pacific should be built here in British Columbia. New trade routes must be established and the seaports of the country must be developed. This is particularly true of the port of Vancouver, which seems to be the natural port of Western Canada. It will have extra attention from the association this year.

"The natural resources of the country must be developed to the very highest degree. All that Canada produces from her wealth of natural resources should be used in the manufacture of Canadian goods in Canada, wherever possible. We desire the finished articles to be made in this country, and do not wish to see our raw materials go elsewhere to be returned as manufactured articles. This would give more employment to Canadians and future citizens, and aid in building up the Dominion.

Aid All Sections

"This association is in no way sectional, and it desires to aid in the industrial and commercial growth of every portion of the country. We wish to have more attention paid to scientific research and technical education. The result of this will mean an improvement in the quality of 'made-in-Canada' goods."

Continuing, the speaker said that Canadian manufacturers stood ready and willing to discuss with any class of the community any great national problem for the betterment of Canada. He suggested that efforts might be made to initiate the study of Oriental languages in order that the Dominion could take advantage of opportunities offered for trade with peoples across the Pacific.

Resolutions Passed by Sask. R. M. A.

Moose Jaw, June 10.—A number of amendments to the provincial legislation affecting hawkers, peddlers and other agents were asked in resolutions passed by the Saskatchewan R.M.A. convention here. One resolution asked that the Hawkers and Peddlers Act be made applicable to agents who are residents of towns in which they operate. At present residents do not require to take out licenses.

Another resolution asked that the license fees should be made to cover one line of goods only, with additional lines carried by a single peddler to be charged for on a sliding scale.

Other resolutions passed were:

To make it compulsory for village councils to enact an early closing by-law when a properly signed petition is presented.

To have the Bulk Sales Act amended to include farmers.

Asking the Western Board to organize farm implement retailers so as to enable them to present a solid front in demanding wider margins and better contracts from the wholesalers and manufacturers.

Asking for the amendment of the Saskatchewan Auto Repairs Act, which was contended to be unworkable.

To increase the provincial membership fee of the R.M.A. to $20 from $15 as at present.

Western Notes

Winnipeg.—Delegates to the National Electric Light Association convention, held recently in California, were entertained while in the city.

Winnipeg.—G. Draper, Western manager of the Solex Lamp Co., is on a trip to Calgary.

Winnipeg.—W. A. Watt, cutlery department manager of Wood Vallance, Ltd., recently underwent an operation, from which he has completely recovered.

Winnipeg.—Wood Vallance, Ltd., Winnipeg, have a baseball team in B division of the Commercial League this season, and a splendid schedule of games has been arranged in competition with teams representing other large Winnipeg firms. In the first scheduled game, Wood Vallance team defeated Fruit Exchange by the score of 15 to 3.

EVENTS IN THE TRADE

Business Changes

Toronto.—C. F. Moorehouse, hardware merchant, is retiring from business.

Incorporations

Oshawa, Ont.—Hugh Park Foundry Co., Ltd., has been incorporated with capital of $200,000 to carry on business as metal founders.

H. N. Fox Co., Ltd., has been incorporated with head office in Leamington, Ont., to deal in hardware, electrical and automobile supplies.

Traction Rims, Ltd., has been incorporated with head office in Toronto, to manufacture automobile accessories.

Convention of Maritime Wholesale Hardware Ass'n

The regular annual meeting of the Maritime Wholesale Hardware Association will be held at the Pines, Digby, N.S., on Tuesday, July 6.

Hardware Store Escaped Robbery

MONTREAL.—The store of the Durand Hardware Co., 370 St. James Street, Montreal, suffered the loss of a large plate glass window last week. A would-be robber picked a large stone up from the street and was seen, by a policeman, to hurl the same through the glass. The policeman gave chase, but was unsuccessful in landing his man.

Will Help Citizens to Instal

Marmora.—The Town Council has decided to assist citizens desiring to make a contract for electricity for light or power purposes by doing the wiring and allowing them until January, 1921, to pay for it, without interest. This is done in order to give all who wish to do so an opportunity to install light and power at once.

Staff Changes in Yale & Towne Manufacturing Co.

John B. Milliken, formerly treasurer and director of the Yale & Towne Mfg. Co., Stamford, Conn., has resigned to enter other fields. Willard L. Case was elected at a recent meeting to the position succeeding Mr. Milliken. Mr. Case has had long experience with the problems of organized industry.

Edward C. Waldvogel, who has been with the company for fifteen years and who has occupied the position of general manager for four years, has been elected a director of the company.

Gurney Plant Closing Down

Toronto. — The King Street West branch of the Gurney Foundry Company is being closed down and the site is offered for sale. The work carried on at this plant will be divided between the West Toronto branch and another plant which is to be opened in the East. The West Toronto branch will be added to, and it is understood that the Gurney interests have bought out the Canada Stove Company at St. Lambert, just outside the city of Montreal, where they will open a new plant.

C. J. BRITTAIN

Formerly managing director of the Winnipeg, Calgary and Saskatoon branches of the Canadian Fairbanks-Morse Co., Ltd., who has been appointed vice-president and general manager of the organization with headquarters in Montreal. Mr. Brittain succeeds C. Graham Drinkwater in this position.

Montreal Building Makes Progress

The present year promises to be the best building year in Montreal since the record of construction period of 1913. For the five months ending in May last the value of work done was greater by $4,000,000 than in the corresponding period of 1919. New dwellings are being erected in many quarters and old ones are turned into flats and apartments, generally of a very small size. The dwelling scarcity is in the way of disappearing. As a matter of fact, no one is without a roof over his head and the "To let" sign is again in evidence in the centre of the city.

Vice-President Canadian Steel Foundries Dead

MONTREAL.—K. W. Blackwell, vice-president the Canadian Steel Foundries, Limited, died at his home in Montreal last week, after a brief illness. The late Mr. Blackwell was connected with Mechanical Engineering for a considerable part of his life. In the year 1882, he entered the manufacturing business under the name of K. W. Blackwell, manufacturer of railway car springs. From this company the Montreal Steel Works, Limited, was subsequently formed, Mr. Blackwell becoming its president and managing director. This company was subsequently absorbed by the Canadian Car and Foundry Company under the name of Canadian Steel Foundries, Limited. In addition to being vice-president of the above company, the late Mr. Blackwell was vice-president of the Merchants Bank of Canada, and was associated in a prominent way with several company directorates.

Steel Merger Strikes Snag

Rumors of internal strife in the Board of the Dominion Steel Corporation as to the wisdom of entering the merger now being organized as the British Empire Steel Corporation, at least until full information is given, is confirmed by the issue of a strong protest by six influential directors of the former. The document is signed by George Caverhill, Hon. R. Dandurand, Sir William Mackenzie, William McMaster, J. H. Plummer and E. R. Wood. It is charged in the letter that the Dominion Steel Corporation receives an unfair deal under the proposal, that $38,000,000 of common stock in the merger is to be sold to parties unnamed for $30 per share, that $25,000,000 which it is hoped will be received for preferred stock is actually already counted in the cash in the balance sheet just issued, and that the Dominion Steel Board has failed to secure essential information regarding the smaller companies.

Yale & Towne Mfg. Co. Buy Electric Truck Co.

The Yale & Towne Manufacturing Co., Stamford, Conn., have purchased the Industrial Electric Truck Division of the C. W. Hunt Company of Staten Island. Hunt trucks are used in railroad terminals, steamship piers, in warehouses and manufacturing plants, and this branch of business will be combined with the hoist department of the company.

T. P. HOWARD
Retiring president of the Canadian Manufacturers' Association.

Death of Pioneer Hardware Merchant

Brandon, Man.—The death is announced of A. B. Fleming, one of the city's pioneer citizens. The deceased was forty-nine years of age and came here with his father, the late Dr. Alexander Fleming, from New Brunswick in 1880. He was in the hardware business here for a number of years, later moving to Hamiota, where he conducted a store at that place. He returned to Brandon about twelve years ago, and had since been engaged in a wholesale coal business. He was very widely known, and his sudden death was a great shock to his multitude of friends.

New Factory for the McCaskey Systems Ltd.

McCaskey Systems, Limited, manufacturers of counter check books and credit register systems, have recently purchased a munition plant at Galt, Ont., where their head office and factory will be located after the middle of July.

The new factory in Galt is most modern in every respect and several new high-speed machines are being added which will practically double the present equipment of their plant.

Staff Changes in Canadian Fairbanks-Morse Co.

The following changes in the organization of the Canadian Fairbanks-Morse have been announced: Mr. C. J. Brittain, former manager of the Winnipeg branch, has been appointed vice-president and general sales manager, with headquarters in Montreal, succeeding C. G. Drinkwater, who has been vice-president in charge of sales for many years, and who has resigned to join the banking firm of Alfred and Co., Ltd. Mr. Brittain was one of the first salesmen engaged by the Canadian Fairbanks-Morse Company.

Electrical Men Met

Montreal. — A convention of the Canadian Electrical Association was held on Wednesday and Thursday of this week at the Ritz-Carlton Hotel, Montreal. Delegates attended from Hamilton, Quebec, Sherbrooke, and Toronto.

Say Hardware Manufacturers in Combine

A report credited to the Board of Commerce at Ottawa is to the effect that there exist combines and price-fixing arrangements upon manufacturers of the following lines: Wrapping paper, broom handles, wire fence, cloth, malleable metals, paper bags, toilet paper, eavetroughs and conductor pipe, shipping tags, sheet metal, automobile equipment, shovels, washing machines, wallpaper, lead traps, wringers, cooperage, wrought pipe, scales, steel sash, wood screws, tacks, wire solder and cane lead, general hardware.

STARTED REMARKABLE CAREER

Continued from page 81

says, "an early riser," a pointer that he would pass on with cordial endorsement to all who aspire to success in any field.

Profit sharing was introduced, too, by Mr. Simmons long before it was thought of by others. Every salesman brought his record to him at the end of each year and a generous percentage of the total sales was awarded him. Every salesman's record is carefully gone over at the end of the year with a view to finding in his results something to warrant extra compensation, "velvet," as the salesmen call it. "My velvet was nearly as much as my salary for the first year on the road," one old employee confided to me. "I was flabbergasted—but more than ever determined to deserve the Chief's generosity."

To facilitate his profit-sharing system, Mr. Simmons incorporated his business in 1874. It was *the first mercantile firm in the United States to incorporate.* Employees were given opportunity to acquire stock and this proved extraordinarily profitable. The original capital of $200,000 was increased to $4,500,000, and later to $6,000,000, wholly from earnings—a record which even the strongest bank in the country might envy.

Mr. Simmons' solicitude for the welfare of his men and his customers also led him to become a pioneer in another direction. He was the first to develop the system of having travelling salesmen live in their territory, settle there and become part of the community, instead of spending year after year as nomads. Merchants had more confidence in dealing with a fellow-citizen than with a salesmen whom they could not know well and who was there to-day and gone to-morrow.

His First Hardware Catalogue

Thirty-seven years ago Mr. Simmons had the courage to spend $30,000 in bringing out the first complete hardware catalogue ever compiled, and as a result added $1,000,000 to his sales forthwith. Now the house issues annually a catalogue of 2,500 pages, 22,000 illustrations, and 70,000 items, with minute specifications, descriptions, and prices, so that every retailer in the land can provide his patrons with any article from the whole line on short notice.

Promptness is such a fetish with Mr. Simmons that he wants all orders billed and shipped the day they are received, and to that end every available modern contrivance and device is utilized, from machines for opening and sealing envelopes down to mechanical conveyers for transferring the cases of merchandise from the packing room to the railroad freight station within the building. Indeed, it was primarily to insure expeditious deliveries, and thus enable their customers to compete successfully with the mail order houses, that the Simmons Hardware Company established complete wholesale houses, similar to that in St. Louis, in such distributing centres as Philadelphia, Minneapolis, Sioux City, Toledo, and Wichita.

The registered motto, as most of us know is: "The Recollection of Quality Remains Long After the Price is Forgotten." It took courage and unflagging determination to introduce such a high-grade and necessarily higher-priced line of goods, but Mr. Simmons won out. "Wisdom is justified of her children," as he sometimes remarks. He decided to build on a rock, not on sand.

"Business is the execution of ideas."

"Promptness is the essence of all good business."

"The difference between failure and success is doing a thing nearly right and doing it exactly right."

"Concentration means strength. Scatteration means weakness. Having chosen one line of work or business, stick to it."

"Spend fifteen minutes every night recounting your day's doings and planning to do better next morning."

"Always put yourself in your customer's place."

"An ounce of industry is worth a pound of brains."

"Character is the decisive force in business."

"My favorite pleasure has been to take hold of a poor salesman and make him a 'Cracker-Jack,' a 'Star.'"

"I am a great believer in the business philosophy of encouragement."

'Settle claims promptly. The merchant who does not permit himself to be imposed upon occasionally will never get far."

"If any of your men, or any customer, gets into a hole, always leave him a loop-hole to get out easily."

"Quality of goods, confidence in your business and in yourself, ability and readiness to anticipate conditions and to adapt yourself to them—these are some of the essentials of business success."

J. S. McKINNON
Elected president of the Canadian Manufacturers' Association at the recent convention in Vancouver.

Newsy Notes From Here and There

Toronto.—J. D. Rowland, hardware merchant of Mount Albert, Ont., was a visitor to Toronto this week.

* * *

Toronto.—C. C. Speight, hardware merchant of Acton, Ontario, made a business trip to Toronto this week.

* * *

Quebec.—J. A. E. Bureau, of Montreal, called this week on the Quebec trade in the interests of Richardson and Bureau.

* * *

Halifax, N.S.—W. A. Black, pioneer hardware merchant of this city, has donated $60,000 to the Dalhousie Endowment Fund.

* * *

Montreal.—John Irwin, vice-president and managing director of McArthur Irwin Limited, returned last week from an extensive trip to England and the Continent.

* * *

St. John, N.B.—Once more there is a plentiful supply of plate glass in the city. For nearly two months only one firm had any in stock, and only a limited amount. Merchants from other towns were having to fill orders for local work.

* * *

Montreal.—C. P. Yeo has joined the selling forces of the Canada Paint Company, Ltd., and will cover the Maritime Provinces and Prince Edward Island. John Richardson, buyer for Caverhill, Learmont and Company, returned this week from his vacation.

* * *

Montreal.—Archie MacFarlane, C. E. Adcock, David Brewer, William Hannah, P. D. Martin and George Livingstone, all of A. MacFarlane and Company, Montreal, will attend a conference of Stanley Rule and Level Company and Stanley Works, which is being held at New Britain on June 27 and 28.

* * *

St. John, N.B.—A large quantity of paint is being sold. All the painters have more work on their hands than they can handle. The yacht and motor boat owners have been very active with the paint brush this year. The number of newly painted automobiles is also larger this year than in former years.

* * *

Montreal.—James Fletcher, a retired member of the firm of general merchants of Demers & Fletcher, late of Rigaud, died at Longueuil, Que., on Tuesday last. George Payne, representing H. A. Reid & Company, was in Montreal this week. Arthur E. Smith, representing H. L. Jugg Company, New York, was in Montreal this week. Samuel J. Manheimer, of Kaufmann Bros. & Bondy, New York, called on the Montreal trade this week.

* * *

St. John, N.B.—Daylight saving is the order of the day in St. John, N.B. The Retail Merchants' Association and the Clerks' Association both worked hard to have the new time put into effect, with the result that the city council decided to place all city departments on daylight time and also requested the citizens to follow suit. For the months of June, July, August and September, all the large stores will close at one o'clock on Saturdays, remaining open on Friday evenings.

Retail Merchants Ass'n Excursion and Convention

The fifteenth annual convention of the Dominion Board of the Retail Merchants' Association of Canada will be held in Vancouver, B.C., on Thursday and Friday, July 22 and 23, 1920. This will be one of the most important conventions for retail merchants that has ever been held in Canada, and every province will be represented.

In order to unite business with pleasure, the executive officers have arranged for an excursion over the Canadian Pacific Railway to run from Halifax to Vancouver, taking on at the various points those who wish to attend.

The excursion train will commence at Halifax, leaving on the following days: Halifax, July 12; St. John, July 12; Quebec, July 13; Montreal, July 13; Ottawa, July 13; Toronto, July 14; Port McNicoll, July 14, and will pass through all the leading cities and towns.

From Port McNicoll they take the Canadian Pacific steamers over the Great Lakes to Fort William; from there to Winnipeg across the prairies, through the magnificent Rockies, stopping at Banff and Lake Louise, and then on to Vancouver.

In returning, the excurtionists are allowed the option of coming back via the Okanagan Valley, Sicamous to Penticton, down through the boundary country of Nelson, through the Crow's Nest Pass from Kootenay Landing, to Medicine Hat and then back again East.

The excursion is open for any members who wish to invite their friends or to take any member of their family. Full particulars as to cost and other particulars can be secured by applying to the secretary of any provincial board, or to Mr. E. M. Trowern, secretary of the Dominion Executive Council, Room 49, La Banque Nationale Building, Ottawa.

Amalgamation Forms British Glues & Chemicals Ltd.

British Glues and Chemicals Ltd. has been incorporated in London, England, to amalgamate te following firms: The Grove Chemical Co., Charles Massey & Son, Meggitts (1917), Quibell Bros., J. & T. Walker (1917), The Weaver Refining Co., Williamson & Corder.

Western Travellers Will Meet at Calgary

Grand Council of Manitoba, Saskatchewan and Alberta Recently Met in Medicine Hat

REGINA, June 11.—The Grand Council of Manitoba, Saskatchewan and Alberta, of the United Commercial Travellers of America met at Medicine Hat June 4 and 5, and selected Calgary as the next place of meeting on June 3 and 4, 1921.

The following officers were elected:—Grand Councillor, C. G. Davidson, Edmonton; Junior Grand Councillor, W. Heislop, Lethbridge; Past Grand Councillor, H. F. Moulten, Winnipeg; Grand Secretary, W. H. McGibbon, Regina; Grand Treasurer, S. L. McCracken, Calgary; Grand Conductor, Thomas Fox, Saskatoon; Grand Page, W. L. Lewis, Winnipeg; Grand Sentinel, J. C. Dunlop, Moose Jaw; Grand executive committee for two years, T. D. M. Osborne, Saskatoon; W. E. Clark, Medicine Hat; Grand Chaplain, J. W. Lightbody, Yorkton; delegates to supreme council, H. A. Knight, Regina; R. M. McGowan, Winnipeg; C. G. Davidson, Edmonton, S. S. Savage, Edmonton. A resolution was passed endorsing the propaganda of the motor league of Alberta and promising assistance. It was also decided that the question of hotel accommodation in the three Prairie Provinces be taken up with the Provincial Governments.

Makers of Casters, Furniture Handles, Woodenware

Canadian Export & Import Trading Co., Halifax, N.S.—Please advise us as to names of manufacturers of casters, furniture handles, and household woodenware, etc.

Casters can be procured from the following: Faultless Caster Co., Evansville, Iud.; National Hardware Co., Limited, Orillia, Ont.; Denton & Co., Woodstock, Ont.; W. J. Hinphy Co., Montreal, Que.

Furniture handles and household woodenware can be procured from the following: Canada Steel Goods Co, Limited, Hamilton; Canada Foundries and Forgings, Ltd., Brockville, Ont.; Otterville Mfg. Co., Otterville, Ont.; The Thomas Davidson Mfg. Co., Limited, Guelph, Ont.; Wm. Cane & Sons, Co., Ltd., Newmarket, Ont.; Stratford Brass Mfg. Co., Stratford, Ont; Taylor Forbes Co., Gueiph, Ont.; Peterboro Lock Mfg. Co., Peterboro, Ont.; Belleville Hardware & Lock Mfg. Co., Belleville, Ont.; Canada Wood Specialties Co., Limited, Orillia, Ont.; E. B. Eddy Co., Limited, Hull, Que.; Meakins & Sons, Ltd., Hamilton, Ont.; J. S. Neill & Sons, Ltd., Fredericton, N.B.—Ed.

Hardware Letter Box

Almond Chuck

Hardware Company of Toronto, Ltd., Toronto, kindly advise us the address of the manufacturers of the Almond Chuck.

Their address is T. R. Almond Mfg. Co., Ashburnham, Mass.—Ed.

Babcock Filter Co.?

Sommerville Hardware Co., Ltd., Edmonton, Alta.—Kindly advise us as to address of the Babcock Filter Company of Toronto.

This Company has been out of business for some years.—Ed.

Quick Metal Wicks

Henry Zettel, Esq., Wellesley, Ont.—Kindly advise us as to where we can procure wicks for Quick Meal coal oil cook stoves.

These stoves are manufactured by the American Stove Company, St. Louis, Mo., and the Canadian agents are James Stewart Mfg. Company, Woodstock, Ont. —Ed.

Hardware Cases and Shelf Boxes

Mr. Geo. D. Dahmer, Conestogo, Ont. —Please advise us as to names of manufacturers of hardware cases and shelf boxes.

These may be procured from the following: Cameron & Company, Queen Street E., Toronto, Ont.; T. L. Arnett, Souris, Man.; Duluth Show Case Company, Duluth, Minn.—Ed.

Old Boilers

Norman MacLean, Esq., Govan, Sask. —Please advise us as to names of purchasers of old steam boilers.

These may be procured from the following: Frankel Brothers, Toronto; Calgary Scrap Iron & Metal Co., Calgary, Alta.; Western Metal & Bottle Co., Edmonton, Alta.; Galt Rag and Metal Co., Galt, Ont.; The Hamilton Metal Smelting Works, Hamilton, Ont.; E. Ebushevsky & Son, Toronto; Winnipeg Metal Co., Ltd., Winnipeg, Man.; Manitoba Junk Co., Winnipeg, Man.; Dominion Metal Exporting Co., Winnipeg, Man.—Ed.

Building Paper

Kent, Garvin & Company, Hamilton, Ont.—Please advise us as to names of manufacturers of building paper.

The following are manufacturers: Barrett Company, Limited, St. Hubert Street, Montreal; Alex. McArthur & Co., Limited, McGill Street, Montreal; Merrick Anderson Co., Ltd., Winnipeg, Man.; D. J. Ladd & Company, Winnipeg, Man.; Brantford Roofing Co., Ltd., Brantford, Ont.; Standard Paint Co. of Canada, Montreal, Que.; Bird & Son, Hamilton, Ont.; Canadian Roofing Mfg. Co., Ltd., Windsor, Ont.; International Chemical Co., Lombard Street, Toronto; Mica Insulator Co., Victoriaville, Que.; Beveridge Paper Co., Ltd., Montreal.—Ed.

Brass Name Plates

Peart Bros. Hardware Co., Ltd., Regina, Sask.—Please forward us names of makers of brass name plates for doors.

Following are manufacturers: Canada Steel Goods Co., Ltd., Hamilton, Ont.; Hamilton Stamp and Stencil Works, Hamilton, Ont.; Hamilton Stove & Heater Co., Ltd., Hamilton, Ont.; Stratford Brass Co., Stratford, Ont.; Canadian Yale & Towne Ltd., St. Catharines, Ont.; Jas. Morrison Brass Mfg. Co., Ltd., Toronto; The Belleville Hardware and Lock Mfg. Co., Belleville, Ont.; The Peterboro Lock Mfg. Co., Peterboro, Ont.; Taylor Forbes & Co., Guelph, Ont.; Patterson & Heward, 319 King Street W., Toronto; Toronto Stamp & Stencil Works, Church Street, Toronto; National Hardware Co., Ltd., Orillia, Ont.—Ed.

Catalogues and Booklets

Brisco's Wholesale Accessories Ltd.

Brisco's Wholesale Accessories, Limited, Chatham, Ont., have issued a very attractive wholesale accessory catalogue containing 128 pages, there is also an addition of 32 pages, called the second part, and shows a full line of Ford accessories. The catalogue contains many illustrations, prices, etc., on tires, tubes, rubber floor mats and tire sundries, and also shows blow patches, hook on boots, cement stock, vulcanizing rubber, horns, spark plugs, pumps, vulcanizers, auto jacks, tire and chains, bumpers, tool boxes and lamps, as well as many dash sundries and fixtures. An extensive line of flashlights and batteries are also shown. Storage batteries, tools and tire parts are also illustrated and priced. The catalogue also shows a line of bicycles and sporting goods such as baseball mitts, gloves, baseball masks and other sundries, as well as tennis goods, racquets, boxing gloves, striking bags, skates, guns and ammunition, also some lines of toys. Motorcycles are also shown. Readers of Hardware and Metal interested may have a copy of this catalogue by writing the above named firm.

* * *

The Cleveland Twist Drill Co.

The Cleveland Twist Drill Company, Cleveland, Ohio, have issued a very attractive booklet entitled Drill Chips. The book has 16 pages of very humorously written literature as well as some very descriptive cartoons. On the margin of each page is the illustration of different tools made by the company. The pages are all specially cut starting with the outside page, which is full width and each succeeding page is the width of the margin smaller, giving a very nice effect and showing off the tools very plainly. The literature is very humorous and interesting and also carries some good messages. Those desiring copies may have same on request of the manufacturer.

HE'S GOTTA COME DOWN

—Talburt in the Toledo "News-Bee."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

New Game

McClelland and Stewart, Victoria St., Toronto, are Canadian agents for a new game that is being marketed by Irvin-Smith Co., 56 E. Randolph St., Chicago, Ill., which will be known as the Cootie game, and which they describe as a rectangular box-like enclosure which has a small square wire enclosure having a specially designed entrance. There are also three celluloid capsules with small weights and the play is to secure the capsules within the wire enclosure. The top of the devise is covered with glass.

In describing the play of the new game the makers have the following to say: A very interesting game may be played by having a game for each player. All of the cooties must be out of the pen. At a given signal all start to play and endeavor to encage the "cooties" as soon as possible. The first player to capture all of the "cooties" calls "cootie" (and play by everyone must immediately stop) is entitled to a credit of 25 points on account of being the first to make a capture. All other contestants are given a credit of 5 points for each cootie they have caught. The game may be set at 200, 300 or 500 as seems desirable. The one who is successful in securing the desired number of points first is the winner, the one having the second highest number of points is second and so on. A booby prize may be

New Game

given to the one who has the lowest score. An official scorer and umpire should be appointed. Each player should have a card and the scorer and umpire should register the number of points made each time. Other interesting games may also be played.

Aluminum Ware

A new line of aluminum ware is being offered the Canadian trade under the trade name of Duro, which is being manufactured by W. D. Shambrook & Co., Hamilton, Ont. The makers claim that their products will be manufactured from a high quality of aluminum and that they will specialize on high-grade wares for household use. They also state that the full depth of the different utensils is a special feature and claim lipped preserving kettles, are double-lipped to facilitate pouring and which will preserve the shape indefinitely on account of being made rigid with the one

REGISTERED

W.D.S. & Co. DURO ALUMINUM

TRADE MARK
MADE IN CANADA

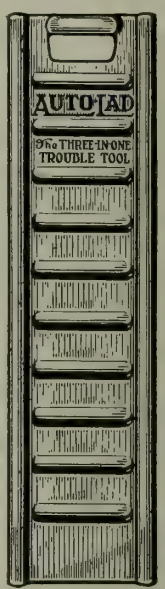
Aluminum Ware

pressure process, also insuring uniformity of the lips. The makers also state they have extensive plans for a large production in order to fill orders promptly. Some of the lines the manufacturers state they intend to manufacture are, lipped preserving kettles, double lipped sauce pans in seven sizes, ladles, cake turners, drinking cups, pudding pans, double boilers, pie plates, jelly plates, tea kettles. They also state that other lines will be added from time to time.

Auto Trouble Tool

The Alsteel Manufacturing Co., Battle Creek, Mich., are offering to the trade a new trouble tool which goes under the trade name of Auto-Lad and which they state is a three-purpose tool that may be carried under the cushion out of the way and so as to be ready whenever needed. The purpose of the tool, they state, is to take the place of a shovel when stuck in the mire, sand, gravel or snow, etc., and may be used to put under the jack on soft ground to provide a solid foundation and prevent the jack from sinking into the soft ground.

The manufacturers also state that the tool saves the time of hunting for a suitable board and plank and the annoy-



Auto Trouble Tool

ance of having the board break when the weight of the car is on the jack.

In describing their new tool the manufacturers state that it has a rolled steel grip and sharpened end and may be used as a shovel where it is necessary to dig in sand, gravel or snow, is made of heavy steel, which is strengthened by corrugations. These horizontal grips or corrugations also form ladder-like steps which furnish traction for the wheels in order to prevent their slipping in mud, sand or snow, etc. To operate, place the tool in front of drive wheel, apply the power and the car is enabled to climb out on the ladder. In other cases it may be used to dig a shallow trench when the tool may be put under the wheel and allow the car to drive out under its own power. The makers also state there is no need to jack up the car in order to use old boards or rails to get out of a bad hole.

STERLING FOOD CHOPPERS

In June 12 issue of Hardware and Metal the name of N. R. Street & Co., Rochester, N.Y., was given as the manufacturer of the Sterling Food Chopper. It has been learned since, that this firm has been taken over by Josiah Austice of Rochester, N.Y.—Ed.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

GREAT activity has taken place throughout the hardware markets this week and many prices have been revised as a result. Bolts and nuts have been marked up about 10%. Conductor elbows are also higher. Wrapping paper has been again revised and will now cost more. A new and higher list has been issued for shoe findings and the packing extra on this line has also been advanced. Corrugated box fasteners have been marked up about 10%. Skate screws will also cost the dealer more. New and higher extras have been made on wire. Ammunition, snow shovels and furnace scoops, ash sifters, watches, washers, casters, sash pulleys, door keys, lantern globes, and pineapple snips have all been revised upwards.

Some lines and makes of silver flatware have been readjusted and lower prices have become effective. Solder prices have also been lowered. Considerably lower quotations are current for linseed oil, also turpentine.

Jobbers state they are still facing considerable shortage in their stock of many basic lines, and owing to the inability of the manufacturers to cope with the present demand state they have little hopes for an early readjustment of the situation. The congestion of freight in transit is also proving a great detriment to all concerned.

Prospects for a good crop throughout the Western provinces are said to be very bright. Satisfaction is expressed for the favorable way collections are coming forward.

MONTREAL MARKETS

MONTREAL, June 17.—Hardware jobbers find conditions active in the country, though quieter in the city. There has been an insistent call for spring gardening tools and for hose, hose couplings, and other springtime requirements.

Among price changes, an advance of 25c per keg for nails is the most outstanding. These are scarce, and there has been a feeling in trade circles that the price would advance soon, and without notice. The change was made over the week end. Fall and winter sporting goods' prices are being revised. Patent saw sets are up. Lumbering tools discounts are less, and sheep shears and metal polishes are higher in price. An advance was made for jack screws. Sewing awls and thread have advanced to the trade. All lines of bolts such as carriage, machine, shaft, whiffletree, etc., have advanced. Wire rope clips are higher. Five per cent. has been added to the price of wrought washers. Baling wire is up in price, and is very scarce. Various enamelled and tin wares are marked higher as per new discounts published below. Sash weights are higher as is also sulphide paper. Sandpaper is costing more, in reams, and iron and steel are firm and may soon advance again, some think. The ingot market is dull and concessions are being made when orders of any considerable extent offer.

Sporting Goods Are Revised on Higher Basis

Montreal.

SPORTING GOODS.—A new list is being issued by A. J. Reach & Co. on Fall and Winter sporting goods. A readjustment of prices is being made, and while there are some advances it is understood that other of such changes do not indicate increase of price. The new lists are being sent to the jobbing trade at the present time.

Wire Rope Clips Now Costing More

Montreal.

ROPE CLIPS.—Wire rope clips are revised in price and are selling as follows: For the Japanned line, ¼ inch, per dozen $1; ⅜, $1.20; ½, $1.80; ⅝, $2.30; ¾, $3.25; 1 inch, $4.80.

Galvanized wire rope clips are selling as follows: ¼ inch, $1.10 per dozen; 5-16, $1.20; ⅜, $1.30; ½, $2.25; ⅝, $3.00; ¾, $4.20; ⅞, $5.40; 1 inch, $6.25.

Sewing Awls and Thread Have Advanced to Trade

Montreal.

SEWING AWLS. — The following prices obtained in jobbing circles for sewing awls. Patented awls known as "Awl-for-Awl" are now selling at $11.00 per dozen; "Never Rip-Awls," $10.00 per dozen. Thread for the former is quoted at $2.50 per dozen, and that for the "Never-Rip-Awls" $2.25 per dozen.

Patent Saw Sets Have Advanced

Montreal.

SAW SETS.—An advance is announced by jobbers for Taintor saw sets, No. 7. These are now selling to the trade for $20.50 per dozen.

Oils Are Very Firm; Summer Sales Active

Montreal.

OILS.—Prices are firm on all grades of lubricating and illuminating oils. The basis for crude oil is still strong and this means that there will be a continued firmness on fuel oil, coal oils and gasoline. The demand for gasoline is seasonably heavy, with motor grade selling at 38½c. Coal oil is quoted 29 to 31c.

Sheep Shear Prices Register an Advance

Montreal.

SHEAP SHEARS.—Advanced prices are effective for sheep shears of the ordinary variety, and the following prices obtained on some of the regular numbers:

No. 1, per dozen $12.75; No. 3, $15.75; No. 5, $21.00; No. 6, $22.00.

Higher Prices Now For Metal Polishes

Montreal.

METAL POLISH.—Brass or metal polish is selling at higher prices, No. 3 being quoted at $1.65 per dozen; No. 6, $2.70; No. 12, $5.20; and No. 24, $10.80.

Prices Are Higher For Jack Screws

Montreal.

JACK SCREWS.--Higher prices are being quoted on jack screws, and the following prices will be of interest to the hardware trade: ¼ inch by 6 inch, per dozen, $36.00; ½ inch by 8 inch, $45.00; 1¾ by 12, $60.00; 2 by 14, $90.00; 2¼ by 18, $126.00; 2½ by 18, $132.00.

Lumbering Tools Are Higher Again

Montreal.

LUMBERING TOOLS.—An advance has been made in the price of Pink's lumbering tools. These are now quoted at 5 to 10 per cent. off regular list.

All Lines Bolts Are Marked Up

Montreal.

BOLTS.—Various bolts and nuts are advanced in price this week and new discounts applying on these have been issued to the trade. The following list is now effective as from June 10th:

Carriage Bolts, $1 list, ⅜ in. dia. and smaller, 6 in. and shorter	Net List
Do. Do. longer lengths	List plus 10%
Do., 7-16 in. and larger	List plus 10%
Machine Bolts, ⅜ in. dia. and smaller, 4 in. and shorter	10%
Do., ⅜ in. dia. and smaller, longer lengths	List plus 10%
Do., 7-16 in. dia and larger	List plus 10%
Sleigh Shoe Bolts, all sizes	List plus 10%
Coach and Lag Screws	15%
Square Head Blank Bolts	List plus 10%
Bolt Ends	List plus 10%
Plow Bolts, 1, 2, 3, Heads	Net List
Do., others	List plus 20%
Elevator Bolts, large head	List plus 10%
Do., corrugated heads	20%
Fancy Head Bolts	List plus 10%
Shaft Bolts ($3.00 list)	List plus 10%
Step Bolts, large head ($3.00 list)	List plus 10%
Whiffletree Bolts	List plus 10%
	Add to list
Nuts, 2 in. and smaller, square—Blank	$2 25
Do. Do. Tapped	2 75
Nuts, 2 in. and smaller, hexagon—Blank	2 50
Do. Do. Tapped	3 00

Terms—Cash in 30 days from date of shipment less 2%.

Wrought Washers Are Up About Five Per Cent.

Montreal.

WASHERS.—Jobbers' discounts to the trade on wrought iron washers is now 25 per cent. off the list. The old discount was 30 per cent.

Standard Wire Nails Advance 25 Cents

Montreal.

NAILS.—Standard wire nails have been advanced 25 cents per keg to $6.10 per one hundred pounds. This advance was not unexpected in many jobbing circles as the trade claims that they have been working very close to cost basis. The market is very firm at this price, and nails are extremely scarce and difficult to obtain. Cut nails are selling still at a base of $6.35 per keg.

Baling Wire Prices Have Again Advanced

Montreal.

HAY BALING WIRE. —Higher prices are effective for hay baling wire, No. 13 now selling at $6.45 per one hundred pounds; No. 14, at $6.55; No. 15, at $6.70. In addition to this the carlot arrangement of a lower differential is now abolished, all quantities taking the above prices. This is a reflection of the present shortage of raw material. Steel wire base price is now $6 per 100 lbs.

Higher Prices Now For Various Wares

Montreal.

WARES.—Extensive revisions have been made in the various discounts applying on all kinds of wares. Mention was made of a few distinct items last week and additional information to hand shows that the revision of discounts has been very extensive, a number of the important ones being as follows: Britannic ware advance 55 per cent., Colonial ware, 15 per cent., Premier, plus 17½ per cent.; White ware, 35 per cent.; Stamped ware, plain, 40 per cent.; Stamped ware, retinned, 33 1-3 per cent.; Copper bottoms, plus 80 per cent.; Tinner's trimmings, plain, 40 per cent.; Tinner's trimmings, retinned, 33 1-3 per cent.; Tinner's trimmings, general list, plus 33 1-3 per cent.; factory milk cans, plus 60 per cent.; milk can trimmings, plus 75 per cent.; railroad cans, plus 33 1-3 per cent.; sheet iron ware, list plus 45 per cent.; piece ware, ordinary list, plus 60 per cent.; piece tinware, copper bottoms lists, plus 80 per cent.; fire shovels, japanned, lists plus 45 per cent.; light galvanized pails and tubs, lists plus 45 per cent.; heavy galvanized pails and tubs lists, plus 35 per cent.; hollow ware at 30 per cent.; garbage pails, lists plus 30 per cent.; japanned coal hods, list plus 60 per cent.; galvanized coal hods, lists plus 75 per cent.; paper line boards, 20 per cent.; wood line boards, 5 per cent.; stove and other pipes, list plus 75 per cent.; stove pipe elbows, black and galvanized, list plus 45 per cent.

Sash Weight Prices Again Marked Up

Montreal.

SASH WEIGHTS.—Prices have advanced for sash weights. The present basis for solid is $6 per hundred pounds and that for sectional, $7.00.

Sulphide Paper Price Is Revised Upward

Montreal.

PAPER.—Prices on the six-foot heavy sulphide paper have been marked higher this week. The present basis is $8.50 per 100 lbs. on half ton quantities, or over, and for less than half tons, $8.75.

Ream Sandpaper on Higher Basis

Montreal.

SANDPAPER.—Prices are revised on ream sandpaper, and the present basis is 5 per cent. list, less 5 per cent. This is approximately a ten per cent. advance.

Rope Quieter But Prices Are Held

Montreal.

ROPE AND CORDAGE.—Prices have remained steady and unchanged on rope, and there has been somewhat of a quiet market condition. Sisal basis is 22½c; British, Beaver and New Zealand manila, 28 cents, and pure manila, 35½ cents per lb.

Little Interest Now in Old Material List

Montreal.

OLD MATERIALS.—Jobbers are selling some old material, but the condition have been much quieter in the past few weeks. Tendencies are easier all down the line and there are likely to be lower prices on a number of the old materials.

Dealers' Buying Prices.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Firm; May be Higher Soon

Montreal.

IRON AND STEEL.—Prices may be higher on iron and steel bars. The tendencies have been strong on kindred lines, and there is some feeling in jobbing circles that there will be an advance on the base prices ere long. The movement is fairly active, with stocks in fair shape, jobbers report.

IRON AND STEEL

Iron finish machinery steel		$4 95
Norway iron	13 50	15 00
Single reeled machinery steel		6 50

Dull Ingot Markets, With Prices Easing

Montreal.

INGOT METALS.—Prices are tending downward on ingot metals, and the markets are reported quite dull. Shaded quotations are being given out to the trade.

COPPER.—Advices report lower quotation at New York, although the prices of last week, 24 cents for electro, and 23½ cents for casting, are still quoted here.

TIN.—There has been quite a desire to liquidate holdings of tin, and for round lots prices several points below 60 cents are being quoted. In car quantities some is reported sold at around 57-58 cents.

LEAD.—This is easier in tone, with prices likely to soften still more. From 10 to 10¼ cents is being quoted.

ANTIMONY.—This, too, is quoted less, the tendencies being easier at 11½ to 12 cents.

ALUMINUM.—At 34 cents per lb., there appears to be ample stock of this to meet all local demands.

SPELTER.—At 10½ to 11 cents per lb., there is little trading.

TORONTO MARKETS

TORONTO, June 17.—Many revisions have been made on hardware prices and higher quotations are still the order, although some lines have been marked down. Silver flatware has lower quotations. Solder is also cheaper. Amongst the many lines having higher prices are bolts and nuts, which are about 10% higher. Shoe findings have a new higher list and the extras have also been increased. Conductor elbows have had a stiff advance. Wrapping paper, corrugated box fasteners and skate screws have also been marked up. The extras on wire have advanced. New higher booking prices have been made on furnace scoops and snow shovels. Ammunition prices have again been revised upwards. Pocket watches, ash sifters and washers have also been advanced in price.

The shortage of many hardware commodities has shown little relief and jobbers have been experiencing considerable difficulty in securing supplies from the manufacturers to replenish their diminishing stocks. The lack of production of iron and steel materials at the mills is a big factor for the scarcity of the finished product. The tie-up and congestion of freight shipments in transit also have a bearing on the case.

Jobbers state that business is very good considering the depleted condition of their stocks. Collections continue to come forward freely.

Corrugated Sheets Firm; Production Light

Toronto.

CORRUGATED SHEETS.—Manufacturers of corrugated sheets state that the situation has tightened up considerably in the securing of raw materials for the manufacture of their products and that no flat sheets are coming forward. This, they state, is entirely up to the mills who in turn say they are unable to secure cars to ship the material they have already on hand.

The demand is said to be heavy, although manufacturers state it has fallen off to some extent, but this they believe is due more to the fact that buyers realize the impossibility of securing immediate delivery and have temporarily dropped out of the market.

It is the belief of some that if some relief is not shown for this situation that the outcome will be serious and some have it that many operations have been held up already on account of not being able to secure sufficient supplies.

The present price tendency is still upwards, although no higher prices have been made and 7½ per cent. is still being quoted as the discount from the list.

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Sheets and Plate Famine Shows No Relief

Toronto.

SHEETS AND PLATES.—Practically no relief has been shown in the situation on sheets and plates and famine at present is prevailing throughout this market, and while it is true that several jobbers have received cars of sheets they state the demand is so heavy and the need so great for sheets, that what have come to hand are only a drop in the bucket as it were.

The congestion of freight in transit is said to be one factor for holding up shipments and some state they have sheets still tied up in transit. However, it is believed that the main factor reaches back to the mills who seem unable to handle the business that is being offered them. It may be that they will be able to fill orders in larger volumes in the near future and this is what all concerns are hoping for, as it is believed that all wish to get away from the present unsatisfactory business of living from hand to mouth. The following prices are quoted merely as a guide, as it is stated that owing to the shortage very few could supply a full list of sizes. It is often found necessary to pay premiums over these quotations, say the jobbers, when they find it necessary to go into the local markets in order to secure stocks to fill their orders.

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

BOLTS AND NUTS ADVANCE

BOLTS AND NUTS—Those having hopes for lower prices on commodities manufactured from iron or steel are due to a disappointment, as the tendency for nearly all lines composed of these materials is still upwards. Bolts and nuts are no exception to this rule and higher prices have again been made throughout the list. This new advance is approximately 10% higher than former prices and is quoted from a very firm basis. Manufacturers state that in part these advances are a result of the shortage of raw material and the labor unrest, while the shortage of coal is a very important factor. The new quotation published herewith is shown below.

Carriage Bolts ($1.00 list), ⅜ in. diam. and smaller, 6 in. and shorter	Net List

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
18 and 20	10 70	10 95	10 70	11 10
16	10 70	10 95	10 70	11 10
12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Lower Prices on Some Lines of Silver Ware

Toronto

SILVER FLAT WARE.—A downward revision has been made on some lines of silverware, and the Oneida Community make has lower prices on some lines. Manufacturers state that this is not an indication of the tendency of the present market, but rather a readjustment of prices.

Wrapping Paper Has Higher Revised Prices

Toronto.

WRAPPING PAPER is on the list of advancing prices this week and kraft paper has again been marked up to higher levels, the new quotations being approximately 10 per cent. higher.

Wire Nail Prices Firm; Scarcity Not Relieved

Toronto.

WIRE NAILS.—Little improvement has been shown on the wire nail situation and jobbers state that nails are as hard to procure as ever, and that only light shipments are coming to hand. The demand is a very heavy one and seems to be daily increasing. Part of this, however, may be due to the inability of those in the market to secure sufficient supplies and are therefore forced to come into the market more often. The present quotation on wire nails is $6.10 per keg base, while the cut nails are quoted at $7.00 base.

Oiled and Annealed Wire Now Selling $6.45 Cwt.

Toronto.

WIRE.—The scarcity of wire of nearly all kinds is showing little signs of relief and jobbers state they have great difficulty in securing supplies from the mills. The demand is a heavy one and jobbers state their stocks are becoming very light, the prospects for replenishments are also said to be poor for immediate delivery and many are concerned for the future. An advance has been made on the extras of wire, and annealed now takes an extra 15 cents over the price of common bright, while the soft bright and oiled and annealed take an extra of 40c over the bright wire quotations. This new scale makes the present price on oiled and annealed wire $6.45 base.

Famine Prevails For Canada Plates

Toronto.

CANADA PLATE.—The local market is practically bare of Canada plate, and supplies are very hard to secure. One manufacturer stated to Hardware and Metal that if the situation is not soon relieved before the stove pipe season commences, that manufacturers may be forced to substitute galvanized iron or any other suitable metal available.

Shoe Findings Advance; Packing Extras Also Up

Toronto.

SHOE FINDINGS.—A new higher list has been issued for shoe findings of nearly all kinds and an advance of from 5 to 15 per cent. has been made all along the list. The packing extras have also been advanced.

Corrugated Box Fasteners Advance

Toronto.

CORRUGATED BOX FASTENERS are also among the list of advances this week and new and higher prices are quoted on this line as follows: The plain edge is 35 per cent. discount from the list, while the saw edge is quoted at 10 per cent. discount from the list.

Skate Screws Marked Up to 52½c Per Carton

Toronto.

SKATE SCREWS.—New higher revision of price has been made on skate screws. The ⅜ x 6 and the ⅝ x 6 are now being quoted at 52½ cents per carton.

New Booking Prices For Furnace and Snow Shovels

Toronto.

SNOW SHOVELS.—New booking prices are being made for snow shovels, and the new quotations are considerably higher than those formerly quoted last season. The new quotations, however, are not yet available, although it is stated that a very substantial increase has been made in the price.

FURNACE SCOOPS are also included on this list, and are a considerable advance over former prices.

Pocket and Glo Ben Watches Advance

Toronto.

WATCHES.—Higher prices have been made on the Pocket Ben watches, and the revision makes the new price $1.80 each. The Glo Ben has also been revised upwards to $2.80 each.

Wood Ash Sifters Now Cost Dealers $3.10 Doz.

Toronto.

ASH SIFTERS.—New and higher prices have been made on wood ash sifters. This line will now cost the dealer $3.10.

Ammunition Quotations Revised Upwards

Toronto.

AMMUNITION.—The price on the different lines of ammunition has been revised. The Dominion make is now quoted at a discount of 30 per cent., and 10 per cent. from the Canadian list. The Winchester and Savage is now quoted 27½ per cent. additional to the list, while the Remington Arms Union Met-

allic make is now quoted at list plus 17½ per cent.

Iron Washers Advance; Now 25% Discount

Toronto

WASHERS. — Higher prices have again been made on iron washers by a lowering of the discount. The new discount is now being quoted at 25 per cent. off the list in place of a former 35 per cent. off the list.

Conductor Pipe Elbows Quoted List Plus 40%

Toronto.

CONDUCTOR ELBOWS.—New and higher prices have been made on conductor pipe elbows, the advance being quite a stiff one. The new quotation is an additional 40 per cent. to the list.

Waste Materials Weaker; Tendency Downward

Toronto.

WASTE MATERIALS.—The tendency for materials of nearly all kinds is still downwards, and while no lower prices have yet been made there seems every possibility that a decline may take place, it is stated. However, it is hard to predict anything like the future tendency, as it may be with the increasing activity of the railroads, factories and industries will again speed up, and should this be the case the demand would again stimulate the markets for nearly all waste materials, with the result that price will firm considerably and probably advance. Iron and steel, which up to recently has held at such firm high figures, is considerably easier and the tendency is now downward. The following are the present quotations:

WASTE MATERIAL	
No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½
Heavy copper	0 17
No. 1 machinery cast	38 00
Heavy melting steel	15 00
Wrought iron No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overshoes, lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

Boiler Tubes Have Good Demand; Firm

Toronto.

BOILER TUBES.—Stocks are said to be getting quite low on boiler tubes and jobbers state that only light shipments are coming forward and in most cases that these have been ordered months previously. Some state the demand is not so heavy as was expected, while others state the demand has been unusually heavy since early spring but believe this is due to the buyers not being able to secure all their requirements and again come in the market for a duplicate order.

The skelp situation seems to be at the bottom of the trouble and little improvement is shown in the delivery of skelp from the mills. The present great shortage of coal is said to be one of the main factors, although it is believed that the scarcity of iron and steel generally also has considerable bearing on the case.

The following quotations are more or less nominal, as jobbers state it is often necessary for them to go into the market and purchase boiler tubes at a premium in order to fill their orders. Especially is this so of special sizes.

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Iron and Steel Bars Firm; Show No Change

Toronto.

IRON AND STEEL BARS.—The demand for iron and steel bars continues to keep up and fair volumes are moving. Warehouse stocks are none too heavy, although jobbers state they are able to take care of their orders. Fresh replenishments are coming in very slowly and prospects do not look very bright for the near future. Some have it that the mills are working under considerable difficulties and the production is very much reduced owing to different disruptions which are almost daily occurring. The coal shortage is also a very important factor and some state the shortage of coal is steadily curtailing the output and hindering production. The present prices remain unchanged, although quotations are very firm and are as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	
Mild steel	5 75
Norway iron	16 25
Toe calk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Solder Prices Drop From 1 to 3 Cents Per Lb.

Toronto.

LEAD AND ZINC PRODUCTS. — A decline has again been made on solder and new lower prices have been made. Wire solder is now quoted at 43 cents per lb., while the strictly is quoted at 35 cents per lb. Commercial 33 cents, guaranteed 39 cents, while the wiping solder has been marked down to 33 cents per lb. These reductions vary, some having been reduced 1 cent, while others have been revised downwards to the extent of 3 cents per lb.

While the tendency on basic metal is downwards, lead, lead pipe and waste, traps and bands, etc., continue unchanged, although the present quotations are weak. Whether lower prices will be made on lead products in the near future is hard to say, as there are so many factors entering into the situation, and while it is true that the cost of the raw material is declining there is also the cost of manufacture to contend with, which is said to be quite an item. Below is a new table showing the present prices:

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Zinc sheets, per lb.	0 19

Tin, Lead, Spelter, Copper Have Downward Tendency

Toronto.

INGOT METALS.—The tendency on nearly all metals is for downward prices, the buying is rather dull. Although former prices have been made on the primary markets this is offset by the exchange situation and no change has been made in the present quotations.

SPELTER.—The tendency for spelter is still for weaker prices. Although no change has been made the present quotation being 10½ cents per lb.

TIN.—Considerably weaker prices are being quoted for tin on the primary markets, although the local markets show no change in price. This, however, is attributed to present exchange situation. The present price is quoted at 60 cents per pound.

ANTIMONY stocks continue light and the buying movement has also fallen off, it is stated. The tendency is still downward. Although no change in price has been made, 15 cents per lb. still being the quotation.

LEAD.—No change has yet been made in the price of lead, although the tendency is still downward, and it is stated that little surplus lead is to be found. The present quotations remain at 10½ cents per lb.

COPPER.—The market continues dull for copper, although the quotation remains unchanged at 24 cents.

ALUMINUM shows no change in price. The demand is also very light. Recent quotations are around 37 cents per lb.

LONDON MARKETS

LONDON, June 17.—The tendency for prices of nearly all hardware commodities is still upwards and many basic lines have new higher prices this week. Bolts and nuts are chief on the list, having been marked up 10%. Ammunition prices have been revised upwards. Casters and steel sash pulleys have higher quotations. Remington rifle prices have been readjusted. Common door keys are also amongst the latest price changes. Lantern globes and pineapple snips have also been revised upwards.

Many seasonable spring lines are moving well, including garden and harvest tools, screen wire cloth, poultry netting, Paris green, garden hose and fittings, refrigerators, hammocks, hammock hooks and chains, etc.

All in the trade express themselves as satisfied with the present business, which is very brisk at present. Prices are very firm and the peak for higher prices does not seem to have been reached as yet and further advances in some lines would not be unexpected.

Collections are very satisfactory and money at present seems quite plentiful.

Bolt and Nut Prices Again Revised Upward

London, Ont.

BOLTS AND NUTS.—New and higher prices have again been made for bolts and nuts and take the form of a very sharp advance, the new price being approximately ten per cent. higher. The situation which has developed in the manufacture of nearly all products of iron or steel is causing great inconvenience to all concerned and has a tendency to raise the prices on nearly all commodities manufactured from this material owing to the advanced cost of manufacturing. The following is the new list of quotations:

Carriage Bolts ($1 list), ⅜ in. dia. and smaller, 6 in. and shorter, net.
Carriage Bolts ($1 list), ⅜ in. dia. and smaller, long lengths, plus 10%.
Carriage Bolts ($1 list), 7-16 in. dia. and larger, plus 10%.
Machine Bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 10%.
Machine Bolts, ⅜ in. dia. and smaller, longer lengths, plus 10%.
Machine Bolts, 7-16 in. dia. and larger, plus 10%.
Sleigh Shoe Bolts, all sizes, plus 10%.
Coach and Lag Screws, 15%.
Square Head Blank Bolts, plus 10%.
Bolt Ends, plus 10%.
Plow Bolts, Nos. 1, 2, 3, net.
Plow Bolts, all other Nos., list, plus 20%.
Elevator Bolts, large flat head, plus 10%.
Elevator Bolts, corrugated head, 20%.
Fancy Head Bolts, plus 10%.
Step and Shaft Bolts ($3.00 list), plus 10%.
Whiffletree Bolts, plus 10%.
Nuts, Square Blank, add $2.25 to list.
Nuts, Square Tapped, add $2.75 to list.
Nuts, Hexagon, Blank, add $2.50 to list.
Nuts, Hexagon, Tapped, add $3.00 to list.
Terms—2% 30 days.

New Quotations Made on Faultless Casters

London, Ont.

BED CASTERS. — New quotations have been made on bed casters and some makes have been revised upwards. The Faultless will now cost the dealer more, having come under this latest revision. The new quotation on the E/2/6 is 45 cents per set, while the F/2/6 is 60 cents per set.

Steel Sash Pulleys Now Cost 90c Doz.

London, Ont.

SASH PULLEYS are also among the higher revised prices this week, and the steel number 12 have been marked up to 90 cents per doz.

Lantern Globes Have New Higher Quotations

London, Ont.

LANTERN GLOBES. — Among the many price changes this week is found lantern globes, which have been marked up to higher levels. The glass situation generally is very unsettled. The tendency is for higher prices on many lines. The following are the new quotations on lantern globes:

Short and Long Patterns—1 doz. to case, $1.20 doz.; 3 doz. to case, $1.15 doz.; 6 doz. to case, $1.10 doz.

Ammunition Prices Have Been Revised

London, Ont.

AMMUNITION.—The Dominion ammunition is now being quoted at a discount of 30 per cent. and 10 per cent. off the list, while the Winchester is quoted at list, plus 27½ per cent.

Pineapple Eye Snips Marked Up to $3.65 Doz.

London, Ont.

PINEAPPLE EYE SNIPS are selling at higher prices this season, the new quotation being $3.65 per doz.

Remington Rifles Have Readjustment

London, Ont.

REMINGTON RIFLES. — Readjustment has been made on the prices of Remington rifles, and the new revised quotations are shown herewith, and are as follows:

Present Prices—No. 6 x 22 or 32 cal., $11.68 each; No. 12A x 22 cal., $31.79 each; No. 12C x 22 cal., $35.65 each; No. 14A x 30 or 32 or 35 cal., $65.12 each.

Common Door Keys Marked Up to 35c Doz.

London, Ont.

DOOR KEYS. — New and higher prices have been made on common door keys and the number 7792½, also the 7793, are being quoted at the new price of 35 cents per doz.

Wire Nails Becoming Scarce; Price Firm

London, Ont.

NAILS.—A brisk demand continues to be made for wire nails and jobbers state they are having difficulty in securing sufficient supplies to fill their orders. The situation as regards securing replenishments from the mills is said to have shown little change and deliveries are as hard to secure as ever and few, if any, are able to secure immediate delivery and in many cases have booked months ahead and are still waiting for the shipments, it is stated. However, the mills state they have been under considerable disadvantage and that owing to coal shortage, labor unrest, scarcity of raw material and other factors have considerable difficulty in keeping up their production. The present quotation on wire nails is very firm and is quoted at $6.10 base, while the cut is quoted at $7.50 base.

No Lower Prices Have Been Made on Rope

London, Ont.

ROPE.—With the near approach of haying season rope is beginning to move in good quantities for this purpose and many are looking for a good volume of business from this source. Other sources are continually opening up for the use of this commodity and all in the trade seem to be enjoying good season for rope of nearly all kinds. The following are the present quotations:

	Per lb. base
Pure Manila	0 35½
Beaver Manila	0 28
New Zealand Hemp	0 28
Sisal	0 22½

Garden and Harvest Tools Have Brisk Demand

London, Ont.

TOOLS, GARDEN, HARVEST, etc., continue to move very freely and the demand continues to be very satisfactory. The harvest and garden tools continue to sell at 50 per cent. and 10 per cent. discounts from the list, while spades, shovels and scoops continue to sell at 35 per cent. discount from the list.

Screen Wire Cloth Has Brisk Demand; Firm

London, Ont.

SCREEN WIRE CLOTH continues to have a big demand, and according to some should the balance of the season show as good returns as that already

explained, some will have had one of the best seasons experienced for sometime back. The quotation remains unchanged and the black painted continues to sell at $3.60 per hundred square feet, while the galvanized is unchanged and is still quoted at $4.25 per hundred square feet.

Poultry Netting Scarce; Price Remains Unchanged

London, Ont.

POULTRY NETTING.—A very good demand continues for poultry netting, although it is believed the stocks generally are light. Jobbers state they still have difficulty in securing their supplies from manufacturers. This is also said to be true of nearly all wire products and is said to be due to a situation which has developed at the mills caused by the shortage of coal and raw material as well as labor disturbances and other factors. The Canadian two-inch mesh poultry netting is quoted at net list. The one-inch mesh continues to sell at an additional five per cent. to the list.

Paris Green Has Good Demand; Also Sprayers

London, Ont.

PARIS GREEN AND SPRAYERS.—A steady sale is being made for Paris green, although some state that dealers still have light stocks. Sprayers of many kinds are beginning to move freely and many are looking for a good turnover in this line. Some of the present quotations are as follows:

Sprayers—Tin Well, $6.00 doz.; Glass Jar, $9.00 doz.

Compressed Air—Eureka, Galv'd, No. 110, $7.00 each; Eureka, Brass, No. 111, $9.50 each; Sturdy, Galv'd, $6.15 each.

Paris Green—½-lb. pkgs., 58c lb.; 1-lb. pkgs., 56c lb.; 25-lb. drums, 54c lb.; 50-lb. drums, 53c lb.; 100-lb. drums, 53c lb.; 250-lb. kegs, 52½c lb.; 600-lb. casks, 52c lb.

Rubber Garden Hose Is Having Big Demand

London, Ont.

RUBBER HOSE.—Nearly all in the trade are very well satisfied with the business that has already been handled this season for garden hose of nearly all kinds, and large volumes are continuing to move out daily. Manufacturers state they have some difficulty in keeping up with the demand. Some of the present quotations are as follows:

3 ply—½ in., 14½c ft.; ⅝ in., 17c ft.; ¾ in., 19c ft.

4 ply—½ in., 16c ft.; ⅝ in., 19½c ft.; ¾ in., 21c ft.

5 ply—½ in., 18c ft.; ⅝ in., 21c ft.; ¾ in., 23c ft.

Corrugated—½ in., 23c ft.; ⅝ in., 26c ft.; ¾ in., 29c ft.

Corr. in 500-ft. reels, less 5%.

Fence Wire Scarce; Stocks Getting Low

London, Ont.

FENCE WIRES.—The demand generally for fence wire of nearly all kinds is a very heavy one and warehouse stocks are becoming very low. Jobbers state they are unable to secure anything like sufficient quantities from the manufacturers; especially is this true of number 9 galvanized wire, and prices for this line are on application only. Barbed wire stocks are also very low and the local quotations are around $6.75 per hundred lbs. The number 11 oiled and annealed wire is holding at a very firm price of $6.37 per hundred lbs. and the number 12 at $6.45 per hundred lbs.

Refrigerator Prices Firm; Unchanged

London, Ont.

REFRIGERATORS. — The warmer weather has brought out a very good demand for refrigerators, and the volume moving is very satisfying to all in the trade. No change in price has been made, although present quotations continue very firm. The household continues to sell at 40 per cent. discount off the list, while the grocers' is quoted at 35 per cent. off the list.

Hammocks, Hooks and Chains in Good Demand

London, Ont.

HAMMOCKS.—A very good demand has started in for hammocks of nearly all kinds, and prospects seem very bright for a good season. Quotations are very firm and prices range from $20 to $100 per doz.

HAMMOCK HOOKS are also in good demand, and the price on the number 128 to screw in is $1 per doz., while the number 138 with the plate is quoted at $1.10 per doz.

HAMMOCK CHAINS.—The demand for the above has also stimulated the movement of hammock chains and a good volume of business in this commodity is being handled. The price on the 3 foot is quoted at $7.20 per doz. pair, while the 4 foot is quoted at $9.60 per doz. pair and the 6 foot at $14 per doz. pair.

Ice Cream Freezers and Dishes Selling Well

London, Ont.

ICE CREAM FREEZERS. — A very satisfactory seasonable demand is being made for ice cream freezers and sundries of all kinds. No change in price has recently been made, although present quotations are very firm. Ice cream dishes are also in good demand, and many have started in to procure their season's requirements. The following are the quotations on some lines:

Ice Cream Freezers—Blizzard—2 qt., $4.00 each; 3 qt., $4.75; 4 qt., $5.85; 6 qt., $7.40; 8 qt., $9.15.

Ice Cream Dishes—24, 20 and 16 to the quart, $2.25 each.

Putty Prices Very Firm; Stocks Light

London, Ont.

PUTTY.—Considering the season of the year putty is having a good sale and repeat orders are very significant of the present demand. There is still a tendency for scarcity of many brands; this, however, is attributed to the great scarcity of whiting, which as yet has not been overcome. The present price is very firm, although unchanged, and is quoted as follows:

	Per 100 lbs.
Standard, 100-lb. drums	$ 8 30
Standard, 25-lb. drums	8 55
Pure, 100-lb. drums	10 80
Pure, 25-lb. drums	11 05

No Change in Price of Window Glass

London, Ont.

WINDOW GLASS is having a very good demand for this season of the year, and it is believed that many are putting in their lights now so as to avoid confusion later on in the fall when there is usually such a rush. Little change is made in the price, although present quotations are very firm. The single and double diamond are still quoted at 1 per cent. off the list, while the cut lights take a discount of 40 per cent. off the list.

No Lower Prices Yet Made For Linseed Oil

London, Ont.

LINSEED OIL has a very heavy demand, although stocks are still very low. The situation has shown little change since last week and shipments of seed have been coming very slowly, it is stated. This in turn checks the production of linseed oil. The following are the present quotations:

	Raw	Boiled
1 to 2 barrels, gal.	$2 87	$2 90
3 to 5 barrels	2 86	2 89
6 to 9 barrels	2 84	2 87

Turpentine Scarce; Deliveries Delayed

London, Ont.

TURPENTINE.—A heavy demand is coming forward for turpentine. This, however, may be due to the very great scarcity which is at present prevailing. The situation having shown little improvement over the conditions prevailing for sometime past and while it is true that some turpentine has been coming in, the supplies are not sufficient to satisfy the demand. The present price is very firm, although no change has been made. The price, however, is considered a high one and some are looking for lower prices in the near future providing sufficient shipments of turpentine come to hand. The following are the present quotations:

1 barrel lots, gal.	$3 80
2 to 4 barrels, gal.	3 79
5 gals., per gal.	3 95

White Lead in Oil Prices Firm; Unchanged

London, Ont.

WHITE LEAD IN OIL.—A very good business is being transacted in white lead and oil, and all in the trade seem to be enjoying a very good business. The present price is very firm, although no change has been made. The pure in ton lots continues to sell at $20.45 per hundred lbs., and in less than 10 lots, $20.80 per hundred lbs. The Elephant hundred lbs., and in less than ton lots, and $21.30 in less than ton lots.

WINNIPEG MARKETS

WINNIPEG, June 17.—Prices on hardware commodities continue to advance and this week's budget is no exception to the rule, higher prices having been made on saw sets, tie-out chains, roofing caps, road scrapers, wringer rolls, coal oil, gasoline, tee pipes, wall plaster and alarm clocks. As will be noted, the changes for the week involve the manufactured product, a condition that is clearly understood and accepted, owing to previous repeated advances on the raw and basic materials, which has shown by previous market bulletins affected the manufactured article accordingly. Little noticeable improvement has occurred to date in relief of the existing transportation problems and many important lines that are urgently needed to replenish practically exhausted stocks are coming through but slowly, and in insufficient quantities, it is claimed. The embargo recently placed on United States lines still continues to be a detrimental factor in the securing of greater and more satisfactory quantities of many of the important lines necessary to assist in relieving the situation. Crop conditions to date are said to be highly satisfactory. Business generally also continues good.

Saw Set Prices Are Revised Upwards 17%

Winnipeg.

SAW SETS.—New prices are named on Taintor saw sets, which show an approximate 17 per cent. increase over the old. Little need be said as to the cause of this advance when it is considered that metal is the basic material of this line, which, as is known, has advanced considerably and regularly in the past, a condition that must needs prove an influencing factor in regulating the prices of the manufactured product. The latest prices quote: Saw Sets—Taintor, $21.00 per dozen.

Higher Prices Are Named on Tie-out Chains

Winnipeg.

TIE-OUT CHAINS are again revised upwards to the extent of a further 15 per cent. The chief reason given for this latest increase is the greatly advanced cost of raw material, to which can be added increased operating costs. The new prices are quoted net, and are as follows:

Tie Out Chains—Electric weld, No. 0 x 30, $17.25; No. 0 x 40, $22.50; No. 0 x 50, $27.75; No. 00 x 30, $19.50; No. 00 x 40, $24.75; No. 00 x 50, $31.15 per dozen.

Tin Roofing Caps Advance About 40%

Winnipeg.

TIN ROOFING CAPS.—An exceptionally heavy advance affects tin roofing caps to the extent of 40 per cent. on previous prices, a condition said to be due to the adverse conditions of the markets. To-day's prices, which at present appear firm, show: Roofing Caps—Tin, $12.00 per 100 lbs.

Road Scrapers Advance an Approximate 19%

Winnipeg.

ROAD SCRAPERS. — Late market changes affect and advance road scrapers, which as a result are 19 per cent. higher than previous quotations. Greatly advanced cost of material is named as the chief cause responsible for the new change. Present quotations are listed as under:

Road Scrapers—Columbus, No. 1, $20.50; No. 2, $19.50 each. Winner, No. 1, $18.50; No. 2, $17.50 each.

Wringer Rolls Have Advanced About 30%

Winnipeg.

WRINGER ROLLS. — Revised prices appearing on wringer rolls advance this line an approximate 30 per cent. on previous lists, an occurrence said to be due to the highly advanced prices of raw material, namely rubber and iron. Considering the long period of stability shown by this line the new increase is to be expected, although it must be admitted the same is inclined to be of somewhat heavy character. New prices are listed in the following order:

Wringer Rolls—Without logs, size 10 in., $2.05; 11 in., $2.45 each; with logs, size 10 in., $2.20 each; 11 in., $2.50 each.

Tee Stove Pipes Have Advanced 35%

Winnipeg.

TEE STOVE PIPES.—Prices on tee stove pipes have been revised upwards and show a 35c increase as a result. Whether this change occurring on only the one style of pipe is the forerunner of further changes yet to come, has not yet been ascertained. Other types of pipe remain firm at present. Present changes involving this line quote: Tee Stove Pipe—Size 6 in., $4.65; 7 in., $5.00 per dozen.

Coal Oil and Gasoline Prices Withdrawn

Winnipeg.

GASOLINE, ETC — All prices on coal oil and gasoline are again withdrawn by the oil companies, and temporary quotations are now prices ruling on date of shipment. The latest change does not extend any hope of better conditions prevailing in this market than has been experienced for some time, and on the issuing of the new lists it is anticipated that the prices will be of greatly advanced character. General conditions pertaining to this market continue to be of an unsettled and unsatisfactory nature.

Wall Plaster Quotations Are Revised Upwards

Winnipeg.

WALL PLASTER.—New prices are named on wall plaster which results in an approximate 5 per cent. raise on old prices. Higher operating costs and advanced transportation rates are named as two of the chief causes for the new increase. Prices now ruling are listed as follows:

Wall Plaster—Empire wood fibre, paper sacks, $20.50; jute sacks, $24.30 per ton.
Hard Wall No. 1, paper sacks, $20.50; jute sacks, $24.30 per ton.
Gold Dust Finish, No. 2, paper sacks, $20.50; jute sacks, $24.30 per ton.
Empire Finish, paper sacks, $24.30; jute sacks, $28.50 per ton.

Alarm Clocks Also Show New Increase

Winnipeg.

ALARM CLOCKS.—Two well-known lines of alarm clocks are included in the week's changes and are advanced an approximate 20 per cent. as a result. Although the cost of raw material and manufacturing costs, etc., have advanced considerably in recent weeks, the latest change on considering previous repeated revisions, places these lines at high level for goods of this type. The new prices, however, it is thought, are firm, and no further change at present looked for. Prices ruling to-day are:

Alarm Clocks—Big Ben, $4.05; Baby Ben, $4.05; Sleepmeter, $2.75 each.

Heavy Advance Raises Sheet Zinc 7c Per Lb.

Winnipeg.

SHEET ZINC.—Present market activities also include sheet zinc in the changes, with the extra heavy showing of practically 35 per cent. increase The sheet and plate situation still continues to be a source of trouble to the trade, stocks are deplorably low and fresh supplies difficult to procure. Sheet zinc is no exception in the existing conditions, hence the new advance. The price on this line is now quoted at: Sheet Zinc—Plain, 25c per lb.

Heavy Demand Depleting Poultry Wire Stocks

Winnipeg.

POULTRY WIRE. — Exceptionally heavy demand is greatly depleting available stocks of poultry fencing, dealers claim, many of the standard sizes being now sold out, with little possibility of se-

curing further supplies in any great quantity. Prices to date are holding firm, although it is thought changes may occur at an early date. Prices now ruling are listed in the current market quotations.

PITTSBURGH MARKETS

PITTSBURGH, June 17.—There has been an increase of about one-third in steel production to date, from the low point caused by the recent rail strike, the rate being now only a few per cent. under the rate of last March, the highest rate since October, 1918.

The American Iron and Steel Institute reports a production in May of 2,883,164 gross tons of steel ingots, by 30 steel companies which in 1918 made 84.03 per cent. of the entire production of the industry. Using this proportion as a basis, and taking account of the number of working days in the month and year, it appears that production of steel ingots in May by the whole industry was at the rate of about 41,050,000 gross tons a year. The average rate for April had been about 37,550,000 tons, but in the forepart of April the rail strike was only affecting the Chicago district, the other districts proceeding at the high rate they had attained in March, when the industry was making ingots at the rate of about 45,200,000 tons a year. The low point in production fell in the third and fourth weeks of April, and for a short time production was probably under 34,000,000 tons a year. There having been a progressive improvement during the greater part of May, the 41,050,000-ton average for the month suggests that production at the close of the month was at about 43,000,000 tons, and there has been a further increase thus far this month, so that attainment of a 45,000,000-ton rate before the end of this month seems rather probable.

These comparisons have great significance. Since the armistice there have been two scarcities, the first being a scarcity of orders at steel mills, the second a scarcity of steel on the part of consumers. At no time since the armistice has there been anything like full production except in February and March of this year. Full production, therefore, has not been tested out, for two months of full production would not furnish a test, when all buyers had been absolutely bare of stocks. The stocks normally carried by jobbers and manufacturing consumers, for the ordinary and convenient prosecution of their business, amount to several weeks of production. It is probable that the rail strike of April and the great curtailment in deliveries that ensued, found not a few consumers with fair sized stocks, accumulated in the brief space of two months, otherwise the curtailed deliveries of steel would have caused still greater hardships than were apparent. If steel production and deliveries had continued at the March rate, it is quite probable that steel would now be so plentiful. Now the production rate is being restored. It is true that some members of the trade continue to speak of there being barriers to full operation of the steel industry, but it does not seem at all logical to assume barriers to the production of steel and not at the same time take into account that unfavorable conditions would also affect the disposition of people to consume steel. The natural presumption would be that if the steel consumers can function the steel producers can also function. The steel making capacity has increased 50 per cent. since before the war and it is yet to be seen whether the steel demand has also increased 50 per cent.

Traffic Conditions

The major testimony is that rail traffic conditions have experienced a further improvement in the past week, though a few observers claim there is no really definite improvement. The general feeling among the mills is a sanguine one as to the nearby future of transportation. The argument is that while thus far the improvement has been slow, in the number of cars furnished for loading and in the time required to get shipments through, it is always the case with a traffic congestion that the beginning is the difficult thing. Once some little inroads on the jam are made the work of clearing it becomes easier and easier, the effects being cumulative. Thus the more common prediction is that within a very few weeks rail conditions will be normal. That would mean simply that the railroads would be able to furnish the furnaces and mills with full supplies of raw materials, and be able to take away the current production of steel. Even at this time the shipments of steel, though increased, are somewhat under the production. Normal operation of the railroads, however, would not take care of the large accumulation of steel that would be left at mills, for moving that steel would mean the railroads taking an overload. The common prediction, therefore, is that it will be a long time, say two to four months, before all the accumulated steel at mills is cleared off. Even with an ample car supply, it takes time and labor to pick up the steel and load it, while furthermore it must be remembered that some of the accumulated steel is in billet, sheet bar and ingot form and requires further rolling. A stock of ingots can be worked off only gradually, by the blooming mill working a few per cent. above normal.

Steel Corporation Tonnages

The Steel Corporation continues its remarkable sales record, the unfilled obligations having increased during May by 580,719 tons, bringing the total June 1 to 10 940,466 tons. This is equal to the tonnage that would be produced in 8.2 months, working at full rated capacity of 52,500 tons per working day, or nine months, working at 90 per cent. of capacity. A few months ago, when the independents were advancing their prices and hoping the Steel Corporation would do the same, the claim was made that the corporation could not continue its adherence to lower prices, as it would soon become hopelessly oversold and its customers would be unwilling to buy for the late deliveries which alone the corporation could offer. A test showing the incorrectness of this reasoning was furnished in May. The independents, sold up in few cases for as much as four or five months, had a dull market, while the Steel Corporation, sold up for an average of eight or nine months, had an active market. The case was simply that buyers expected the independent prices to come down eventually to the Steel Corporation level, hence would not commit themselves any distance ahead, while they had great confidence in the Steel Corporation prices and would place with the corporation all the tonnage that would be accepted. The increase in unfilled tonnage in May, 580,719 tons, was equal to 44 per cent. of the corporation's capacity for the month, and estimating the shipments at 68 per cent., production having been perhaps 85 per cent., the bookings appear to have been about 112 per cent., or 12 per cent. over capacity and 65 per cent. or so over shipments.

The steel market is quiet, but is plainly carrying out the program one would expect. The mills previously getting the highest prices, because able to make prompt shipment on account of having but little business on books, have had to come down in prices. The mills sold up for several months have not had occasion to do so, and presumably will maintain their prices as long as they have unfilled orders on books at those prices.

Pig iron is dull and unchanged.

Western Coal Men Fear Shortage of Fuel

WINNIPEG.—Winnipeg coal dealers are not optimistic over the prospects of the West obtaining an adequate supply of hard coal for next winter, even at the present price of $21.50 a ton. Coal is not arriving at the head of the lakes in the average volume of previous years and conditions at the mines do not warrant expectation of increased production to make up the deficit in the present supply later on in the season.

Optimists who looked for an improvement in the United States railroad service with the return of the roads to private ownership, have been disappointed. The roads have fallen down hopelessly in moving the grain crop to centres of distribution.

Taking the Dullness Out of Summer Paint Sales

Clerks' Vacation Brought Busy Week of Paint Selling in Mid-Summer—Offering Inducements to Automobile Owners' Trade—Effective Handbill Distribution.

IN the paint business July and August have come to be looked upon as about two of the dullest months in the year, and this is true not only in the larger cities but follows out in the smaller towns as well.

Live merchants are not content to simply let things take their natural course. For there are many new and novel sales and advertising plans which will keep things going during these usually dull months—if they are utilized.

We are giving a few suggestions herein; some of them are new and many have been tried by other merchants and proved good business getters. Many of your clerks have their own list of friends and acquaintances, aside from those people who come into the store as regular customers. An Ontario dealer took advantage of this friendship on the part of the clerks with an interesting contest plan. As is the usual policy, each of these clerks have been in the habit of having two weeks' vacation during the summer months. This paint retailer paid them their usual salary for one week and the other week was to be taken at their own expense, but he tempered this with the announcement that whoever made the largest number of individual sales during a certain week would receive a two weeks' vacation with regular salary for both weeks.

For a second week the prize would be given to the clerk whose sales were greatest during that week; thus you will note there were two prizes and the contest covered a period of two weeks.

This wide-awake dealer furthered this plan by preparing advertising matter explaining the contest and mailed it to all the regular customers of the store, and each clerk was supplied with as many copies as he desired for personal distribution to his friends, acquaintances, etc.

A very lively interest is reported on the part of the clerks in this plan, for they went after their friends, and these friends in turn used their influence with their relatives, friends and acquaintances in order to assist the clerk who they were anxious to see win the prize.

Now you know how it is yourself about going into a store and having some one clerk wait upon

A recent article dealing with the sale of paint, as appearing in "Hardware and Metal," emphasized the importance of having the department located near the front of the store so that the customer would not have to pick a way among rolls of building paper, cans and other such articles, to the rear of the store where the paint department was to be found in a dark corner. The paint department shown herewith is well arranged for a small store which cannot boast an exclusive section for its paint. A neatly arranged display of brushes is shown in conjunction and it will be noted the paint is well arranged on the shelves with an index so that even a new employee would have no trouble putting his hand on the color and size of can required by the customer. Color cards are prominent and to this medium is added the service of the store employees who advise customers as to their requirements.

Moore's

"Save the surface and you save all" *Paint & Varnish*

House Paints

Guaranteed for Service

Moore's well known paints and varnishes are sold on an absolute guarantee of satisfaction or money refunded. The dealer never has to refund the money. This popular line of paints is manufactured for service, and they give it in the highest degree. Consumer satisfaction is assured when Moore's are sold. A Moore Agency for Paints, Varnishes and Muresco means bigger and better profit, new customers and repeat orders. We shall be only too pleased to supply any enterprising dealer with Color Cards and details of this splendid agency plan on request.

you whom you know. You have a preference for this sales person and have an interest in him, therefore, with a plan of this kind, your trade will be very much interested in the men behind the counter and will anticipate their wants, save them and even increase their planned purchases in order to favor the clerk they have in mind.

The result of the plan outlined was a very busy week for Mr. Paint Seller, in which a larger volume of sales was shown than for corresponding weeks during the previous years.

Getting Farmer Trade

Do not overlook the outlying trade in your territory. Many of the people come into town in automobiles and a great many of your people in your immediate vicinity also have cars. It is well then to make some special inducement for the automobile owners' trade. Many paint and hardware stores carry gasoline, and one dealer recently announced that during July and August a gallon of gasoline would be given free when filling tanks at his store. He had this announcement printed on an attractive postal card showing a picture of the store, which helped to identify his place of business, brought his name forcibly before the public, and these cards were mailed to every automobile owner within a radius of twenty miles, having first, of course, secured an up-to-date list of automobile owners for the purpose.

You see the "something for nothing" idea always brings a good crowd, and in this instance many new customers were made, for when they came to get the gasoline, many came into the store, and effective advertising displays and good selling on the part of the clerks and owner created many a new sale. While the gasoline tank was being filled special attention was called to new paints, varnishes, automobile cleaners, carbon remover, top dressings, etc., which this store carried.

The paint merchant in mind reports that splendid results were obtained from this little plan.

Effective Handbills Distribution

Handbills which are properly prepared, which are striking in appearance and tell a quick, effective story will bring good results. A Western paint store proprietor recently secured a good mailing list of all his regular customers and others that he desired as customers, and used this list for a timely mailing of circulars, giving current prices of paint, barn paint, etc., and made an attractive list of goods for the average house owner, but he took precaution to note that the use of this circular idea did not result in waste or loss.

The first thing he did was to buy a numbering machine, and before mailing the circulars he numbered them consecutively. The circulars bore the announcement that twenty of the numbers were prize winners. This was featured in large type. He told the people to bring the circulars when they came to trade at his store, as it was necessary to present them with the right numbers in order to secure the prizes.

This paint retailer selected for this purpose twenty different items from his stock and placed them on a big attractively trimmed table in the centre of his store, for instance a gallon of floor paint, varnish, a good paint brush, a gallon of linseed oil, a gallon of house paint, a gallon of white enamel, a gallon of gray enamel, a group of sponge, scraper, brush, etc. With each he displayed a card bearing a large number —39, 123, 410, 309, etc. You can easily see the effect of this plan. The retailer advises that the result from this work was really surprising, and made his circulation plan much more effective than ever before, for people who were not regular customers came in to look around, and in many cases were seen to take the circular from their pocket for a look at the numbers.

Livening-Up the Summer Paint Trade

During the hot days of July, August and September, one merchant places in his window an alluring sign surrounded by miniature icebergs on which appears the following:

"A long cool drink of ice water. It's part of our service."

Telephone shopping becomes more popular during the summer on account of the trouble of riding down town in a crowded street car or walking several blocks to one's favorite store. A paint dealer in Ontario makes it a point to call his customers at least once a week during the summer, impressing upon them the convenience of telephone shopping and the fact that telephone orders are given just as careful attention as personal orders.

E. G. LINDSAY

South African representative of Brandram-Henderson, Ltd., Montreal, who is now enroute to Cape Town and other South African ports in the company's interests.

E. G. Lindsay Goes to South Africa

MONTREAL.—E. G. Lindsay is now en route to Cape Town and other South African ports in the interests of Brandram-Henderson Ltd.

Mr. Lindsay has been connected with the Brandram-Henderson Company for a number of years in Manitoba and Saskatchewan territories. He secured an experience which his firm feels well fits him for the work of specially representing them in the South African field. The company has for many years had business in South Africa, and it will be the object of Mr. Lindsay to make a survey of present conditions and enlarge upon the present scope of the company's South African affairs, and to fully instruct the South African distributors of the company's products as to their use, etc.

Mr. Lindsay will perhaps be absent on this special work from 12 to 18 months.

Sherwin-Williams Picnic is Great Success

MONTREAL.—Employees of the Sherwin-Williams Company of Canada, Ltd., with their families and friends to the number of over 1,200, took part in a very enjoyable picnic at Lavaltrie, Quebec, on Saturday last. The steamer "Rapids Prince" was chartered for the occasion and provided a delightful trip down the river, leaving Montreal at 8.30 in the morning. The capacity of this boat was hardly sufficient to take care of the entire party, and a dozen automobiles were secured for the day, and those who were too late to secure places on the boat enjoyed the auto trip along the Quebec Highway, bordering the shores of the St. Lawrence River.

On arrival at the picnic grounds a baseball game between the office staff and the factory staff took place, the result being in favor of the factory staff, with a score of 4 to 1.

Following lunch, partaken of either

When it Bears This Mark

"Hillcrest"

It is the highest quality we know how to produce. "Hillcrest" is put on things we know can be backed up.

Hardware dealers should be particularly well stocked with the "Hillcrest" line this season. The least observant persons are aware of the unusual amount of painting going on and being planned for the immediate future. Don't miss the unusual opportunities this season—Send for our salesmen now, while the public is obeying the impulse to

among the beautiful pine trees or on the boat by those preferring it, a good programme of games followed by a tug-of-war took place, and this caused much excitement. An event causing much laughter was a pie-eating contest, for which a special prize was donated by the managing director, Mr. W. S. Fallis, and which was won by William McGowan, Jr. Quite a number of children took part in this event, and much merriment was occasioned from the fact that the party who cooked the rhubarb pies had omitted to put any sugar therein.

Shortly after 6.30 p.m. the boat left on its return trip with a happy, though tired crowd, arriving in Montreal shortly after 9 p.m.

Differential is Changed

Montreal.—Heretofore the differential charge for oil and turpentine in small containers, holding five gallons, has been 7c over the barrel price. This has been changed, and the present differential is 10c above the barrel price with packing charges extra. The new differential is based on the imperial gallon of 9 lbs. weight.

NEW POSITION FOR FREDERICK A. FARRAR

Those who have read the articles in connection with the sale of paint and varnish, which have been appearing in Hardware and Metal under the authorship of Frederick Arnold Farrar, will be interested to note the announcement that after 12 years in the service of Adams & Elting Company, he has now been appointed advertising manager of the Chicago section for the various working departments of The Glidden Co.

There are four companies in the Chicago section, Adams & Elting Co., Heath & Milligan Mfg. Co., Twin City Varnish Co., and the Nubian Varnish Co. Mr. Farrar will continue to make his headquarters with the Adams & Elting Co.

Mr. Farrar has been referred to as a "superb craftsman." He is a man of keen business judgment, an aggressive salesman and, as well, a clever writer, painter, musician, and in spite of the demands on his time in connection with these varied accomplishments he finds time to take active part in the building of better city and community conditions.

How Hardwaremen Advertise Paints---No. 11

AGAIN advocating the use of paint as a medium of economy in the present times of high prices, this advertisement asks the question: Does It Pay to Paint? No doubt this question has been asked by a great many people in recent years, and putting it in their own language immediately creates an interest.

The ad. goes on to point out that in view of the high prices of lumber, paint though also high in price, is much the cheaper of the two. It draws a parallel with the farmer who protects his crop against hail by insurance, himself against loss by insuring his house against fire, and then asks, "Why not protect that same house from the influence of the elements of nature by giving it a coat or two of paint?

The concluding paragraph of the ad. offers the service of the store salesmen in giving information for any job around the house. This extending of service free indicates to the reader that you are trying to achieve something else beside getting your percentage of profit in the easiest manner.

Does It Pay To Paint?

WITH the present price of lumber, good paint is by far the cheaper of the two. You protect your crop against hail by insurance. You protect yourself against loss by insuring your house against fire. Why not protect that same house from the influences of the elements of nature by giving it a coat or two of paint? It is a very good investment today even if paint does cost more than it used to. We handle

Heath & Milligan's

AND

Marshall-Wells' Paints

and we guarantee them with any paint you want to name and to stand the wear and tear of the weather, and to cover MORE surface per gallon than any other paint on the market. We also have the famous

Glidden Varnishes, Paints and Enamels.

It's name is a synonym for good varnish and a safe name for paints, enamels and every other kind of material the painter needs.

Being in the business it's likely we can give you some useful information in respect to that little job you intend to do in and around the house, and we will be pleased to do so.

Eastend Hardware Co.

Agents for Sharples Separators

The Luxeberry Painter Says:

"WELL FINISHED IS HALF SOLD. I often remind people of this who are building to sell. If it is necessary to economize on the building, cost let the finish be better than usual. Attractively finished interiors are investments that pay big dividends in quick sales and good prices.

"I know by experience there are no better finishing investments than Liquid Granite Floor Varnish, Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall Finishes, Luxeberry Spar Varnish, Berrycraft Stain Finishes, etc."

The great and always growing demand for Berry Brothers' products is based on their unquestioned merit.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 17.—Paint markets are still quite active, more than seasonably so. The manufacturers have still some trouble in securing wants of raw materials, although the shortage of some of these is less felt now that the real heavy rush is past.

Linseed oil has not receded from its $2.50 basis quoted last week, though there may be a tendency downward, with possible changes. At the same time it is only the arrival, say crushers, of English oil, that relieves the market here. Demands have been less urgent within the past ten days from the trade.

Turpentine is ruling with a somewhat easier undertone, and there may be a reduction in the basis ere long. Despite this the market is holding at last week's figures of $3.35 to $3.60 per gallon.

Whiting is still scarce and this means that the putty basis is firm and will probably hold in this position for some time to come. Dry colors and colors in oil are firm.

English Oil Arrivals Help Supply Market

Montreal.

LINSEED OIL.—Since last report there has been very little definite change in the way of improvement. The price base has remained at $2.50 and $2.52½ throughout the week, and what relief has been given the paint trade has really come about through the arrival of English oil. Crushers and jobbers alike report that seed arrivals from the United States are still very meagre and that extensive relief is not anticipated for the next few weeks. One crusher expressed himself that there would not be any material reduction on the present basis for perhaps two or three months.

Raw—	Imp. Gal.	
1 to 2 barrels	2 50	2 60
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 52½	2 62½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Little Relief Yet on Turpentine

Montreal.

TURPENTINE.—Shortage of turpentine still exists, and while prices are somewhat easier than they were a few weeks ago the basis still remains at $3.35 as quoted last week. It is difficult to get adequate supplies forward and jobbers express themselves as desiring not to entertain any orders whatever. Ten cents per gallon above barrel price is being quoted on small quantities, with packing charged extra.

Turpentine—	Imp. Gal.	
Single barrels	3 35	3 60
Small lots	3 70	3 90
(Packages extra)		

Scarcity of Whiting Keeps Putty Price Firm

Montreal.

PUTTY.—There is little change in the putty market, although jobbers still experience difficulty in getting necessary supplies of English whiting. One jobber reports the receipt of a few hundred barrelse, but taken in a large way there is still difficulty in getting this commodity forward. Putty prices are firm and sales are good, with quotations as follows:

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Glass From Belgium Relieves Situation

Montreal.

GLASS.—The receipt of glass from Belgium in rather extensive quantities serves to correct, in a large measure, the shortage of glass that has been manifest here for a long time. This has been a welcome relief in view of the fact that other sources did not yield a great deal of glass. The market is running along on a more even keel, with prices quite unchanged.

Paints a Bit Quieter But Still Are Active

Montreal.

PAINTS AND VARNISHES.—Prices have been steadily firm on prepared paints and varnishes and all specialties. There has been a steady out-turn to the trade for a long time, and while there is at present a slight falling off of trade there is much activity around the paint factories. Sorting orders are frequent.

Demands Still Are Active For White Lead

Montreal.

WHITE LEAD IN OIL.—Prices are firm on white lead in oil, and the movement is reported as very active for this season of the year. Orders received are frequent and the tonnage moving along to the trade is large. Prices have been ruling steady, without change. Standard lead, in 5-ton lots, per 100 lbs., are selling at $19.50; 1-ton lots at $20, and smaller quantities at $20.35. One jobber states that there is a present demand for the adultcrated lead in considerable quantities.

TORONTO

TORONTO, June 17.—The feature of this week's paint market is the decline in the price of both linseed oil and turpentine, linseed oil having been reduced about 37 cents per gallon. Lower prices on turpentine will approximate a decline of about 50 cents per gallon. Putty prices are very firm, due to the great scarcity of whiting. White lead in oil is having good demand. Ready-prepared paint has been moving out freely and those looking for a record business during the season may have their best hopes realized, providing the present demand continues, it is stated.

Quotations on nearly all grades of varnish are very firm, although quotations are holding fairly steady. Collections are very satisfactory and money seems to be circulating freely.

Putty Quotations Firm; No Price Changes

Toronto.

PUTTY.—Prices remain unchanged although the present quotations are very firm. The scarcity of whiting has shown little relief, and manufacturers state they have difficulty in securing supplies. This is attributed to the unsatisfactory condition of the English market, which has been greatly disrupted, due to the recent war activities, and English producers claim they have difficulty in securing sufficient labor at the chalk quarries to handle the heavy demand which is pouring in from all sources. The increased cost of producing whiting from other sources, as well as the difficulty of keeping production up to the requirements of the demand, is also a factor in this market and high, firm prices for putty is the result. The following are the quotations:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

"Save the surface and you save all" *Paint & Varnish*

Let this *Worthy Brand* Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want **you** to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will **pay** you to sell Jamieson Paints and Varnishes exclusively to your customers.

Linseed Oil Prices Drop From 30c to 37c Gal.

Toronto.

LINSEED OIL.—Lower prices have been made this week on linseed oil, the price having dropped from 30 to 37 cents per gallon. It is believed that this is mainly attributed to the appearance of English oil on the market, as Canadian crushers state that they are still unable to secure shipments of sufficient seed to materially affect the price. The following are the new lower quotations:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 50	2 65
3 to 5 barrels, gal.	2 49	....
10 barrels and over, gal.	2 47	....
	Boiled	
1 to 2 barrels, gal.	2 53	2 68
3 to 5 barrels, gal.	2 52	....
10 barrels and over, gal.	2 50	....

Prices shown are those ruling on Thursday of curent week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Prices Drop About 50 Cents Per Gal.

Toronto.

TURPENTINE — Considerable improvement has been made on the price of turpentine and a lower price has been made which is approximately 50 cents per gallon below former quotations. Some difficulty is still being experienced in securing supplies owing to badly congested freight conditions. Importers state it is necessary to pay for supplies in United States currency before shipments are made. There is also the exchange situation to contend with, which is the cause for considerable uncertainty as the rate fluctuates so frequently. The following are the new quotations:

Turpentine—	Per imp. gal	
1 barrel lots	....	$3 50
2 to 4 barrel lots	....	....
5 gal. lots	....	3 65

Ready Prepared Paint Enjoying Good Demand

Toronto.

PREPARED PAINT.—The present demand for paint is very brisk and all in the trade are rushed with orders. The present quotations are very firm and with the present high price of ingredients lower quotations are not looked for at present. Manufacturers state that some difficulty is experienced in securing supplies of certain pigments, and some colors are hard to procure, it is stated. Supplies of linseed oil and turpentine are also limited, although this condition it is expected will soon be overcome. The present quotations are as per current quotation pages.

White Lead in Oil Has Fair Demand

Toronto.

WHITE LEAD IN OIL.—In line with the brisk demand for nearly all paint commodities, white lead in oil is moving out in fair volume, and those looking forward to a record season may have their hopes realized. Foreign demand is also of a heavy nature, it is stated, and a fair volume is being exported. Corroders state the present demand is almost greater than the supply and are rushed to keep up with the incoming business. The quotation on pure remains at $20.35 per hundred pounds in ton lots, while $20.70 per hundred pounds is the price in less than ton lots.

Window Glass Stocks Light; Price Firm

Toronto

GLASS.—Warehouse stocks of glass are comparatively light considering the heavy demand which is current, especially for this season of the year. The large building activities which are being carried out in many localities account for large glass requirements. Notwithstanding the world's shortage of glass, jobbers and importers state they have been able to procure fair quantities, but the freight congestion on some of the United States railroads has seriously delayed shipments, and some state that while they have been able to secure shipments from the manufacturers that they are unable to obtain deliveries from the railroads. The present quotations are firm. The single and double diamond are quoted at 15 per cent. discount, while cut lights are still being sold at a discount of 40 per cent. from the list.

Paris Green Demand Is Daily Increasing

Toronto.

PARIS GREEN.—A good demand has been current for Paris green during the past week and fair quantities are moving. Prices continue unchanged and quotations are from a firm basis. The present prices are as follows:

Paris Green—	Per lb.
½-lb. pkgs.	0 58
1 lb. pkgs	0 56
25-lb. drums	0 54
50-lb. drums	0 53
100-lb. drums	0 53
250-lb. kegs	0 52½
600-lb. barrels	0 52

Paper Dearness

Effect on the Press

In view of the suggested further advance in wages and the very serious situation which must arise in that event, the British Weekly Newspaper and Periodical Proprietors' Association has issued a memorandum regarding the high cost of production, in which it is pointed out that since 1914 proprietors have had to meet a continued succession of increases in cost of production and distribution, increases which, since the armistice, have been intensified. The conditions under which they are at present laboring include:

1.—High price of paper, blocks, contributions, and illustrations.
2.—Higher salaries and wages.
3.—Altered conditions as to working hours, overtime, holidays, and so forth.
4.—Higher railway and other transport rates.

Before the war newsprint (paper for newspapers) cost 2c per lb., whereas it is now 12½c per lb. and over; and there have already been eleven separate advances in printing charges, which have thereby been increased by 120 per cent. to 200 per cent.

For a 32-page weekly paper, with a circulation of 150,000, this means an increase in the cost of printing alone of between $25,000 and $30,000 per annum.

A publication using 20 tons of paper per week was spending in the purchase of paper before the war $830 per week—just under $50,000 per annum. The present cost of the supply for one week's issue for a paper of the same size at 12½c per lb. is $5,780, an advance of $4,850 per week, or $252,200 per annum.

Attempts have been made to cope with these increases by reducing the size of publications, raising the sale price, and by considerably increasing advertisement rates. These efforts have, however, been quite inadequate to meet the increased charges, and many of the publications are, in fact, now running at a substantial loss.

These conditions necessarily affect a very large number of smaller firms to a much greater extent than they do the big corporations, and it must be realized that in the aggregate these smaller firms employ far more labor than the larger concerns, so that when, as is inevitable if conditions do not improve, many of the smaller papers drop out as their reserves are exhausted, unemployment must ensue.

Winnipeg Wholesalers Favor Four Per Cent. Tax on Manufacturers

The wholesale trade of Winnipeg, Man., has placed itself on record as favoring a sales tax of four per cent. on sales by manufacturers or importations, and that it shall be compulsory for the manufacturer to show this upon his invoices, rather than the present one per cent. sales tax, also that the excise taxes of ten, twenty and fifty per cent. shall be paid by the manufacturer at the time of sale or on importations. A thorough revision of the articles classed as "luxuries" is advised. This shall be made upon a scientific basis with a view to eliminating the present unfair discrimination. It is also urged that whatever system is adopted, that in the case of both excise and sales taxes, it shall be compulsory that the tax be shown on the invoices, and in whatever form it is collected, it shall be collected upon the total monthly turnover of the vendors, payable upon the 31st of the month, following the last day of the month upon which the tax is to be based.

Opposition was expressed against the methods as first proposed by the Finance Minister, contending that the suggestions of the Finance Minister would produce dislocation of business and defeat the aims of the Government. The new taxation also discriminated against certain industries in favor of other industries.

The Agate Family

Home Beautifiers by Occupation

Here's a line with a special sales-making pull. Every member of this family appeals to customers interested in beautifying the home—and who is not so interested?

A particularly interesting member of the group is Agate Varnish Stain, made from our well-known Agate Floor Varnish. This popular stain saves labor by performing the two operations of staining and varnishing at once. In eight beautiful shades and natural.

Ask for literature about the Agate family—it's a money-maker for the hardware trade.

Livingston

THE KIND YOUR GR

FOR 56 YEARS THE STANDARD

In the old days the name "Baden" signified everything good that could be said of linseed oil. It was the merchants' and the customers' guarantee that the oil was the best that could be produced.

Even to-day the name "Baden" is still the "buy word" for the older generation, but it is generally being replaced by the name of the originator.

This is the result of the expansion of the Livingston organi-

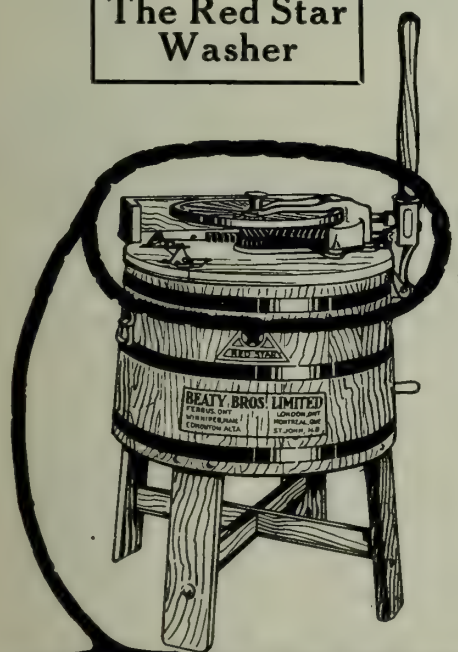
Legs are Detachable

The Red Star Washer



Mechanical Parts Compact

Beatty Bros. Limited Bulletin

A Guiding Star To Profit

The Red Star Washer sells easily. It delights the purchasers. It is very plainly marked with the Red Star so that consumer's satisfaction is directly connected with your store. This leads to permanent future business and guides you to greater profit.

Mechanical Supremacy

is self-evident from the moment a customer tries the easy working lever of the Red Star displayed in your store. She feels the easy operation which results from the two sets of ball-bearings and the machine-cut gears. The legs are bolted on—not formed by staves extended which makes a great strain on the tub. She is convinced when you show how the dolly may be lifted before the lid is raised, freeing the dolly from the weight of the clothes.

Easy to Sell—Easy to Store

Red Star Washers sell with remarkable ease because the selling points are so convincing; but even for the short time that Red Star Washers remain with you, storage is a valuable consideration. Shipped in a crate with working parts inside the tub, it is but the work of a moment to assemble. Packed, it takes little storage space and is protected until needed.

Prompt Shipment

It is practically impossible to get prompt delivery elsewhere even if you could find a machine to compare with the Red Star, but these desirable washers can be sent you at once. We are making special effort to supply the demand and have machines on hand that can be ordered now. Write nearest branch

TONCAN METAL

—More Business For You

A DEALER who is known to handle the best and most reliable goods naturally gets the majority of business from the best class of trade. TONCAN METAL is well known as being rust resisting and exceptionally long lived.

When you offer TONCAN METAL your customer knows immediately that you are recommending something good, as for years this product has been advertised extensively throughout the Dominion.

As a dealer in TONCAN METAL you will continually benefit by this advertising.

Galvanized, Fabricated and Stocked in Canada

SOLD BY ALL SHEET METAL JOBBERS

All TONCAN METAL sheets used in Canada are galvanized in Canada in a modern plant by the most approved processes. Sheets are carried in stock ready for shipment. All the usual sheet metal building accessories such as Eaves Trough, Conductor Pipe, Roofing, Siding, Shingles, Ventilators, Metal Lath, Rib Fabric, and Reinforcing Plates are fabricated and distributed from convenient points.

GLIDDEN

PAINTS – VARNISHES – COLORS – INSECTICIDES

Everywhere on Everything

To meet the Dealer's need

In every locality there is a need for painting materials — in business as well as the home. Everywhere there are surfaces that require protection and decoration.

Be prepared to take care not only of home requirements but business demands as well. Don't limit your profits with limited stocks. A study of the Glidden list of products will reveal a vast market to you. Glidden factories are producing quality products for every conceivable paint and varnish purpose — paints for industry, for factory, equipment and product; paints for commerce, for buildings, shipping and railway; paints for the house, inside and outside—*everywhere on everything.*

To represent Glidden in any locality has come to be a tangible asset for you. Glidden reputation will reflect its good influence upon your business generally. Write to-day for the Glidden proposition.

Every Reason To Order Early

Present conditions make it advisable for the hardware merchant to look ahead and to buy glass well in advance of his needs to insure delivery. Don't be caught without a stock when Fall comes. The builders, who have been delaying their glass installations, are awaiting a price drop which cannot come.

Every merchant who believes in preparedness should carefully sort up on his lines of glass and order to fill his requirements in plenty of time to have his wants attended to without rush and haste and to insure deliveries at a convenient time.

By such policies the merchant enables us to give the maximum of useful service to the trade.

Stephens'

REGISTERED TRADE MARK

"Save the surface and you save all" *Paint & Varnish*

Makes Friends With Consumers

Because this durable, reliable house paint stands up squarely to the severe weather test of the Canadian climate. It spreads and works evenly over surfaces to the delight of the most particular professional painter.

When you offer *Stephens'* house paint to your customer it is equivalent to offering him an insurance policy on his house against deterioration. It's a genuine surface-saver and actually saves your customer money for which he will be grateful to the *Stephens'* dealer—good-will means continued trade.

HARDWARE SPECIALTY LINES WANTED FOR WESTERN CANADA

P. R. BRECKEN, Limited

Manufacturers' Agent

108 Sixth Avenue West

CALGARY ALBERTA

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

If interested, tear out this page and keep with letters to be answered.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Solex
Electric Lamps
Pure Continuous Filament

Solex Lamps combine quality materials, and superior workmanship, to which is added a lamp—life guarantee of 1,500 hours. A lamp that will save you money.

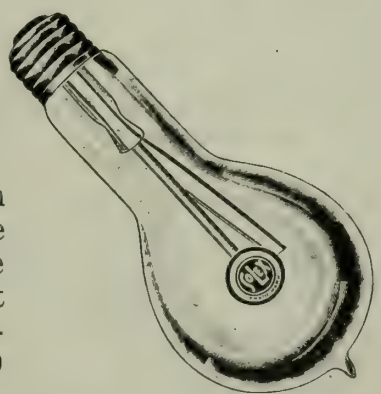
The Blue Bulb Lunar Lamp when illuminated gives a soft and diffused light. A most suitable lamp for window illumination. All Solex Tungsten Lamps are pure continuous filament, drawn through diamond eyes into a fine, strong wire. Breakage is minimized through springy metal supports.

Round Tungsten

Brilliant — yet economical; Solex Nitrogen Lamps give a white, intense light closely resembling natural light. They give more light with the same cost for current. The Solex Low Voltage Nitrogen Lamps are specially designed for use on farms. Conserve electricity, yet give a steady, bright light.

Tungsten Lamp

The Round Bulb Tungsten Lamp will be found in some cases more suitable than the pear-shape. Can be used to fit in smaller electric light fixtures, and etc. Carries 1,500 hour guarantee.



Nitrogen Lamp

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

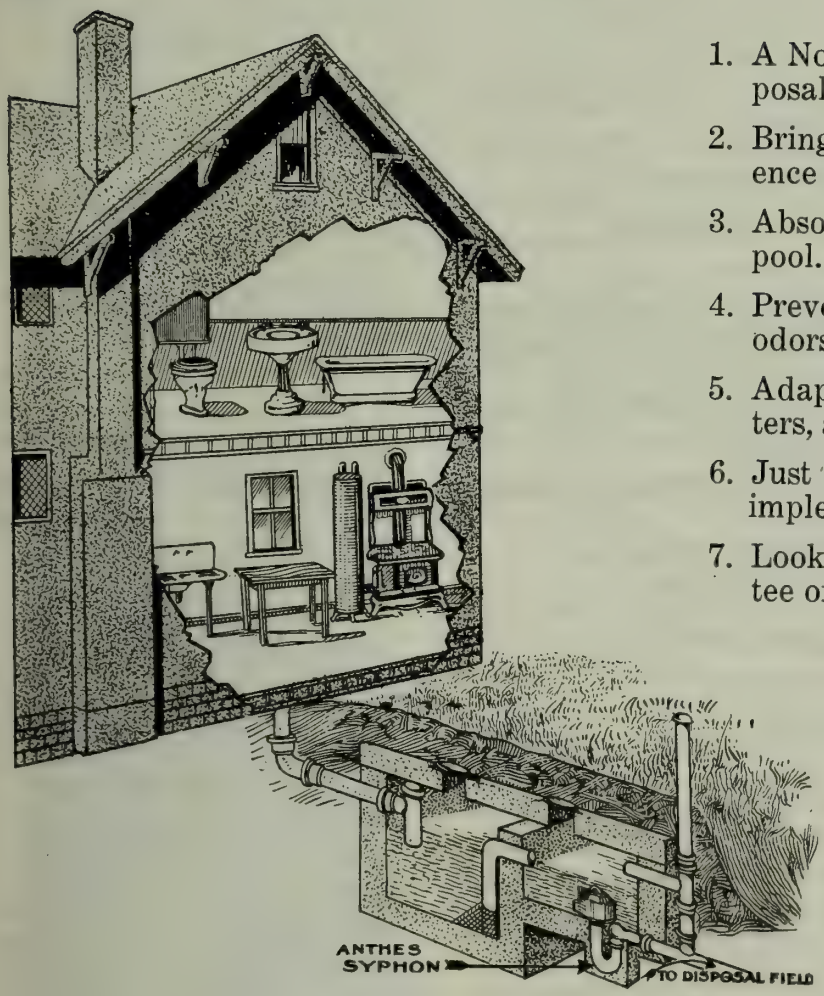
Use these ANTHES Selling Points



1. A No-trouble system of Sewage Disposal.
2. Brings family comfort and convenience to the Country Home.
3. Absolutely sanitary; it is not a cesspool.
4. Prevents disease and disagreeable odors.
5. Adapted to the severe Western winters, and WON'T FREEZE.
6. Just as much a necessity as good implements in the farm land.
7. Look for name—Anthes—a guarantee of reliability.

Your Anthes customers will stay with you because you sell perfect satisfaction when you sell the Anthes. And you boost your sales of Plumbing Fittings at the same time.

Descriptive circular and blue print sent on application.

LACO TUNGSTEN AND NITRO LAMPS

ARE

BACK AGAIN

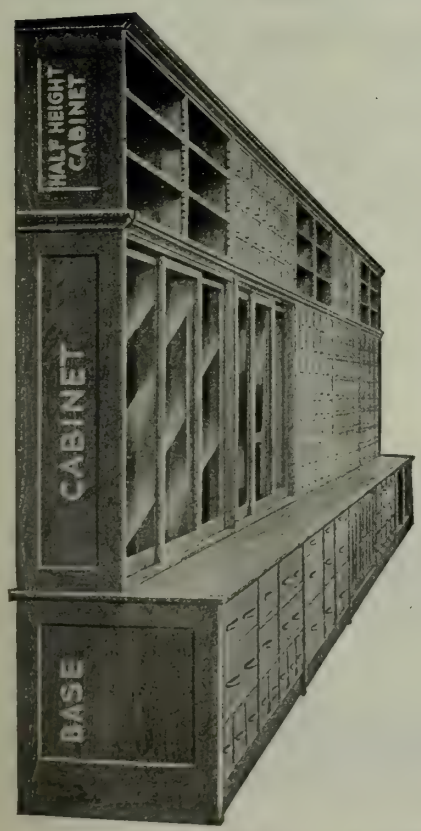
After a period of nearly two years during which, it has been practically impossible to secure them, we are again in a position to fill your orders for these well known lamps.

And there is no difference between the lamp we can now ship you and the previous ones except that, whereas they were formerly made in Holland, they are now made in Canada.

The quality and efficiency are the same. When you supply a customer, with one of these lamps, you are not guessing, **you know** that you are supplying him with lighting satisfaction, you have our guarantee as to that. So if you have not arranged for your supply, do so now.

GREAT WEST ELECTRIC COMPANY, LIMITED

WINNIPEG



"DULUTH"

Sectional Hardware Store Equipment

The Unit System

When locksmiths filed out locks one by one they were expensive and crude. Standardized and stamped out by modern machinery, they sell from twenty-five cents up.
It's the special made-to-order suit that costs the most.
Just so store furniture; built in quantities on the standardized unit plan, is the biggest value for the money. It is flexible, adaptable to any lay-out, and not injured in the least by moving or rearranging. Not a high-cost system that only a few can afford, but a practical, commonsense, medium priced system for all retail hardware merchants, whether large or small. It is an improvement on the old store that will fit in the new store as well, and can be added to at any time. It grows with the business, and makes the business grow.
An illustration of a typical unit is shown. It consists of end panels placed at the end of each combination; one or more bases, which may be fitted with doors, drawers, shelves or bins, and cabinets or half-height cabinets, fitted with shelves, display doors, sliding doors or interchangeable drawers of assorted standard sizes.
"Increases sales and cuts costs."

Makers of "Duluth" Sectional Hardware Store Furniture

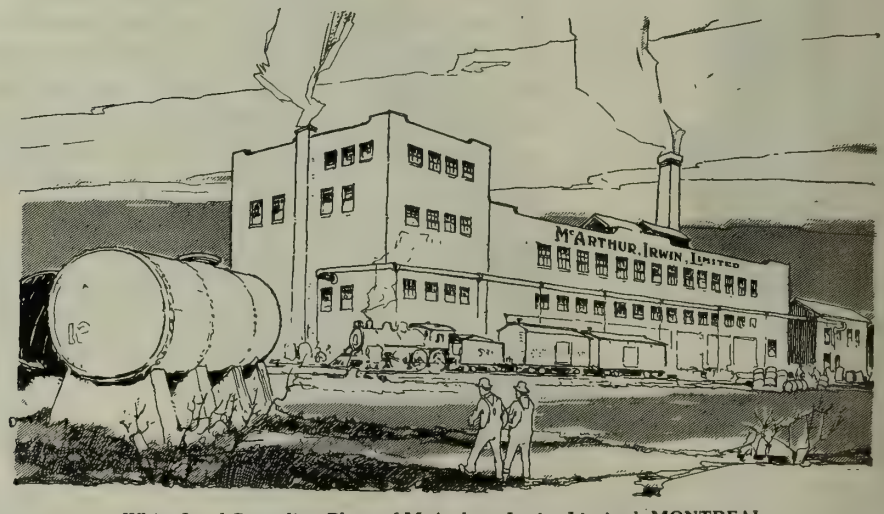
CROWN DIAMOND WHITE LEAD

Admittedly the finest white pigment produced in Canada. It is corroded under the most skillful technical control by our new and greatly improved process—

Crown Diamond White Lead is a pure, beautiful white of silky smoothness, free from moisture, of uniform grade and the highest quality.

Crown Diamond White Lead is backed by the reputation of an old established firm and is the best White Lead you can buy.

Write to-day for our interesting booklet "From Pig Lead to White Lead." It describes our process of corroding.



White Lead Corroding Plant of McArthur, Irwin, Limited, MONTREAL

CROWN DIAMOND LIQUID PAINTS

Crown Diamond Paints have endured since 1842 and the enviable reputation they have gained during all these years is known from coast to coast.

That Crown Diamond Paints are of an unusually high standard—that the formula on which they are manufactured makes them look better and last longer is shown by many expert tests and the opinions of unbiased paint authorities.

Help your customers to a better understanding of paint by selling them this old established proven line—

"Save the surface and you save all" Paint & Varnish

We will gladly tell you more about this thoroughly practical Paint. If you will write to-day to

Morrow Drills for Particular Buyers

The most particular buyers in the average hardware store are men who demand tools of precision, tools that will do their work correctly down to the thousandth part of an inch.

These men are always willing to pay a fair price for a good product.

They include superintendents, foremen and individual users of tools. Their patronage is highly desirable—they need and want the best. When it comes to drill requirements they are critically careful.

You will require less selling time and effort to sell "Morrow High Speed Forged Drills." If you carry a complete stock of "Morrow High Speed Forged Drills" the news will soon spread around among drill users.

You can safely guarantee every "Morrow" drill. They are made from hammered steel bars—"Morrow" tempered—made with a graduated thickness of web, giving strength where strength is needed.

Architects Find

CLIMAX

SHEATHING PAPER

Very Satisfactory

The increasing demand for Climax Sheathing Paper indicates that architects appreciate its quality and usefulness and are specifying it largely.

Climax is a tough Kraft paper coated with high grade asphalt. It is both durable and waterproof and very reasonable in price.

It is unexcelled for damp-proofing purposes. It is used between footing and foundation; between foundation and wall; underneath floors in houses; in walls before lath and plaster are put on.

Besides keeping out dampness, Climax Sheathing Paper also keeps out the wind —which makes it especially valuable for houses in exposed locations. It makes houses cooler in summer and warmer in winter. It saves coal. It is also used for all manner of insulation and cold storage work.

Samples and prices of Climax Sheathing Paper and any further information desired will be mailed on request.

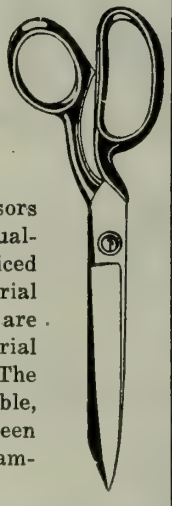
"ACME" Leads 'Em All

Famous Since 1874



"Acme" cast Shears, Scissors and Tinners' Snips excel in quality and finish for low priced cutlery. The special material and strengthening elements are controlled from the raw material to the finished product. The blades are tough and durable, and have the Acme famous, keen and sharp cutting edges—famous the world over.

"ACME" Shears and Scissors are profitable to import: discriminating importers do not hesitate to carry adequate stocks. Our exceptional manufacturing facilities enable us to satisfactorily fill orders, and to quote interesting prices.

A COPY of our No. 5 Illustrated Catalogue—"The Scissors Encylopaedia"—will be sent on request. All prices F.O.B. Bridgeport, Conn.

The safe revolver to use is the safe revolver to sell

THE same reasons that make the Iver Johnson the safe revolver for home protection make it the fastest-selling revolver for you to stock. The fact that you can drop it, thump it, jolt it, or even "Hammer the Hammer" without fear of accidental discharge, makes men, and women, too, feel the security of its safety.

32 Caliber Hammerless Regular Grip.

And so, while the Iver Johnson is essentially a man's revolver, its absolute safety from accidental discharge make it the accepted and ever-present assurance of protection to the home, property, and personal safety of the American woman.

38 Caliber Hammerless Perfect Grip

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not carry Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

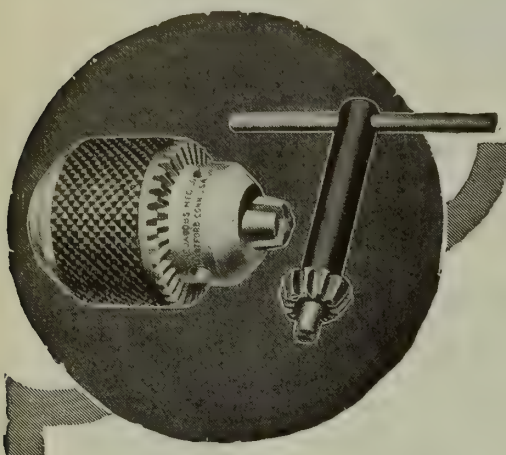
JACOBS CHUCKS



---as advertised

Jacobs Chucks have always fulfilled what has been claimed for them.

Their tested and proven performance has made them the choice of the driller and the preference of the purchaser. Hence their selection as standard equipment by foremost drill makers.

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

Profit Makers—All Three

IMPERIAL Parowax, Imperial Household Lubricant, and Imperial Ioco Liquid Gloss are in demand the year round.

All three products are needed every week for some one of their many uses, and the average housewife usually must replenish her supply frequently.

These products are staple specialties—not seasonable sellers. You can afford to give them valuable counter and window space.

Look to your stocks to-day and make sure you are supplied. Ample stocks assure satisfactory profits.

New stock can be obtained from Imperial Sales branches in leading cities.

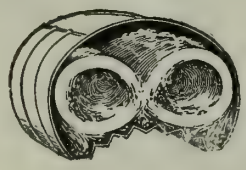
"Let's Get Acquainted"

"I'm the magic figure eight movement of the 1900 Cataract Electric Washer, and folks are hearing of me from Coast to Coast.

"What do I do? Well, I wash clothes faster than the ordinary washer. The hot, cleansing water swirls through the clothes in a figure 8 motion—and four times as often.

"This 'figure 8,' is an exclusive feature of the 1900 Cataract Electric Washer."



The water swirls through the clothes a figure 8 movement —four times as often

1900 CATARACT Electric Washer

The swinging reversible wringer saves steps, swings right around without moving the washer.

The "1900" is easy to operate. Connects with the electric light socket. In 8 to 10 minutes out come the clothes sweet and clean. In order to "cash in" on the present day demand for Electric Washers, you will find it to your advantage to get acquainted with the "1900" Cataract Washer—the mechanically perfect machine that you can depend upon to give complete satisfaction in every household where you install it.

Our extensive national advertising in magazines and newspapers is creating a widespread opinion that the "1900" is THE Washing Machine of the day—and it takes little effort on the dealer's part to make sales at a goodly profit.

Write for our proposition—our line include Electric Motor, Engine Power, Water Power, and Hand Washers.

Is There an Alien Menace in Canada?

IN THE years of war, people were quick to grasp the possibilities of danger that lie in Alien sympathies. But people quickly forget, and therein lies the danger for it is in the insidious breaking down of the ties of loyalty, that goes on in the piping times of peace, that makes the menace of the days of war.

In "The Stranger in Our Midst" the simple story of a school teacher's experience in foreign settlements in the West there lies a reproach and a warning, a reproach in that such things can be, and a warning that they may not happen again.

This is only one of the many stories and articles that make the June 15th issue of MacLean's Magazine of outstanding interest.

These are some other points of interest:

FICTION

"The Little Warrior"—Pelham Grenville Wodehouse's inimitable story.

"The Parts Men Play"—Arthur Beverley Baxter.

"The Sunset Homesteader" — Will E. Ingersoll.

"The Bettle and the Butterfly"— C. W. Stephens.

ARTICLES

"What Must Be Done?"—Mrs. Murphy's suggestions of a remedy for the drug menace.

"We Must Reform Dress"—Marian Keith.

"Gentlemen of the Fourth Estate"—The story of men who begin life in newspaper offices.

The Best From Everywhere

In the Review of Reviews department will be found the best articles from all magazines and periodicals the world over. Look at these titles and authors:

"Belgium Has Come Back"—by Frederick Palmer.

"How the English Came to Be"—by Rudyard Kipling.

"Eight Billions Wasted"—by Thomas V. Merle.

"Mankind Needs Change of Heart"—by Sir Philip Gibbs.

"Give Labor a Square Deal"—by Charles M. Schwab.

"The Slow Conquest of America"—by Forrest Crissey.

"Know Your Own Car"—by Alexander C. Johnson.

"Sending Pictures by Telegraph"—by Milton N. Stoddard.

MADE IN CANADA

Westco

A Water System Without a Tank

For operation off Hydro or Farm Light Plant

A New Field for Profit

THE need for such a water system as the Westco is urgent in rural and suburban homes to-day. Wherever introduced it is selling rapidly. For its many interesting and splendid features make instant appeal to the farmer or rural resident who has electricity available.

Get even one Westco System installed in your territory, and it will sell many others. It is a small, compact system, yet absolutely efficient in every detail.

Its chief selling features are:—

(a) It has no supply tank.
(b) Simplicity of construction; no complications possible.
(c) Pump has only one moving part—the impeller. Nothing to wear out, except one bearing, which will last for years.
(d) Cheap to install, maintain and operate.
(e) Entirely automatic.
(f) Has no tank, no valves, no gears, no belts, no springs, no oil or grease cups, and it is self lubricating.
(g) Uses less power than Electric iron while supplying water for four faucets.
(h) Pumps 300 to 500 gallons per hour.
(i) Size 16½" long, 14½" wide and 11" high, weighs less than 100 pounds.
(j) Opening of any faucet starts pump; closing of faucet stops it at once.

If your territory is still open, write us at once for full particulars and details of this splendid selling water system.

Westco Pumps Limited

707 Yonge St. Toronto, Ont.

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.

OTTAWA

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Says a Reader of Many Years Standing:

"I do feel that your paper is the most interesting and readable financial journal published in this country and, perhaps, in the entire North American Continent. Each week I somehow find time to read every word of it—mostly in bed, late at night. I find I have to read THE FINANCIAL POST in order to maintain myself properly abreast with the bigger things and movements taking place in this country."

THE FINANCIAL POST is published for men who are interested in big things—not necessarily men who personally have big financial interests at stake, but for men who are eager to know what is happening that will have a bearing on business and the well-being of Canada generally.

THE entire editorial organization of the MacLean Publishing Company is at hand to co-operate with the editors of THE FINANCIAL POST. Specialists in many businesses write for THE POST. A practical farmer, in constant touch with the farming conditions, deals with crop prospects.

THE POST is a paper edited by specialists for business specialists.

The Publisher's Page

TORONTO JUNE 19th 1920

Advertisement Pulled Business for 21 Months

On May 26, 1920, the Dominion Battery Co., of Toronto received an order from a Quebec Hardware Merchant (name on request) for goods advertised in the August 24, 1918, Fall Sales Number of Hardware & Metal—21 months after the advertisement appeared! The page advertisement from the August 24 number, 1918, was pinned to the order.

32nd Annual Falls Sales Number of

HARDWARE & METAL

Canada's National Hardware Weekly will appear on

August 21

It will reach the trade at a very critical time for manufacturers and producers—at the height of the change in business conditions which is just beginning. The scarcity of goods in many lines is being overcome. Already the buyer is beginning to consider choosing, rather than merely taking what he can get.

The hardware trade of Canada looks to Hardware and Metal for all important trade messages, for news of markets, legislation, new goods, new selling methods and all similar news. Business will shortly need readjusting; it will be essential to have your goods strongly before the trade this fall. Can you afford to have your dealers find your advertisement missing from the fall number?

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

Montreal Branch, Southam Bldg. **Winnipeg Branch, Union Trust Bldg.**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

The Best You Can Sell

COLT'S
FIRE ARMS

Dual Protectors of the American Home!

WHAT home would be without the beneficent insurance policy which restores and repairs after loss and damage.

Without insurance those catastrophes, beyond the power of individuals to prevent, would be complete. And householders are being told to companion this insurance with the protection of a COLT to thwart harmful and evil influence which, unless prevented, lead to catastrophe.

These evil influences take various forms. The auto thief can be put to flight if interrupted by a COLT as he attempts to run a car out of the garage at night. The fire bug does not make a ruin of the home or factory against the argument of a COLT. The night prowler caught upon the veranda has no other thought but flight when brought face to face with a COLT.

Your sale of fire arms can very easily be doubled if you use these arguments to householders who wish the fullest protection for their homes and property.

is for the welcome way O.P.W. wins wealth for watchful merchants. O.P.W. will work well wherever weather-worn wood wants painting, warranting welfare for whoever would win wages for "wad" or wallet.

"Save the surface and you save all" Paint & Varnish

"Paints and Varnishes for Every Purpose."

Protective Farm Painting

The modern farmer is a shrewd business man. He not only keeps books—he "keeps tab" on the general efficiency of his farm. He is perfectly aware that deterioration of his buildings and equipment may go far to offset success from his direct effort toward production. His constantly read farm papers teach him that, and our advertisements in those favorite papers of his drive the lesson home practically, and at the same time suggest your store as the source of his supplies—if you're an O. P. W. Dealer-Agent.

O. P. W. Paints and Varnishes offer a wide field of opportunity to the alert hardwareman for many other prospects beside those in the rural communities. Sort up your O. P. W. stock with a view to turning every inquiry into an order. The O. P. W. Dealer-Agent prospers.

If You Are Not Yet Handling O.P.W. There is a Profitable Plan Waiting for You

A TRADE MARK

One of Your Best Assets

What does Canada stand for? Canada has won a name for itself in the last five years, and it is known and spoken all over the world. This is going to be a wonderful asset for the manufacturing concerns throughout Canada. If you are going to introduce your goods in England, France, and other countries and say that they are "Made in Canada," that fact will be appreciated and you will find yourself entitled to a hearing.

But how about your own concern's goods? Are they known and are they entitled to a hearing, or are they just the common what-you-call-it line? To make a success of manufacturing a product and placing it on the market, the prduct should be trade-marked. Make your products carry a name, so that when they go to a pleased purchaser, he can again obtain your products. Remember, it is not the single sales that build a business, it is the repeated orders from satisfied purchasers. Teach these purchasers to ask for your goods by your trade-mark or trade-name, and you will soon appreciate that the trade-mark is a wonderful asset to your business.

Every firm knows **"Dart** Unions," **"C.G.E.** Electrical Goods," and **Gillette** Razors," How do you know these names? It is not because that particular line of goods is superior, but because the firms making these particular products have made their trade-mark familiar to you. These trade-marks sell thousands of dollars worth of goods every year, because people know that these trade-marks are the guarantee and that the firms behind the goods are reputable.

OUR BUSINESS HAS BEEN BUILT ON THE SERVICE WE GIVE

We make a specialty of designing attractive, forcible trade-marks, and would like an opportunity of designing such a trade-mark for your company, and we will take the time to study out the features of your goods, and, if you have not a particular mark in view, we will draw up a design for your approval. We feel that after getting together on the matter, you will see that it is a valuable asset of your business which you have been overlooking.

For Foreign Trade-marks. You should be very careful sending out your goods, so that foreign purchasers will know that when they ask for YOUR goods, they will receive the product of your firm bearing your stamp of guarantee. We are in a position to handle foreign Trade-mark applications with the least possible delay.

Why not write us to-day, asking us to submit a suggestive trade-mark for your approval. Have your goods branded and ready for repeated sales. It pays to have Shipman's, at Ottawa, to give your business prompt, personal attention.

Do You Know

O-Cedar Polish ?

Not O-Cedar **furniture** Polish. Not O-Cedar floor Polish. But O-Cedar Polish?

Do your customers know the many ways O-Cedar Polish may be used?

Many folks are under the impression that O-Cedar Polish is only a wonderful furniture Polish. That is a mistake.

Get them to try it on their cars. What a surprise! O-Cedar polishes a car just as beautifully as it puts a gleaming surface on the baby grand piano, leaving a clean, hard surface that does not easily collect dust.

Other customers may not have tried it on their floors—suggest a trial—and incidentally show them the O-Cedar Polish Mop with the long handle. It saves stooping or reaching for high spots or low places.

Many a housewife will welcome these suggestions and thank you with real cash sales—then come back time and again for more O-Cedar, as she finds additional uses for it around the house.

"Suggestion" is a small word, but large profits are hidden in every letter of it.

Channell Chemical Co., Limited

TORONTO

HARDWARE AND METAL, June 26, 1920. Volume XXXII., No. 26. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

Just about *now* the cars begin to lose their lustre

Gives—

—a lasting lustre.

—a surface you can keep bright by merely dusting.

—a surface that a damp cloth will keep bright even after rain.

"Nonolio" is a polish absolutely free from oil — backed by a $1,000 guarantee that it contains no oil, acid, grease or grit and that it will not harm the finest varnished or enamelled finish.

"Nonolio" is waterproof, will not fingermark or retain dust. Endorsed by leading motor car manufacturers.

"NONOLIO" is Made in Toronto

THE car that came out spick and span in the spring is by now beginning to feel the effects of the weather, the grime of the roads, the cleaning. The high polish loses its lustre and should be renewed. Now is the time to "Save the Surface" by the use of a good polish. We sell the leading brands and can give prompt delivery. Ask the "RICE LEWIS" man about these lines or write direct.

O-Cedar Polish

HAVE YOU ALADDIN DYE SOAP IN STOCK?

JOHNSON'S PREPARED WAX

—in liquid and paste, makes a hard, dry gloss-like polish which does not collect or hold dust. Preserves the varnish of car. Put up in handy packages. We carry Johnson's complete line of auto products.

O-Cedar polish is used extensively in polishing automobiles. It is especially adaptable for use in dusting—cleans as it dusts. May be used on O-Cedar dust cloth or on cheesecloth.

LIQUID VENEER

may be used on the dust cloth or may be sprayed on. Makes a splendid dry cleaner for either summer or winter use. Put up in all size packages.

WE CARRY "ALADDIN" DYE SOAP IN STOCK. (*All the leading Shades*)

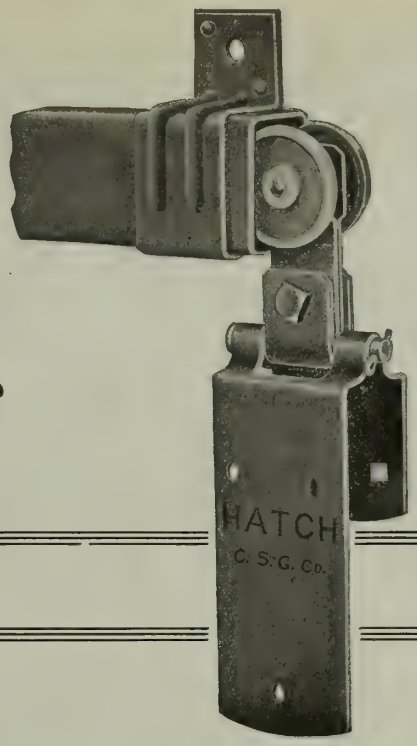
An Old Friend of the Trade

The Hatch

Trolley Hanger



Moderate Price — Quick Turnover

This perfect-action hanger sells extraordinarily well because it might be said to be "made to measure for the Canadian trade."

The Hatch Hanger is the result of a thorough investigation of the requirements of the hanger-users and the trade in general, and the hanger fills exactly the wants of the trade and consumers. This accounts for its splendid sales.

A smooth, easy-running hanger with apron 6 inches long and 3 inches wide. It moves with perfect action on roller bearings. Packed for shipment one pair in a box complete with bolts and end caps for track; 12 pairs in a case. Weight, per dozen pairs, 85 lbs.

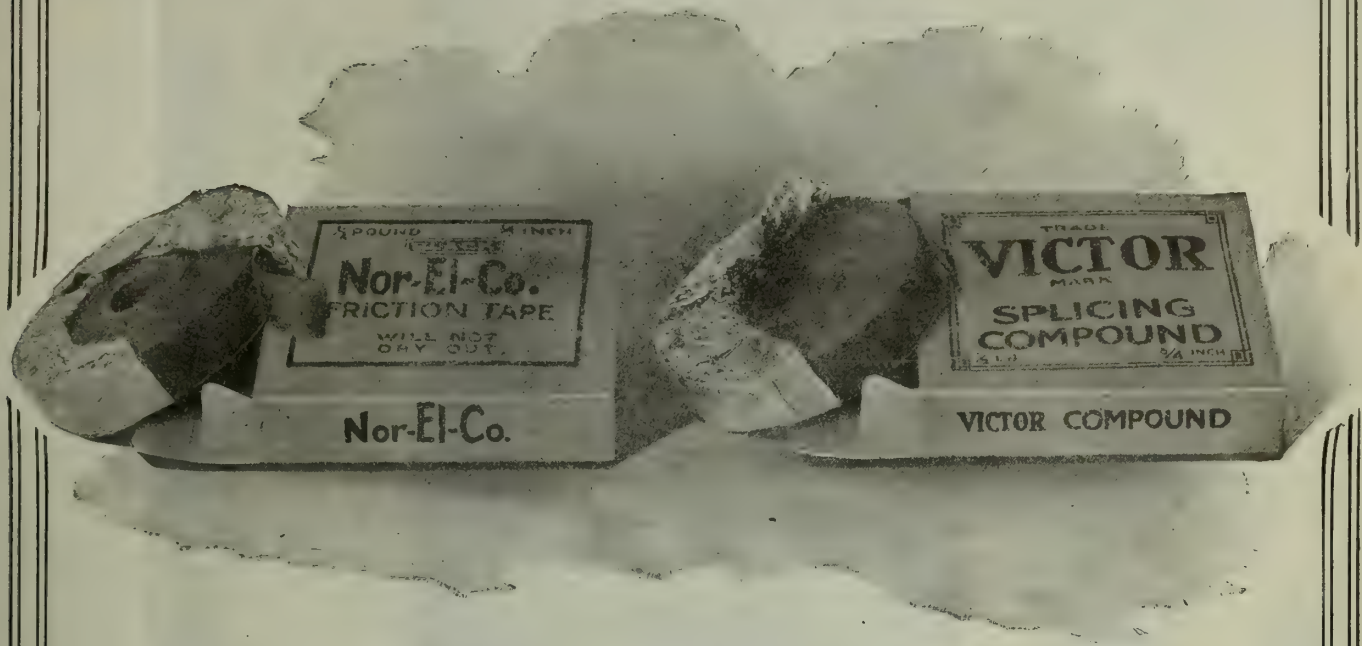
Northern Electric



Good Tape Means Joint Insurance

¶ Norelco Tape and Victor Splicing Compound fulfil the one important mission of such products by furnishing maximum mechanical and electrical protection to electrical wires without impairing their efficiency.

¶ They have especially high insulating properties, a single thickness resisting an applied potential of from 1,400 to 1,600 volts.

¶ Their composition contains no free sulphur to corrode copper wire—they do not unwrap or dry out if kept in original packages—will not deteriorate with age—are highly adhesive, and are equally effective for inside or outside work.

¶ Northern, Victor and Norelco Tapes and Northern Special and Victor Splices, are recognized standards of excellence.

Do You Keep a Hook For "New Business?"

FAMILIAR to most merchants is the "hook."

On it you hang the orders as they are filled. At the day's end they are added up—along with the cash receipts and other items.

In some stores they call that a day's work.

Not so in others. There is a type of merchant growing up who has a hook for "new business."

They hire an "outside" salesman or two to go after this business.

They look out for folks who might be buying but for some reason or other don't. These men aren't order takers—they're "demand creators." They get the new business—and every new order increases your number of customers—enlarges your chances of profit.

Give your outside salesman a new business hook. Start him out with the GTD line. Instead of his taking in orders, let him be primed with selling arguments of the good quality and workmanship of the GTD line of screw threading tools and screw plates.

Let him talk GTD, shout GTD, whistle GTD, and pretty soon your customers will think GTD and want GTD tools and naturally turn to you as the "GTD Store."

FAIRBANKS-MORSE

Building a Bigger Canada

THESE are days of progress—days when industry is leaping ahead and Canada is assuming her place in the world of commerce. Giant structures are being reared to house the machinery, men and equipment necessary to a bigger business.

Great highways are being constructed to provide for the easier transportation of Canada's products; elevators, wharves, factories, mills, mines—everywhere the hand of the contractor is set to some big task.

And wherever this construction work is going on, Fairbanks-Morse contractors' equipment is playing an important part—rendering its services as a factor in this work of progress. From the shovel to the steam and electric hoists, from the concrete mixer to the heavy road machinery, drill and jack, to truck and railway car, Fairbanks-Morse equipment is the choice of the contractor, because he knows that behind the smallest tool is the same quality guarantee and service that supports the largest unit of Fairbanks-Morse equipment.

He knows that the Fairbanks-Morse 100% quality seal is the ideal of the Fairbanks-Morse institution—a standard and a guide in building a bigger Canada.

Made with the Help Of

CADILLAC
STANDARD OF THE WORLD

STANDARDIZATION

In England and America, for many years, the thought of standardization has been closely linked to the name Cadillac.

The two have been almost convertible terms.

Now, the war has given to the phrase and to the principle of standardization, a new and a wider significance.

Every nation has a wonder-working word.

In that word is implied or expressed the special genius of its people.

Is it not possible that that word, in America, is standardization?

Standardization is a peculiarly American principle.

It is the capacity to think in large volume—*and execute in close, fine measurements.*

It is characterized by a noble bigness, on the one hand, and a scrupulous smallness, on the other.

Standardization dreams large dreams—*but it works them out with micrometer accuracy.*

It is not afraid of big figures when thinking in terms of materials, or machines, or markets, or money.

But it is mortally afraid of big figures when part is fitted into part.

Standardization laughs at millions—and worries over a loose bolt.

To the unthinking, it seems to talk in the language of the spendthrift.

The initiated know that in execution, it is the very essence of economy.

Standardization can be applied to base ends—but, in America, it should not be.

When it seeks volume alone, it is merely the apotheosis of brute force—the perpetuation of cheapness.

But when standardization and quality are wed—the fruit is a product superlatively fine.

Standardized ships and guns and aeroplanes and motor cars are speeding across the ocean to save the world.

War has shed new lustre on America's wonder-working word.

* * * * *

We feel that we may with propriety point out that this wonder-working word has also been the watch-word of these works since the Cadillac business began.

CADILLAC MOTOR CAR COMPANY, DETROIT, MICHIGAN.

Story for Week Dated June 26, 1920. Being No. 11 in the Series

From the Tree to the Trade---

Is A Long, Long Trail

THE scent of the pine-woods lingers about a box of Eddy Company matches. The picked white pine from which they are made is clean and pure and fragrant. In the form of timber that pine has taken a long time to grow; in the form of logs it has taken a long and turbulent trip from the lumber camp; in the form of match-boards it has gone through many processes, as you know, before it comes to the counter across which you sell it to the customer who brings every Eddy match eventually to the striking point.

To the right is a picture taken many miles away from the great Eddy plant at Hull, but it is a picture of part of the Eddy plant all the same. This is the Du Moines River tumbling down its rapids. There are the dark fringes of the pine trees against the sky. In the river, stranded as you will notice here and there, upon the rocky banks, there are logs sawn to length. They are on their way to the E. B. Eddy plant at Hull to be manufactured into matches and many other articles of merchandise.

Lake Du Moines is some two hundred and twenty-five miles away from the Eddy plant; and it takes the logs a whole year, as a rule, to negotiate the distance. As you are reading this, the shanty men are busily engaged in cutting logs which will float down the river of the picture to the right in spring, and which will be arriving at their destination in Hull about Christmas, 1921. Once there, they will become matches very quickly as the former stories of this series have indicated, but the logs loiter a lot on their way down river. Look at the picture and you will see them loitering. To see them arrive at the Eddy plant is a very different matter. They have lingered in the shallows, romped down the rapids, and floated like a squadron of long, low ships in the deep reaches of the rivers on which they travel. They have been guided here and there, sometimes towed by steamboats, and hurried along at times on their long journey, but at last they are grasped by the eager clutches of the great machines. Their journey is ended. They have left the realm of the Tree, and are on their way to the Trade.

Scene on the Du Moines River, 225 miles from the Eddy plant. Note logs on their way to become matches, illustrating the Eddy motto:

"From the Tree to the Trade"

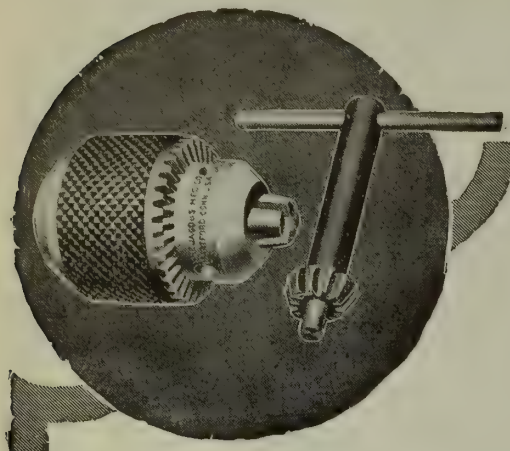
JACOBS CHUCKS



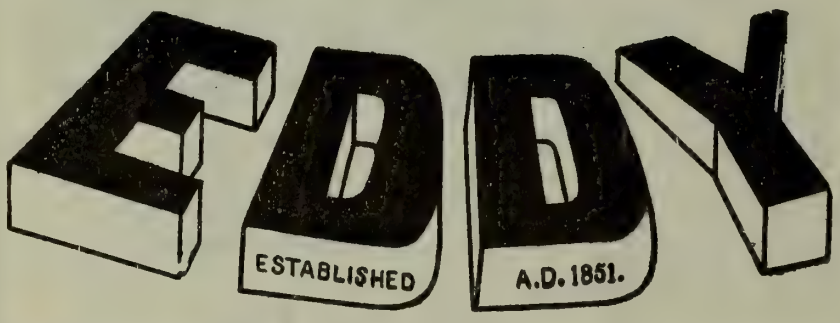
---it's what your customer gets out of them

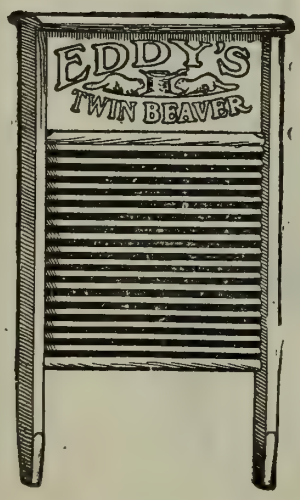
The dealer who sells Jacobs Chucks is selling his customer better drilling—better, because of the greater efficiency, convenience, ease of handling, and economy in the operation of his drills.

This better drilling is what the man who buys chucks is looking for. Why not give him what he wants, or inform him as to what he needs?

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

THE JACOBS MFG. CO. HARTFORD, CONNECTICUT, U.S.A.





Eddy Products Are Easily Sold

Because behind every Eddy display there is a nation wide confidence in the name "Eddy," a realization on the part of the consumer that the name in itself is an all-sufficient quality guarantee.

Based upon Merit this consumer goodwill is being maintained and strengthened by a rigid adherence to the highest standards of manufacturing excellence. Publicity too—intelligent educational advertising—is helping to still further popularize Eddy products in every community.

See that your stocks of Eddy's Matches and Indurated Fibreware are sufficient to meet the local demand.

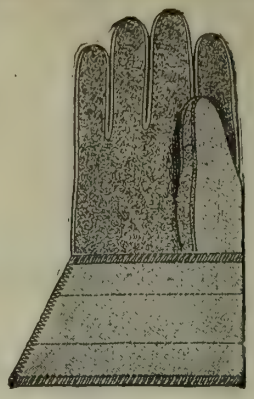
TAPATCO BRAND

REGISTERED TRADE MARK



Satisfaction The Unseen Salesman

In most instances a well-satisfied customer does not take the trouble to come in and express his satisfaction to the dealer, so the dealer must draw his own conclusions. But the sale of a dependable, serviceable article like "Tapatco Gloves or Mitts" never leaves room for doubt or guesswork.

The man who buys Tapatco Gloves or Mitts can be counted on for an unseen salesman, a constant booster among his fellow workers.

Even should he say nothing about Tapatco Gloves or Mitts the superior quality will show itself in time and continued use. Then the inevitable question will be asked, "Where did you get them?" Are you as a dealer taking advantage of this unseen salesman called "satisfaction?"

STYLES

Gauntlet, Knit Wrist and Band Top. In Heavy, Medium, and Light Weights. Also Leather Tip and Leather-faced Gloves, Jersey Gloves and Mitts in Tan, Slate or Oxfords.

A Line With Ever Increasing Sale

A Pad so well made that it gives long service — with hooks so secure that they never work loose. TAPATCO COLLAR PADS are used from one end of Canada to the other to protect the necks of horses. They prevent friction, and so remove all possibility of sores, galls and chafing. Get your share of the big business that is being done with this line among Canadian farmers.

A Co-operative Jobbing Programme

There is a universal demand for Babbitt Metals. It comes from the mills, machine shops and plants generally.

Our plan is to increase your share of this business, for by doing so, we can better serve the actual consumer.

We want only one Distributing Agency in each City or District. This Agency must be a live one. We will give the Distributor every co-operation, granting him an overage on all business secured direct from his District on the Brands he carries.

We have standard prices arranged on a sliding scale according to quantity. The Distributor can afford to re-sell at our standard prices and book quantity business.

We offer a clearly defined and solid Jobbing proposition. Babbitt is a good line. It is a steady repeat business. The repeat business is what pays. Jobbers have frequently secured initial orders for Babbitt and lost the repeat business when their customers ordered direct from the makers. With our proposition this direct business will benefit the Jobber as much as the business he books himself.

As distinguished from ordinary Babbitts, ours have definite selling points. They are the only Babbitts made and sold in Canada which are alloyed under the famous "STANLEY PROCESS." No other kind of Babbitt Metal enjoys so world-wide a sale. There is scarcely a Country in which "STANLEY PROCESS" Babbitts are not used. This speaks for itself. There is every reason why we should get together.

Inquiries From Responsible Houses Are Invited.

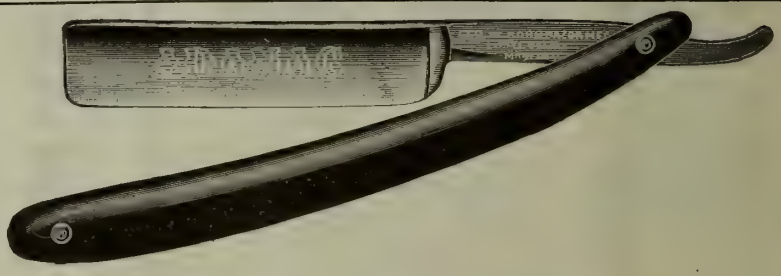
Price Doesn't Make a Razor



Men have paid as high as ten dollars for razors which were a keen disappointment.
And they have paid only two or three dollars for G. W. Korn's Razors which were a keen delight.
The difference is more in the **treatment**, than in the **steel**—anyone can buy good steel.
G. W. Korn's razors are made by **razor experts**, not "general cutlery makers."
A complete line with an established reputation.

Vol. XXXII. TORONTO, JUNE 26, 1920 No. 26

To Collect Luxury Tax With Stamps

Stamps in Varying Denominations to Be Ready by July 1—Will Be Equivalent to Government Currency so Will Have to Be Thoroughly Defaced—Hardware Dealer Has Advantage Over Jeweller in Sale of Alarm Clocks and Watches Under $10—Collections Slow—Will Enforce Licensing System—Imported Goods Only Pay 1 Per Cent. Tax.

APART from the announcement that the luxury tax is to be collected by means of revenue stamps, there has been little or no change in the taxation measures for some days. It is evident, therefore, that the amended resolutions are to be taken as an official basis for the collection of taxes, and that this basis will be more or less permanent. A complete statement of how the taxes apply to the lines sold through the hardware trade is reproduced elsewhere in this issue, and it would be advisable for the dealer to keep this list in a convenient place for reference. Any amendments forthcoming later will be mentioned in these columns.

The decision to collect the luxury taxes by means of stamps came as a result of the difficulties experienced in the collection of the taxes by means of retailers making a return with invoice for each sale. The latter method has proved cumbersome and costly. The revenue stamps to be used in future will be ready by July 1, and as they are available for purchase by merchants, the sending of duplicates of every sales receipt covering goods which are taxable, will cease. This will prove a great relief to merchants throughout the country and also the Inland Revenue Department which was taking on a large staff of clerks to check the invoices.

Denominations of Stamps

Revenue stamps will be provided in denominations of from 1 to 10 cents inclusive, 13 cents, 15 cents, and all multiples of 10 cents, up to $1. In addition there will be one, two, three, four, five and ten dollar stamps. If a person buys an article worth $200 on which the tax is 10 per cent. or $20, the procedure will be for the salesman to affix two $10 stamps to the sales slip or invoice and collect $20 from the purchaser, the stamps acting as evidence that the tax has been paid. The stamps will have to be defaced so that they cannot be used again.

Stamps used for this purpose would have a value equal to that of bank notes or Dominion bills for a similar amount, and a great deal of attention is, therefore, being given to the question of having the stamps so defaced that they cannot be "raised" or used again. The use of ink may not be considered sufficient, as traces of ink can often be removed. Some kind of punch has been considered for the purpose of perforation. The use of indelible ink or pencil has also been suggested, but whatever device is adopted will provide ample protection against the fraudulent use of the stamps.

Will Enforce Licensing System

Collections on the new taxes have been very slow all over the Dominion. In Montreal the revenue produced has been only one-fifth of what was expected. There are 26,000 business places in Montreal, but of those only 2,300 had made entries for their taxation. The licensing system will have to be enforced before the Government will be able to go after those who fail to make returns, and action then will be along the line of cancelling that dealer's license. He will then be unable to resume business until his taxes are paid and the license renewed. This license system allows the Inland Revenue Department to keep after taxes in arrears both on luxury and sales taxes.

With regard to the failure of so many to report, G. W. Taylor, Assistant Deputy Minister of Customs, states that there has been a great deal of uncertainty in the minds of merchants, they having gained the impression that there would be modifications and, therefore, delaying returns until the situation became clarified.

May Make Returns of Branches Through Head Office

Applications have been made from a large number of manufacturing and other concerns having branches throughout the Dominion to be allowed to make one return from their head office instead of from each branch. The matter is now under consideration and if finally sanctioned it would entail some delay in making returns to the department, though it would meet the accounting convenience of the firms con-

Continued on page 36

Retailers Protest Business Profits Tax

Ask Reduction of 50 Per Cent. Where Profits Are Represented by Merchandise and Not Cash —Profits Tax Discriminates and Discourages Expansion.

In expressing to the Government at Ottawa the views of its members regarding the provisions of the Drayton budget, the Retail Merchants' Association of Canada went on record as strongly opposed to the business profits war tax. If this tax was continued, it was contended, consideration should be given to the fact that business firms with small capitalization very often have to pay much larger tax than heavily capitalized concerns, because of water in the stock of the latter. It was submitted that the business profits tax was unjust because the greater portion of the profits shown by the merchants at the present time are represented in the increase of the price of stock on hand and are not actually profits made and realized. Further it was contended that no discrimination should be made between those who have no money to pay the war profits tax, although having made large profits, and those whose profits are tied up in merchandise and who often are compelled to borrow sufficient funds to pay the tax. Where profits were represented in merchandise and not in cash it was suggested that the money should be reduced by the sum of 50 per cent. and where profits were shown as cash or investments outside the retail business full taxes should prevail. The basis of capitalization should be actual money paid in and actually reserved.

With regard to the business profits tax on profits between $25,000 the following arguments were submitted:

The Business Profits Tax is Unfair in That It Discriminates:

1. It applies only to concerns employing more than a specified capital; concerns of smaller capitalization escape.
2. It applies only to certain kinds of industrial undertakings; agricultural enterprise is exempt.
3. If the manufacturer has a bad year, he must bear the loss himself; if the following year is a good one, the Government takes the excess profit, refusing to allow any portion of it to be applied to even up on the loss previously sustained.
4. Large professional incomes are not affected; the business man who takes a risk and succeeds is taxed according to his success, while the professional man who takes no risk escapes everything but the Income Tax.

The Business Profits Tax Discourages Expansion:

1. By causing foreign capital to choose other countries for investment.
2. By driving Canadian capital to seek other countries for investment.
3. By curtailing profits, which are one of the main sources out of which plant extension can be provided for.
4. By removing the only incentive which would justify the taking of further risks.

Its Renewal is Inadvisable in the National Interests:

1. Because it discourages greater production, as shown above.
2. Because it is in reality a fine on efficiency.

BRITAIN'S IMPORTS RAZORS FROM FRANCE AND HARDWARE FROM U. S.

Heavy importations of safety razors (including blades and blanks) into the United Kingdom from France were made during the month of April. These totalled 644,126 doz. valued at £40,650.

Importations of hardware (other than hollowware) into the United Kingdom from the United States during that month totalled 2,806 cwt., valued at £32,181.

UNITED KINGDOM'S TRADE WITH GERMANY

The following table indicates the extent of trade being carried on with Germany by the United Kingdom. The figures represent importations of hardware, hollowware and cutlery into the United Kingdom from Germany during the month of April, 1920. The weight of importations is shown and the value in English currency:

	Weight	Value
Hardware	1,633 cwt.	£15,488
Hollowware (cast, not enamelled)	5 tons	391
Hollowware (cast enamelled)	103 tons	8,580
Hollowware (wrought, not enamelled	3 tons	233
Hollowware (wrought enamelled)	251 tons	21,954
Hollowware (wrought galvanized)	19 tons	1,126
Hollowware (of tinned plate)	8 tons	88
Cutlery (knives other than machine knives)	22,612 doz.	9,924
Cutlery (scissors and shears, including blanks)	10,786 doz.	5,101
Cutlery (safety razors)	34,534 doz.	1,998
Cutlery (other razors including blades and blanks)	2,013 doz.	2,283
Other cutlers' wares		3,063

(Continued from page 35)

cerned and reduce the work of the Revenue Department.

The Finance Minister makes it clear again that while some taxes have been greatly reduced and others entirely wiped out since the original resolution was introduced, there is to be no refund of taxes already collected.

Hardware Dealer Has Advantage Over Jeweller

A point of interest to hardware dealers is that in the sale of clocks and watches, as commonly sold in the hardware trade, they will have a distinct advantage over the jeweller. The latter tradesman is taxed 10 per cent. on his turnover, under a provision to license jewellers, insofar as articles not specially stipulated are concerned, and on other articles sold through the jewellery trade the tax is applied in varying measure. It is, therefore, evident that the jeweller is paying a 10 per cent. turnover tax on every sale, including clocks and watches of any price. The Act, as amended, stipulates that clocks and watches as sold through the various trades are exempted up to $10, insofar as the luxury taxes are concerned. The hardwareman, therefore, escapes the luxury tax on alarm clocks, and watches selling under $10, while the jeweller must pay a 10 per cent. turnover tax on such articles.

Imported Goods Only Pay 1 Per Cent. Tax

A ruling recently given by the Inland Revenue Department is that goods imported for use in manufacture in Canada would not be subject to the double sales tax of 2 per cent., as would be the case if applied by both the importer and manufacturer, but only to the importer's sales tax of one per cent.

Perhaps Your Order is Down at the Bottom

Canadians Have Been Wondering for Some Time Just When Their Orders Were Going to Be Filled—The Railway Situation is on the Mend, But a Big Job Faces the Roads.

THOUSANDS OF TONS OF BARS WAITING FOR SHIPMENT

THE photograph here shows how bar iron and steel are being piled at some of the large mills in the steel belt of United States. The space occupied, according to the official furnishing the photo to Hardware and Metal, is not intended for storage, but is right in one of the regular finishing departments.

Speaking of the matter he remarked, "If you or anyone else can come along and tell us how to get this moved, our hat is in the ring for a try at it."

Other pictures show tubes piled, also plates and black sheets.

Canadian firms wonder when their shipments are going to get across. Some of your long-looked-for material may be in some of these piles—and dangerously near the bottom, too.

Another U. S. steel man, who was in this district a few days ago, drew attention to the way in which piling was going to throw their shipping schedule out of order. As soon as the roads were unable to keep up with the mill output, material was piled. Shipments that were ready to go out weeks ago were laid down, and others have been put on top in many cases. So it seems likely when the stuff does start to move that "the first shall be last and the last shall be first."

Were all the material now stored around the U. S. mills released it might do much to bring the steel market nearer an even break between supply and demand.

The steel trade has gone through some remarkable right-about-faces since the end of the war. First, there was the period when steel salesmen were right out after trade, in an endeavor to secure a capacity tonnage for the mills. Then followed the export demand, and the domestic trade, waking up, came into competition with it. In a few weeks, a month or so at best, the mills were all booked beyond capacity for some time in advance.

The incessant demand has been kept alive and to the front by the switchmen's strike. Everything has played into the hands of the premium operator. The increased tonnage reported as going through the mills has meant practically nothing to the consuming trade in Canada. Turning it out is one thing, but getting it across is one greater thing at present.

Who Collects the Tax and How Much?

Revised schedule of taxes as they apply to lines sold through the hardware trade. This schedule takes into account all the amendments adopted prior to the introduction of the Bill into the House of Commons. Any further changes, if any, will be of a very minor character and this schedule will, therefore, serve as a safe guide. This resolution was adopted by the House of Commons on Wednesday, June 16, and became effective from that date.

FOLLOWING TAXES TO BE CHARGED BY THE RETAILER ON TOTAL SALE PRICE.

The tax on the following articles is to be **added by the retailer to the total selling price to the consumer** at time of sale:

10 PER CENT. TAX

Cutlery, Toiletware, Cut Glass

Ivory-handled cutlery, ebony and imitation ivory toilet ware, cut glassware and etched glassware.

Sporting Goods

Sporting goods, such as tennis rackets, nets, racket covers and presses, canoe paddles and cushions, polo mallets, baseballs, protectors, footballs, helmets, harness and goals, basket ball goals and uniforms, golf bags and clubs, baseball, lacrosse, hockey and football uniforms, balls of all kinds not hereinafter specified (not including balls for children), fishing rods, reels, lines, spoons and artificial bait, billiard and pool tables, chess and checker boards and pieces, dice games and parts of games (except playing cards and children's toys, games and express wagons), and all similar articles not elsewhere specified, commonly or commercially known as sporting goods, in excess of 50 cents; baseball bats and baseballs in excess of $2; baseball masks and gloves in excess of $1.50; skates in excess of $2 per pair; toboggans and hand sleds in excess of $3 each; skis in excess of $2 per pair; footballs in excess of $3 each; lacrosse sticks in excess of $2 each; hockey sticks in excess of 75 cents each.

Plated Ware

Articles plated with gold or silver, not otherwise provided for in this resolution, adapted for household or office use.

Clocks, Watches, Jewelry

Clocks and watches in excess of $10 each; articles commonly or commercially known as jewelry, whether real or imitation, for personal use or for adornment of the person, except wedding rings, when said articles do not exceed $5 in value.

Leather Goods, Trunks, Etc.

Purses and pocket-books in excess of $2 each; shopping and hand bags in excess of $6 each; trunks in excess of $40 each; valises, travelling bags, suitcases, hat boxes and fitted travelling cases in excess of $25 each; gloves, (except fur), in excess of $3 per pair.

Robes and Rugs

Robes and rugs, the component material of chief value being fur, in excess of $50 each.

---

15 PER CENT. TAX

Card Tables, Piano Lamps, Ferneries, Chinaware, Etc.

All tables made especially for cards, checkers, chess or other games; all liquor cabinets, smokers' cabinets, tea wagons, sewing cabinets, work tables, piano lamps or stands, table lamps or stands, ferneries, jardinieres, pedestals and bric-a-brac, made of rosewood, primavera, solid mahogany or ebony or lacquered or decorated; chinaware and crockery known as "Royal Crown, Derby, Wedgwood, Minton, Ainsley, Limoges, Coalport, Pekard, Copeland, and similar quality chinaware and crockery by whatever name known."

---

20 PER CENT. TAX

Smoking Outfits, Hunting Garments, Knives, Toiletware.

(c) A tax of 20 per cent. on cigar and cigarette holders and pipes in excess of $2.50 each; cigar and cigarette cases, ash trays and match boxes of gold or silver; humidors and smoking-stands; hunting and shooting garments and riding habits; hunting and bowie knives; gold, silver and ivory toiletware; articles of silver not otherwise provided for in this resolution adapted for household or office use; silver or gold deposit ware; articles commonly or commercially known as jewelry, whether real or imitation, for personal use or for adornment of the person, except wedding rings, when said articles exceed $5 in value.

---

50 PER CENT. TAX

Other Articles of Gold

Articles of gold not otherwise provided for in this resolution adapted for household or office use.

FOLLOWING TAXES TO BE CHARGED BY RETAILER ONLY ON AMOUNT IN EXCESS OF PRICE SPECIFIED

The tax on the following articles is to be **charged by the retailer on that portion of the amount paid by the consumer which is in excess of the price specified.**

15 PER CENT. TAX

Sweaters, Boots, Coats.

Boots, shoes and slippers of any material (not including top boots not less than ten inches in height such as are used in lumbering, mining and fishing industries, or the river-driving boots) in excess of $9 per pair; men's and boys' coats when sold separately from suits (not including leather coats lined with sheepskin) when sold in excess of $25 each; knitted sweaters and sweater coats in excess of $15 each.

EXCISE TAXES TO BE PAID BY MANUFACTURER

The following excise taxes **are payable on the duty paid value** in addition to present duties, **by the manufacturer at time of sale** or when imported or when taken out of Customs or excise bond, but not when exported.

5 PER CENT. TAX

Pianos, Organs, Under Exemption Price

Pianos not exceeding $450 each, and organs not exceeding $150 each (other than pianos and organs for religious and educational purposes.)

10 PER CENT. TAX

Boats, Cameras

Boats, yachts, canoes and motor boats (provided that on satisfactory proof being furnished that these articles will be used for trading or commercial purposes, the said tax shall not be collected); cameras weighing not more than 100 pounds.

Firearms, Cartridges, Pianos and Organs (Over Exempted Price); Other Musical Instruments and Chandeliers

Firearms, shells or cartridges for use other than for militia purposes; pianos exceeding $450 each, and organs, exceeding $150 each (other than pianos and organs for religious or educational purposes); mechanical player pianos, graphophones, phonographs, talking machines, music boxes and records used in connection therewith, or with any musical instrument; musical instruments (other than band instruments) not elsewhere specified; chandeliers, except for church, in excess of $12 each; gas or electric light wall brackets, in excess of $3 each; gas and electric light fixtures not elsewhere specified in excess of $3 each.

15 PER CENT. TAX

Automobiles

Automobiles adapted or adaptable for passenger use retailing for not more than $3,000 each, and a tax of 20 per cent. on such automobiles when retailing for more than $3,000 each.

Playing Cards

A tax on playing cards for every 54 cards or fraction of 54 in each package; when selling at $24 or less per gross package, 15 cents per package; when selling in excess of $24 per gross packages but not in excess of $36 per gross packages, 25 cents per pack; when selling in excess of $36 per gross packages, 50 cents per pack.

License Fee

Every person selling or dealing in the articles upon which taxes are imposed as prescribed by the foregoing resolutions may be required by the Minister to take out an annual license therefor, for which license a fee not exceeding $2 shall be paid.

The Turnover Tax

In addition to the present duty of excise and customs a tax of one per cent. shall be imposed, levied and collected on sales and deliveries by manufacturers, wholesalers or jobbers, and on the duty paid value of importations; that in respect of sales by manufacturers to retailers or consumers, or on importations by retailers or consumers, the tax payable shall be two per cent.; that the purchaser shall be furnished with a written invoice of any sale, which invoice shall state separately the amount of such tax to at least the extent of one per cent.; that such tax must not be included in the manufacturers' or wholesalers' costs on which profit is calculated; and the tax shall be paid by the purchaser to the wholesaler or manufacturer at the time of such sale, and by the wholesaler or manufacturer to his Majesty in accordance with such regulations as may be prescribed, and such wholesaler or manufacturer shall be liable to a penalty not exceeding $500 if such payments are not made, and in addition shall be liable to a penalty equal to double the amount of the excise duties unpaid.

License Fee on Manufacturers and Wholesalers

The Minister may require every manufacturer and wholesaler to take out an annual license for the purposes aforesaid, and may prescribe a fee therefor not exceeding $5, and the penalty for neglect or refusal shall be a sum not exceeding $1,000.

Exemptions

The tax on sales shall not apply to cattle foods, materials for use in the construction of ships, anthracite and bituminous coal and coal dust, lignite briquettes made from anthracite or bituminous coal, coke, charcoal, peat, wood for fuel, electricity, gas manufactured from coal, oil for heating or illuminating purposes, fibre for use in manufacturing binder twine, settlers' effects.

Stamp Tax on Notes, Bank Advances, Etc.

A stamp tax of two cents is imposed, levied and collected on promissory notes and bills of exchange, and advances made by a bank by way of overdraft of the value of $100 or less, and a tax of two cents additional is imposed on every $100, or fractional part thereof, in excess of $100. A bank overdraft will not be deemed outstanding until the fourth day on which the account was overdrawn.

INCOME TAXATION

Taxes and surtaxes including tax upon corporations and joint stock companies is increased 5% per annum on incomes of $5,000 and upwards, to apply on all taxes leviable for any income received during 1919 or any accounting period ending in 1919.

BUSINESS PROFITS TAX

Exemption under this tax is raised from 7% to 10%. On profits between 10% and 15% tax is 20% of profits; on profits between 15% and 20% tax is 30% of profits; on profits between 20% and 30% tax is 50% of profits; on profits over 30% tax is 60% of profits.

Incorporated business with capital between $25,000 and $50,000 pays tax of 20% of amount by which profits earned during accounting period ending in 1920 exceed 10%.

WIPE OUT WAR TAX

The 7½% war tax on imported goods is wiped out on all remaining lines.

IMPORTANT RULINGS

Wholesaler Can Make Adjustment:—The wholesaler is empowered to make adjustments of the tax where goods are returned by the dealer or where a clerical error is made in invoices necessitating an adjustment of the tax paid.

Repairs:—Repairs made for consumers or users are not taxable except in the case of repairs to garments.

Contracts for Future Delivery:—The ruling is that the tax should be collected in the case of goods contracted for at certain prices, and a later ruling will be given as to the legality of the collection.

Retailers Selling Wholesale:—Where a retailer sells merchandise as a wholesaler such as sales in large quantities to hospitals, hotels, steamships, restaurants, institution, etc., he is responsible for the 1% sales tax on all such transactions.

Where and When Stores Are Closing

A List of Early Closings in Towns and Cities Throughout Canada Prepared from Information Supplied by Merchants—The Growing Popularity of the Weekly Half-holiday is Demonstrated.

EDITORIAL COMMENT

BANKRUPTCY ACT NOW COMING INTO EFFECT

THE Bankruptcy Act as passed at the 1919 Spring session of the Dominion Government comes into effect on July 1. Merchants are warned that after that date they will be held responsible for a complete record of their business through the medium of a recognized accounting system. This act was passed after many years of fighting by those who considered that abuses had grown alarmingly under the old conditions, and the bill is declared to be one of the most advanced pieces of insolvency legislation to be found anywhere on the continent.

While the Act requires a little more careful attention to records than has been practised by some dealers, the benefits from such legislation accrue to all in equal proportion and it must therefore be looked upon as a progressive measure. Important points in the new Act are those providing for the appointing of assignees by Provincial Governments, the necessity of all merchants keeping books in order to show their true condition of affairs in the event of insolvency and to thereby facilitate a declaration of insolvency.

MAY TAKE STEPS TO BRING MAXIMUM TAX RETURN

RETURNS to the Government under the new system of taxation have been disappointing to date and no attempt is made to disguise the fact. On the other hand the Assistant Deputy Minister of Customs comes out boldly with the figures showing the number of returns made from merchants in the city of Montreal as compared with the number in business in that city. He goes further and makes the statement that the licensing system which was authorized as part of the original resolution will be enforced to bring in the required returns. Under this system a dealer's license can be cancelled and he can be prevented from doing business until again authorized. Such action would be rather arbitrary but it is evident the Government has means at its disposal for enforcing the law. The substitution of the plan for collecting the revenue by means of luxury stamps may render such action unnecessary. Inspectors could then check up dealers in similar fashion as is now being done in regard to the stamp taxes on certain lines. A number of other interesting and important phases of the matter are outlined elsewhere in this issue.

DEVELOPMENT OF RESOURCES TO 25% OF VALUE WOULD PAY CANADA'S OBLIGATION

CANADA'S great need for production to overcome the great burden of debt which must be paid, was emphasized by W. A. Buchanan, M.P., in a recent address before the House of Commons. "We can produce in the factories, on the land, and in the mines of this country," said Mr. Buchanan. "We have great natural resources that only need to be developed in order to enrich this country; and if we could only develop those resources to the extent of one-fourth of their value at the present time we would have no trouble in meeting our obligations as a nation. There is no cause for any person in this country to be discouraged about the future of Canada. All we need to do is to move around this Dominion to realize the great resources we possess; and we cannot help but become prouder of our country and cannot help but glory in the fact that, in Canada, we have as great wealth and as great opportunities as are to be found in any land in the world to-day. What is requisite is to encourage the development of those resources, and, given an opportunity to the people to take advantage of the wealth that is in the country, there will be no need for the Government to worry about the future of Canada and no need for the honest, capable and ambitious citizen of Canada to worry about it either."

Retailers Must Keep Books After July 1

Bankruptcy Act Now Coming Into Force—Assignees to Be Appointed by Provincial Governments—Benefits Open to All—Most Advanced Insolvency Legislation.

MERCHANTS are warned of the putting into effect on July 1 of the Bankruptcy Act, details of which have appeared in these columns. An order-in-Council was passed early in the year setting July 1, 1920, as the date on which the Act as passed at the 1919 spring session, is to go into force. This Act was passed after many years of fighting by those who considered that abuses had grown alarmingly under the old conditions. The bill was not allowed to go into effect at once as it was desired to give the business community a year or more to adjust itself to the new situation.

There are several important features in the new Bankruptcy Act, which has been declared by merchants and others to be the most advanced piece of insolvency legislation on the continent.

It provides that all assignees must be appointed by the various Provincial Governments, and that they must be capable men who will be bonded for the work they are to perform.

Open to Private Citizens

Another provision is that the benefits of the Act are open to men in business, or private citizens, if the latter so desire to make an assignment. They may be declared insolvent if it is found that the circumstances warrant such action. When a merchant has filed a statement showing his financial condition, his creditors can take action to have him declared insolvent if his statement justifies this being done.

All Must Keep Books

Another important feature of the new Act is that all persons carrying on business must keep books showing the record of all their transactions. This becomes compulsory from the date of the Act coming into effect, namely July 1.

As it passed the House the measure had the support of business and professional men of all classes, and its provisions are claimed to be equally fair to those in all lines of trade as well as farmers and private citizens.

WHERE AND WHEN STORES ARE CLOSING

Continued from page 41

RIDGETOWN—Closes Wednesday at 12 o'clock from April 15 to August 15. o'clock except Saturday.

SARNIA—Stores close Wednesdays at 1 o'clock from May to September inclusive. Also every night except Saturdays at 7 o'clock.

EVENTS IN THE TRADE

Business Changes

Oakville, Ont.—J. H. Lee has sold his hardware business to Geo. A. Weeks.

Barrie, Ont.—J. McCandless is closing out his business and selling everything in connection with the trade

Mansonville, Que.—Sisco & Perkins, hardware and plumbers, have dissolved partnership.

H. J. Fuller Elected Director of Gillette Safety Razor Co.

Montreal.—Henry J. Fuller, president of the Canadian Fairbanks-Morse Co., Ltd., was elected a director of the Gillette Safety Razor Co., of Canada at a meeting of the board.

Fire Losses

Kelowna, B. C.—The hardware store and stock owned by D. Leckie suffered considerable damage by a recent fire. The loss was largely covered by insurance.

Sudbury Veterans Take Over Hardware Store

Sudbury.—J. Russell Horne and Robert Horne, Jr., have taken over the hardware business established by their father over twenty years ago and will open for business shortly. On the death of their father the late Robert Horne, the business passed into the hands of the Rothschild Company. Both young men are returned soldiers.

Cement Co. to Beachville

Brantford.—The Ontario Cement Company directors have issued instructions for the dismantling of the Blue Lake Cement plant and its removal to Beachville at once. Additional land has been purchased at Beachville and sidings are being laid. Construction work will start as soon as the sidings are completed.

Film Story of Rope Making

Plymouth Cordage Company have recently released a motion picture film of the cordage industry, telling the story of the manufacture of rope and binder twine in an entertaining and instructive manner. The film is for use at house meetings, sales conventions, etc., as a direct means of educating the selling organization representing the company's products. It can also be used by the dealer representing this line in any local community providing he makes arrangements with schools or theatres for the purpose.

Practical information along industrial lines is being eagerly sought after and the Plymouth Cordage Company have had this film taken for the purpose of providing information of an educational nature through this medium.

Celebrates Fiftieth Anniversary in Hardware Trade

To have watched the steady march and progress of events in the hardware trade for half a century is the experience of very few men in the business. Thos. M. Meredith, founder of Thos. Meredith & Company, 156 King Street East, Toronto, is one who has been fortunate in this respect, and on the 2nd of July of this year he will celebrate his fiftieth anniversary in the hardware trade.

His first association with this line of business commenced as a boy of 15 years of age, when on July 2nd, 1870, he entered the hardware business of John Mead, located on the same site as his own business is to-day. After five years this firm was succeeded by Ross & Allen. For eight years Mr. Meredith was engaged by this partnership and in 1883 when they retired from business he succeeded them under the present name of his firm. The store now occupied by Thos. Meredith & Company is the only one which Mr. Meredith has known throughout the fifty years of his experience in the hardware business.

Steel Production at Higher Rate Than Indicated

"Steel production keeps up at a higher rate than the very moderate betterment in car movement would indicate. No signs appear that any marked change is impending in the relation of output and consumption," says The Iron Age.

"It is to be expected that the gorge of finished material at various mills will be broken as the railroads keep working on it, but for many weeks coal and coke supply will be the key to the whole iron and steel situation. In the past week hot weather and the breaking in of so many new railroad workers have shown that a trying summer is ahead.

"The May output of steel ingots, partly estimated, was about 3,430,000 tons, a gain of 10 per cent. from April, and the industry was surprised that the total for the past five months was at a yearly rate of 41,400,000 tons, pointing to the possibility that 1920 may yet be one of the three great years in steel.

"Consumers who are wrestling with the most difficult situation in all their experience are still puzzled by the large production figures and the smallness of the visible supply of finished steel of nearly all descriptions."

Old Material Men Organize

The Waste Material Dealers of Montreal met last week at the Windsor Hotel and consummated the organization of an association for their trade to be known as The Canadian Waste Trade Association. The object of the Association will be to take care of trade interests peculiar to this trade, and it is planned to include in its membership firms who deal in waste materials in Montreal.

Those represented at the first meeting were:—The North Eastern Iron & Salvage Company, Frankel Brothers, National Scrap Iron & Metal Company, Lewis Pickard, Consumers' Metal Company of Lachine, Northern Iron & Equipment Company, Laxer, Deitcher & Company, L. S. Tarshis & Sons.

Officers were elected as follows:—President, J. J. Sophus (director and treasurer, Consumers' Metal Company); hon.-treasurer, H. Frankel (Frankel Bros.); hon.-secretary, Louis Fauteux.

Joins Staff of A. MacFarlane & Co.

Montreal.—Gordon L. Hale, for some years connected with the staffs of Starke-Seybold, Ltd., and Frothingham & Workman, Ltd., has joined the staff of A. MacFarlane & Co., Canadian representatives of a number of British and United States and Canadian manufacturing houses. Mr. Hale has already entered upon his new duties.

Good Building Programme in Northwest

Building construction work in the Prairie Provinces and British Columbia will involve an expenditure of approximately $85,000,000 for 1920. Present plans call for the erection of 2,300 houses, 400 schools and 60 warehouses. Upward of $60,000,000 worth of new construction has already been entered upon west of the Lakes, and much depends on the changing crop situation during the coming months in determining the amount of additional work that will be started. A shortage of building materials is reported in some sections, for which railway congestion is responsible to a certain extent. There is a shortage of labor for building work in most centres. Public works are being undertaken to a limited extent by the cities, and the Federal Government is doing but a small amount of building.

NEWS OF WESTERN CANADA

Turpentine and Resin to Be Leading Industry in British Columbia

Industrial Chemist Says British Columbia is Greatest Potential Source of Turpentine and Resin Chemicals in Whole World—Enough Wood Products Going to Waste to Equal Value of Province's Return from Mines and Fisheries

VANCOUVER, B. C.—That the turpentine and resin by-products industry in the Province of British Columbia will be the greatest industry of the Province, is the assertion made by E. S. Oliver, an industrial chemist and specialist on wood products who for the past 18 years has made a study of ways to get the maximum extraction of turpentine, resin, pitches, tars and other chemical by-products of tree resin, without injury to growing trees.

"Every year there are enough wood products going to waste in British Columbia to equal in value the whole of the returns from the mines and fisheries of the Province," says Mr. Oliver.

During the past 18 years Mr. Oliver, who came to this Province originally as industrial adviser to Earl Grey, has been all over America and Europe pursuing his investigations. He has been to the forests of Russia, Sweden, France, Germany and the Mediterranean countries, worked as a forest laborer in the Bavarian state forests and in France. On this continent he has worked and studied all the way from British Columbia, through the forests of the southern states, and thence down through Mexico and through Central America to Colombia.

After all this travel and research, Mr. Oliver admits that he learned more from book and laboratory research in the city of London, and that the Province of British Columbia is the greatest potential source of turpentine and resin chemicals in the whole world.

Early in the last legislative session Mr. Oliver and his business associates were instrumental in securing an amendment to the Forest Act, whereby the Provincial Government can lease "resin leases" and collect a royalty of three-quarters of a cent a gallon on all resin collected therein, in addition to the rentals and fees to be paid to the Forest Fire Protection fund. The amendment was only allowed after demonstrations and reports from forestry officials to the effect that the tapping of the tree resin does no injury to the growing tree.

In addition to a large number of resin leases which Mr. Oliver's company has secured from the Government, a greater area has been leased on a royalty and labor basis from settlers up the coast, who see in the collecting business the hope of treating rocky tree grown pre-emptions as if they were orchards bearing a profitable crop all the year round. In fact, Mr. Oliver asserts that a rocky area growing Douglas fir for resin purposes is just as valuable as orchard property.

Numbers of pre-emptors up the coast are now engaged at work at $5 a day and with the promise of a royalty of $1 a barrel in addition on all the tree resin they can collect, after being instructed in the special method employed by Mr. Oliver and supplied with the patented tap channels and air-tight vacuum flasks which are a feature of the process.

Western Notes

Vancouver.—J. C. Pendray, president of the Vancouver Island and Development Co., and president of the Victoria Board of Trade, also president of the British-America Paint Co., recently made a tour of inspection of the B.-A. P. Co. branches at Calgary, Edmonton and Regina.

Tisdale, Sask.—McGraten & Chalmers have purchased the hardware store of Charles Pieterson, of Tisdale, Sask. Mr. McGraten was formerly on the sales force of Marshall-Wells Co., and Mr. Chalmers was formerly of Chalmers Bros., Manitou, Man.

Bulwark, Alta.—Geo. M. Dunnan is discontinuing the hardware business.

Westlock, Alta.—Skinner and Pierce have purchased the hardware business of Allen Hardware Co.

Pelly, Sask.—W. R. Spencer is starting a hardware store here.

Oak Lake, Man.—D. A. McMillan has greatly improved his hardware store by installing electric lights.

New Business

Vancouver.—A new hardware store has been opened on Main Street, Mt. Pleasant, Vancouver, under the name of Mt. Pleasant Hardware Co. The manager is G. R. Baird, who for many years conducted a hardware business on Granville Street. A general hardware line is carried.

FRIENDLY SPIRIT BROUGHT WESTERN DEALER GOOD-SIZED HARDWARE ORDER

That it pays to have and cultivate friends and to do a good turn for strangers whenever the opportunity offers, has been proven by L. K. Kirkpatrick, owner of the Bawlf Hardware Co., Bawlf, Alta., by the success he has had as result, in securing a contract for hardware and material to be used in the building of a new $60,000 grain elevator in Bawlf.

Mr. Kirkpatrick admits this is somewhat contrary to the usual saying that there is no place for friends in business, but he believes in having them and trying to do a good turn for everyone with whom he comes in contact.

To return to our story. About two years ago a stranger came into his store early in the morning and asked if he could leave his bag until the train came along. Mr. Kirkpatrick's attitude was such that the two soon became staunch friends and the visitor made a call each time he was in town. It developed that the stranger was the Inspector of elevators for a large firm, and through the cultivation of his friendship Mr. Kirkpatrick later secured a good-sized order when the local elevator was being rebuilt after being destroyed by fire. Mr. Kirkpatrick credits this business to having done a good turn for a friend and he passes the word along to others in the trade.

Newsy Notes From Here and There

Toronto.—Geo. Binns, hardware merchant, of Newmarket, Ont., was in Toronto this week on business.

Toronto.—J. A. Henderson, hardware merchant, of Brampton, Ont., made a business trip to Toronto this week.

Toronto.—The Luxfer Prism Co., who recently disposed of their building on Richmond Street West, have just purchased the Canadian Symphonola Company's factory on Brock Avenue for $45,000.

Toronto.—W. F. Hill, of the Kasement Skrene Dore Co., who since his connection with this company, has been living in Buffalo, has now moved to Toronto. Before linking his interests with this company, Mr. Hill was with the Good Manufacturing Co., New York.

Preston, Ont.—Employees of Clare Bros. and Co. held their annual picnic at Puslinch Lake last week, where they had a day of great enjoyment.

Montreal.—T. H. Jordan, vice-president of A. C. Leslie & Co., Ltd., Montreal, was a visitor this week to Hamilton; F. G. Smith, representing A. C. Leslie & Co., Ltd., Montreal, is visiting the hardware trade in the Maritime Provinces this week.

Montreal.—Gordon C. Seybold, of Starke-Seybold, Ltd., is at present in the Maritime Provinces calling on the hardware trade; Thomas Mortimer, of Toronto, was in Montreal this week; D. W. Carter, representing the Eagle Lock Company, of Geneva, Ohio, called on the hardware trade in Montreal this week.

Montreal.—Hon. H. D. Walgott, C.M.G., collector of customs in Trinidad; Capt. J. M. Reid, Comptroller of Customs, British Guiana; Hon. Herbert Ferguson, Colonial Secretary, Windward Island, and Capt. H. D. G. Austin, C.M.G., Barbadoes, delegates from the British West Indies, were in Montreal this week conferring with Capt. Evan J. Edwards, His Majesty's Senior Trade Commissioner in Canada and Newfoundland. While in Montreal these men held a conference regarding the extension of trade as between Canada and the British West Indies.

Statistics Show Large Increase in Building

Substantial Increase for May Over Last Year—High Costs Still Interfering to Some Extent—Western Cities Show Construction on Large Scale.

WHILE building totals for the month of May for the Dominion show a large increase over the returns for the corresponding month a year ago, there is a decided decline from the total for the month of April of the present year. The returns show a total for May of $13,953,698, as compared with $7,515,482 for May, 1919, and $16,088,649 for April of the present year. While the returns indicate that the building in progress is much greater than last year, the decline from the previous month is somewhat of a disappointment. An explanation may be found in the high costs of material, which at present are not abating. Many contracts have been cancelled or held over to await the return of more favorable conditions.

The returns for the twenty-seven cities of the East reveal a total of $9,325,443, as against $6,164,093 last year. The increased activity is more noticeable in the West where, in the case of the fourteen cities, the total value of permits issued last month was $4,628,255, as against $1,351,389 last year. There has been a remarkable increase for the first five months of the year, the total standing at $46,225,994, as compared with $20,858,970 last year, or an increase of $25,367,024. The city of Toronto has been re-established in the premier place, insofar as the total of building permits issued is concerned, the total standing at $3,133,605. The city of Weyburn, Sask., is the nearest competitor with a total of $2,235,858. This amount is, however, largely made up by a permit for the erection of a mental hospital to the value of $2,207,708. The value of permits issued in Montreal totalled $1,665,658, as against $1,269,438 last year.

Building operations are being conducted on a large scale in some of the Western cities. The total for Winnipeg is $531,400; for Calgary, $436,500, and for Edmonton, $426,075. A few cities show a decline in the permits for the past month as compared with a year ago. In Brantford there is a decline of $145,335. Sydney, N. S., is also behind last year's record by $32,692.

Hardware Letter Box

Tennis Racquet Repairs

M. W. Conner & Son, Madoc, Ont.—Would you kindly give us the addresses of Toronto firms who repair tennis racquets?

Answer.—This class of work could be handled by the following: Slazengers Ltd., Toronto; A. G. Spalding & Bros., Toronto; Harold A. Wilson, Toronto.—Ed.

Wood Door Stops

Sumner Company, Ltd., Moncton, N.B.—Would you kindly give us the names of manufacturers of wood door stops in Canada

Answer.—The following manufacture this line: Canada Foundries and Forgings, Ltd., Brockville; Taylor Forbes Co., Guelph, Ont.; Otterville Mfg. Co., Otterville, Ont.; Canada Wood Specialties Co., Orillia, Ont.; E. B. Estes & Sons, St. John, N.B.; Rugg Ball Mfg. Co., Ltd., Ayer's Cliff, Que.—Ed.

Fyrac Enjoins Cut-Price Dealer

The Fyrac Manufacturing Co., Rockford, Illinois, has just been granted a permanent injunction against the Graves Cycle & Auto Supply Co., of Bay City, Mich., preventing the misuse of their trade name, "Fyrac" in connection with cut-rate advertising.

Beaver Lodge, Alta.—A. G. Truax, hardware, has commenced business.

Falher, Alta.—Vezina Gamache has registered partnership to operate the Fal-

L. S. STARRETT COMPANY.

"Hack Saws and Their Use" is the subject of a new booklet published by L. S. Starrett Company, Athol, Mass. The purpose of the book is to promote the intelligent and efficient use of all makes of hack saws. It opens with a consideration of the three chief factors which have a direct bearing on the cutting efficiency of hack saw blades. These factors are the saw, the material cut and the operation, whether by hand or in power machines. The saw is first discussed—the composition and heat treatment of the steel, the dimensions, set, pitch and shape of teeth. One of the features of the book is a series of diagrams showing the right and wrong ways to "corner" such work as angles, channels and like shapes.

INCORPORATIONS

Dominion Brass Products Co. has been incorporated with capital of $40,000 and head office in Toronto, to manufacture brass and metal products.

Autostrop Safety Razor Co., Ltd., has been incorporated with a capital of $1,500,000 and head office in Toronto, to manufacture and deal in safety razors and appurtenances thereto.

Wells & Newton (Canada), Ltd., has been incorporated with a capital of $20,000 and head office in Toronto to manufacture and deal in apparatus for heating, ventilating, plumbing, lighting, etc.

J. H. Edmunds & Co., Ltd., has been incorporated with head office in Toronto and capital of $100,000 to manufacture glass ware, metal ware, porcelain ware, utensils, electric fixtures, stoves.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1110. **Wire Nails.**—A firm of commission agents in Barbados desire to secure a Canadian agency for galvanized and iron nails. It would be necessary to send samples with prices.

1129. **Miscellaneous manufactures.**—Canadian firm of sales and purchasing representatives in Toronto have inquiries from India for electrical goods and fixtures (220 volts), industrial chemicals, iron screws, copper wire. Would like to come in touch with Canadian concerns interested in exchange of Canadian and Indian commodities.

1130. **Rainwater and soil pipes, etc.**—A London company ask for the addresses of Canadian manufacturers of rainwater pipes of various sizes, and soil pipes; also roll-edged porcelain enamelled baths, who can fill orders for export.

1131. **Iron and steel safes.**—A commission merchant in Port of Spain, Trinidad, wishes to get into communication with Canadian manufacturers of iron and steel safes, large steel office cabinets, and other steel supplies. He is also interested in reinforced concrete construction.

1132. **Copper wire.**—A Manchester firm of commission merchants inquire for manufacturers of cotton-covered and silk-covered copper wire who are open to appoint agents in the United Kingdom.

1133. **Wire and cables.**—A Manchester firm are open to represent manufacturers of flexible wire and cables.

1134. **Barbed wire, nails and textile machinery.**—A firm in Caracas, Venezuela, are seeking Canadian supplies of the above commodities and machinery, and ask for catalogues and prices, together with terms, preferably f.o.b. New York.

1135. **Rubber goods.**—A Manchester firm are open to purchase boots and shoes and bathing caps, or would act as agents for the United Kingdom.

1136. **Rubber wear.**—A well-known London firm are open to place orders for autumn delivery for india-rubber footwear, including boots, rubbers, snowboots, etc., and would like to receive offers and quotations from Canadian manufacturers able to accept orders.

1137. **Cement.**—A Cuban firm wish to obtain supplies of Canadian cement, dealing directly with manufacturers. Information may be obtained from the Cuban consulate at Ottawa.

1138. **General agency.**—Established commission firm in Port of Spain report steady demand for Canadian goods, and would like to come in touch with any manufacturers considering that market.

Catalogues and Booklets

CANADIAN FAIRBANKS-MORSE CO., LTD.

General catalog number 20, just issued by Canadian Fairbanks-Morse Co., Ltd., contains a concise and handy record of the company's products. Information regarding design, dimensions and prices is given on scales, valves, steam goods, oil engines, pumps, electrical machinery, machine tools, woodworking machinery, transmission, railway and contractors' equipment, shop supplies, automotive equipment, etc.

Several pages of the catalog are devoted to valuable data concerning weights and measures applying to various products, for the dealer's information. A telegraph and cable code and an index of all the lines dealt with complete the catalog.

* * *

JOHN MILLEN & SON, LTD.

John Millen & Son, Limited, Montreal, are issuing a new circular describing the Alemite Lubricating System for filling the grease cups, springs and other parts of automobiles by compression. The circular illustrates and describes straight and elbow nipples, integral nipples, with shackle bolts, bushings, couplings, compressors, plugs, hose caps, hose plugs and many other fittings as well as cuts of the compressor. There is also a price list showing a list of a large variety of cars of different models and showing the number of the set of lubricating system, required for each special car and the price required to equip each different model. Readers of Hardware and Metal desiring a copy of this circular may have one on request from the above-named firm.

* * *

THE WILT TWIST DRILL CO.

The Wilt Twist Drill Company of Canada, Limited, Walkerville, Ontario, has just published a complete catalogue on specially designed Ford Reamers, which catalogues are now ready for distribution and will be furnished on request.

Yes, it would be funny if it wasn't so darned uncomfortable!

Sykes in Philadelphia Public Ledger.

FYRAC

One INCH Firing Surface

Canadian Money at Par

For the first three years Fyrac was not advertised.

In that time Fyrac rose from last to third in production on a list of 197 makes.

Thirty-eight per cent of its sales in 1919 were on re-orders from dealers.

The plug sold itself.

Today intensive advertising carries to motorists everywhere that important Fyrac story

---

ONE INCH FIRING SURFACE

This shows the central electrode, from whose *one inch firing surface* sparks leap the gap to the stout right and left wires, made to live long. *One inch firing surface* insures reliable power, and prevents gasoline-formed carbon.

If interested, tear out this page and keep with letters to be answered.

Spark Plugs

—*one inch firing surface.* That feature shows plainly in the illustration below, and in that now familiar phrase.

But the plug still sells itself.

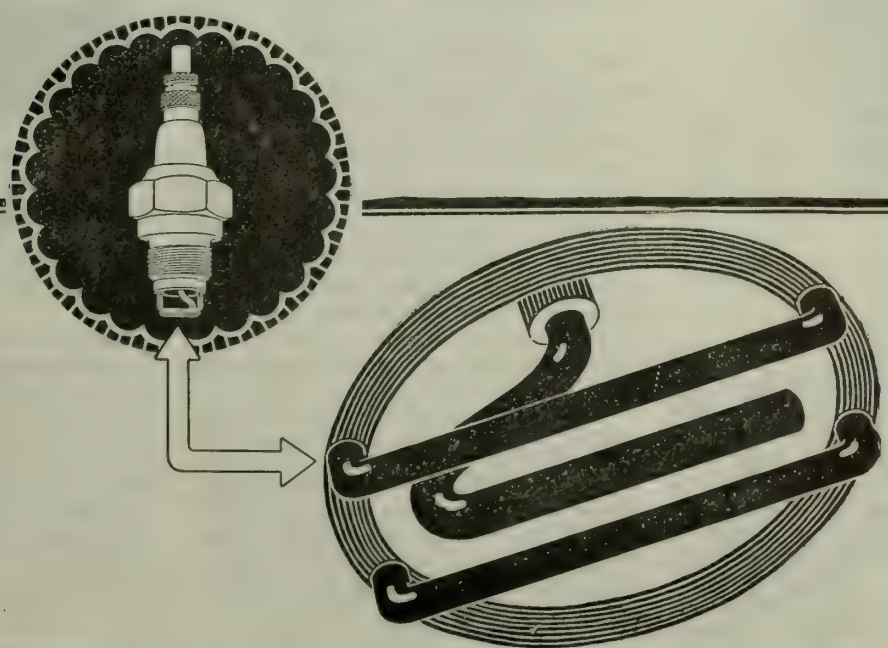
In your store the customer's first glance discovers that *one inch firing surface*—the stout wires that distribute over myriad points the leaping flames that would wither the ordinary point of wire—and the flint-hard insulator, heat-and-air tested to withstand 960 seventy-pound blows per minute.

Yes, Fyrac sells—*will sell*—itself for you.

FYRAC MANUFACTURING CO., *Rockford, Ill.*

Canadian Department
Campbell Agencies, 350 McKinnon Building
Toronto, Canada

Export Department
Werner & Butts, 336 Whitehall Bldg., New York, U. S. A.



If interested, tear out this page and keep with letters to be answered.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

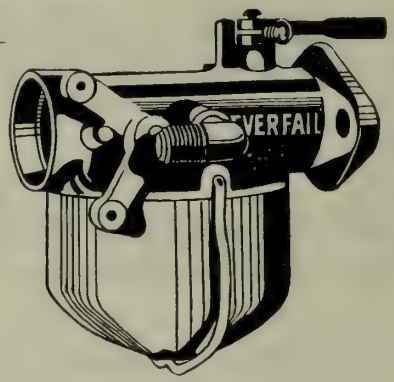
Ames Holden Tire Co.

Convinced that there is a big future for the Canadian automobile trade and to provide for the increasing demand for automobile casings and tubes, the Ames Holden Tire Company have built and equipped at Kitchener, Ont., a modern tire manufacturing plant. The sales organization of Ames Holden McCready, Ltd., is available for marketing the products of the Ames Holden Tire Co. throughout Canada. The tire being manufactured by this company has a distinctive tread as will be seen from the illustration shown herewith. This is known as the "Universal" tread and many advantages are claimed for it. Tubes, both grey and red, are also being manufactured. The officers and operatives of the company are said to be experienced tire men, and "Canadian from the ground up" is the proud claim of the company.

Universal Tread

Carburetor

The Never Fail Carburetor Co., Long Island City, N. Y., are putting on the market, through their agents, the F. M. Eldredge Co., Detroit, Mich., a new carburetor for use in Ford cars, which is known under the trade name of Neverfail and which they claim works on a new scientific principle, the entire vaporization taking place in the high vacuum on all speeds giving ample power and quick and smooth acceleration. Another feature pointed out by the makers is the low consumption of fuel and the ease with which the motor is started when attached.



Carburetor

Other features, the manufacturers claim, are the elimination of springs and air valves. The fuel bowl is also an improvement and is easily detached, permitting within a few seconds the removal of any dirt or water, without removing the carburetor from the car. The standard Ford stove, throttle rod, choke rod and bolts are used. There is only one adjustment screw which is marked "lean" and "rich" indicated by arrows. To instal, attach carburetor, turn adjustment screw to the right until closed, then start the motor and then turn adjustment to the left until motor performs properly.

Automobile Radiator

The F. H. Lawson Co., Cincinnati, Ohio, are offering to the trade their new auto radiator which goes under the trade name of White Radiator, and which they state is made on scientific principles, having a column of air for every column of water, the air space being ample to allow for a current sufficient to cool the volume of water. The makers also claim that the water cells contain an extra large quantity of water and owing to the principle of construction all this water comes in contact with the air currents and is readily cooled.

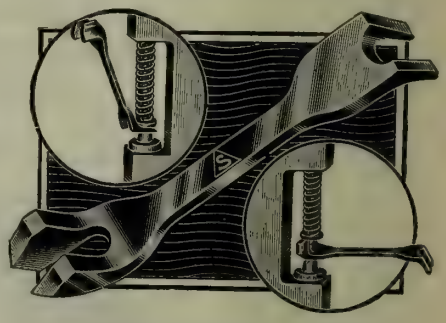
The manufacturers describe this product as follows: The construction of the cells allow for a large amount of radiating surface. The vertical air space between the tubes allows sufficient expansion to help prevent bursting should the water freeze. It is constructed on the basis that the function of a radiator is not to heat a given volume of air, but to cool a given volume of water. The air passes through rapidly and freely because of the wide mouth horizontal air spaces and a cool volume is ever in contact with the heated walls of the water cells.

The core is made of extra quality soft brass and all joints are floated in a high grade solder, and while the construction is rugged, manufacturers say, there is a sufficient amount of flexibility to allow for the necessary expansion and contraction as well as strains, etc.

Valve Lifter for Ford

Stevens and Co., 375 Broadway, New York City, N. Y., are offering to the trade their new valve lifter for use on Ford engines, and which, they claim, is easy to operate and will give sure, quick results, and owing to the construction of the two ends will successfully handle the operation of taking out the pin or assembling the spring without the necessity of removing either the manifold or carburetor.

The manufacturers state their new product is entirely made of metal in one solid piece, one end being of a wedge-shaped design, which instantly forces the spring up so that the pin may be easily removed. The tool may then be left in this position while the valve is being ground, thus enabling the operator to replace the valve and pin without annoyance.



Valve Lifter for Ford

The other end of the tool, the manufacturers describe as having a hammer claw end which they claim will instantly raise the spring off the push rod guide, and with a quick upward thrust will lift the spring past the pin hole. The length over all is 6½ inches.

A new booklet describing the above device has just been published for the manufacturers. Readers of Hardware and Metal may have a copy of this booklet on request from the above-named firm.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

SHARP advances have been made on prices of many important hardware lines. There seems little hope for immediate lower quotations and the price tendency is still upwards; especially is this true of commodities manufactured from iron or steel.

Carpenters' tools have again come up for higher price revisions and many lines are affected. Machinists' vices, tap wrenches, tool sets and screw-drivers are also higher priced. Brick and plastering trowels, cast iron sledges, cow bells, lantern globes, grindstone fixtures, clay picks, mattocks, axle grease, wire stretchers, egg crates, taper pins, iron and steel bars, beaver board, wrapping paper, faucets, meat choppers, coffee mills, rubber heels, brass wire, sweat pads, iron washers, and lawn mower repairs are all included in the list of higher price revisions. A sharp advance has also been made on the price of snow shovels.

The adoption of the new ruling of the tax legislation, whereby it is necessary for the manufacturer to charge a 2 per cent. sales tax when selling direct to retailers or consumers, has been the cause for some unfavorable comment in some circles.

Warehouse stocks are still very light and jobbers state they are having great difficulty in securing sufficient supplies to cope with the present demand. Merchants generally are handling a large volume of business despite the difficulty of securing supplies and some may be in a position to have their best hopes realized for one of the best seasons in the history of their business.

The prospects for realizing a good crop throughout the Western Provinces are very promising. Collections are coming forward very freely.

MONTREAL MARKETS

MONTREAL, June 24.—Summer lines have been in active demand and the jobbers are well sold out of many lines, with replacements very difficult to make. There are numerous advances this week again and among the important lines to advance are iron and steel bars. The increase on these lines is ten cents per 100 lbs. Beaver board is up $2 per thousand feet, and wrapping paper is half a cent higher. Fine tools of North Bros.' manufacture have advanced, including screw-drivers, tool sets, vises, tap wrenches, etc., while self-measuring faucets, meat choppers, coffee mills and other lines of Enterprise manufacture are advanced in price considerably. Steel snow shovels are now on a 25 per cent. advance basis, over list. Rubber heels are higher in price. Brass wire of various kinds has again advanced. Ingot metals are more settled this week and there has been a tendency to firmness on one or two lines such as lead an spelter. Trade in these commodities is limited, however.

Summer goods have been selling well, and refrigerators and lawn mowers, gardening tools and lawn hose have sold well. The tendencies are strong still on many lines and few declines are anticipated on hardware lines, particularly those made of steel.

Summer Demands Take Much Oil and Gasoline

Montreal.

COAL OIL, GASOLINE. — Prices have been steadily maintained on coal oil and gasoline, and there is little likelihood but that prices will rule high. Some expect, in fact, that there will be higher prices still.

Gasoline basis is 38½c for motor grade, while coal oil is selling at 29 to 31c per gallon.

Steadied Market For Various Lead Products

Montreal.

LEAD PRODUCTS. — Prices have been steady during the week on solders and sheets, fittings, etc. There is a fairly steady demand from the trade and supplies are ample to meet all requirements. It is probable, if lead and tin hold as at present, that the basis will be steadier than it has been for the past few weeks.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00
Note.—Lead pipe is subject to a discount of 10%.

Scythe Snaths on New Discount Basis Now

Montreal.

SNATHS. — Prices are higher on scythe snaths. The present quotations to the trade are 25 per cent. advance over list. Formerly prices were quoted net.

Scrap Markets Easier; Lead and Plate Down

Montreal.

OLD MATERIAL.—The market is very dull at the present time and this is attributed to the closing of many of the foundries. This condition has thrown heavy supplies of old scrap on the hands of dealers, the mills not buying extensively. Added to this, considerable quantities of scrap in small quantities come forward from small country dealers and this has meant a surplus, with a consequent softening of the basis for a good many lines.

The weakness of the market is indicated on heavy lead, which is now quoted at from 6 to 7 cents per pound, and on stove plate, which is down $3.00 a ton to $27.00. Altogether an easy condition is looked for.

No Improvement Likely in Sheet Situation

Montreal.

SHEETS AND PLATES.—While a certain amount of tonnage has come forward from the Old Country, great scarcity of plates still prevails. One jobber states that while he received a small quantity of sheets from England recently, there was little likelihood of receiving very much from that quarter for some time to come. In the meantime, there is a great scarcity of popular sizes and gauges, and manufacturers and jobbers have the same difficulties which they have had for weeks in maintaining anything like an adequate stock.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Advances Are Made For Various Iron and Steel

Montreal.

IRON AND STEEL.—Prices have advanced for iron and steel and the jobbers have altered prices on all lines. Bar iron, base price, is now $4.65 per 100 lbs.; refined iron, $5.65; mild steel, $5; sleighshoe steel, $5; band steel, $5; tire steel, $5.20; harrowtooth steel, $5.15; iron finish machinery steel, $5.05; and toe calk steel, $5.90.

IRON AND STEEL

Iron finish machinery steel	$5 05
Norway iron	13 50 15 00
Single reeled machinery steel	6 50
Spring steel	5 50
Sleigh shoe steel	5 00
Tire steel	5 20
Toe calk steel, per 100 lbs.	5 90
Band steel	5 00
Harrow tooth steel	5 15
Mining tool steel, per lb.	0 24½
Black diamond tool steel, per lb.	0 24½
Black diamond cast steel, per lb.	0 24½
Common bar iron, per 100 lbs.	4 65
Refined iron, per 100 lbs.	5 65
Mild steel	5 00

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Beaver Board Price Advanced Two Dollars

Montreal.

BEAVER BOARD.—An advance of $2.00 per 1,000 square feet has been made in the price of beaver board, the price now being $50.00 in 1,000 foot lots.

Wrapping Paper Prices Advance Half a Cent

Montreal.

WRAPPING PAPER.—An advance of half a cent per pound on the price of wrapping paper has been made in jobbing quarters. Kraft paper is now selling on the basis of 15½ cents per pound.

Rope and Cordage Held Without Change

Montreal.

ROPE AND CORDAGE.—The week has brought little new feature into the rope situation and while there is a fair amount of business passing, conditions are generally on the quiet side. The present price basis is as follows: Pure manila, per lb., 35½ cents; New Zealand, British and Beaver manila, per lb., 28 cents; and sisal, per lb., 22½ cents.

Demand Unabated For Wire Nails

Montreal.

NAILS.—There is still a heavy demand for Standard wire nails and jobbers report the market as very firm. It would seem that there will be an active demand from usual quarters for this product all through the summer season, and no recession in the price basis is looked for. The present quotations are as follows: Standard wire nails, per keg, $6.10; and cut nails, per keg, $6.35.

Fine Screwdrivers on New High Basis

Montreal.

SCREWDRIVERS. — The following prices have been given out by jobbers this week on North Bros.' line of screwdrivers. No. 10 by 2, per dozen, $9.10; by 3, $11.15; by 4, $11.85; by 5, $13.05; by 6, $14.75; by 8, $16.60; by 10, $19.75.

No. 15x2, per dozen, $9.90; by 3, $10.40; by 4, $10.90; by 5, $11.40; No. 12, $13.05. Pocket screwdrivers, No. 60, are quoted $13.65 per dozen.

Spiral screwdrivers are quoted as follows: No. 20 x 1, per dozen, $26.50; No. 30, $41.50; No. 31, $55.70; No. 35, $30.80; No. 130, $47.40; No. 90 x 2, $4.10 per dozen; 90 x 3, $4.55; 4, $5.30; 5, $6.65; 6, $7.60; 7, $8.75; 8, $10.10; 10, $12.35.

No. 95 x 2½ are quoted at $4.10 per dozen; 95 x 4½, $5.25; 6½, $6.65; 8½, $8.10.

Various Fine Drills on Advanced Basis

Montreal.

AUTOMATIC DRILLS.—North Bros.' line of automatic drills are selling as follows: No. 41, per dozen, $25.95; 42, $28.45; 43, $18.00; 44, $43.25; 50, $54.50.

Bench drills, No. 1003, are selling at $18.10 each; No. 1005 at $28.50 each.

Breast drills, No. 1455, are selling at $8.55 each; No. 1555, $12.55; No. 550, $7.75; and No. 555 at $12.55.

Tool sets, No. 100, are quoted at $9.90 per set.

Vises Marked Up; Tap Wrenches Higher

Montreal.

VISES—North Bros.' vises are selling as follows, these being advanced prices over those obtaining until recently: No. 990, each, $3.60; No. 993, $7.60; No. 1993, $10.25.

TAP WRENCHES. — No. 250 tap wrenches of the same make are selling at $2.10 each; No. 251 at $2.80; and 1251 at $2.55.

Self-measuring Faucets Are Up

Montreal.

FAUCETS.—No. 65 self-measuring faucets are quoted higher this week at $9.00 each. For the same number with tubs a price of $20 each is quoted. Augers for tapping barrels are also higher, being quoted at $36.00 per doz.

Coffee Mills, Stuffers, Have New Cost Basis

Montreal.

COFFEE MILLS, STUFFERS, ETC. Prices are higher on coffee mills, sausage stuffers, and other lines manufactured by the Enterprise Company. The advance is general for the whole line made by this firm and totals about 15 per cent. all through.

Lawn Mowers of Best Grade Big Sellers

Montreal.

LAWN MOWERS.—Jobbers report to Hardware and Metal that the present season has been an exceptionally heavy one for the better grade of lawn mowers. Jobbers still have in stock certain quantities of the cheap mower, but the more expensive and better grades of machines have been in active demand this year and sales have been heavy. The market is naturally very firm, with labor and raw material holding on continued high basis.

Various Lines Wire Have Gone Higher

Montreal

WIRE.—An advance has been made in the price of snare wire and there also is a change in the differential for small hanks. The present prices are 10 per cent. advance over list and on one ounce hanks an extra charge of 5c is made where the former charge was 4c.

Hard brass spring wire is also ad-

vanced in price, the increase being about ten per cent.

Stove pipe wire is selling at $10.50 per cwt. for No. 18 and $11.00 for No. 19.

Rubber Heel Prices Have Scored Advance

Montreal.

RUBBER HEELS.—An advance has been made in the price of rubber heels. Women's size are selling at $2.00 per dozen pairs, and men's at $2.35.

Refrigerators; Freezers Are Well Sold

Montreal.

REFRIGERATORS, FREEZERS. — The present season has been an active one for refrigerators and jobbers are pretty well sold out of popular priced sizes and styles.

Ice cream freezers have also been in active demand and the difficulty has been that of getting delivery. A large manufacturer stated to Hardware and Metal this week that so great had been the delay in shipping well-known makes of refrigerators forward that it has been necessary to cancel the balance of orders which have been so long delayed and delivery of which will be still delayed for several weeks.

Stoves May be Scarce; Both Heaters and Ranges

Montreal.

STOVES AND WARES.—The stove demand has been reasonably satisfactory, manufacturers claim, and orders have been received from the trade for delivery on specified dates. It is stated that orders already in hands of manufacturers are almost sufficient to absorb the output of the next few months. This will mean that those ordering their requirements early will avoid disappointment, and it has been pointed out that with the exception of one or two lines of heaters and ranges it will be difficult to fill many more orders than those already in hand.

WARES.—The demand for various wares continues brisk and particularly for such lines as are seasonable. The new prices in effect for the past week or ten days do not seem to have lessened the demand appreciably.

More Money Asked For Food Choppers

Montreal.

FOOD CHOPPERS—No. 5 food choppers of Enterprise make are quoted higher this week at $54.00 per dozen. Other prices are as follows: No. 10, per dozen, $84.00; No. 21, $78.00; No. 22, $132.00; No. 32, $168.00; No. 602, $42.00.

Steel Snow Shovels Are Costing More

Montreal.

STEEL SHOVELS.—The steel snow shovels are advanced in jobbing quarters and are now quoted 25 per cent. over the list. This is a considerable advance, as the former discount was 12½ per cent. from the list.

Some Improvement in the Ingot List

Montreal.

INGOT METALS.—Some encouragement has been manifest in the markets this week, say importers. There is evidence, here and there, of a more settled condition than has existed for several weeks, and some feel that rock bottom has been reached on a number of the ingots, if not all.

COPPER shows slight improvement of tone, with electrolytic selling at 24c, and casting at 23½c.

TIN.—Advices from London denote improvement in conditions. The local price basis this week is unchanged at 57-58c.

LEAD.—"We are looking for higher prices on lead," was the comment of a large importer. The undertone seems more settled this week with prices here around 10½c.

ANTIMONY.—While the New York market has been somewhat depressed, owing to silver decline, there is little change here, and little is expected. A price of 11½c is quoted.

SPELTER.—Unchanged at 10½c to 10¾c per lb.

ALUMINUM. — Little doing. Prices range from 34 to 35c per lb.

TORONTO MARKETS

TORONTO, June 24.—Little hope is expressed for lower hardware prices, at least in the near future, the price tendency still being upward. Many higher prices have been made on important hardware lines this week. Snow shovels and furnace scoops have had a sharp advance. Carpenters' tools, including saws, push drills and screw-drivers, have been marked up as well as some lines of trowels. Clay picks and mattocks, grindstone fixtures, ruby lantern globes, cast iron sledges, cow bells, bread knives, bench axes, brass cheese gates, sad iron handles, taper pins, axle grease, wire stretchers and egg crates all have new higher prices.

Stocks of many basic hardware lines are becoming very low, little relief having been offered the situation. The demand continues to be a heavy one and, despite the great shortage, many are experiencing a good turnover.

Manufacturers at present are having great difficulty in securing shipments of coal, a situation which has been aggravated by the recent embargo on the United States railroads. This situation also applies to the transportation of raw materials and other commodities.

Collections are coming forward very freely.

Higher Quotations Have Been Made on Bench Axes

Toronto.

BENCH AXES.—Higher prices have again been made on some lines of bench axes, and the James Smart make have been advanced in price by a lowering of the discount. The number 2 is listed at $40 per doz.; number 3 at $45; number 4, at $49; number 5, at $54; and the number 6 at $60 per dozen, subject to the new discount of 45 per cent. and 20 per cent. fro the list.

Sad Iron Handles Have Again Been Marked Up

Toronto.

SAD IRON HANDLES.— New and higher prices have again been made for sad iron handles, and the number 1 will now cost the dealer $2.10 per dozen. The number 2 has been marked up to $2.20 per dozen.

SAD IRONS have also been revised upwards, the common plain now being quoted at 3, 4 and 5 lbs., $15.60 per doz., while 6 lbs. and up are priced at $12.40 per doz. The common plated are quoted at 4 and 5 lbs., $17.50 per doz., and the 6 lb. and up, $14.50 per doz.

Brass Cheese Vat Gates Have Higher Quotations

Toronto.

CHEESE VAT GATES.—A higher price revision has been made on brass cheese vat gates, the number 10 having a new higher quotation of $13.00 each, and the number 20 has been marked up to $15.00 each.

Taper Pins Now Priced at Net List No. 6 and Over

Toronto.

TAPER PINS.—An upward revision has been made on taper pins and higher quotations are the result. The No. 5 and smaller are now quoted at a discount of 30 per cent. off the list, and the No. 6 and larger are quoted at net list.

Axle Grease Prices Have Been Marked Up

Toronto.

AXLE GREASE.—Some lines of this comodity have been revised upwards, and

the 1,000-mile will now cost the dealer more. The new revisions make the 1 lb. price, $1.75 per doz., and the 3 lb. price, $4.25 per doz.

Wire Stretchers Have New Higher Quotations

Toronto.

WIRE STRETCHERS. — Prices on some lines of wire stretchers come up for higher revised prices, and the McClosky is now being quoted at $10.25 per doz.

Humpty Dumpty Egg Crates Cost $7.75 Doz.

Toronto.

EGG CRATES.—In line with the upward march of nearly all commodities manufactured from wood, Humpty-dumpty egg crates have been revised upwards. They are now being quoted at $7.75 per doz.

Some Lines of Carpenters' Tools Have Advanced

Toronto.

CARPENTERS' TOOLS. — Higher prices continue to be made on nearly all commodities manufactured from iron or steel, and in some cases wood. Tools are no exception to this ruling, and this week records an advance on tools of the Yankee brand. The No. 31 screw driver will now cost the dealer $55.70 per doz., and the No. 131, $64.00 per doz. The push-drills, No. 41, are quoted at $35.95 per doz.; No. 42, $48.45 per doz.; while the No. 44 is quoted at $43.25 per doz. The extra drill points are now priced at $1.45 per doz. for all sizes.

Further Advances Made on Hand and Compass Saws

Toronto.

SAWS.—Tools of many kinds have recently been marked upwards. The Disston line also has some new prices which are of a higher nature. The D 8 hand saw, 26 inch, is now quoted at $49.30 per doz. Compass saws No. 2 by 12 now cost the dealer $9.60 per doz. and the No. 2 by 14 is $9.30 per doz.

Disston Trowels Have New Higher Quotations

Toronto.

TROWELS have been revised upwards and some of the new quotations on the Disston make are as follows:

Brick Trowels—No. 5 x 12, $22.65 doz.; 10 x 11, $22.65; 10 x 11½, $23.60; 11 x 11½, $30.10.

Plastering Trowels—No. 2 x 11½, $25.85 doz.; 16 x 11½, $31.05.

Painting Trowels—No. 15 x 5, $8.95; 15 x 5½, $9.40.

Clay Picks and Mattocks Have Upward Revision

Toronto.

CLAY PICKS are also on the list for upward revision and a higher price of $11.90 per doz. is being charged for the 5 to 6 lbs., while the 6 to 7 lbs. is quoted at $13.00 a doz., and the 7 to 8 lbs., at $13.50 per doz.

MATTOCKS are also revised upwards week, the 15 inch now being quoted at $14.50 per doz.

Grindstone Fixtures Also Have New Prices

Toronto.

GRINDSTONE FIXTURES. — The common grindstone fixtures are also on the budget of higher advanced prices this week. The 15 inch now being quoted at $9.75 per doz., and the 17 inch at $10.40 per doz.

Ruby Lantern Globes Cost Dealers $5.50 Doz.

Toronto.

LANTERN GLOBES.—An upward revision of price on the Ruby lantern globes makes the cost to the dealer of a higher nature, $5.50 per doz. being the new quotation.

Cast Iron Sledges Have New Price of $11.40 Cwt.

Toronto.

SLEDGES.—A new and higher price has been made on cast iron sledges, the price having been recently revised upwards, and is now quoted at $11.40 per hundred weight.

Prices on Cow Bells Have Been Advanced 10%

Toronto.

COW BELLS.—The higher cost of raw material and manufacture is said to be the reason for the recent advance in cow bells. The new price is approximately 10 per cent. higher.

Snow Shovel Prices Are Quoted at an Advance

Toronto

SNOW SHOVELS.—As announced in last week's issue of Hardware and Metal, snow shovels have been revised upwards and new and higher prices are being charged for fall booking, as will be noted by the following list. These prices are considerably higher than those formerly quoted.

FURNACE SCOOPS have also been revised upwards, and will now cost the dealer $12.50 per doz. The following are the new prices on snow shovels:

Snow Shovels—No. 20 or Prince, $11.25 doz.; No. 30 or Queen, $12.50; No. 40 or King, $15; No. 50 or Moose, $18.75.

Corrugated Sheets Scarce; Hard to Get Material

Toronto.

CORRUGATED SHEETS.—Considering the heavy demand for corrugated sheets manufacturers state the market is almost bare compared with the requirements of those in the market for this product, and they state that this is almost entirely due to the situation of the freight transportation, which they claim has not yet been overcome, and while it is said the embargo is lifted in some sections, in other sections it does not seem to have become effective, yet in many cases where the embargo is lifted those concerned find great difficulty in securing enough cars to transport their raw materials to the mills, as well as shipping their finished product to their customers. Many are also concerned for the future delivery of iron and steel of nearly all kinds, and in the belief of some the mills are still several months behind with their orders and present prospects seem very poor for their catching up in the near future.

Manufacturers of corrugated sheets state that their business in this line has been practically paralyzed, and it is still necessary for them to turn down business every day on account of not being able to supply the demand. The following are the present quotations:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Universal Bread Knives Have Advanced 10%

Toronto.

BREAD KNIVES have also come up for higher revision of prices this week, and the Universal are now quoted at higher prices, which will approximate 10 per cent. over former quotations. Cooks' knives have also been revised upwards, the increase being about 10 per cent.

Price Tendency For Waste Materials Downward

Toronto.

WASTE MATERIALS. — A heavy slump is said to have hit the waste material business and jobbers state that all lines are very quiet, and the tendency for nearly all materials is still downward, and there seems every possibility that a decline will be made in prices in the near future, although no new quotations have yet been made. Jobbers state that this situation has been brought about by the recent embargo and tie-up on the United States railroads, and many industries that require these materials have become clogged up as a result, and it may be some time before they are all clear again and able to come into the market as heavy buyers. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½
Heavy copper	0 17
No. 1 machinery cast	38 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½

Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

Lead and Zinc Products Unchanged; Price Firm

Toronto.

LEAD AND ZINC PRODUCTS.—The situation on nearly all lead and zinc products is considerably firmer this week, which is no doubt due to the strengthening of basic metals, and although no change in price has been made, the lead pipe, lead waste and waste pipe as well as lead traps and bends, etc., are very firm. Solders, too, are considerably firmer although no change has been made in the present quotations, which are as follows:

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Zinc sheets, per lb.	0 19

Iron and Steel Bars Firm; Price Still Unchanged

Toronto.

IRON AND STEEL are having a very active demand and while stocks are generally fairly heavy, some sizes, it is believed, are becoming scarce. Little improvement has been shown in the delivery and the situation is worse if anything. Some have it that they are only able to turn out half of their capacity on account of being held up for coal, a situation which is said to be the means of tying up nearly all industries to a certain degree.

SHAFTING of some kinds is becoming very scarce, while structural shapes and sections are also getting hard to procure, especially in the smaller sizes, and one jobber stated to Hardware and Metal that the 3 inch and under were practically off the market. The following are the present quotations:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 "5
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Boiler Tubes Firm; Fair Stocks on Hand

Toronto.

BOILER TUBES.—A steady demand continues to be made for boiler tubes and jobbers state they are having very satisfactory turnovers considering the season of the year. Some jobbers state their stocks are becoming very low and they have great difficulty in securing replenishments. This, they state, is due to the excessive demands made on the skelp and pipe mills for tubes and pipes of all kinds, and it is believed that this is especially true of the new oil fields which are developing, and have been in the market recently as very large buyers.

Re-construction of boilers on a large scale is also said to have created a large demand for tubes as well as the fact that a large quantity is needed for industries getting back from war work into peace work, and which as yet have not been able to finish all their operations on account of the many drawbacks which have developed in nearly all phases of the steel and iron industry.

However, there are some jobbers that state they have fair stocks and state that providing their shipments, which they have booked a long time ahead come to hand within a reasonable time after the booking date, it is their belief that there will be no serious shortage or hold up. The following are the present quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Some Shipments of Sheets and Plates Have Arrived

Toronto.

SHEETS AND PLATES.—The situation that has developed on this commodity has shown little improvement, although some jobbers state they have had small, light shipment of sheets. This, they state, however, is no indication that the mills are able to make freer deliveries and those that have been fortunate enough to receive iron within the last few days state that it was only through great financial risk and the danger of being disappointed on the delivery as well as the necessity of paying a heavy premium that they were able to secure these sheets, which in most cases came from small independent mills.

Freight deliveries on the United States roads are said to have improved in some sections, although the general situation is said to be paralyzing some industries, in some cases, although the embargo is lifted, all concerned have great difficulty in securing enough cars to transport their raw materials to the mills and to handle their products which their customers are so desirous of securing, with the result that many mills have considerable stocks piled up on their premises, while their consumer is starving for the material.

Dating back from the strike during last fall, and taking into consideration the present disturbances, it is the opinion of many that the mills will be unable to overcome the situation very readily as they are already several months behind with their orders, but whether this condition will improve in the near future remains to be seen. The following are the present quotations. These prices, however, are quoted merely as a guide as it is stated that owing to the shortage a very few could supply a full list of sizes, and jobbers state it is often necessary to pay premiums over these quotations when they find it necessary to go into the local markets to pick up stock to complete their orders.

BLACK SHEETS

14 gauge	$8 95
16 gauge	9 00
18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
18 and 20	10 70	10 95	10 70	11 10
16	10 70	10 95	10 70	11 10
12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Tin, Lead, Spelter, Etc., Have Firmer Price

Toronto.

INGOT METALS.—Part of the market is decidedly changed this week and a much firmer tendency is noted on nearly all lines shown on this list, although little change has been made in the price, most of these metals having a fair buying movement, although the demand is not a heavy one.

TIN.—A much firmer tone is noted for tin and the tendency is upward, although no change has been made in price, 60c per lb. still being the quotation.

LEAD has also a firmer tendency. However, the price remains unchanged and is quoted at 10½c per lb.

COPPER shows little change over last week's situation although quotations are somewhat firmer. The present price is quoted at 24c per lb.

SPELTER.—A fair demand is being made for spelter, although the price remains unchanged, and is quoted at 10½c per lb.

ANTIMONY stocks continue light, although the situation is some firmer. The present price of 15½c per lb. holds.

ALUMINUM has a fair demand, the price still remaining around 37c per lb.

LONDON MARKETS

LONDON, June 24. The price tendency for nearly all hardware commodities continues upward and further advances have again been made on the prices of important lines. Snow shovels and furnace scoops are on the list of higher quotations and will cost the dealer considerably more. Wrapping paper has also been revised upwards, the kraft brand having advanced ½ cent per pound. A lower discount advances the price of iron washers. Yellow sweat pads have again been marked up. New and higher prices have been made on lawn mower repairs.

A downward revision has been made on some lines of silver spoons and forks. Turpentine and linseed oil quotations have also been reduced, although supplies are still limited.

Business in the hardware stores continues very brisk and the volume of business is said to be very large in spite of the great shortage in many lines. Seasonable lines are enjoying a heavy buying movement, and auto accessories, scythes and snaths, fly oil, screen wire cloth and screen doors, harvest and garden tools and rope are all moving freely.

Prices in most cases are quoted from a firm basis and higher quotations on many lines are daily being made. Collections continue to come forward very freely.

Good Demand Made For Window Doors and Screens

London, Ont.

SCREENS.—A very satisfactory demand continues for screen doors and windows, and the trade generally are enjoying a very satisfactory demand for this line of goods. The present quotations are very firm although no recent change has been made. Some of the present prices current are as follows:

DOORS—
No. 1, grained only, $22.35 doz.
No. 21, mission style (grained, filled and varnished), $33.35 doz.
No. 3, with brackets, grained, filled and varnished, $36.50 doz.
No. 8, with panel, grained, filled and varnished, $39.35 doz.
No. 9, with panel and oval, grained, filled and varnished, $47.40 doz.

Wire Nails Still Scarce; Now Quoted at $6 Base

London, Ont.

NAILS.—The scarcity on nails is said to be showing little improvement, and jobbers state they have great difficulty in securing sufficient supplies from the mills, which are believed to be greatly hampered by the shortage of coal and other unsatisfactory conditions. The price on wire nails, however, has been readjusted and is now quoted from a new base price of $6 per keg. The cut nails continue to be quoted at $7.50 per keg base.

Rope Prices Firm; Show No Change

London, Ont.

ROPE.—A satisfactory demand is being enjoyed by nearly all in the trade for rope of nearly all kinds, and manufacturers state that shipments are going out very freely. The gradual opening up of different outside enterprises continues to open up many sources where this product may be placed. In some communities a good demand is being made for hay fork rope as well as the many varieties of rope that are used for slings, etc. The present quotation remains unchanged, although prices are somewhat firm, and are as follows:

Pure manila, 35½c lb. base; Beaver manila, 28c; New Zealand hemp, 28c; sisal, 22½c.

Kraft Wrapping Paper Marked Up to 14½c Lb.

London, Ont.

WRAPPING PAPER. — The great scarcity of paper of nearly all kinds is daily becoming more noticeable, and wrapping paper is no exception to the rule. This week records a higher price revision in the price of kraft wrapping paper, the price having been marked up to 14½ cents per pound.

Yellow Sweat Pads Now Cost Dealer $11.25 Doz.

London, Ont.

SWEAT PADS. — New and higher prices have again been made on sweat pads, and the yellow has been revised upwards to a new quotation of $11.25 per dozen.

Lawn Mower Repairs Have Been Marked Up

London, Ont.

LAWN MOWER REPAIRS.—Higher revised prices have been made on lawn mower repairs affecting the Taylor, Forbes make. The new prices are as quoted below.

LAWN MOWERS are having a good demand, although the volume moving is said to have slackened up somewhat compared with former sales. The Daisy, Star, Woodyatt and Empress continue to sell at a discount of 25 per cent. off the list.

Pinions, 25c each; panels, 10c each; wheels, 80c each; handles, 75c each.

Iron Washers Advanced By Lowering Discount

London, Ont.

IRON WASHERS.—In line with the advancing price of nearly all commodities manufactured from iron or steel, iron washers have again been revised upwards by a lowering of the discount. The new discount is quoted at 25 per cent. off the list in place of a former 30 per cent. off the list, with the usual extra for small lots.

Harvest Tool Discount Remains at 50-10% off List

London, Ont.

HARVEST TOOLS.—A brisk demand continues to be made for harvest tools of nearly all kinds and nearly all in the trade are very well satisfied with the amount of business handled. The discount remains unchanged and is quoted at 50 per cent. and 10 per cent. off the list.

Higher Prices Made on Snow Shovels and Scoops

London, Ont.

SNOW SHOVELS.—A sharp advance has been made on snow shovels for fall booking. The new quotations are said to be due to the higher cost of manufacture, a situation which is partly due to the shortage of raw material as well as the advanced price of same. The following are the new quotations:

Prince or No. 20, $11.25 doz.; Queen or No. 30, $12.50 doz.; King or No. 40, $15 doz.; Moose or No. 50, $18.75 doz.; Furnace Scoops, $12.50 doz.

Poultry Netting Firm; Supplies Limited

London, Ont.

POULTRY NETTING. — A good movement is still taking place on nearly all kinds of poultry netting, although the situation is still tight. Jobbers state they still have difficulty in securing sufficient supplies, and warehouse stocks are very light. The Canadian-make 2-inch mesh is still quoted at net list while the one-inch mesh is quoted at an additional 5 per cent. to the list.

Many Lines of Auto Accessories Moving

London, Ont.

AUTOMOBILE ACCESSORIES. — The season's demand for nearly all kinds of automobile accessories is very favorable, and nearly all in the trade handling this class of goods are enjoying a very good demand. Automobile tires are also moving very freely.

Screen Wire Cloth Price Firm; Unchanged

London, Ont.

SCREEN WIRE CLOTH. — The demand for this commodity is keeping up very favorably and those in the trade

are very well satisfied with the season's turnover. The black painted continues to be quoted at a firm price, the quotation being $3.60 per hundred square feet. The galvanized price is also firm, although unchanged, and is selling at $4.25 per hundred square feet.

Downward Revision Made on Price of Silver Ware

London, Ont.

SILVER FLATWARE.—A slight revision of price on a few lines of Community Silver flatware has been made. This applies mostly to spoons and forks, practically all the odd pieces remaining unchanged. The new quotations on spoons and forks are as follows:

Tea Spoons, $5.74 doz.; Dessert Spoons, $10.98 doz.; Table Spoons, $11.48 doz.; Dessert Forks, $10.98 doz.; Table Forks, $11.48 doz.

Good Demand Made For Scythes and Snaths

London, Ont.

SCYTHES AND SNATHS.—The recent favorable growing weather has created a considerable demand for scythes and snaths of nearly all kinds and nearly all those in the trade are enjoying a very good turnover on this commodity. The present quotations, although showing no recent change, are very firm, and are as follows:

Scythes—Cast steel, $17.25 doz.; Clipper, $18.25; Double Bead, $18.75; Cutlery Steel, $19.25; Brush, $17.75.

Snath—No. 1 Patent, $15.85 doz.; No. 2 Patent, $15.20; No. 3 Patent, $14; No. 00 Patent, $16.50; Brush, $17.20.

Fly Oil Has Active Demand; Unchanged

London, Ont.

FLY DESTROYER. — The alternate damp and warm weather seems to have brought numerous flies and other insects that as a result a heavy demand is being made for fly destroyer of various kinds. The Crenoid is quoted at $7.75 per doz. in half gal. lots, and $11 per doz. in one gal. lots. The Dr. Williams in half. gals. is quoted at $8 a doz. and 1 gal., $12 per doz.

White Lead in Oil Has Fair Demand

London, Ont.

WHITE LEAD IN OIL.—A good buying movement continues for white lead in oil and the present demand is still very satisfactory to all in the trade, it is stated. The present quotations are very firm, although no change has been made in the price. The pure in ton lots continues to be quoted at $20.45 per hundred lbs. and less than ton lots $20.80 per hundred lbs. The Elephant brand in ton lots is quoted at $20.95, and in less than ton lots $21.30 per hundred lbs.

Turpentine Quotations Are 30c Per Gal. Lower

London, Ont.

TURPENTINE. — Considerable improvement has been shown in the turpentine situation as regards price, this week's quotations being about 30 cents per gal. lower than formerly. Further improvements are also looked for on this commodity in the near future and the present situation practically depends on the delivery from the Southern sources of supply.

Jobbers and importers state that while some improvement has been shown in the freight deliveries that their business is still greatly hampered by the unsatisfactory freight transportation conditions, but are in hopes that this situation will soon be cleared up. The new prices on turpentine are as follows:

	Imp. gal.
1 barrel lots	3 50
2 to 4 barrels	3 49
5 gal.	3 65

English Linseed Oil Relieves Local Shortage

London, Ont.

LINSEED OIL.—Although very little improvement has been shown in the linseed oil situation as regards delivery of flax seed and incidentally the production of the finished product, some reduction has been made in the price, and the new quotations are about 37 cents per gal. lower than the steady high price which has been in force for several weeks.

Crushers state one of the main factors for lower prices on this commodity is the arrival of considerable English oil on the market, although they state that the situation in regards to Canadian oil has shown little improvement, and flax seed has been coming forward very slowly. This, however, it is expected, will be improved with the clearing up of the freight congestion on the American railroads, but whether this will be immediately overcome remains to be seen.

The following are the present quotations:

	Raw	Boiled
1 to 2 barrels, gal.	2 50	2 53
3 to 5 barrels, gal.	2 49	2 52
6 to 9 barrels, gal.	2 47	2 50

Less barrels add 15c gal.

WINNIPEG MARKETS

WINNIPEG, June 24.—The week's markets show marked activity and a wide range of hardware lines appear for further revision of price as a result, chief among which will be found pocket knives, oil cans, brushes, pliers, stovepipes, shovel and spade handles, glue, stove pipe mandrels, set screws, cap screws and syrup cans. As in the past weeks the manufactured product again predominates, metals, needless to mention, taking the lead. The general aspect of the markets, it is said, indicates decided firmness with strong tendencies toward further advanced prices. Apparent and even acute scarcity on many of the most important hardware lines is becoming daily more noticeable with little prospect of securing any appreciable relief. Barbed wire is said to be exceptionally scarce, many jobbers have no stocks of many of the standard styles, and supplies are coming through but slowly and in only small quantities. Business generally it is said, continues good, many seasonable lines moving rapidly.

Pocket Knives Show New Advanced Quotations

Winnipeg.

POCKET KNIVES.—A decided and fairly substantial advance affects on a general scale English pocket cutlery, the Wostenholm line being the chief affected. The advances occurring are general and show an average 10 per cent. increase on former prices.

Many Styles of Brushes Have New Higher Prices

Winnipeg.

BRUSHES. — The present market changes bring several styles of brushes to the fore for revisions of prices which, needless to mention, are of an advanced nature, showing an approximate 10 per cent. to 15 per cent. increase. The more important of the styles involved are: Scrub, stove, boot and varnish brushes. The change is general, including many of the most important styles and sizes. The lack of, combined with the advanced cost of, raw material is named as the chief cause for the new changes.

Pliers Are Now Costing More to the Extent of 5%

Winnipeg.

PLIERS.—Newly revised prices showing on pliers advance this commodity a further 5 per cent. on old lists, the reason of which, it is said, is due to the greatly advanced cost of raw material on which this class of goods is solely reliant for its manufacture, and which, as is known, has advanced steadily over a long period; a condition that cannot help but eventually affect the manufactured product. The Utica plier is the line at present most affected, all styles and sizes in this line being involved.

The Week's Changes Also Involve Stove Pipe

Winnipeg.

STOVE PIPE. — Following recent changes on tee pipes, the week's activi-

ties show sweeping and general change occurring on stove pipes and elbows. The latest revision, which shows an average 10 per cent. increase, will evince little surprise, as the recent change affecting only a portion of this line gave the impression that further and more general changes were to follow, which, as already stated, occur in the market changes of this week. The new increase is of a general character and latest prices are quoted as follows:

Stove Pipes—Standard, 6 inch, $24.87; 7 inch, $26.77. Ready to rivet, 6 inch, $23.87; 7 inch, $25.77. Riveted, 6 inch, $24.37; 7 inch, $26.27, per 100 lengths.

Elbows—Heavy, 6 inch, $3.48; 7 inch, $3.90. Light, 6 inch, $3.00; 7 inch, $3.30 per dozen.

Higher Prices Made on Spade and Shovel Handles

Winnipeg.

HANDLES.—A new revision occurs on spade and shovel handle prices and these lines are advanced a further 4 per cent. as a result. The present adverse conditions existing in the lumber markets are named as the chief factors responsible for the new increase, general and acute shortage still existing in many classes of lumber; which condition naturally advances the price of the raw material and in turn affects the manufactured product. There is little likelihood of any possibility of early relief occurring, that will materially improve the situation, it is said. The present handle prices are quoted as follows:

Handles—Long shovel, regular, $7.75; Bulldog, $7.75; D shovel, 5, $7.75; 8, $7.75; D spade, 9, $7.75; D scoop, 10, $7.75; 20, $7.75 per dozen.

Powdered Glue Advanced an Average 3c Per Lb.

Winnipeg.

POWDERED GLUE.—Higher prices appearing on powdered glue advance this line a further 3 cents per lb., which is accordingly quoted as follows:

Powdered Glue—Size, ¼-lb. pkts., 52c; ½-lb. pkts., 41c; 1-lb. pkts., 37c per lb.

20% Advance Is Named on Stove Pipe Mandrels

Winnipeg.

STOVE PIPE MANDRELS show heavy advance in the week's changes and are 20 per cent. higher as a result of this new revision. The present price appears firm and quotes the 36 x 4½ in. size at $12 each.

Round Syrup Cans Are Now 10% Higher

Winnipeg.

SYRUP CANS.—New prices named on syrup cans advance this line an approximate 10 per cent. on old prices; an occurrence which, it is said, can be solely attributed to the present acute scarcity of sheet tin which is at present worrying manufacturers of this class of goods. The raw material has also advanced considerably in price in recent weeks. The new prices appear firm and are quoted at:

Syrup Cans—Plain round, ¼ gal., $14.20; ½ gal., $20.60; 1 gal., $28.45 per 100.

Gasoline Cans Show a $1.50 Per Dozen Advance

Winnipeg.

SAFETY GASOLINE CANS have higher prices to the extent of an average $1.50 on one dozen lots. The new change, it is said, is not of a very heavy character when it is considered that the raw material is difficult to procure and the prices of same are being subjected to heavy and repeated advance.

Revised prices are now quoted at:

Gasoline Cans—Safety, ½-gal., $4.50; 1 gal., $5; 5 gal., $9.75 per dozen.

Set and Cap Screws Are Now Quoted Net List

Winnipeg.

SET AND CAP SCREWS.—Present market revisions also affect set and cap screws and advance these lines a further 17½ per cent. The new revisions affect both square and hexagon patterns and are now quoted at net, standard lists.

PITTSBURGH MARKETS

PITTSBURGH, June 24.—Production of both pig iron and steel has increased a trifle and the rate is now nearly, if not quite up to the rate in March, the best rate attained since October, 1918.

Steel shipments have increased but little, and are still hardly equal to production, though the additions to the large amount of steel accumulated are now small. In occasional instances mills are probably shipping somewhat more steel than they make. Early last week car supplies at some of the plants suddenly dropped off, the explanation offered being that this was due to the establishment of the railroad pools in lake coal and lake ore, under instructions by the Interstate Commerce Commission. A desperate situation had arisen as to lake coal, the Northwest being faced with a fuel famine next winter. The extra car shortage proved to be only temporary. Shipments of tin plate have been excellent, far in excess of the production.

The pig iron and steel markets are very quiet all along the line. There is business being placed, but it is only of routine character, the market being absolutely devoid of snap. Customers of the Steel Corporation are buying freely in so far as the corporation is willing to accept their contracts, and evidently have entire faith in the stability of the Corporation's prices, which are all in accordance with the Industrial Board schedule effective March 21, 1919. The Corporation has given another evidence of its disposition to hold prices down in having allotted some pig iron tonnages to regular customers in the Chicago district at $36 when the independent market is $43, this being in line with its policy on Birmingham iron, which the Corporation has not sold at above $38, the independent market being $42.

Regular customers of independents are limiting their purchases to absolutely known requirements in the case of independents that have particularly high prices, while in the case of independents that are only $10 to $20 above the Corporation prices it is the producer that limits the amount of business placed.

Contracting for Connellsville furnace coke for the second half of the year presents very difficult problems for both producers and consumers. The producers see a present coal market in the Pittsburgh district ranging between $8 and $10 per net ton at mines, and at $9 the market value merely of the ton and a half of coal required to make a ton of coke would be $13.50, while the cost of making coke would be say $1.50, making $15 for coke, to get back the coal value. Coal may be worth much less during the second half of the year, but no one can prove that it will be. To ask $15 for coke would mean that no sales would be precedents the conditions, that would be paid might mean a big loss, compared with what might be obtained for the coal.

The furnaceman, on the other hand, does not know whether pig iron is going to advance or decline, but seriously fears that it is going to decline. Some operators have offered "ratio" contracts at 4 to 1 on basic pig iron, which would mean $10.87½ for coke when basic pig iron is $43.50, valley, as at present. If pig iron went to $32 the coke would cost $8 on such a ratio contract, but according to precedents the conditions that would in the open market worth much less than $8, and thus the furnaceman is puzzled, just as is the case with the coke operator.

Contracts involving about 25,000 tons of coke a month have been closed on the 4 to 1 ratio basis, also contracts for a considerable tonnage at flat prices between $10 and $12. Some operators and furnacemen are indisposed to contract at all, and may get together on the basis of a monthly or weekly adjustment of price during the half year.

DO PAINT CAMPAIGNS PAY?

In figuring out whether a week's campaign will pay or not, the dealer must remember that it is doubtful if twenty-five per cent. of the houses in any community have used up to the limit of their requirements in floor paints and varnishes in order to give maximum protection to floors and woodwork. It is therefore a question of pointing out effectively what will result from continued neglect.

The Mason Tire & Rubber Co., Ltd., has been incorporated with head office in Toronto and capital of $10,000 to manufacture automobile tires and other rubber goods.

Heavy Importations of Fibres, Iron and Steel Products in May

Customs Figures Indicate Increase in Importations of Hardware Lines—Both Imports and Exports Show Increase Trade

OTTAWA.—The trade figures for the month of May, just issued by the Canadian Department of Customs, show a total trade for the month of $193,866,238, compared with $167,811,336 in May, 1919. The imports were $1113,447,899, compared with $71,344,816 for May, 1919. The exports of domestic produce were $97,342,578, as compared with $92,258,687 for the preceding year, and the re-exports were $3,075,761 as against $4,207,833. The total trade for the twelve months ending May 31st was $2,101,960,118, the exports being $1,163,770,493, and the imports $938,189,625. The duty collected during the month was $19,929,884 as compared with $13,964,643 in May, 1919.

Among the imports, textiles, fibres and their products were the largest of the classes, their value being $29,022,102 or over $16,000,000 more than for the same month last year. The greater part of these were from the United Kingdom. The imports of iron and steel and manufactures thereof came second, with $21,305,000, or nearly $14,000,000 more than in May, 1919. Vegetable and agricultural products, mostly foods, were $15,644,560 or $4,428,000 over the same month last year. Other classifications were: Animals and their products, $3,324,829; ores and metals, other than iron and steel, $5,092,760; non-metallic minerals, $10,995,837; wood and wood products, including paper, $3,876,501.

Wood and wood products, which includes lumber, pulp and paper, led the exports with $21,597,653, an increase of $8,605,000 over May, 1919. Exports of agricultural and vegetable products, mostly foods, were $19,835,377, or $22,451,498 below the same month last year. Other classes were as follows. Animals and their products, $13,856,134; fibres, textiles and textile products, $2,081,666; chemicals and their products, $2,098,745; iron and steel and manufactures thereof, $8,794,165; ores, metals and manufactures thereof, other than iron and steel, $3,734,730; non-metallic minerals, $3,380,198.—T. M. F.

Eliminate the Non-Essential

Producing the Most From the Expenditure of Energy

IT is undoubtedly a great art to know what to leave undone, and to know how to establish what the less important things are so that one's energy will always be directed along the most productive lines.

Writing in "The New Success," O. S. M. deals in an interesting manner with this important subject:

"How many people are so impressed with the importance of details, are so faithful to small things, that they expend their energies on trifles, and never have time for doing great things. The trouble is that half of us do not get the right perspective of life. We bring objects into the foreground which should be in the background. Life must be looked at as a whole. Many things must be subordinated, not because they are not important, but because they are relatively unimportant.

One of the most difficult things in the world is to get the right perspective of life, to keep in view the larger, and not let the smaller shut it out.

"Everywhere we see people jeopardizing the big thing for the little. While attending to some little picayune detail that ought to be left to a clerk, stenographer, or office boy, men lose some great advantage they might have gained had they been free to attend to it, just as shortsighted economists will lose a chance to make a hundred dollars in the future in trying to save fifty cents to-day. They do not realize that a small coin close to the eye can shut out the sight of a gold eagle.

We know many business men who keep their noses to the grindstone so closely, they are so completely buried in details, in attending to the little things themselves, that their larger interests suffer. No man is great enough to be a leader and at the same time bury himself in details. The one excludes the other.

The great thing is to get the right perspective, not to emphasize the wrong thing. The man whose head is buried in details cannot get a clear vision of his affairs as a whole. When absorbed in little things he is not in a position to plan large things.

"I have a friend, a most estimable man, who is so conscientious about doing little things to a complete finish that he never allows himself to neglect the smallest details of the most trifling matter. The result is, that, although he is a tremendous worker, his energies are so exhaused on trifles that he has very little strength or time for important things that need his attention. He has, indeed, been buried in trifles all his life. Painfully conscientious in his faithfulness to the minutest detail, he has lost the perspective of the larger, completer life which might have been possible to him. This man does not believe there are any such things as trifles, but that big things depend upon little ones. While there is much truth in this, every man of achievement well knows that there are hundreds of little things which are important if one only had time to attend to everything, but which must be sacrificed for the greater things.

"Of course, it would be desirable if we could do all of the minutest things which come in our daily life in the completest possible way; but we cannot do everything. Something must be subordinated, or else the great essentials will suffer.

Our common sense is given to help us discriminate, to show that while things may be important considered alone, we must look at them in their relation to the other, bigger things.

The man referred to will open a letter when he get to his desk in the morning, and will not do another thing until that letter is absolutely disposed of, everything referred to in it attended to. In other words, when he puts the letter aside that is the end of it. Then he opens another and proceeds in the same laborious, painful, minute way to the end. No matter how many people he has around him who could do some of the work as well as he, he attends to it all himself, because he does not want to take any chances with any detail. He is determined that nothing shall ever come back that will reflect upon his exactitude or show neglect even of the minutest things.

"Many a man's career has been pinched which might have been broadened if he had only learned the great art of eliminating the comparatively unessential.

No man can see things in their largest possible relations whose head is constantly buried in details. He must be able to look at things in their entirety, not at small unessentials, before his life will be very effective."

STAUNTONS LIMITED

Stauntons Limited have just issued a beautifully illustrated year book for the season of 1920 and 1921, which they say has been especially prepared for the assistance of those who sell wall papers. The book contains twelve pages of colored illustrations that depict a number of designs that are shown in a new line of wallpaper the firm are offering for the coming season. These appear amid modern appointments, so that those who are about to paper their homes may gain an impression of the appearance of each room when it is completely furnished. This firm also state that they have adopted a 22-inch standard of width which they claim lends a high decorative value to both the cheaper as well as a more expensive paper. Readers of Hardware and Metal desiring a copy of this book may have one on request from the above named firm.

Advertising Prolongs the Paint Selling Season

Advertising Has Overcome the Handicap of Paint Sales Being Confined to certain Seasons—Dealer Can Use This Factor in His Own Community if He Has This Problem to Contend with—Reasons Why Paint Advertising Should Be on a Twelve-Month Schedule.

FROM all parts of the Dominion come reports that the paint trade during the spring season of this year was very active. This may be due largely to the fact that properties neglected owing to force of circumstances during the years of war were entitled to a refreshing, and due partly to the general prosperity prevailing and the fact that high values now placed upon buildings necessitates more than ever their protection.

There is absolutely no reason why the spring activity in the selling of paint and varnish should not continue throughout the summer. The dealer who stops pushing paint when summer comes, who takes his paint and varnish displays out of his windows and moves the stock back from up front, who discontinues his paint advertising in the local newspapers and his circularizing, and who stops thinking and talking paint among his customers, is the worst sort of quitter.

There is no question that the judicious use of advertising is a big factor in prolonging the paint sale season. Insofar as they relate to buying, seasons are almost unthought of in most lines. There are some goods which are, however, affected to a large extent by the "seasonable" hoax. One of the best examples of what advertising has done to overcome this handicap is that dealing with the toy industry, says an article on the subject in the "American Paint and Oil Dealer." Some years ago there were but two buying seasons for toys—fall and spring, with the possible exception of the two or three weeks preceding the Christmas holidays when the toy manufacturers were kept very busy. To-day all seasons are buying seasons for all lines, with few exceptions.

Advertising is the factor which has made possible this transition. Of course advertising was done at the time when "seasons" were in vogue, but those who did the advertising believed there was no business to be secured "out of season" and therefore gave no thought to publicity except when the buying seasons were on.

Broader Usefulness Applied to Advertising

At a later stage when a broader usefulness was applied to advertising principles, it was seen that the time when advertising would do its best work was when business was quiet. As advertising seasons were eliminated the buying seasons were prolonged, and to-day every season is a buying season.

It is not difficult for those in the trade to remember when paint was only a seasonable commodity — unfortunately this opinion is held to some extent even to-day. While it cannot be gainsaid that paint is not to a great extent a seasonable commodity, yet the proper application of advertising will prove a great help in overcoming the disadvantages of having the paint trade confined to certain set seasons. Discussing this subject recently, "Printer's Ink," after showing the necessity for a campaign that would create a demand for all kinds of building material in all seasons of the year, said:

"While it is true that a number of manufacturers and a few associations in this line have seen the wisdom of continuing their publicity through most of the year, still, as a whole, building advertising has been largely seasonal. The big drive is usually confined to but three or four months.

Merchandising Mistake to Reach Only the Spring Painter

"The campaign generally is planned with the idea of catching the interest of the spring builder. Close students of the building situation claim this is a merchandising mistake. There are three principal reasons, they say, why building materials should be advertised on a twelve months' schedule. One is that most persons mull over their building plans for from three to five years before they actually undertake the project. Advertising to these people in the spring only is obviously not enough. Their enthusiasm for the house of their dreams should be kept aflame throughout the year.

'The second reason is that the placing of building contracts or the buying of homes is no longer confined to the spring. There is such an acute housing shortage that people are obliged to build or to buy when they can, whether it be summer, fall or winter. To keep these folks from getting discouraged, the advertising should be kept going without a stop.

Much Painting Held Over to Summer and Fall Through Scarcity of Painters

"The third reason for twelve-months-a-year advertising activity is that the repair end of the building material business is an important item. Because of the difficulty of getting painters, paperhangers, electricians, etc., many householders who only have repair or refinishing work to be done are obliged to wait until the slack season. This means that the work they would ordinarily have done in the spring must now be attended to in the late fall and winter. If advertising is to reach these persons at the proper time it is evident that it cannot be confined to any particular season.

"The building and paint advertiser, therefore, should enter the twelve-months' class. The trouble with seasonal advertising is that it tends to compact the industry's business into too short a space of time, and this prevents a profitable handling of the sales. Yearly advertising, on the other hand, spreads out

(Continued on page 64)

Livening Up Summer Paint Trade

"During the hot summer months the service about the average paint department is mighty apt to be on the wane," says a Western merchant. "Especially is the attention to the customer liable to slump a little. We do our utmost to give our customers the best possible attention because the temper of the average customer on a hot day is at a very high tension and any little inattention that might be overlooked at any other time, would start a fight on a hot day in July or August. So we try not to let the sultry weather dull the keen edge of our courtesy at this season. We have a few complaints about our store. Any well-regulated business has them. We try to be as diplomatic as possible, telling our customers that we have always advertised he was right."

The Brush Department

The "Service" Dealer is Progressing

Service in Brush Sales as Important as Any Other Department—Help Customer to Side-Step Difficulties in Painting and More Brushes and Paint Will Be Sold.

IT IS being demonstrated more clearly every day that the dealer who is giving service and cultivating the confidence of his customers is the one who is progressing. This extending of service in the form of information and other helps to the customer, can be applied to the brush department with equal success. It is well to plan a system whereby the customer will come in for a good deal of consideration.

A customer comes into the average hardware store to buy some paint. The dealer possibly goes to some trouble to see that he gets just the right paint for the job. He will perhaps give minute directions as to its use, and when he comes to sell the customer a brush the chances are he neglects to extend the same helps.

Getting the right brush is a most important part of the painting, and all the pains the dealer takes in directing the customer as to the correct paint to use will be discounted in effect to a marked degree if the right brush is not recommended. Many a job has not been well finished because the hardware man did not talk brushes to the customer or explain why a certain brush would give the best results.

Too Many "Last Season" Brushes Used

The man who bought the paint had it in mind to used a brush which had been used the former season but which had not been taken care of in the interval. He found the old brush as hard as only a brush that had not been used for a year could be. After working around with it for an hour or so perhaps he got it into a condition where it was at least semi-pliable, and started to work. It was plain from the start that it was not working right and would not work right, and yet the worker, rather than lose any more time, and anxious to get the painting done, went on. At the end he had a job that in spots looked as if the paint had been thrown on. There were bare spots and rough spots and streaks.

Such cases are common, and the difficulty can be obviated if the hardware dealer or his clerk suggested in the first place that when the customer was spending money on paint he should guarantee a good job by the extra expenditure required for a new brush. The man would have saved time and money and would have had a satisfactory job that would have encouraged him to do more painting instead of looking forward in the future to sidestepping any more such work and trouble.

Most Customers Fail to Consider Brush Question

Herein lies an opportunity for boosting sales of brushes and of rendering real service to customers. Most customers fail to seriously consider the brush question when starting to do painting. Working with too small a brush will make hours of extra work, and this is trying on their temper.

When the man is buying the paint is the time to sell the brush. When the customer gets home and does a nice job in quick time he appreciates the suggestion made by the hardwareman. While it may seem that this is a small service, it is in reality a big one, making as it does for that more or less intangible quality that establishes goodwill for a store or merchant. Goodwill is usually founded on just such little things in each department of the store.

WOOD PROTECTION

June issue of "Conservation" states as follows:

"The effect of the lumber scarcity, and its antecedent, the depletion of the forest, is being felt by the ambitious householder who undertakes to make his own repairs or improvements. Costs of material are rapidly mounting, and the expense entailed causes a delay in making repairs.

"In many cases, however, the necessity for repairs is due to delay in protecting woodwork. By the use of paint, much of the labour and expense of renewal would be obviated. It is remarkable how little thought is given to the protection of wood where it is exposed to the weather. The alternate absorption and drying out of moisture are conducive to decay. By painting the woodwork, moisture is excluded and the life of the wood will be greatly lengthened.

Can Market Canadian Paint in New Zealand

Since 80 per cent. of the dwelling-houses of almost all farm buildings and, in the country, most of the commercial buildings and hotels of New Zealand are constructed of wood, it may be understood that paints and varnishes occupy a prominent position in the import list. They were extremely difficult to obtain during the war, and for that reason much work was deferred until supplies became more plentiful and prices more moderate.

In the meantime American goods made up to some extent the shortage from the United Kingdom, and Australia much improved its position as a supplier of this country's needs in respect to both paints and varnishes, putting on the market a well-got-up and serviceable article. The exchange position, however, has much reduced the volume of "future" business going to the States. In the meantime supplies from the United Kingdom are coming to hand slowly, and the prices are such that only the barest minimum of renovation work is being done.

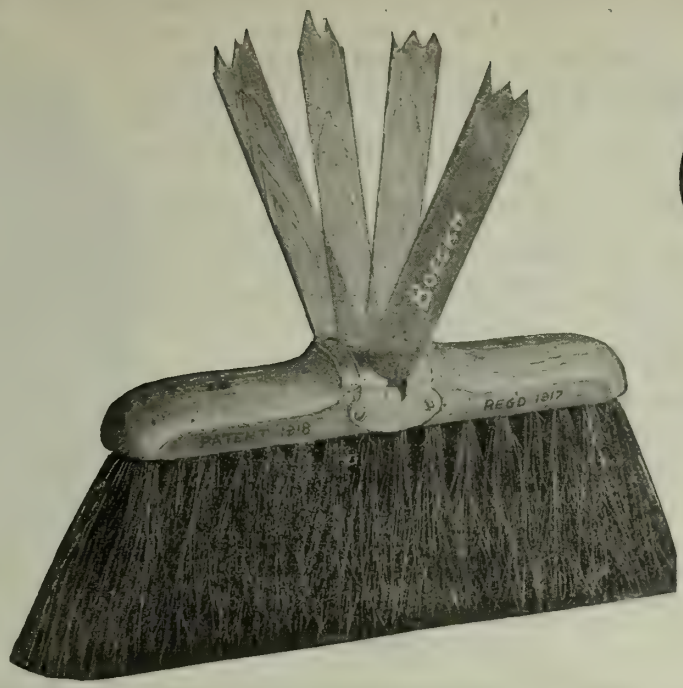
American paints and enamels are attractively presented to the eye of the purchaser, and they are ably introduced and sold. Their advertisement is often very convincing; but so far as big work is concerned, such as railways and Government undertakings generally, British goods are preferred.

Paint and varnish are made in New Zealand, but the industry is not on an extensive scale. Local manufacturers do not receive the encouragement that they look for from Government departments; they are not at present a factor in the market to give exporters to the Dominion much concern. The Australian paints, white lead, varnishes, and boiled and raw oils are now making their influence felt, and unless some concession is given in the form of price by British manufacturers they are likely to dominate the market, or, at any rate, eo expand in that direction. This does not refer to specialties like bath enamels and stains.

The retail trade in roofing paints is extensive, as the number of people of moderate means, including working people, who own the dwellings they occupy is large, and the high price of labor compels them to paint their own roofs. The American paint manufacturer's literature makes an eloquent appeal to such users, who could be similarly approached by British advertisements and descriptive matter.

Linseed Oil May Soon Be Lower

Montreal.—The linseed oil situation is still rather unsettled, but the consensus of opinion points to a revision of prices downward. Considerable oil has arrived from the British market, and this will have the effect of keeping prices of Canadian and American oil down, even though prices at present are high. One crusher pointed out to Hardware and



BOECKH'S

Adjustable Screw Lock Handle for Carpet or Floor Brooms

The exactness with which it supplies a long felt want for the consumer assures gratifying sales for the hardware merchant.

It is readily adjustable for the tall or short person or for sweeping under furniture, in odd corners, etc. The position of the Handle is altered simply by loosening and tightening the "Screw Lock." The handle should always be screwed tight.

By changing the handle from one side to the other every week the life of the broom is materially lengthened, and the sweeping surface is kept even. The broom end should not rest on end when not in use nor be used in water.

Its merits—its simplicity and attractive appearance are plainly evident at a glance—which makes it one of the best selling features on the market.

Metal this week that before another week has passed he expected prices would be considerably reduced from present levels. A decline of 25 cents or more per gallon may soon manifest itself, he intimated, and in the meantime many jobbers have taken care of orders previously in their hands and these are pretty well cleaned up.

Martin-Senour Co. Expanding

The Martin-Senour Co., Ltd., Montreal, is making extensive alterations to its plant in Montreal which will give them an additional floor space of between 20,000 and 30,000 square feet. Rearrangement and additions to the manufacturing plant, together with increased stock-handling space, will facilitate the handling of increasing business.

The Martin-Senour Company started manufacturing in Canada in 1906. Previous to this time some of the company's products were distributed in Canada through the jobbing trade. The first factory was established at 142 Inspector Street, Montreal, and this was vacated in 1909 for larger premises on Mount Royal Avenue and Drolet Streets. In 1910 a varnish plant was erected on Greenshields Avenue and Beaumont Streets. In 1914 the present factory was erected and occupied, with modern machinery installed.

The new extension will consist of three stories, and this will be added to one-half of the present structure. Manufacturing plants have also been established at Winnipeg and Vancouver, with distributing warehouses operated at Halifax and Toronto.

ADVERTISING PROLONGS THE PAINT SELLING SEASON

Continued from page 60

the sales and gives the advertiser a better chance to care for his orders. Also by pressing constantly against the market's outskirts it often succeeds in pressing them back, and this enlarges the advertiser's field.

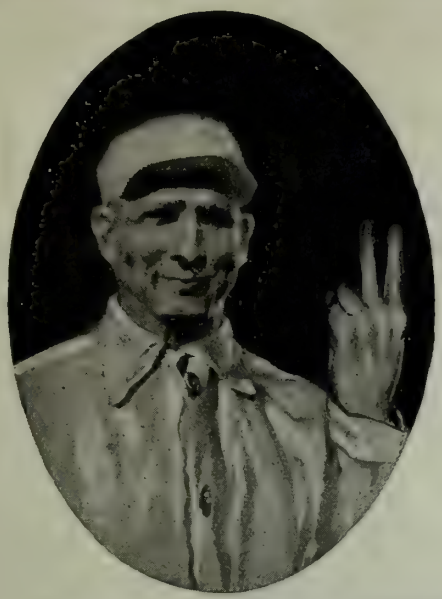
The advertising to be done along the lines suggested embraces a broad field. Suggestions for ads. are appearing in each issue of Hardware and Metal. Property owners can be urged to make an examination of property which has not been properly protected, and the likelihood is that they will be very much impressed with what they find. By advertising, the dealer can keep after the prospect who has not acquired the painting habit. Many of them will be surprised once they realize the extent to which the elements have been feasting on unprotected wood and other things.

For advertising purposes the slogan, "Examine your house," or any other simple sentence conveying that idea can be adopted for the campaign. Boost paint and varnish sales by getting close to the needs of your trade and thereby devising some means of getting property owners to a closer realization of the need of protection by painting. A constructive campaign along these lines carried on through advertising will do much to do away with "seasons" in paint selling.

How Hardwaremen Advertise Paints---No. 12

LINKING up the appeal of protection as well as beauty as a two-fold benefit from painting, this ad. by Horsley & Lorse, Ltd., Naicam, Sask., makes a point of the fact that the paint which serves best as a protection and beautifier, fulfills the dual purpose and the paint which serves the longest, effects the greater saving.

The ad. emphasizes the fact that it is mistaken economy to buy cheap paint, pointing out that while there is a saving on the initial cost the final cost represents extravagance in view of the fact that a gallon of cheap paint goes only about half as far as a gallon of good paint, and the result of using cheap paint will be to make the building look shabby after a few months of wear. The ad. concludes with a listing of the paints in stock for various purposes and asks for an opportunity of quoting on customers' requirements.



"Two Things"

says the Luxeberry Painter, "are desirable in varnish—quality and uniformity. They make the finest finishing possibilities a pleasant routine instead of an uncertain hazard.

"I always use Berry Brothers' products because their uniform quality enables me to produce a finish that satisfies me and pleases my customers."

Berry Brothers' Finishes sell easily because the "Berry" label is their best salesman.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 24. — While some uncertainty exists with regard to the price on linseed oil, many well-informed trade sources expect that prices will be lower very soon, probably before the week-end. The arrival of English oil, and encouragement regarding heavier seed supplies here, justifies the forecast that oil will rule easier. In the meanwhile there has been a fair demand from the trade for supplies, and yet orders held by the paint manufacturers have been quite well liquidated.

Turpentine is still high in price but a decline is anticipated on this commodity. The tendencies are easier than they were a week ago, although such quantities as have been received locally have been quickly distributed.

Paris green is actively in demand, from Western jobbers in particular. Putty, white lead in oil and general lines are selling well.

Many Expect Lower Linseed Oil Basis

Montreal.

LINSEED OIL.—Before the end of the present week it is probable that linseed oil may have reached a lower figure and at the moment there is some uncertainty as to the price. The arrival of English oil has effected a change in the local market conditions, while some are expecting more supply of the seed for crushing here. This means that an early decline of price is looked for, and one crusher intimated that prices may average around $2.25 per gallon or even less. There has been quite a general filling of orders by paint makers and others, and from now forward it is expected that necessary quantities of oil will be forthcoming without much trouble.

Raw—	Imp. Gal.	
1 to 2 barrels	2 45	2 60
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 47½	2 62½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Turpentine May be Lower in Few Weeks

Montreal.

TURPENTINE.—A tank car of turpentine arrived in Montreal this week but was quickly bought up. The situation is not any more difficult but there appears to be little surplus of turpentine on this market. The demands are satisfied in a large measure by supplying limited quantities to customers, and while there is no immediate price change some are looking for a reduction in the price in the near future.

Turpentine—	Imp. Gal.	
Single barrels	3 35	3 60
Small lots	3 70	3 90

(Packages extra)

Enough Putty to Meet Demands; Price Is Firm

Montreal.

PUTTY.—There is a seasonably fair demand for putty at unchanged prices and despite the fact that whiting is still scarce, dealers have been able to supply the trade with their requirements.

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead Demands Seasonably Active

Montreal.

WHITE LEAD IN OIL.—There has been a fair demand right along for white lead in oil, and paint makers are well satisfied with the volume of trade. The basis is unchanged and prices in effect will probably continue as they are for some time to come. The present basis for Government standard lead is $19.50 per 100 pounds in 5-ton lots; $20 for 100 pounds for ton lots and in smaller quantities the price is $20.35.

Maintained Demand For Prepared Paints

Montreal.

PREPARED PAINTS.—Market conditions are steady and quite active for this time of the year. Manufacturers state that they had not expected orders to come forward in such volume and the market is generally an active one for this time of the year. The undertone is steady and unchanged.

Paris Green Active With Firm Undertone

Montreal.

PARIS GREEN.—There has been an active enquiry and sale for Paris green throughout the Western Provinces. This is attributed to the grasshopper menace and some of the producers are expecting supplies to be severely taxed in filling belated orders. One manufacturer claims that unless the demands are unduly heavy they may have enough to see the season through. The market is a firm one.

TORONTO

TORONTO, June 24.—The feature of this week's market is a further decline in the price of turpentine, a further 25 cent reduction having been made. White lead in oil is in good demand and sales are very brisk, with a tendency ttowards shortage. Putty is also scarce and the price is held very firm owing to the difficulty of securing whiting supplies. Ready-prepared paint is also enjoying a good seasonable demand. Jobbers state that they are handling a very brisk sorting business and that fair shipments are daily going out of their warehouses. The glass situation has been materially relieved by shipments of Belgian glass, and some have hopes for at least partly overcoming the shortage before the heavy fall buying season sets in. Collections continue to come forward promptly.

Shellacs and Varnishes Firm; Price Unchanged

Toronto

VARNISH AND SHELLAC is having a very satisfactory movement and fair quantities are daily being shipped. The present quotataions are very firm and the tendency is upwards, although little change has been recently been made in the prices which are as current quotation pages.

Movement of Prepared Paint Very Brisk

Toronto.

PREPARED PAINT of nearly all kinds still has a very favorable demand, and it believed that nearly all in the trade are enjoying a very good business turnover on this line. Jobbers state they are doing a good sorting business and that nearly all stock that is going out now is to refill the dealers shelves. The present quotations are as per current quotation pages.

White Lead in Oil Sales; Very Satisfactory

Toronto.

WHITE LEAD IN OIL is also moving readily, and those in the trade seem very well satisfied with the business that is being offered. It is stated that

The Unconquerable White

The Right Enamel
To Enamel Right.

A. Ramsay & Son Company

corroders are doing a very favorable export business, and between the foreign demand and the home demand are kept very busy manufacturing their product. Owing to the large requirements there is a tendency towards shortage, some having difficulty in securing sufficient supplies. The quotation on pure white lead in oil remains unchanged, the price being $20.35 per hundred pounds in ton lots, and $20.70 per hundred pounds in less than ton lots.

Shipments of Belgium Glass Recently Arrived

Toronto.

WINDOW GLASS.—Some fair shipments of Belgian glass have come to hand recently and jobbers state they have better stock on hand now than they have had for many months. This, however, they state is moving very quickly as during the early spring many back orders were held over, and the filling of these back orders as well as the present demand has created considerable activity on this commodity. Many have hopes that the near future will show a decided improvement in supplies and that the scarcity may be overcome before the heavy buying season comes in. The present quotations on glass are very firm, single and double diamond still being quoted at 15 per cent. discount from the list, while the cut lights are quoted at 40 per cent. discount from the list.

Putty Prices Firm; Whiting Shipments Tardy

Toronto.

PUTTY. A heavy demand has been noted for putty, and manufacturers state they are still faced with the difficulty of securing sufficient supplies of English whiting, and also state that shipments of other brands of whiting are also tardy. Little change has been made in the price, and the present quotations are held very firmly and are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quo-

Prices on Linseed Oil Remain Steady

Toronto

LINSEED OIL.—Crushers state they still have difficulty in securing sufficient seed for their purpose, and while it is believed that there is considerably more oil on the market the situation is still rather tight so far as supplies are concerned. Railroad transportation difficulties have been the chief cause for aggravating the situation as crushers state they have considerable seed tied up at ports of entry but have been unable to complete shipment to the mills owing to the freight tie-up. It is hoped, however, that the railway transportation situation will soon right itself and that crushers will be able to receive their seed in more satisfactory quantities, and should this be the case many are looking forward to lower prices on this commodity.

The following are the present quotations:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 50	2 65
3 to 5 barrels, gal.	2 49	....
10 barrels and over, gal.	2 47	....
	Boiled	
1 to 2 barrels, gal.	2 53	2 68
3 to 5 barrels, gal.	2 52	....
10 barrels and over, gal.	2 50	....

Prices shown are those ruling on Thursday of curent week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Further Decline of 25c Made on Turpentine

Toronto.

TURPENTINE.—A further decline has been made on the price of turpentine this week which lowers the quotation 25 cents per gallon. The tendency is for still lower prices in the near future it is stated. Many are looking for a decided increase in this season's receipts over those of last, and base their opinions on the satisfactory receipts which are coming forward daily. Considerable improvement has been shown in the turpentine situation locally, it is stated, and the famine which has been prevailing has been practically relieved and a fair amount of turpentine is available, although it is stated that large quantities are still needed to fill up the empty tanks as a result of the recent famine. However, it is hoped that this situation will soon right itself, and now that the railway transportation is improving many are again watching the markets in the South and have hopes for still lower prices in the near future. This, however, might be expected at this season of the year, but how soon this becomes effective depends on conditions. The following are the present quotations:

Turpentine—	Per imp. gal
1 barrel lots	3 25
2 to 4 barrel lots	3 24
5 gal. lots	3 40

Painters and Supply Houses Hold Annual Picnic

The annual picnic of the Master Painters and Decorators, held last week at Weekes' Grove, North Toronto, was the most successful outing held by them since the inception of the association. A splendid program of sports was successfully carried out, and the main feature was a baseball game between the Master Painters and the Supply Houses, which was won by the former by a score of 15 to 13.

Paint Sorting is Still Active

Montreal.—In speaking with a large Canadian paint manufacturer in Montreal this week, it was pointed out that repeat or sorting orders from the trade were very active. This condition seems to prevail in manufacturing circles generally, and there is more business passing at the present time than had been expected. This indicates that the consumer is buying freely and that much painting is in progress throughout the country. Spring orders, as before pointed out in Hardware and Metal, were very heavy and this sorting business being so active indicates that stocks have been passed along to consumers regularly. The season has been one of the very best, if not the best, in the history of the trade.

Corporations to Protest to Sir Henry Drayton

Montreal.—A deputation representing several hundred millions of invested capital will leave Montreal for Ottawa to voice a protest against the recent changed ruling of the Government with regard to the sales tax. A few days ago notice was received from the Government that all public services and corporations buying direct from manufacturers or importers would have to pay the full two per cent. sales tax. For the Canadian Pacific Railway alone this means a charge of at least a million dollars a year.

WHERE AND WHEN STORES ARE CLOSING

Big Business in This New Product

If your customers include automobile owners you can add materially to your business and profits through the sale of Tarklene–the new tar, grease and oil solvent.

Every Motorist Needs Tarklene

because it removes almost instantly the tar picked up from the roads, splashes of oil and grease and restores the original lustre of the finish. Simply applied with a rag, many uses will be found for Tarklene.

Get your share of the sales of this new product. Write our nearest branch about it to-day.

What is the Life of a Paint Brush?

Generally it depends on the usage it gets and the preparations in which it is used.

TRADE SIMMS SET IN RUBBER MARK

Paint Brushes

can be used in any paint, oil or varnish preparation, kalsomine, glue, paint removers, etc., and yet live longer than the ordinary brush that is used in only one kind of paint.

The SIMMS brush lives until its bristles are worn down to the handle, and it gives excellent service all the time, under all conditions.

The painter's trade will come your way if you handle SIMMS Set-In-Rubber Paint Brushes.

Our other lines are also winners.

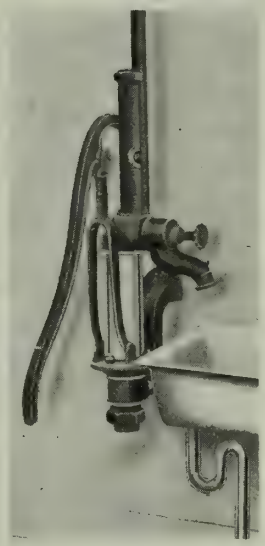
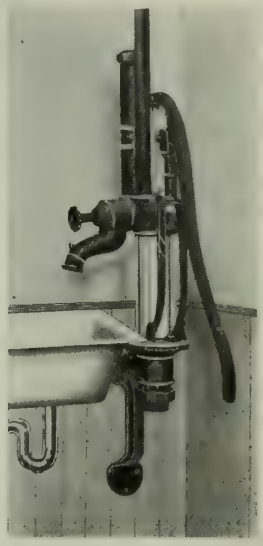
Beatty Bros. Limited Bulletin





The BT Bracket Pump

—the Pump of Many Uses

MR. W. A. FITZSIMMONS

Mr. W. A. Fitzsimmons is one of the best known BT Hardware Salesmen. He lives in Ottawa and handles Ottawa Valley. For many years he sold our Barn Equipment Lines, but is now devoting his time to calling on our friends in the hardware trade. He has been with us longer than any other BT Salesman now "on the road."

The BT bracket pump is splendid for use in kitchens where there are rolled rim sinks.

The illustrations above show how easily they can be attached to the wall.

The wall bracket, handle and spouts permit of a variety of adjustments. They are splendid pumps to install in a corner, where you have to get the handle round at an odd angle.

The bracket can be supplied for three different varieties of BT House Force Pumps. It is a splendid line to stock. It meets so many problems without a lot of different varieties.

If you have not a copy of our big general catalog, drop a card to our nearest branch. It tells all about the BT Bracket Pump and the other BT lines.

TINKER TOM'S TALKS.

No. 265

Returns from the Garden

EARLY IN MAY THE SHOP OFF, ACCOUNT NO STEEL—TOO MANY STRIKES—

DID WE QUIT COLD?
NOT ON YOUR LIFE!

WE ALL "TURNED FARMER"— DIGGING, PLANTING, CULTIVATING — AND NOW WE LIVE HIGH!

VEGETABLES — SEVEN KINDS — AND STRAWBERRIES!

THE MORAL, OLD MAN—IS THIS— IF YOU NEVER PLANT ANYTHING YOU'LL HAVE JUST NOTHING. SOW A GOOD DEED, A KIND THOUGHT — A HARD DAY'S WORK FOR THE FIRM, YOU'LL GET YOUR REWARD.

I GOT MINE!

TINKER TOM

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

Stephens'

REGISTERED TRADE MARK

Shingle Stains

Salesmaking Artistic Effects

There is a multitude of uses for shingle stains, but their growing popularity with the consumer for creating the many artistic effects on shingle and rough timbered designs in modern bungalows is a gratifying source of extra sales for the paint department.

Stephens Shingle Stain is ideal whether the stain is applied by dipping or brushing.

Many new homes are contemplated, many are building; *Stephens* popularity makes these prospects yours.

When writing to Advertisers kindly mention this paper

Says a Reader of Many Years Standing:

"I do feel that your paper is the most interesting and readable financial journal published in this country and, perhaps, in the entire North American Continent. Each week I somehow find time to read every word of it—mostly in bed, late at night. I find I have to read THE FINANCIAL POST in order to maintain myself properly abreast with the bigger things and movements taking place in this country."

THE FINANCIAL POST is published for men who are interested in big things—not necessarily men who personally have big financial interests at stake, but for men who are eager to know what is happening that will have a bearing on business and the well-being of Canada generally.

THE entire editorial organization of the MacLean Publishing Company is at hand to co-operate with the editors of THE FINANCIAL POST. Specialists in many businesses write for THE POST. A practical farmer, in constant touch with the farming conditions, deals with crop prospects.

THE POST is a paper edited by specialists for business specialists.

The Financial Post

HARDWARE SPECIALTY LINES WANTED FOR WESTERN CANADA

P. R. BRECKEN, Limited
Manufacturers' Agent
108 Sixth Avenue West
CALGARY ALBERTA

The Advertisers would like to know where you saw their advertisements—tell them.

CASE TIRE TOOL - EASY

Takes off—puts on Clincher Tires quickly. New great invention. Also Case Rim Tool takes rims off tires. Malleable. Ask any dealer, or send $4.50 to

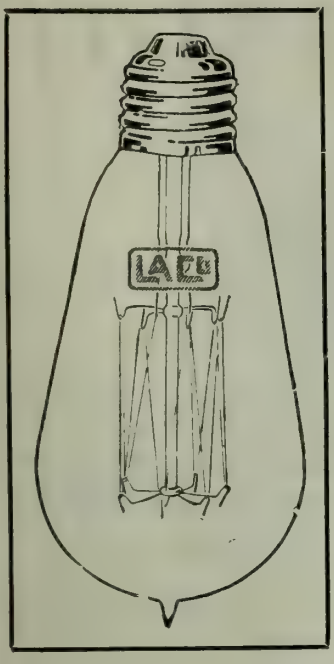
MOTOR NECESSITIES CO. OF CANADA
231 Somerset Bldg. Winnipeg, Canada

OWL BABBITT METALS

Hardware dealers can get Owl Traction Babbitts for tractors, Owl Babbitt Metal for threshers, and Owl Vulcan Babbitts for light, general work from their jobbers. Also solders for tinsmiths and plumbers.

OWL METAL COMPANY WINNIPEG

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.



LACO TUNGSTEN AND NITRO LAMPS

ARE

BACK AGAIN

After a period of nearly two years during which, it has been practically impossible to secure them, we are again in a position to fill your orders for these well known lamps.

And there is no difference between the lamp we can now ship you and the previous ones except that, whereas they were formerly made in Holland, they are now made in Canada.

The quality and efficiency are the same. When you supply a customer, with one of these lamps, you are not guessing, **you know** that you are supplying him with lighting satisfaction, you have our guarantee as to that. So if you have not arranged for your supply, do so now.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Barrett Roofings, Cements Industrial Paints etc.

IT is easy to sell a thing that your customers need and *know they need*. That's why it is so easy to sell Creonoid.

The fly season will soon be here and you should be ready to supply Creonoid to your farm trade. It will return you a good profit on quick sales and it will prove to your customers that you are looking out for their interests as well as your own.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

EVERY progressive farmer in your community knows that constant annoyance by flies makes his cows give less milk and his horses do less work. He knows, too, that lice keep his hogs from getting fat and his hens from laying eggs.

And he is eager to try Creonoid, for he has read our advertisements which have appeared regularly in all the leading farm papers.

Creonoid is without question the most effective destroyer of flies and other vermin that has ever been put on the market.

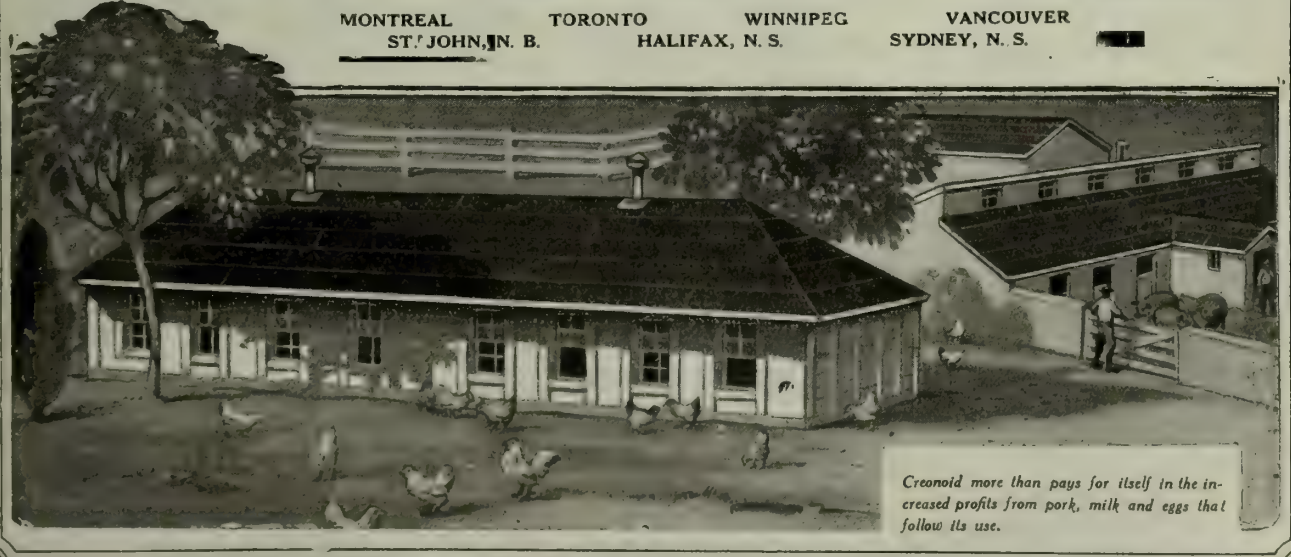
It is a liquid preparation which is quickly and easily applied with a sprayer. It is cheap enough to use freely; it produces sure results, and it pays for itself over and over again in the better health of live stock and in the increased profits from pork, milk and eggs that follow its use.

Creonoid comes all ready for use. It requires no mixing or thinning. It is put up in exceptionally attractive cans in the following sizes: 1-gallon cans (12 to the case), 5 and 10-gallon cans, ½ barrels and barrels.

The Barrett Company
LIMITED

MONTREAL TORONTO WINNIPEG VANCOUVER
ST. JOHN, N. B. HALIFAX, N. S. SYDNEY, N. S.

We can also supply an inexpensive sprayer made especially for applying Creonoid.



Creonoid more than pays for itself in the increased profits from pork, milk and eggs that follow its use.

BOLINDER'S

FOOD CHOPPING and MINCING MACHINES

THE "BOLINDER" FOOD CHOPPERS

Adjustable for chopping meat—coarse, medium or fine. Can be used to the same advantage for mincing fruit, vegetables, eggs, cheese, etc. Ahead of every other make on account of their many-sidedness.

Food Choppers made in 4 sizes.

The "BOLINDER" Mincing Machines

Are of the very highest standard. All surfaces are smooth to prevent the accumulation of dirt and to facilitate cleaning. **Made in 9 sizes**

Both machines are constructed on the American system and all parts standardized to interchange with other machines of the same type.

The **Cutters** are of case-hardened Swedish steel, specially tempered and practically blunt-proof. The **Tinning** is extra heavily coated by expert workmanship with purest tin.

Exclusive selling rights granted to dealers where we are not actively represented.

For catalogues, prices and terms please write.

J. & C. G. BOLINDERS MEK. VERKST. A. B., STOCKHOLM, SWEDEN

CARTER'S

Your Paint Customers Need Carter's Genuine Red Lead

Pure, uniform and economical Carter's Genuine Red Lead is the best protection for metal work of every description.

When mixed with pure linseed oil it possesses every quality of a perfect Red Lead—free flowing, uniform in film and with unusual covering capacity.

We also make Carter's Genuine Orange Lead, Dry White Lead and Litharge. It will pay you to keep an ample stock on hand.

The Carter White Lead Company of Canada, Ltd., 91 Delorimier Ave., Montreal

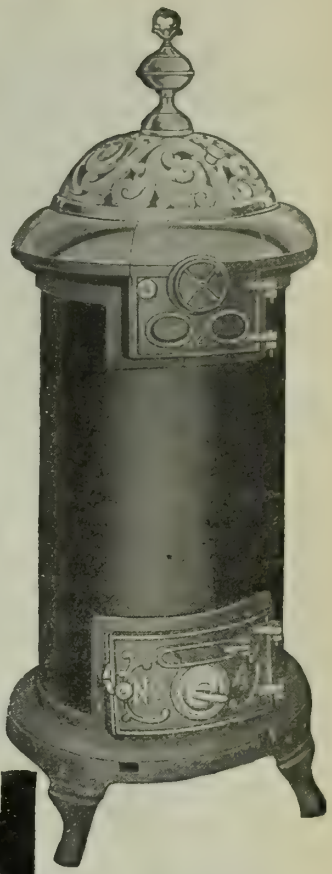
"BEAVER" HEATERS

All the Davidson "quality marks" are in these stoves

These "Beavers" can be supplied with or without grates—they are lined with fire brick, the bodies being of extra heavy blued steel. Very pleasing in appearance and durable. Many satisfied customers have made these very popular lines.

Orders promptly filled in sizes 2, 3, 4, 5 and 6—either plain or nickel-plated.



The Thos. Davidson Mfg. Co. Limited

HARDWARE & METAL'S

unique circulation as proven by the A.B.C. Audit is due to 31 years of honest effort to give the retail trade the best possible service.

The Publisher's Page

TORONTO JUNE 26th, 1920

This is Not a Freak Special

ON or about 21st of August, in every year for the past 32 years, the hardware trade of Canada has received the Annual Fall Sales and Directory Number of HARDWARE AND METAL. This number is looked upon as a most essential book of reference in every wholesale hardware buyer's office, and in over 90 per cent. of the retail hardware stores from coast to coast. The issue is a real buyer's guide and directory number. Owing to its size and the great amount of practical and valuable information in the editorial and advertising pages, the number is read, re-read, and consulted many times during the fall and winter months. A cord is inserted in the upper left hand corner, in order that hardware buyers can hang up their copies close beside their desks. The Canadian hardware trade in all its branches naturally expects to find in this number advertisements from manufacturers and wholesalers who desire to do business with the hardware trade.

Reservations made to date for the 32nd "Fall Number" make it quite apparent that this year's number will eclipse all previous records, and that it will be necessary to close all forms earlier than in previous years.

If you have not arranged for space in this number, drop us a line and we will gladly send complete details regarding circulation, rates, etc.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

Montreal Branch, Southam Bldg. Winnipeg Branch, Union Trust Bldg.

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

IMPERIAL
Polarine
MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.

IMPERIAL POLARINE
(light medium body)
IMPERIAL POLARINE HEAVY
(medium heavy body)
IMPERIAL POLARINE A
(extra heavy body)

One of these grades is specially recommended for the correct lubrication of any car or truck in your community.
See the Imperial Polarine Chart of Recommendations — display it prominently and sell by this chart.

For efficient automobile transmission and differential lubrication sell
IMPERIAL POLARINE TRANSMISSION OIL
In cases where grease is required or preferred, sell
IMPERIAL POLARINE TRANSMISSION GREASE "BB"
IMPERIAL POLARINE CUP GREASE

Write to the
General Sales Department
56 Church Street
Toronto, Ontario
For our dealer's proposition

70% of these cars use Imperial Polarine

MOTORISTS everywhere depend on Imperial Polarine for efficient lubrication. Over seventy per cent. of the motor cars in Canada are lubricated with Imperial Polarine.

Practically seven out of every ten cars which pass your door are giving satisfactory service because lubricated with Imperial Polarine. Dealers who sell and recommend Polarine are reaping the harvest of this consumer satisfaction. Motorists naturally buy where they know that their grade of Imperial Polarine is carried in stock in the size they want.

If you don't carry the complete Imperial Polarine line you are automatically keeping much of this business away from your door. The customers you do get may expect just oil when they ask for oil—but, the chances are they expect Imperial Polarine. If they don't come back it may be because you didn't give them Imperial Polarine.

If you expect to get 70% of the business from your territory you should carry a complete line of Imperial Polarine—then you'll satisfy your customers—and they'll come again for more Imperial Polarine and other motoring needs as well.

There's a big profit in Imperial Polarine when you build up your volume—a profit worth fighting hard to keep coming.

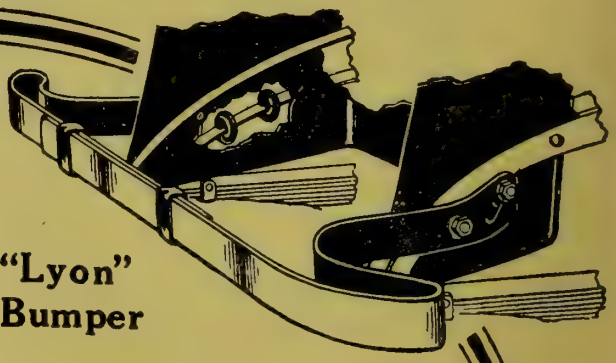
Northern Electric

Accessories the Motorist Knows and Buys —

K. P. Universal Rim Tool
Northern Timer Elevator
"Lyon" Bumper

Our Consumer Advertising on these lines is running in thirty-seven mediums with an aggregate circulation of nearly 1,500,000. Figure the result for yourself.



Northern Timer Elevator

Sells on UTILITY—it lifts the Timer to the most accessible position where mud, dirt, oil, grit and dampness cannot possibly reach and harm it.

"Lyon" Bumper

A QUALITY bumper made for real service. Just thirty pounds of the highest quality steel, scientifically constructed into a perfect bumper for Ford and Chevrolet 490 cars.

K. P. Universal Rim Tool

A practical, LABOR SAVING device that fits all types of cross-cut demountable rims—collapses a rim no matter how badly a tire may be stuck to it—forces the rim back on the tire again with the utmost ease—locks rim collapsed, while tire is being removed or replaced.

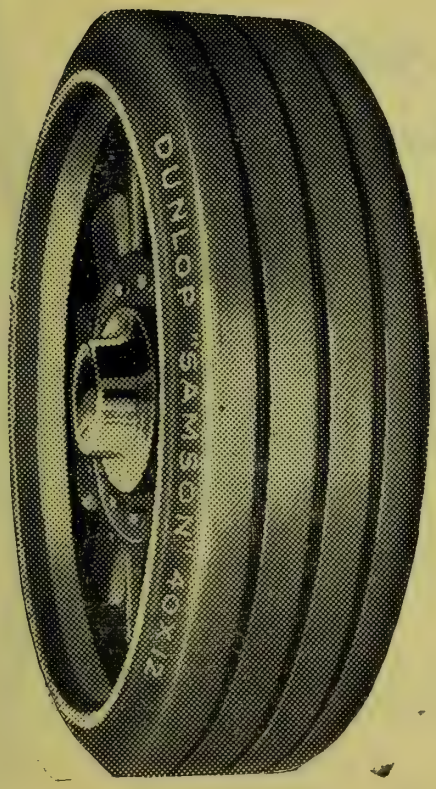
DUNLOP TIRES

SEAL OF QUALITY

MOTOR TRUCK



Motor Trucks are, in respect to overloading, at the mercy of circumstance.

To-day this practice is even more pronounced than ever.

To minimize the effects of this evil, as far as humanly possible,

DUNLOP "SAMSON"

Motor Truck Tire was developed.

Every **Dunlop Truck Tire** is an over-size tire, and contains more cubic inches of rubber per foot than the corresponding size of any other Truck Tire made in Canada.

Dunlop "SAMSON" is constructed to take a big portion of road shocks that ordinarily play havoc with the mechanism of the truck or its load.

As already stated, **Dunlop Truck Tires** contain an extra volume of wear-resisting, load-absorbing rubber. It is this resilient, well-nigh indestructible rubber, also that means better value to you in **Dunlop "SAMSON."**

A call from one of our salesmen puts you under no obligation to buy.

Drop a line or 'phone to the Dunlop Branch nearest you.

Dunlop Motor Truck Tires absolutely will not split nor come loose from the steel base. You cannot chisel them off.

"GUTTA PERCHA" TIRES

They Give Satisfaction to both

Buyer and Seller

The day is past when motorists consider the first cost of a tire. They have learned that the road performance is the true test. "Gutta Percha" Tires are delivering mileage in excess of expectations—and trouble-free, trustworthy mileage, at that.

Your customers will be glad you sold them "Gutta Percha" Tires. Every one you sell will mean more customers—regular customers—satisfied customers. See that your stock is complete with a full line of all sizes.

East or West the North Star is the biggest battery value.

Dependability

The user of North Star batteries knows that he can expect maximum service under all conditions. Heat, cold or humidity cannot affect the strength of the battery—the full power must be delivered in actual spark.

The value of dependability cannot be estimated. Delays, big or little, cost money. Serious loss can be occasioned by unreliable batteries. The North Star cells end delay losses and are a guarantee of continuous operation for engines, tractors, automobiles, telephones, bells, etc.

Made singly and in multiples (perfectly protected and conveniently arranged with handle). The user gets better service and the seller bigger returns and larger turnover from the North Star.

"Lively and Lasting"

RELIABLE
TRADE MARK
Canadian Products

Are True To Name

"Reliable" products are true to name. Made with infinite care in Canadian factories by Canadian workmen and thoroughly tested to insure high uniform quality, they never fail to give that efficient, eagerly-desired service that insures satisfied customers and increased business.

For instance, the "Reliable" Ignition Unit is easily a leader. Made of "Reliable" Dry Cells, bedded in pitch and set in a box which is perfectly moisture proof, it always gives dependable, high-grade ignition service in automobiles, power boats, gas engines or tractors.

The No. 6 "Reliable" Battery is also full of power and can be entirely depended upon to give every ounce of its tightly-packed energy whenever used—in motor, engine, bell or telephone.

The Big Brass Cap—a feature in all "Reliable" batteries—prevents waste of energy, gives a maximum spark and puts all the power to work.

Stock the complete "Reliable" line. There is a type and size of battery and flashlight for every requirement. The complete satisfaction of customers who buy these products will tell its inevitable tale in better and bigger battery business.

No. 1 Fire Pot
List Price, each $27.20
Ask for Discount.

How to Save Gasoline

The No. 1 Fire Pot has the highest degree of heat generating power with the smallest consumption of fuel. The saving in gasoline alone will soon pay the cost of the Fire Pot. The No. 1 is the greatest general utility Fire Pot made and is favorably known to all mechanics. The tank is made of seamless drawn steel, with large funnel and filler plug, and the powerful burner is swiveled so that the flame can be placed where needed. Jobbers supply at factory price. Send for catalog.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

A large, progressive manufacturing concern in Toronto has an opening, with real future, for a young man with sales ability. Applicant must be ambitious and willing to devote considerable time and study to learning the business. Only those with these qualifications need apply. This is a real opportunity for right type of man. Give full particulars in first letter, stating age, previous experience, etc. Apply Box 253, Hardware and Metal.

WANTED — Manufacturer's agent to handle a well-known line of Aluminum Cooking Utensils in the following territory on a commission basis:

Nova Scotia
Prince Edward Island
New Brunswick
Manitoba
Alberta
Saskatchewan
British Columbia.

Apply stating reference, lines handled and how often territory is covered to Box 267, Hardware and Metal.

WANTED — FIRST-CLASS TINSMITH, CAPable of taking charge of a shop and figuring on work. Married man preferred. Apply to the Fulton Hardware Co., Ltd., Sault Ste. Marie, Ont.

WANTED—TRAVELLER TO COVER NIAGARA Peninsula, selling builders hardware and mantels. Also first-class young man for builders hardware department in retail store. First-class men only wanted. Apply Kent, Garvin & Co., Hamilton.

WANTED—RETAIL HARDWARE SALESMEN, single men only. Give full particulars. Mills Hardware Co., Hamilton.

WANTED — GOOD ROAD SALESMAN FOR Wholesale Hardware; must be a live wire, have good personality and be of steady habits. This is an excellent proposition for the right man. Territory covered in Western Canada. Apply in own handwriting, stating experience, age, height, etc., to Box 370, Hardware and Metal.

WANTED

ADVERTISER WILL PAY CASH FOR HARDware business well located in city of 12,000 to 25,000 population. Stock of from $15,000 to $35,000. Please write fully in first letter advising particularly as to location of store, amount of stock, and what lease might be obtained on store. Box 379, Hardware and Metal.

WANTED—GOOD HARDWARE BUSINESS IN good town or city. Stock from $8,000 to $15,000. Will pay cash for stock, and either rent or buy store property. Box 419, Hardware and Metal.

SITUATIONS WANTED

HERE IS AN OPPORTUNITY FOR A MERchant in Manitoba to get a first-class bookkeeper, experienced in general store and hardware work. Best of references, moderate salary. Capable and reliable. Canadian. Box 158, Hardware and Metal.

HARDWARE SALESMAN — THIRTY, MARried, fifteen years' experience, splendid insight into modern bookkeeping and accounting systems, desires responsible position with progressive firm. Maritime Provinces preferred. Would consider travelling position from reliable house for this territory. Future prospects of more importance than initial salary. Box 407, Hardware and Metal.

FOR SALE

HARDWARE BUSINESS FOR SALE IN GOOD farming district; stock about six thousand. Owner going west, taking business caused by death. Apply Box 321, Hardware and Metal.

FOR SALE — SET TINSMITH TOOLS AND machines in good condition. Apply Box 329, Hardware and Metal.

HARDWARE STORE IN GOOD GROWING DIStrict in Toronto. Solid brick, store, 5 rooms, good basement, furnace, electric, gas, all modern advantages. Sheds, lane at side. Price, $7,500. Arrangement might be made to purchase the well-selected stock from out going tenant. Box 119, Hardware and Metal.

CLEARANCE LINE—GENUINE "SLOCOMBE" Drills are offered at a sacrifice. Sizes "C," "E," "F," and "G." Wholesalers and dealers will find it of interest to communicate their requirements to Box No. 140, Hardware and Metal.

HARDWARE STOCK, PROPERTY AND dwelling for sale with first-class tin shop and tools; good clean hardware stock, about $4,000. $10,000 handles whole thing; other interests and poor health reasons for selling. Farm machine agencies with business. Good farming community. Box 115, Hardware and Metal.

FRUIT FARM OF 32 ACRES ON LAKE ONtario, very conveniently situated, being only ten miles from Hamilton, ten minutes walk to electric car and G.T.R. station. Modern house and good buildings; nice bathing beach. This is a revenue proposition and have good experienced help. Would consider exchanging for a first-class hardware business. Box 549, Hardware and Metal.

HARDWARE STOCK AND PROPERTY FOR sale. Town of 800, on Provincial highway, good farming district; $10,000 stock. Retiring from business. Write Box 304, Hardware and Metal.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

Extra Copies for Store Salesmen

Several of the largest and most successful hardware firms in Canada subscribe for extra copies of HARDWARE AND METAL for their retail salesmen. This plan has proven a profitable investment for them.

Write us for details of how the plan has worked out in practice.

O.P.W.

Trade Mark Registered

X

is for O.P.W. extraordinary excellence; exactness of experienced manufacture, extensive sales, exemplary service in use and extra sales and profits to O.P.W. dealers.

"Save the surface and you save all" Paint & Varnish

"Paints and Varnishes for Every Purpose."

Keep Sorted Up

The Right Goods are all very well to talk about. It's having them that counts.

When your customers want a can of O.P.W. Roof Paint and you have to say "you're just out of that, but you have a nice line of horse collars and mouse traps," you have lost more than the profit on one can of paint. If you could get the damage done, down to definite, tangible figures, it's more likely to be the value of a case of paint or more.

How is your stock of O.P.W. Paints and Varnishes to-day? Look it over and fill up the gaps. Don't lose a sale, a profit, a fraction of customer goodwill, or one least bit of that reputation for reliable service your store now has. Sort up!

It pays to handle O.P.W. Paints and Varnishes.

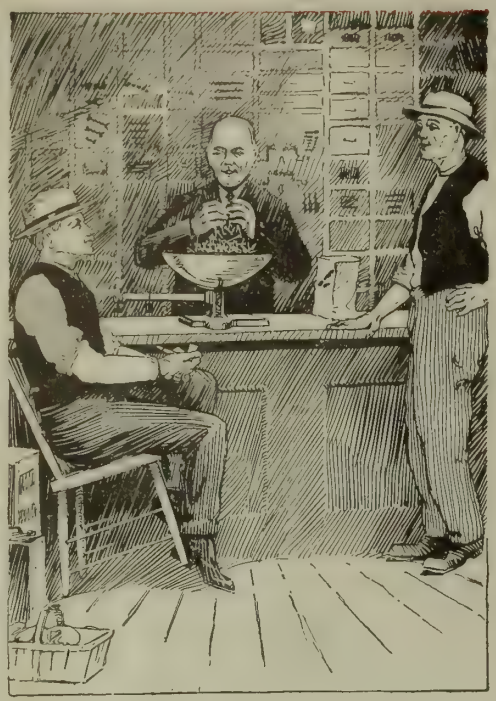
Let the New Dayton Knock Out The Overweights



Forward-looking dealers all over Canada are welcoming the latest Member of the Dayton Family as a "Friend in Need."

THE MOST COMPLETE SCALE ON THE MARKET FOR HARDWARE USE.

Are you dissipating your profits in the old-fashioned way? The illustration shows one method of doing it. Or have you, on the other hand, lined up with the Progressive Business Men who have said good-bye to guesswork?

THE DAYTON HARDWARE SCALE

Sounds a new note in Modern Business. It has already brought home to many large firms, suddenly and with startling force, a lesson of lost profits through antiquated equipment.

SOME OF THE FEATURES

Capacity 100 pounds as follows: 10 pounds on chart; 10 pounds on Tare Beam and 80 pounds on weights.

Range of prices 4c to 60c per pound.

Total adder cylinder to 90 pounds.

Automatic Pendulum; gravity with reflector.

Standard finish: Turquoise Blue. Gold Finish Extra.

Fited with Electric Flashlight attachment if desired, extra.

METAL STOP ON THE TARE BEAM

Operate it this way: Slide the poise to a "set pin." This offsets the weight of the scoop or wire rack, bringing the scale again to zero.

THE TOTAL ADDER

Makes it possible not only to weigh but to compute values up to full capacity.

A Modern Achievement —Delivering B-H Products by Aeroplane

SERVICE—and its ultimate result—SUCCESS—is purely a matter of initiative and achievement. We endeavor always to keep our service on a par with the quality of B-H Product—a high aim—but one well worth while.

To facilitate delivery of special orders we now own and operate an aeroplane by which we can transport goods to our agents in the Central Division.

"B-H No. 1," as the big Curtis Biplane is called, has already made flights to points in this territory, particulars of which has been fully announced in the local papers.

We believe we are absolutely the first house in Canada to adopt this modern means of regular transport, and we want it to represent to the B-H Agents everywhere that spirit of enterprise and efficiency which we ever keep before us as our greatest aim in business.

"Does the B-H Sign hang outside your door?"
"If not, ask us about an Agency."

The Line That Never Fails To Increase Your Summer Sales

This is the season when women want "Universal" Electric Ranges and Grills—they make it hot for the food and cool for the cook. Women no longer heap coals of fire on their own heads by lugging kindiings and doing coal-hod calisthenics in summer.

"Universal" Grill and Range Features

Easy to operate and keep clean.
Requires little space.
Quick heat without blaze, smoke, or odor.
Four heats, 175, 300, 350, 650—WXXXS.
Cooks everything within the limits of its capacity.
Dinner for two or three persons at a very low cost.
Two cooking operations at the same time above and below the radiant grill.

Now is the time to push "Universal" Ranges and Grills. They're widely advertised, easy to sell. The housewife is instantly interested when she is shown the "Universal" tradesmark.

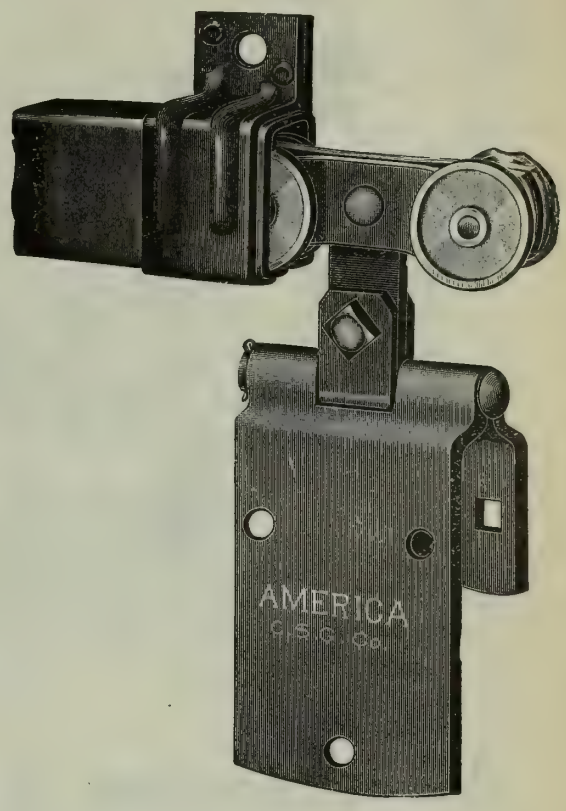
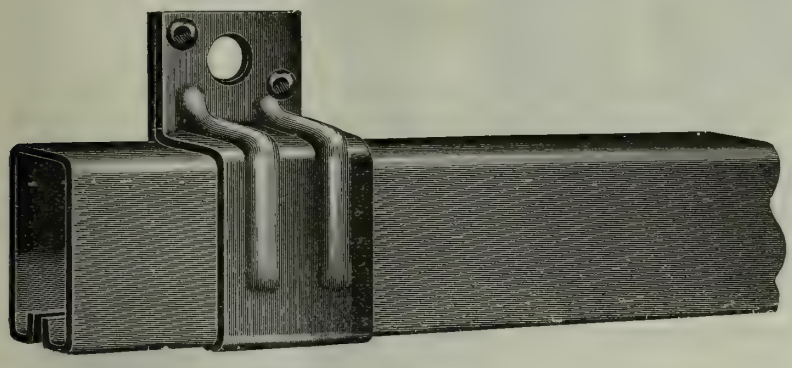
"America"
Trolley Hangers
The Dealers' Friend





Steel Trolley Track

The "America" operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary, plain track brackets.

The Largest Sales of any Trolley Hanger in the Dominion

If you are not now sharing in the sales of this "best seller" and others of the popular Canada Steel Goods Line, you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

Every account is ready for instant settlement

when the N. C. R. System for charge accounts is used

WHEN a customer comes into your store and wants to know how much she owes, you can tell her the amount instantly.

No time is wasted in hunting for her account in a large ledger. No time is wasted adding up the items or striking a balance. There is no worry about the accuracy of the figures.

Your clerk merely looks at the last charge slip filed under the customer's name in the N. C. R. Credit File, and there is the total of her account to date.

This saves time for the customer, for the clerk, and for you.

You have the satisfaction of knowing that the amount she pays is right.

You know the amount is right, because with the N. C. R. Credit File you cannot forget to make charges. You cannot forget to credit money received on account. Mistakes cannot go undetected.

Fill out this coupon and mail it to-day

How Steady is a "Steady Trade?"

YOU'VE a balance in the bank, good credit, etc., etc.—we grant all that—but—

You remember the old Danish King Canute. Well, the old boy got the notion he could stop the tide coming in and so had himself wheeled down to the shore at low tide—had a line drawn on the sand and commanded the sea to "hold off"—What happened?

If His Superior Majesty hadn't been hauled back to a higher level by his attendants he would have "gone under."

Folks of today laugh and think they're wiser than the old king, but—Mr. Hardware Dealer—don't forget that the tide of business competition is *always* coming in.

Can you afford to try to stop it by drawing a line and staying put?—*You'll be submerged.*

Get on a *higher level* of business by sending a salesman out to "sell" goods.

Give him a well established line like GTD Screw-Cutting Tools as a "calling card"—Tools that have stood the test of 47 years' experience.

GTD Taps, Dies and Screw Plates will build up your connection with manufacturers and give your house a "lift up."

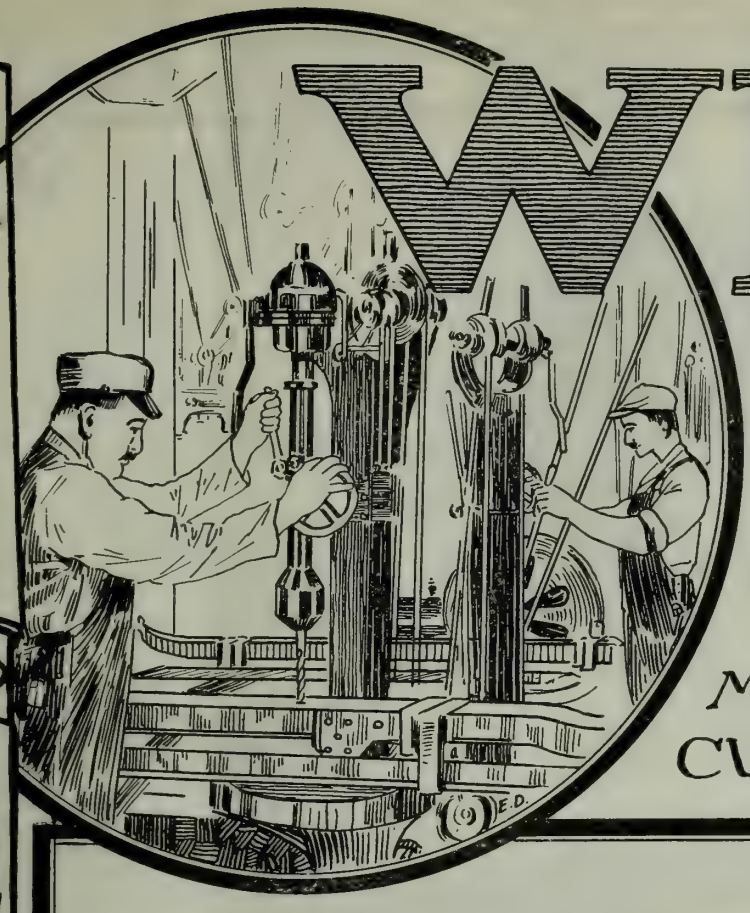
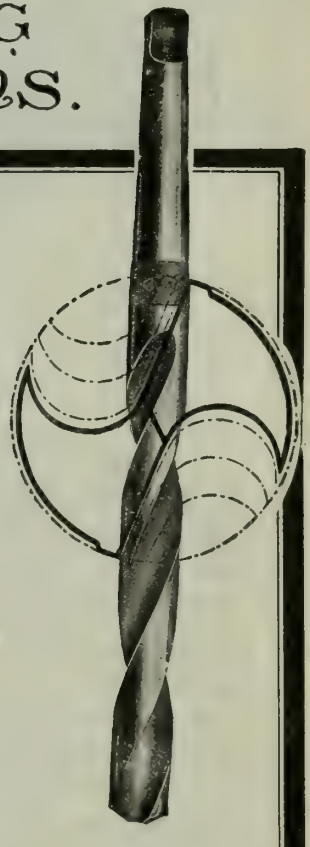
WILT



HIGH SPEED AND CARBON TWIST DRILLS,

REAMERS, AND MILLING CUTTERS.



Quality Tools

Make Permanent Trade

WILT tools make good with the men who use them. Mechanics search for the best—find, buy, and boost WILT tools. The more skilful mechanic demands WILT products. Why? Because he knows that WILT tools cut faster, more accurately, require less power and less regrinding, give longer service, and cost no more than ordinary tools.

Competition and the increased production everywhere make Quality Tools essential. If you can't supply WILT your customer won't complain—to you—they'll simply slide over to the hardware store where WILT TOOLS **are** sold.

Starrett Books - Vol. I and II

75¢

Books That Sell Themselves

Next time a mechanic comes in to buy a tool, put a couple of Starrett books on the showcase — sort of careless like — while you're wrapping up what he's bought.

Needn't give him much of a selling talk. Just let him look 'em over — the tables on gear- and screw-cutting, machine speeds, and the like; the things he wants to know about jig and tool making, etc. Let him browse along and see how much there is in them. When he gets through, you'll have another sale to ring up.

Over 40,000 copies of Volume I have already been sold. Thousands are buying Volume II. Mechanics like them, because they're practical.

They are books that boost sales. They help machinists to do better work, and that means a bigger demand for fine tools.

Both Volumes I and II are bound in red Athol leather, lettered in gold. About 175 pages in each. Size 4½ x 7. They sell for 75 cents.

WHEN THE GREAT EASTERN LAID THE CABLE

"EUROPE and America are united by telegraph." On August 17, 1858, the operator on one side of the Atlantic received this message from the other side, the first message transmitted by the Atlantic Cable.

Plans for the laying of the cable were made soon after the invention of the telegraph in 1843, but it was not until 1856 that the first steps were taken toward connecting the two hemispheres. The first cable was lost, the second deteriorated after a few months service, and in 1866 the steamship "Great Eastern" laid the first permanently successful trans-atlantic cable.

Forty-two years before the "Great Eastern" completed her work, Plymouth-equipped sailing ships maintained intercourse between the two hemispheres. When steam took the place of sails and rigging, Plymouth was the choice of the ship-masters for hawsers and cargo hoists. With the advent of the cable, Plymouth became an important agency in its upkeep and the expansion of its service.

In every activity of intercourse between the old world and the new, Plymouth is playing an important role. It is the rope you can trust.

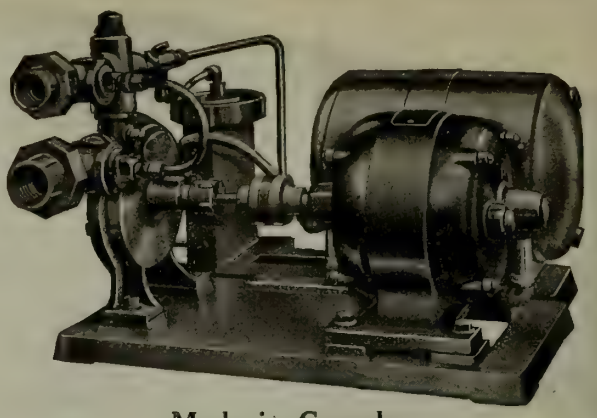
Westco

The Water System Without a Tank Is a Sure Selling Line that Will Bring You Handsome Profits



Made in Canada

An inspection of this compact system and the low initial outlay and cost of maintenance and operation will very quickly convince the farmer, rural or suburban resident that no other water system but the Westco Tankless System will do.

In selling this water system the dealer's duty is simply to explain how it operates, why it is easier to operate and maintain, and to elaborate a little on the comfort and conveniences of running water for kitchen, barns, bathroom and inside toilet for houses in country districts.

The Westco Tankless Water System is a good line to introduce, because the need of such a system is very urgent. Sales will be rapid; your profits will mount up very quickly.

Its main selling points include:

(a) Low cost to install, maintain and operate.
(b) Entirely automatic; turn tap and pump starts at once; close tap, pump ceases.
(c) Has no tank, no valves, no gears, no belt, no springs, no oil or grease cups, and is self-lubricating.
(d) Uses less power than Electric Iron while supplying water to a number of faucets.
(e) Pumps 300 to 500 gallons per hour.
(f) Needs no storage tanks; pumps water direct from well to faucets.

There are many other features too numerous to mention here. You cannot afford to ignore this business opportunity. Write at once for particulars, and obtain the selling rights in your territory if it is still open.

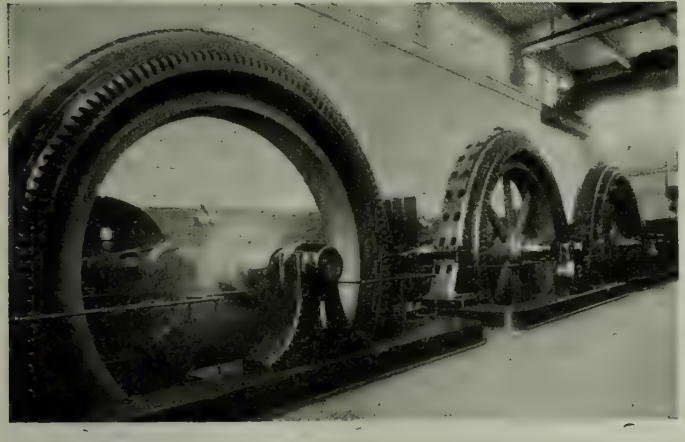
Story for week dated July 3, 1920. **Being No. 12 in the series.**

Eighteen Thousand Horse-Power Behind The Eddy Company Machinery



WHEN Ezra Butler Eddy began business at Hull in 1854 the Chaudiere Falls were fuming and thundering over their rocks unharnessed as they had been for generations. E. B. Eddy began to harness them. Gradually the immense power running to waste in old days over those falls has been conserved for industrial use. The great electric generations illustrated above are to-day developing 18,000 horse power, and run the whole giant array of the Eddy Company's manufacturing machines. The plant is declared by experts to be the most complete, and best laid out of its kind on the American continent. Its foundations are laid on steel piles based on the solid rock below the falls, and 35,000 bags of cement were used in the concrete work of the power house. The whole power house is absolutely fire-proof, and from its switchboards are controlled the great grinding machines of the pulp mills, the paper-making machinery, the match-making machinery, the machinery for manufacturing the indurated ware, the machines at the sulphide plant, the series of fast-running saws that cut the logs, the complete array of conveyors that carry them, the box-making and bag-making machines, the construction and repair shop machinery, the lighting plant and fire apparatus. The Chaudiere Falls have got pretty busy since E. B. Eddy took hold at Hull.

Reasons Why of Indurated Fibre Ware's Great Sales

Your customers are favorably impressed and easily sold because they appreciate ware that, being seamless and without joints, cannot leak, shrink, or fall apart; that is impervious to liquids, odors and taints; that holds the heat of hot water longer and cannot rust; that never becomes battered or dented and provides no lodging place for germs. It is lighter, saving labor. It sells quickly, easily and profitably for the merchant.

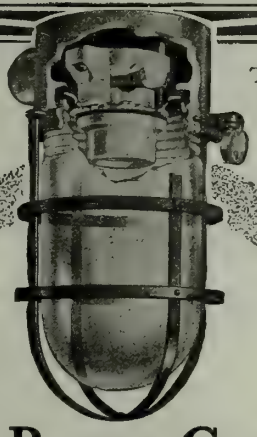
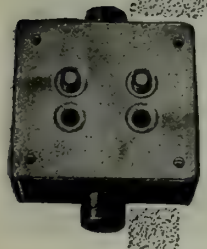
CONDULETS



Type V



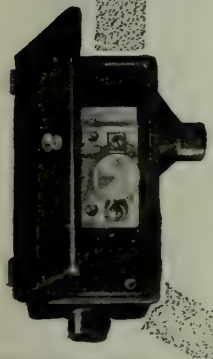
Battery Room Condulets

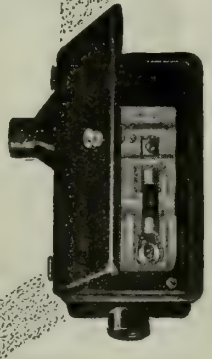
V Series

IN Battery Rooms or wherever there is dampness, gas or fine dust, Condulets of the V Series meet every requirement. They remain vapor, gas and dust-proof even though globes be removed for lamp renewals or are broken. This series comprises many types and sizes.

Y Series

THESE Condulets are designed to take all standard makes, types and capacities of fuse cutouts. They are provided with a cut-out fastening plate which permits mounting without any drilling or tapping. The Condulet is easy of access as it is provided with a hinged door equipped with a spring catch. This Condulet is a stock article, ready to install, will take any cutout you have in stock and can be obtained from all electrical supply houses.





FS Series

THIS Condulet will take flush switches or any standard rectangular wiring devices. Ample room is provided for wiring the device and for passage of extra wires. The Condulets are cast iron and fully protect switches against mechanical injury when mounted on the side walls.

Which

Make of lens ought you to push? It is quite a problem, we know. Let us help you. We carefully investigated all the well-known makes. Our decision was Holophane, "the lens with the fin."

The Holophane lens is a triumph of engineering skill applied to automobile lights. The fin, or shelf extending backwards just above the bulb of the lamp, is obscured by a very smooth etching, which diffuses the upward light from the bulb that strikes the reflector and effectively prevents the bright filament from shining in the eyes of those approaching. In other words, the Holophane lens is designed to eliminate glare and still give you a light strong and powerful enough to make night driving safe and enjoyable—for both you and the "other fellow." The Holophane presents a smooth outer surface, another decided advantage.

The Holophane offers an attractive proposition, which our nearest Sales Branch will be only too pleased to explain.

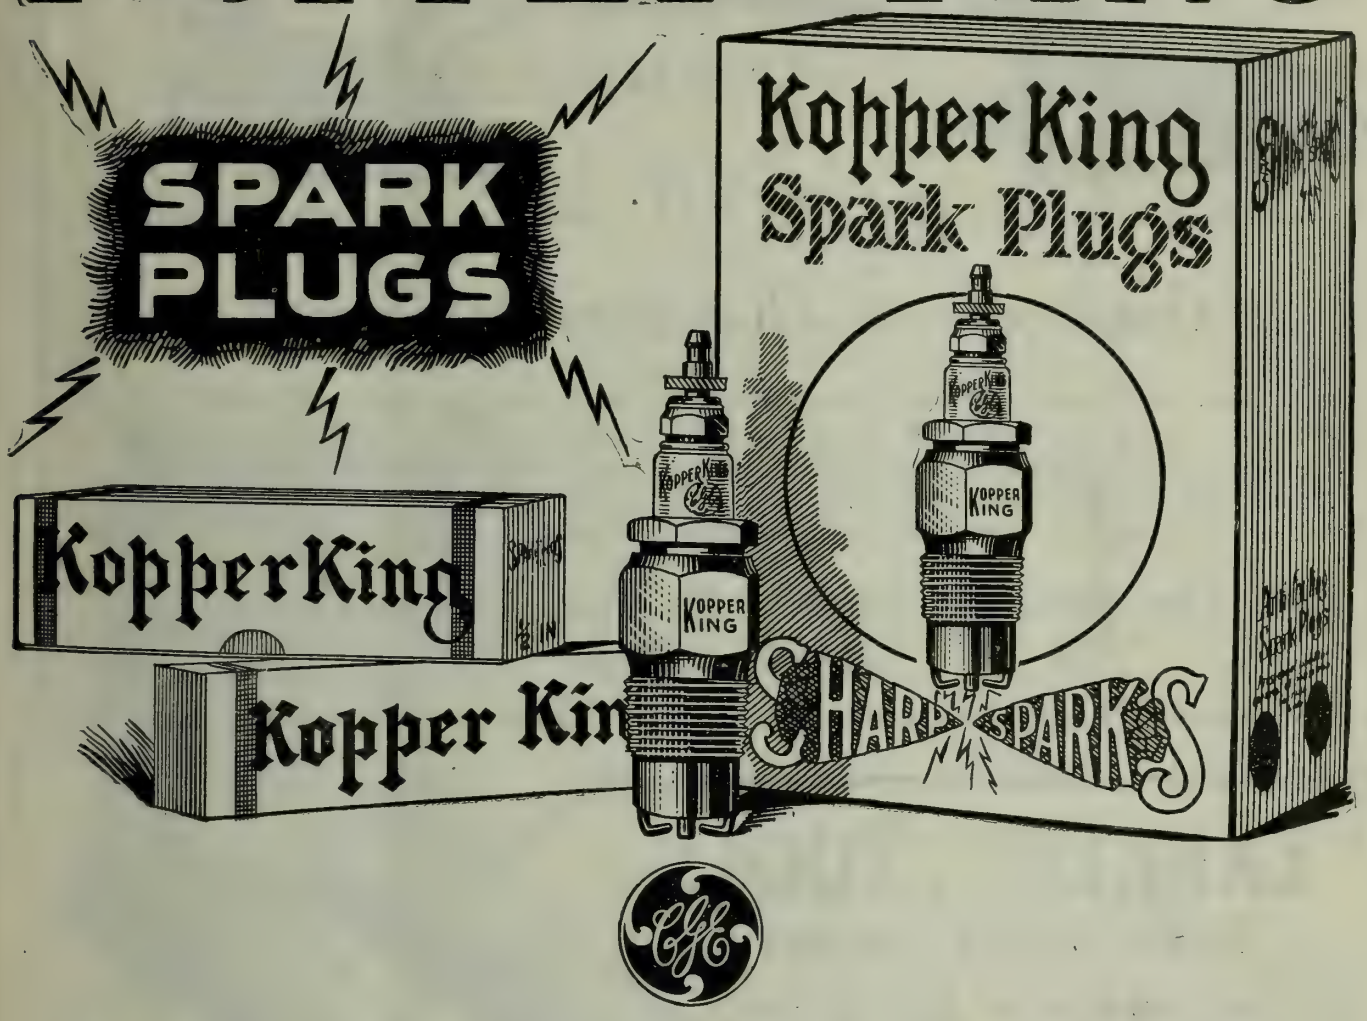
KOPPER KING



There is a Reason

THE phenomenal demand for Kopper King Spark Plugs is not just a lucky accident. There is a reason.

It's the spark that moves the motor. The performance of the engine depends, largely, upon the fitness of the spark plug for its work.

Kopper King Plugs meet completely the exacting requirements of car owners, who are seeking the utmost freedom from spark plug trouble.

One Kopper King sells another.

The "Seafoam"

ELECTRIC POWER

Washing and Wringing Machine

Wrings While it Washes, Washes While it Wrings

is a common-sense washer and wringer that sells for a price that meets the popular demand. It is a Canadian-made machine that has been giving real satisfaction for ten years. Dealers who have not handled the Seafoam are missing much washing machine business. It can be readily sold to people who are keen buyers—who appreciate value, because they can secure a washing and wringing machine at a reasonable price that is not surpassed anywhere, at any price. The Seafoam does thoroughly all the washing and wringing by power without wear and tear on the clothes, and what machine will do more—even at double the price.

SEAFOAM FEATURES

Unsurpassed washing principle—wooden dolley moving halfway around and back forces the hot suds through the clothes and thoroughly washes them in a few minutes.

Cypress tub—nothing to corrode or tear clothes—keeps water hot.

Reversible wringer with highest grade rolls—will start, stop or reverse instantly. Controlled by lever conveniently placed at side of tub.

Safe to operate—as being belt driven the motor is protected against overloading. All gears being covered the danger of accidents is removed. Safe for children to be around.

Simple in construction—does not easily get out of order.

Attractively and durably finished. Shipped complete ready to operate on ordinary house lighting service.

MANUFACTURERS OF

Tinsmiths' and Heavy Sheet Metal Working Machinery

EASY TO HANDLE— ALWAYS DEPENDABLE

The Empire Aluminum level is the popular tool of the quality workman. It is unusually light in weight, its wide hand openings offer easy and convenient grips, the dustproof vial cases present a clear view of the level glasses under all conditions, and—of primary importance—its hair line accuracy can absolutely be depended upon. These are some of the many features that make the Empire Level the most talked of tool of its kind on the market to-day.

Empire Aluminum Levels are made in three different styles; the Adjustable Level with vial cases that can be adjusted to level and plumb off angles, the Stationary Level with vial cases fixed in one position, and the Millwright's Level with a grooved leveling surface for use on pipes and machine parts.

If your dealer hasn't got them write us.

EMPIRE LEVEL MANUFACTURING COMPANY

The Water-Can— does not Prevent Dust

No matter how frequently you sprinkle your floors with water, dust will rise and settle on your shelves. Water evaporates too rapidly and the dust keeps rising.

If you treat your floors with Imperial Floor Dressing the dust *cannot rise.* It is held to the floor so that you can sweep it up and remove it.

Imperial Floor Dressing is *non-evaporating.* It does not gum and it preserves your floors, whether wood, linoleum or oil cloth.

One gallon of Imperial Floor Dressing will cover a floor surface upwards of 700 square feet. One application preserves the floor for several months.

IMPERIAL

FLOOR DRESSING

(Standard)

(Formerly "Imperial Standard Floor Dressing.")

Churches, town-halls, billiard halls, public buildings, hospitals, stores—all need Imperial Floor Dressing. With your floors as demonstrators and your shelves well-stocked, you can develop a profitable business in Imperial Floor Dressing. Ask the Imperial Oil salesman.

Predict Big Trade in Electrical Goods

With Second Largest Available Horsepower of Electricity in the World Canada Has Big Future in Sale of Electrical Goods—Retail Electrical Department of J. H. Ashdown Hardware Co., Winnipeg, Expanded to Cope with Future Trade—Unique Displays Show Appliances in Use as They Would Appear in the Home.

THE splendid new department for electrical supplies in the retail store of the J. H. Ashdown Hardware Company, Winnipeg, is shown herewith. H. W. Bland, manager of the department, is an exponent of the principles of advertising and display as foremost factors in merchandising, and while he achieved good results toward this end in the premises formerly occupied by his department on the third floor of the store, he now has at his disposal very much increased space and therefore much scope for working out new ideas to increase the sale of electrical supplies. The Ashdown block on Main Street, Winnipeg, recently underwent an alteration whereby the whole block is now occupied by the various departments, and each has therefore been allowed to make very necessary expansions.

Display is considered to be such an important factor in the sale of electrical supplies in the Ashdown store, that one of the most prominent windows facing on Main Street is permanently reserved for displays of such goods. Mr. Bland believes in the outstanding value of suggestion in the sale of electrical appliances, this being due in some part to the large number of new devices constantly coming on the market which have for their object the increasing of cofort in the home or elsewhere, or the saving of labor by applying mechanical methods. Due to the fact that the majority of such devices are well worth investigation, the average customer is found to be interested in watching all such new developments. For this reason Mr. Bland finds that if the customer is given plenty of opportunity to see what is new, and to investigate the working of such devices, and test their utility, they are a long way toward being sold.

CANADA'S AVAILABLE POWER SECOND LARGEST IN WORLD

The horsepower of electricity available in Canada is the second largest in the world, being exceeded only by the United States. Canada's available horsepower as compared with other countries, is as follows:

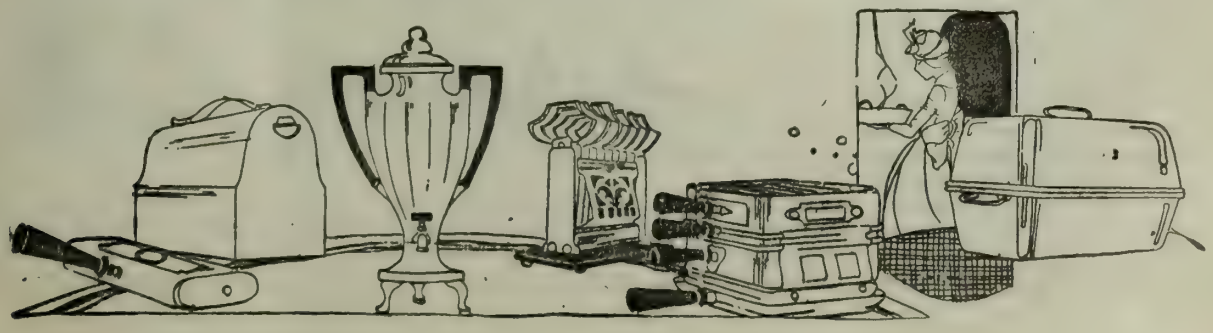
Canada	18,803,000
Austria-Hungary	6,460,000
France	5,587,000
Germany	1,425,000
Italy	4,000,000
Norway	5,500,000
Spain	5,000,000
Sweden	4,500,000
Switzerland	2,000,000

The possibilities for the increased sale of electrical appliances are as great as is demonstrated by these figures of available power. With the further development of its sources of power Canada will have a comparatively cheap rate for electric current and electrical devices will then come into greater use. Boosting sales through displays and advertising will help to bring Canada to the forefront as a user of a large portion of the world's production of electrical appliances.

Counter and Window Displays in Harmony

Counter displays are also an important accessory to the window and other forms of display used in this store, and the plan is generally followed of having each display work simultaneously toward the same objective so that maximum results will be secured. This, of course, applies particularly where some seasonable lines are outstanding such as electric toasters, grills, etc., for the hot weather.

The window displays are always arranged with the idea of carrying a homelike appeal. Mr. Bland believes that there is no better way of selling the customer electrical goods than to show the in such a way that he has no difficulty in picturing the use of them in his own home. Whether it be winter or summer the Ashdown window for electrical devices always carries a homelike appearance which commands attention. It is recognized that certain electrical goods have a greater utility in certain seasons than in others and the thing to do is to emphasize the greatest utility of the article when it is seasonable. Thus if percolators, grills, toasters, etc., are shown in the window display, models of ladies are shown seated at a table enjoying afternoon tea. Toast is on the toaster, some other delicacy is shown cooking on the grill and the percolator is steaming. What could be more inviting on a cold winter day? Or what could be more inviting on these hot summer days than to see a similar arrangement with an electric fan substituted and the family sitting down to a



light luncheon prepared by the use of these devices right on the table, and eliminating the hot drudgery of the kitchen? These are the points which strike home to the prospect who stops to see "what it is all about," and when he commences thinking about these matters he cannot help but agree that it is all very true, and then he is in the right mood for making a purchase. Of course before a sale can be completed he must be brought into closer contact with the goods, so a neatly written card is placed in the window inviting an inspection of the electrical department in the store.

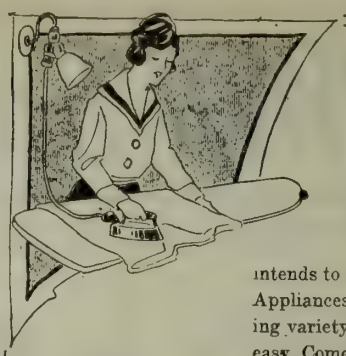
All the goods displayed in the window bear a prominent price ticket, and the same plan is carried out in all departments of the store.

Illuminated Board Increased Sales 75 Per Cent.

Mr. Bland has some display ideas which he is planning to work out, now that the department is in larger premises. These include the use of separate rooms or sections for the display of ceiling and wall fixtures. Mr. Bland has proved in the cramped quarters previously occupied that display if used intelligently brought big returns. One instance he cites concerns the moving of a stock of expensive lamp shades which prior to his taking charge of the department were almost looked upon as dead stock. To liven things up a board was constructed with a number of sockets and a sample of the various shades illuminated. This board was placed in a prominent location near the entrance to the department and sales increased 75 per cent. as result. The board was nothing unusual, and the same plan could be adopted by any dealer with practically no expense, yet it proved to be the stimulant which was required and the results were forthcoming.

In the counter and showcase displays of the department the point emphasized is to get the seasonable and new goods prominently before the eye of the customer. Frequent changes can be made as the seasons go and come and as new lines are placed on the market.

Newspaper advertising of electrical supplies is an important factor in the trade, and this medium is linked up with the window and store displays. A sample advertisement is shown herewith, this one having been used in connection with the recent opening of the new department. The ad. makes the announcement of the intention to specialize on household electrical appliances. "At present we are showing a most pleasing variety of devices that will make housekeeping easy. Come in and look around. We want you to know more about this big new department," says the ad. It will be noted that the writer of this advertisement bears out the general impression conveyed to the customer through every channel, namely, the desire of the management to effect a close personal relationship and mutual understanding. By doing this the customers' wants are made known to the dealer and with this information he is in a strong position to make effective appeal. The advertisement shows a wide range of electrical goods including lamps, vibrators, irons, stoves, etc., and on each article a price is quoted.



Our New Second Floor Electrical Dept.

intends to make a specialty of Household Electrical Appliances, and at present is showing a most pleasing variety of devices that will make housekeeping easy. Come in and look around; we want you to know more about this big, new department.

ELECTRIC HOUSEHOLD MIXER.

Electric Iron Special $4.50

Regular $6.00 value in six-pound household electric irons. Nickel-plated finish and complete with cord and stand. Special, $4.50.

Ashdowns

THE BIG BUSY HARDWARE

Anticipates Large Future Trade

Mr. Bland anticipates a very large sale of electrical devices in years to come, both in connection with the regular trade, and that connected with the automobile accessory trade. The demand for labor-saving equipment is especially active, he states, and he points out that this is one phase of the business which calls for some discrimination in purchasing owing to the large number of new lines which are constantly appearing. As a rule, the Ashdown electrical department does not depart far from the dule of selling only staple, nationally advertised lines. The scarcity and high cost of domestic help is mentioned by Mr. Bland as one of the chief reasons for the big demand for labor-saving electrical equipment, such as sewing machine motors, vacuum cleaners, washing machines, etc.

Standard Lines Form Basis of Trade

It has been the experience of this department that while a certain class of trade rushes for bargain goods, the standard nationally advertised lines of electrical goods form the foundation of trade. In a few cases such as in the sale of electrical irons where prices of the best makes have ben forced up by market conditions, the sale of cheaper grades has temporarily increased, but a little intelligent sales talk convinces the customer that the standard line is cheapest from the standpoint of service, and therefore trade in high-class lines does not suffer. According to Mr. Bland, the stocking of only well-known staple lines as compared with stocking fancy lines which turn slowly, helps to maintain a fair price level and fair volume of trade for staple lines, even when prices are forced up.

The new premises recently occupied by the electrical department in the retail store of the J. H. Ashdown Hardware Company, on Main Street, Winnipeg. The department was formerly on the third floor, but in a readjustment of the building the department was moved to the second floor, where approximately double the floor space previously occupied is available. Mr. Bland, manager of the department, is developing some unique ideas now that he is in larger quarters. He is a firm believer in display and in showing the goods in such a way that they make a convincing appeal to the prospect, either through the store or window displays or the newspaper advertising.

It will be noted that the display counters and shelving are of the most modern design and are arranged so that all reserve stock in cartons and boxes is out of sight. Samples of each line are attractively displayed. The creation of a pleasing effect, followed by the securing of the customer's attention, and finally by developing his interest, is the basis on which the new department is arranged. It will be noticed that a wall case is devoted to the illuminated display of lamp shades. Wire frames for lamp shades are a feature of the displays on the cases. Ceiling space is used for the display of household fixtures. There is no cramped appearance about this section and all the devices and appliances are attractively arranged so that they may be shown as they appear in actual use and where the customer may have easy access to them.

Board of Commerce Without Officials

Resignation of James Murdock, the Labor Commissioner is Accompanied with Sensational Charges—Will the Board Now Be Abandoned?

ANOTHER step in the upheaval of the Board of Commerce has taken place. This time it is the resignation of the remaining member of the board, James Murdock, which was announced in Ottawa last week, accompanied by sensational charges. The board is now without a commissioner, and as someone has intimated, it may mean its abandonment. Judge H. A. Robson and W. F. O'Connor, K.C., have both taken up other work, the former last April and the latter on July 1.

Accompanying his letter of resignation, Mr. Murdock expresses disappointment that the board has not been permitted to carry out the public service which it was appointed to perform. He is convinced, he states, that neither the Premier nor the members of the Cabinet are now, or ever have been, in sympathy with the provisions and intent of the Board of Commerce Act and the Combines and Fair Prices Act.

Makes Serious Charges

He makes serious charges against Judge Robson, who, up to last April, was chairman of the board. He claims, in this regard, that Judge Robson was considered as "safe and sane" in conserving to Canadian manufacturers and other large financial and business interests, the generally unrestricted leeway heretofore enjoyed by such interests in the taking of profits, determined alone by the so-called market price and governed by supply and demand, and that he was in full sympathy with high prices as against low prices, as he stated in his letter to Sir George Foster on February 23.

Board is Necessary

"A board of commerce is necessary," claims Mr. Murdock, "for the following reasons: (a) Business men living together under the protection of the tariff have got to know each other so well that price-fixing agreements and all sorts of agreements and arrangements are the rule, rather than the exception. The board has already on file evidence in some scores of cases of such agreements. Not all of these are reasonable or proper. It should not be left to the unfettered will of the businesses interested to fix prices on necessaries of life. A board of commerce is needed."

Sir Robert Borden said that Mr. Murdock was under a misapprehension, no doubt sincere, as to the Government's intention. "I did not intend to suggest to him," said the Prime Minister, "that the Government would wait for the decision of the Privy Council before filling in the board."

On the contrary, I asked him to name a suitable person to appoint when Mr. O'Connor resigned. I did say to Mr. Murdock then that the question was of so serious a character that I was afraid the Government would be unable to give it proper attention until after prorogation. I went so far as to name to my colleagues the gentleman suggested by Mr. Murdock as a suitable chairman, but there is some doubt that this gentleman would accept the post. My reply to Mr. Murdock's letter of resignation will be given the same publicity that has been given his letter.

Sir Robert Borden has stated in the House of Commons that merchants must continue to obey the orders of the Board of Commerce. Dr. Michael Steele inquired if retail grocers still came under the requirements of the board, in view of the fact that all its commissioners have resigned. Sir Robert pointed out that the resignation of Vice-Chairman O'Connor did not take effect until June 30, and the recommendations of the Government would be passed upon by the Governor-General in due course. Until then the orders of the board would stand.

Manufacturer Can Establish Selling Policy

Effect of Decision Rendered by Board of Commerce—Very Important Decision to Mercantile World—Traders Can Associate to Advance Mutual Interests.

Ottawa.—The judgment issued by the Board of Commerce in the case of the Hamilton grocers is considered to be one of the most important to the mercantile world ever given by any court in Canada. It establishes that the manufacturer has the legal right to establish a selling policy and to refuse to deal with those who will not adhere to the terms of that policy. If he decides to deal only with wholesalers he may refuse to sell to others than wholesalers. If he decides to establish a fixed resale price for his goods and make it a fair price, he may refuse to deal with those who sell above or below that price.

The decision also establishes that an association of wholesalers or an individual wholesaler may request of a manufacturer that he adhere to his own or a suggested selling policy and that, if the manufacturer refuses to do so the wholesalers, by way of an association or individually, may agree to refuse to trade with that manufacturer or may actually refuse.

The principle is laid down that traders have the right to associate for purposes of advancing their mutual interests in any way except by doing something actually forbidden by law. The Combines and Fair Prices Act does not forbid mere agreements or combining on any matter, unless in the opinion of the Board of Commerce it is likely to operate to the detriment of the public; and whether it does so is a matter of fact which must be proved and established as such in the particular case.

Charges Fell Down

The effect of the Board's decision is that it holds that the Attorney-General of Ontario completely failed to establish that any practice of the wholesalers or manufacturers complained of was to the detriment of the public or against their interests. All that was shown was that certain private interests as against the opposition in concert of the Wholesalers' Association, and the members thereof who, although themselves no doubt engaged in advancing of their personal interests, had not in the effort asked or secured anything to the detriment of or against the interests of the public.

The board suggests that if its view of the law is considered wrong, it will expedite an appeal to the Supreme Court of Canada. It will be recalled that the board rendered an interim judgment at the conclusion of the hearing in March last at Hamilton and Toronto in which it expressed the view that the case had failed to prove the thing suggested to the Attorney-General of Ontario; that if he saw fit the board would grant leave to him to prosecute in the Criminal Courts. He did not institute a prosecution but recently issued a writ in the Ontario courts at Toronto calling for the dissolution of the Wholesale Grocers' Association of Canada and Ontario, as unlawful trade combinations.

Some days ago the secretary of the Wholesale Grocers' Association made the statement that the writ had not been served.

WHEN STAMPS TAX ON BILLS AND NOTES TAKES EFFECT

Montreal.—Word was received here by the Canadian Manufacturers' Association that on information from the Department of Finance at Ottawa, the stamp tax on promissory notes, bills of exchange, bank overdrafts and on transfers of stock will not come into effect until the bill now before Parliament has been assented to.

Novel Plan for Figuring Employees' Pay

Prominent Business House Keeps Careful Record of Selling Costs in Each Department—Pays Worker on Basis of What He Actually Does and Helps Him to Boost His Earnings

BY F. W. EVANS
President and Manager D. H. Holmes Company
(Reprinted by courtesy of System)

OUR plan of paying employees —selling and non-selling—is worked out in this way. For 10 years we have kept a careful record of the selling costs in the various departments of our store. For as many years we have budget records of the non-selling departments.

We find that selling costs vary all the way from 3.5 per cent. to 6.5 per cent. So we simply ask that an employee's salary be not over 3.5 per cent. to 6.5 per cent. of sales—and that it never fall below our minimum wage for salespeople of $12 a week. To earn this minimum wage an employee must, therefore, sell $342.85 worth of goods a week, or $57.14 a day. If a salesperson cannot sell enough goods in any department to earn $12 a week, we don't want him or her. If someone, seeking a job in a 3.5 per cent. department, says, "Now I think I ought to get about $20 a week," we just turn to our charts and answer, "Very well, all you have to do is to sell $95.24 worth of goods a day; we shall gladly pay you $20 a week, and as much more as you can earn."

The commission plan on which we pay our salespeople is not, in its fundamentals, greatly different from the plans which are used by a considerable proportion of the more progressive retail organizations of the country. In some of its details it is out of the ordinary, I feel, and more than usually successful. And because the details hang inevitably on the framework of the plan, I am going to describe the whole thing here.

I have said that we require our salespeople to earn a minimum of $12 a week. But suppose a new employee with us objects: "Now, I'm inexperienced at selling goods, and I probably won't be able to earn $12 a week at the beginning. I fear that you'll be wanting to discharge me in a little while because I can't produce my quota." Such an employee we put on what we call a probationary salary of $10 a week, until he or she will have had time to learn the business.

Now for the extra earnings. The employee who sells more than enough goods to earn the quota—on which the minimum wage is based at 3.5 per cent.—gets an additional 2.5 per cent. on excess sales. In one department where we fix the cost of 5 per cent., we pay 4 per cent. excess sales; in the ribbon section, where the cost is 6.5 per cent., we pay 5.5 per cent. on excess sales; and so on.

"But," someone may ask, "if you figure the minimum wage in these departments on a basis of 3.5 per cent., why do you not also figure the bonus, or additional percentage at the same rate?" Our reply to this is that the 3.5 per cent. rate is the maximum that we can afford to pay for selling in that department. We have endeavored to make the salary easy to earn, and have given the advantage to the salary end rather than to the commission end. Under no circumstnces are we willing to let the selling expense exceed 3.5 per cent. in this department; and we find that the differential between the salary basis and commission is not too great, as we push our employees up to the 3.5 per cent. salary basis as rapidly as conditions warrant. This 3.5 per cent. has to carry some dead weight such as the salaries of those who are absent from illness, the probationary employees who are not really earning their salaries, the few salespeople who now and then fall behind their quotas, and so on.

For every employee in the store there is on file a salary card sufficiently large to contain the record for a year. On the cards of the drivers, shipping clerks and others who make no sales, nothing is entered but the weekly wage; but on those of the salespeople is a careful record kept of each week's sales, and the commissions earned and paid. Picking one at random from the files, I find that it is the record of an employee whose weekly drawing account we have fixed at $14. The sales quota, therefore, on a 3.5 per cent. basis, would be $400 a week. (Incidentally, we make settlements with the clerks every four weeks.) During the first four weeks of this year $2,975.14 worth of goods were sold whereas the quota was only $1,600. This employee therefore exceeded the quota by $1,375.14, and earned a commission of $34.38. Of this we paid $14 and held $20.38 in reserve. I shall explain this reserve feature later.

This employee was aided in greatly exceeding the quota by our big after-Christmas sale, which took place in January. Nearly all our departments are, of course, influenced to an extent by the seasons, by special sales and so on. However, we have salespeople whose total earnings average from $50 to $75 a week.

A column headed "premium" on the employee's card are special awards given for the selling of "p. m.'s." Every salesperson in the department knows just what this slow stock is and the p. m. on it. The percentages depend, of course, upon the difficulty of selling the article.

No matter how much any salesperson may earn, we make it a practice at our four-weeks' settlement period to pay him or her only 25 per cent. in excess of her weekly salary. In other words, the girl whose weekly salary was $14 earned $34.38 additional during the four weeks, but of course we only paid her $14, or 25 per cent. The balance we hold back for the six months' settlement period. Twice a year we make settlement of the full balance due on commissions; some of our people frequently draw several hundred dollars at such times. Part of the commissions is held back for equalization and in justice to the department. It would be unfair to allow the salesmen in one department to get a tremendous commission check at the end of one month, and then not make their quotas for the next several months. This reserve is thoroughly understood by all of the salespeople; they tell us that they would rather get their money thus in a lump sum than have it given out to them in small amounts every month.

They Know What They're Doing—So

Of course, if a salesperson quits our service, the balance due on commis-

(Continued on page 47)

SUGGESTIONS FROM EMPLOYEES

We used to have a suggestion-box, but I never got 10% of the good suggestions in it that I receive in personal conversations with the employees. A good idea may come from a boy in the shipping-room, or from a bundle-wrapper.

"But," someone may ask, "while your plan sounds very nice on paper, suppose it falls down? Suppose you find some department unable to sell its quota, costs steadily rising and all that sort of thing? What about it?" Let me counter in State-of-Maine fashion, with a question: What else is our administrative department for but to take care of such emergencies as these?

EDITORIAL COMMENT

"ONE OF THE MOST IMPORTANT JUDGMENTS EVER HANDED OUT TO THE MERCANTILE WORLD"

WHAT is characterized as one of the most important rulings handed out to the mercantile world by any court in Canada, is that made by the Board of Commerce in the case of the Wholesale Grocers' Association, of Hamilton, which was recently investigated. The judgment establishes that the manufacturer has the legal right to establish a selling policy and to refuse to deal with those who will not adhere to the terms of that policy. If he decides to deal only with wholesalers he may refuse to sell to others than wholesalers. If he decides to establish a fixed resale price for his goods and make it a fair price, he may refuse to deal with those who sell above or below that price. A combination of wholesalers would also be empowered to refuse to trade with a manufacturer who does not adhere to a policy which may be requested by the wholesaler. Traders are also permitted to associate for the purpose of advancing their mutual interests in any way except by doing something actually forbidden by law. The Combines and Fair Prices Act does not forbid mere agreement or combining on any matter, unless in the opinion of the Board of Commerce it is likely to operate to the detriment of the public; and whether it does so is a matter of fact which must be proved and established as such in the particular case.

Some retailers have thought that with the disruption of the Board of Commerce, owing to the resignation of its three members, the regulations enforced by the Board would be invalid, but such is not to be the case. Some of the resignations do not take effect yet for some time and meanwhile the Government is taking steps to deal with the matter, and the regulations such as that outlined above remain in effect.

CANADIAN MANUFACTURERS AND FOREIGN TRADE

ARE Canadian manufacturers resting on their oars commercially when they should be energetically pushing out for foreign trade? This charge is implied in a report of European trade outlook issued by the Canadian Bank of Commerce; it was emphatically made by Lloyd Harris as head of the Canadian trade mission to Europe; it has been echoed by a report to Hardware and Metal that the special trade commissioner to Japan brought to Vancouver to address the C.M.A. convention received scant attention.

There never was a time when Canadian manufacturers had such an opportunity to enter the markets of the world. We have the raw materials and labor and organization speeded up by war efforts ready to take the trade offensive, while the great industrial nations of Europe are badly handicapped as the result of the physical effects of the war. Nor is it a case of taking advantage of their condition, but rather of assisting them in supplying their urgent needs. Trade won under such conditions is not likely to prove temporary. It will be much harder to get when our industries are in need of it.

The conclusion that the public is drawing from this lack of interest on the part of Canadian manufacturers in foreign trade — trade which will help to reduce the burden of war— is that profitable business is too readily secured at home.

NEVER forget in the planning of window displays or in the buying of stock that it takes all sorts of people to make even your little business world, and that no two people of them all, perhaps, have just the same likes and dislikes. Buy with a thought of variety in mind. Put variety into your window displays.

* * *

NOTHING kills trade more than to have Mrs. Very-Particular come in and say: "I'd like to see some of that cutlery you are advertising," only to have the clerk acknowledge that he does not know what is being advertised. Keep posted and when a customer asks for such a thing, see that she goes away with the impression that the salesmen know their business.

Advertising Cuts Out Distribution Wastes Business Necessity an Asset

EDWARD N. HURLEY, president of the Hurley Machinery Company, and one of the successful manufacturers in the United States, has just delivered a very important address to the Associated Advertising Clubs of the World—a large association made up of men interested in selling manufactured products of all kinds. Mr. Hurley also has a plant in Canada which he hopes to develop extensively for export business. His address should be read by everyone interested in the drug business in Canada.

Mr. Hurley has had unusually broad experience as a manufacturer and business man. The United States Government conscripted him on two occasions for national service. He was for a time chairman of the Federal Trade Commission, and, when during the war shipping matters got into a snarl he was called back to the Government Service to take charge and reorganize the U. S. Shipping Board.

The chief point he made in the course of his address was that owing to the acute industrial situation existing in America and throughout the world, members of the association he was addressing had a serious responsibility, as in their hands lay to a large part the future policies in the marketing of hundreds of millions of dollars' worth of American goods. That it was not merely a local but an international undertaking that needed an international point of view. He thought these manufacturers and merchants who are not planning to sell at least 10 per cent. of their products to foreign countries were not doing their parts as business men, the parts necessary to the future prosperity of this continent.

The first step in developing business, Mr. Hurley said, was advertising, which he regarded as a necessity and an asset. He said :

The time has arrived when the manufacturer and the merchant must carefully figure advertising cost, carry it in his budget as an expense just as essential as rent or labor, properly charging it against each product and article. Advertising has been hurt by emotional appropriations—by spasmodic flares. For instance, some men still advertise only when they have spare money and never pay out a line when times are dull and they need business! The amount and nature of advertising is to be planned with the production sale. Only then can we stabilize manufacturing, merchandising and advertising.

How Products Are Known

The name of the small merchant to-day who has foresight and judgemnt in the merchandising of his products may be as well-known as John Wanamaker in his particular locality, or even throughout the nation. His products are known by his advertising, and his success depends upon the merits of the products he furnishes to the customers that the advertising brings to him. And the manufacturer or merchant who is advertising sanely to-day is not only laying the foundation for greater business for himself, but is selling the public on his industry. His success will be the guide post for his competitors, and the post will always read, "Advertise."

Advertising men should endeavor to make their accounts permanent. To do so they will need to know more about production. You should determine whether or not the small manufacturer or merchant who starts advertising for the first time knows his manufacturing and selling costs, is financially able to advertise and is able to fulfill all the promises you make for him. I believe the day is coming when every leading advertising agency of this country will have an expert accountant and cost man connected with it, who will carefully scrutinize the balance sheets of their new customers, recommending the necessary changes in their expenses so that the proper amount will be appropriated to care for advertising.

When you pratise this method you may have a fewer number of accounts, but you will have permanent ones and the newspapers and magazines will have more permanent advertisers. Old-established and satisfied customers are the ones we all like to have on our books. We all like to go out and solicit and obtain new accounts, but when we keep them for a short period only and then see them become dissatisfied, owing to their earnings being insufficient to carry on the campaign as planned, we have made a grievous error.

Selling advertising should be based on the same theory that a salesman sells any other line of goods, that is, on the financial standing of the customer. If he is not sound financially, it is not good business to take his order. Sell him on the soundness of advertising by ascertaining first that he will be able to continue to advertise.

Advertising of a thoroughly sound and scientific kind, must of necessity cut out waste in order to give the most for the money — which is business. I know of nothing that so cuts out the wastes of distribution as proper advertising, for it tends to reduce the heavy burden of the modern labor-saving machinery of advertising.

Advertising between industries can help production, too, by promoting installation of improved machinery and better materials. A man has not done his full duty when he produces a machine to eliminate human drudgery and cheapen production. He owes an obligation to society, as well as to himself, to use the education influence of advertising, to put its dynamic forces to work in the interest of the general welfare.

As a national advertiser I should value more highly the services of an advertising man familiar with the trade newspapers in my industry. I am fearful that our manufacturers, merchants and advertising men do not appreciate the trade publications which are doing so much from a scientific as well as a practical standpoint in stabilizing conditions and working out the many problems existing in their respective fields. When I was chairman of the Federal Trade Commission I made it a point to have the principal trade papers in the United States sent to me regularly. These were read, not only by myself, but by the entire staff, so that we might have a finger on the pulse of the country's industry. Advertising agencies placing national and international advertising could well insist on every man in their employ reading the trade newspapers of the industries of their clients, so that they may keep themselves currently informed on the conditions in the businesses for which they are writing copy. I believe in the business journals. I have been closely associated with the work of many and have made a study of them, and I am firmly convinced of the editorial strength and value of many of these publications.

Big Help to Manufacturer

A decided improvement has been made by our manufacturers in arriving at true manufacturing costs of their products and now where a manufacturer sells direct to the consumer he is generally familiar with his selling costs, and this information is available. On the other hand, where the manufacturer sells to jobbers and dealers, both of whom are necessary factors in the distribution of his wares, and through whom 90 per cent. of all our products, both manufactured and farm, reach the consumer, there is a feeling on the part of the public that the distributors are making excessive profits, and they feel that prices would be lower if only they were able to purchase direct from factory or farm. In the absence of any facts on this subject it would be folly to agree that such would be a better and more economical method of distribution.

Engineers, scientists and the Government, through the census, have accumulated almost unlimited information on the volume and cost of production. Our Government takes a complete census of manufacturing industries of the country evehy five years, but we have never had a survey of our jobbers and retailers and their merchandising methods. There are no corresponding statistics on distribution, although it is twice as important from the standpoint of the consumer. Many statements have been made that our merchants are responsible for high prices. In justice to them we should determine the costs of distribution by the various methods and the volume of business transacted through the various channels. Attempts to make distribution more scientific and economical are blocked by lack of authentic data. We only get soap-box figures. It is high time that this important feature of merchandising should be carefully analyzed by our Government and I earnestly urge this great organization to recommend that a bill be passed providing for a special survey to be made at the earliest possible date, so that the question of the cost of distributing our principal products may be ascertained and settled.

Advisory Board Suggested

The bill should provide for an advisory board of, say, nine members to serve without pay and to be appointed by the Secretary of Commerce, consisting of representatives from such organizations as the Associated Advertising Clubs of the World, leading trade newspapers, magazine, and newspaper publishers' associations, and jobbers' and retailers' associations. This board would co-operate with the Secretary of Commerce and the Director of Census in preparing questionnaires, suggesting data required, and in other matters on which they might desire advice. There are many problems involved in this great question, and with the compiling of such data by the Government the information could be quickly analyzed and given to the public at an early date. T

THE CLERKS DEPARTMENT

How to Retain a Valuable Clerk

Difficulties and Dangers of Partnership—A Minor Interest in a Corporation Obviates This —A Satisfactory Method of Bonusing.

A MERCHANT has an exceptionally valuable effective clerk. The man is industrious, earnest, a good salesman, skilful at display work. The time comes when such a man gets beyond the wage line. He cannot be paid more wage than he is getting because, no matter how it might be kept "confidential," the fact would become known and dissatisfaction would result with the others. Yet ways must be devised whereby that clerk can progress to higher earnings or he will be lost to the store.

The end can be reached through giving the man some kind of interest in the business or paying him a percentage. Let us work it out both ways.

Time was when the custom of taking the senior clerk into partnership was common. In fact, the man began as a boy with that plan in mind and everything shaped itself to that end. But many disasters warned merchants to go slow on that experiment. For partnership is like marriage—easy to get into but hard to get out of—and plain purgatory if not congenial, while the opportunity for legalized robbery is wide open.

Dangers of Partnership

The fundamental danger of partnership is that partners are not only equal owners, but in the eyes of the law each is the sole owner of the business so far as the outside world is concerned. Thus, the merchant who takes into partnership a favorite clerk to reward him and retain his services may agree with the clerk that he gives him only a quarter interest in the business; but the minute the papers are signed the clerk may exercise all the functions of sole owner. He may order goods to the limit of the responsibility of the business; he may tap the till, the safe and the bank account with utter immunity from danger of legal process, because the law says it is all his. The idea seems to be that, inasmuch as outsiders cannot tell anything about the inside agreements between partners, each partner is vested with full authority. Thus all who make contracts with the firm may have full protection and can evoke the law against all the assets of the firm to protect their contracts.

Aside from plain dishonesty and fraud, there is the great element of human nature. Plenty of men make agreements in entire good faith, who later on come to misunderstand each other, grow apart, are estranged, become suspicious of each other, get to fighting and dissipate all their substance in quarrelling and the costs thereof. We hear every day of cases wherein one partner puts it up to the other to "buy out or sell out—an' I don't give a continental damn which you do." Often when the decision is finally made, there is nothing left either to buy or to sell.

Contrast the Corporation

The corporation is another matter. There the assets are taken by the courts and formed into "an artificial person." Fred Hanson may be a clothier in his own individual right. He has absolute control over his possessions and can do with them practically what he likes. But when he incorporates into Fred Hanson, a corporation, he can do with his own as he wills only through sundry well-defined courses of action, all subject to legal restriction. Moreover, Fred Hanson, a corporation, may consist of any number of natural persons over two.

If, then, the merchant desires to take into limited control his favorite clerk and give him an eighth of the business, he can accomplish this not only definitely but with comparative safety through incorporating and allotting an eighth of the capital stock to his clerk. Furthermore, since he himself is still sole owner of seven-eighths of the business, he controls every particle of it as fully and exclusively after he has incorporated as while he owned it all; for his is the majority interest.

The beauty of the corporation is that it provides for a square deal to all. Each party in interest gets what is his —no more, no less—and it is safe-guarded to him. Thus the clerk who is given an interest will have the interest secure from any "reneging" or change of mind of the boss; but he can get no more than is provided for him through the action of the boss. There are other points but these are all we need for our present purpose.

If the Boss Wants No Dividend Interest

But let us consider the case of the man who has this kind of clerk whom he desires to retain and whom he wishes to treat equitably, but whom he does not want to take into the business in any capacity. Let us suppose that the clerk manages a department and also sells on the floor about as much as any one man can be expected to sell. Let us agree that he is being paid so liberally that any further advance in mere wages would lead to embarrassment with the rest of the help. How shall he be paid more without having an interest in the business?

Of course, there is always the commission plan. One always can pay a man a definite percentage for work done. The difficulty about one who has grown to importance on a salary basis is that it is hard to arrive at a basis of percentage which will satisfy him without entailing overbalancing difficulties.

Let us suppose the man is selling $600 a week and drawing $25 wages. That may be $10 more than you are paying the next man, yet it is far within the average allowable wages expense simply figured on his sales alone. But again, he has attained to such sales ratio and been satisfied up to now, while doing all the rest of the work indicated. The man is so cheap that you cannot afford to let him go.

If you took 8 per cent. as the basis of wages expense on sales, you would have to pay this man $48 a week—and that, obviously, would never do.

You might take $600 weekly sales as your basic figure and pay him as much as 10 per cent. on all sales in excess thereof. But if you did that you would have him so eager to make sales in excess of $600 that undoubtedly he would neglect his other work and you would merely spoil a good clerk.

Really, there seems to be only one way to meet the difficulty; to give him a definite share in the net earnings of the business, either in addition to or in lieu of a salary. Of course, such a matter must be handled with great care and foresight. It will have the great advantage that if there are no net earnings, no bonus will be due the clerk, while every incentive will impel him to watch and work to the end that the business be made more profitable.

Suppose your records over a series of

Recognition of Russia Would Mean Much to Canadian Trade

Russian Trade Relations a Live Issue in England, Says Vice-President of the McArthur-Irwin Co.—Great Need for Buildings—Much Painting Being Done in Interests of Economy.

IT is probable, thinks John Irwin, vice-president and managing director of McArthur, Irwin, Limited, Montreal—should recognition be made by the Entente, and particularly by Great Britain, of Soviet Russia—leading, as it would, to an opening of trade negotiations, that quite a considerable change may be worked over trade conditions generally. This change would naturally be of interest to Canada.

In an interview with Mr. Irwin, on his return from the Old Country, he stated to Hardware and Metal that there was some question as to whether trade relations would be resumed with the Soviet Russians. There is no question as to their desire to court the favor of Great Britain, for they need the materials she is best able to supply and are immediately anxious to get them, particularly manufactured goods. "They might trade with Germany," said Mr. Irwin, "but, of course, they do not like taking German marks for their goods, reduced in value as they are."

Has Been Live Question

While Mr. Irwin was in England the matter of treating with the Russian Government through Mr. Krassin, representative of the Soviet Government, was receiving considerable attention. The matter would work out in this way, according to Mr. Irwin. Russia is in great need, to-day, of enormous quantities of manufactured goods, and is willing to pay the price. Her needs would absorb enormous stocks, and if the production of English manufacturers were diverted to Russia, then indeed there would be a serious impairment of the produce manufactured products for other countries, such as our own. It would mean, probably, in many cases, that prices of such goods would soar much higher under such new and highly stimulated demand.

Immediate Shipments Desired

At the present time great quantities of goods are wanted in Great Britain. Mr. Irwin pointed out that he could have sold large quantities of white lead at the present time, so great are the needs in that country.

"Four hundred thousand homes are required, to-day, in Great Britain, for her increased population. In the city of London alone there are required two thousand houses, basing this estimate on the average annual requirement of 10,000. Homes are needed everywhere and abandoned street cars and every possible place that can be secured are pressed into service as living quarters," said Mr. Irwin. "Everything in England is painted. Many of the homes are built of stone, but they are painted, and this applies to nearly all of them. It is a protection against the elements, for the stone there will disintegrate and that is why this protection is needed. Everywhere painters are busy slapping on paint, and for the most part great quantities of white lead are needed. Just now the demand for this is great and there is a marked demand there for large quantities of the product, and this will continue for years."

Doubtful of Big Export

Asked as to the likelihood of there being extensive export of Canadian goods to Great Britain, Mr. Irwin stated that, while there would be a demand there for some time, the time would come when manufacturers there would overtake the demand and have a surplus. In the meanwhile, there is a good market there for some goods that Canada can supply.

"As a centre for world trading," continued Mr. Irwin, "London is the greatest place in the world. It is so acknowledged from business men who come from the Continent. There many commodities are brought from all parts of the world and buyers come and secure their requirements. It is wonderful to see the variety of products on sale, and these are now quickly bought up."

Asked as to the possibility of market prices continuing on present or existing levels, Mr. Irwin thought that readjustments would come in time. For the present, however, the needs are so great for many commodities that there is unlikely to be lower prices. Gradually, however, supplies will be more easily obtainable.

Where Stores Are Closing

ARNPRIOR.—Merchants are closing stores on Wednesday afternoons during July and August.

CARLETON PLACE.—Stores close at 12 noon on Wednesday during July, August and at 6 p.m. other nights except Saturday.

HARDWARE MERCHANT DOES $3,000 GRASS SEED BUSINESS

ABOUT 15 years ago a salesman of grass seed came into a hardware store in ————. In talking to the owner of the store he said: "There is one thing that has always puzzled me, Mr. Thompson. You have a quality store here and have always kept it up to a high standard. I can easily see that in the way you display your goods and in the general manner in which you run your business. Why is it, though, that you don't buy the best grass seed? All your other articles are of the best quality and there is no reason why you shouldn't have the best quality of grass seed also."

After a few minutes' talk the merchant learned that he not only handled an inferior grade of grass seed but that he was also losing sales among his customers in consequence. The salesman took the merchant's order and when he did so he advised the man to advertise the fact that he dealt in the best quality of grass seed and that his customers could be sure, in trading with him, that they were getting the very best seed that could be obtained any place.

The merchant took the advice and in his advertisement there usually appeared the notice: "One-half quart of the best grass seed at twice the former price gives the same total—and it is all grass. If you want weeds, we will buy you some weeds separately and you can mix them in."

The idea of buying pure grass seed appealed to the customers. And now this merchant does a yearly grass seed business of over $3,000.

FIGURING EMPLOYEES PAY

(Continued from page 43)

sions is immediately paid to him, without waiting for the semi-annual settlement.

The file of salary cards is always open for inspection; employees frequently go to the bookkeeper in charge and ask to see their cards, to ascertain whether they are keeping ahead of their quotas. We are glad to see them take this interest in their progress; we instruct the bookkeeper in charge to help them in any way he can.

Every now and then a clerk will come to me with his card and say, "My sales have been large enough, I think, to entitle me to graduate out of the $25-a-week class and into the $30-a-week class." Of course, he wants his quota raised. He gets 5 per cent. on his quota, and only 4 per cent. on everything over that. If his minimum wage is $25, he must sell $500 worth of goods to earn it. If he sells $600 worth, he will get only 4 per cent. on the additional $100 worth, which will net him $29 a week. But if his minimum wage is set at $30, the same $600 sales will draw it for him. To get that additional dollar per week, he is willing to assume the risk of falling behind the increased quota, and thereby getting into trouble with us.

Continued on page 61

EVENTS IN THE TRADE

Business Changes

Webbwood, Ont.—F. Y. W. Braithwaite, hardware, has been succeeded by Webbwood Hardware.

Haileybury, Ont.—C. E. Cain & Son, of 10 Silver Street, Cobalt, Ont., have purchased the business of E. Dupuis, 114 Main Street, and will handle the local business from their Cobalt store.

Will Make Pocket Knives

Kingston. — Ratepayers of Kingston voted favorably on a by-law providing for the purchase by the city of the Cereal Works property and its lease for twenty years, with option of purchase, to C. A. Eaton, of Turner's Falls, Mass. It is Mr. Eaton's intention to commence the manufacture of pocket knives and a company to be known as the Canada Cutlery Co., Limited, will be formed for the purpose. Mr. Eaton, who has for the past fifteen months been works manager of the John Russell Cutlery Co., Turner's Falls, Mass., will be general manager of the company. The company will have an authorized capital of $50,000, of which $35,000 will be issued immediately and the balance as required.

Lighting Rates Reduced in Stratford

Stratford.—A reduction of 20 per cent in rates for commercial and domestic lighting is announced by the Public Utilities Commission, to take effect from July 1. This is the result of the very satisfactory condition of the Electric Department's business, which has accumulated a surplus of more than $17,000. The announcement means that electricity for domestic use will cost the user 2 cents per kilowatt hour for service up to the total of the house area charge, instead of 2½ cents, as formerly, and 1 cent per k.w.h. after that, instead of 1¼ cents. The area charge of 3 cents per 100 square feet remains as before. A new feature introduced is a minimum charge of 50 cents per month.

An Explanation

In order to correct an error in our May 29th issue with reference to the reorganization of The Remington Arms Union Metallic Cartridge Co., Inc., we learn that the new company is being reorganized with an authorized capital stock of $10,000,000 7 per cent. preferred stock and 1,000,000 shares of common stock of no par value. As previously stated there will be no change in the management or policies of the company The new name will be Remington Arms Company, Inc., with executive offices in New York City as in the past.

Merchants Must Still Obey Commerce Board Orders

Ottawa.—Merchants must continue to obey the orders of the Board of Commerce of Canada, Sir Robert Borden informed the House of Commons when Dr. Michael Steele inquired if retail dealers still came under the requirements of th Board in view of the fact that all its commissioners have resigned. Sir Robert pointed out that the resignation of Vice-Chairman O'Connor did not take effect until June 30, and the recommendations of the Government would be passed upon by the Governor-General in due course Until then the orders of the board would stand.

Steel Merger Arrangements in Final Stage

Advices from Montreal are to the effect that the arrangements in connection with the big steel merger, out of which is being created the British Empire Steel Corporation, are nearing the final stage. Last week there was a meeting of a special committee of the board of the Dominion Steel Corporation, at which the terms were considered. This committee includes the three vice-presidents, Sir Clifford Sifton and Messrs. Elkin, Smith and Stewart.

When the terms are regarded as satisfactory by this body, it is expected that further steps will be taken to put the merger through the final stages. Former members of the board of Dominion Steel, with whom the situation has been discussed, take the attitude that the course they took was in the interests of the minority shareholders and that as they have "been dropped by the wayside," it is for the new board to act as they may see fit in the interests of the stockholders. They maintain their position that all the cards were not placed on the table as to the terms on which the smaller companies were being brought in, and that they were justified in demanding all information.

Only One Section of Steel Co. of Canada is Closed

Hamilton, Ont.—A rumor that the entire plant of the Steel Company of Canada, Ltd., was closed down for a fortnight, was flatly contradicted by President Robert Hobson.

The facts, Mr. Hobson states, are that the east-end plant only is being closed for probably one week on account of the shortage of fuel oil. The blast furnaces will be kept in operation, but dearth of oil renders it necessary to discontinue open hearth work at the moment. About two thousand men will be affected.

United States Government Tax on Freight Charges

According to Article 18, of Treasury Department, United States Internal Revenue Regulation No. 49, charges on freight transported from a point within the United States to a point in Canada, under a through bill of lading or through livestock contract, are exempt from the transportation tax imposed by the United States Government on freight charges covering shipments moving locally within the United States.

Since May 1st, on account of the exchange situation, United States Railways have been demanding prepayment of charges through to destination on shipments destined Canada, and some members of the C. M. A. have stated that their shippers, in billing them with freight charges, have included the three per cent. tax. As stated above, any shipments moving on through bills of lading are not subject to this tax, and in the event of the amount being added to the invoice by shippers, it should be deducted and the shippers advised that it should never have been paid to the railways.

Good Building Programme in Northwest

Building construction work in the Prairie Provinces and British Columbia will involve an expenditure of approximately $85,000,000 for 1920. Present plans call for the erection of 2,300 houses, 400 schools and 60 warehouses. Upward of $60,000,000 worth of new construction has already been entered upon west of the Lakes, and much depends on the changing crop situation during the coming months in determining the amount of additional work that will be started. A shortage of building materials is reported in some sections, for which railway congestion is responsible to a certain extent. There is a shortage of labor for building work in most centres. Public works are being undertaken to a limited extent by the cities, and the Federal Government is doing but a small amount of building.

NEWS OF WESTERN CANADA

Vancouver Bids for Hemp Trade

Shipping Facilities Said to Be Best on Pacific Coast of America—Sisal Shipments Heavy.

Vancouver, B. C.—Large shipments of hemp have been arriving regularly for several months at this port, for transhipment East, and this trade alone is running into large figures for the port of Vancouver. Inquiries as to the reason for hemp shipments consigned to the eastern and central states coming to Vancouver on United States shipping board bottoms instead of being landed at Seattle, and from there railed inland, have elicited the information that with the grain harvest due in July, and thousands of tons of cordage required to tie up the sacks, the demand is keen in every rope and twine factory, and every day counts. One shipper stated that a condition exists in Vancouver which cannot be found in any port in the Pacific states, whereby within 36 hours from the time the steamer docks in this harbor the hemp is on the cars, rolling, not in single cars but in carload lots, and it continues to roll until it reaches its destination. Service is what the big factories demand, and nothing but good organization in railroad operation can give that service. Therefore Vancouver has been successful in competing for the hemp transhipment trade between Manila and the factories.

Sisal shipments have been coming in steadily, and have been more marked in Pacific coast trade during the past two months than for some time. This is ascribed to the fact that for the past 90 days transportation facilities have been disorganized on the Atlantic coast, and inland cordage factories found it necessary to re-route their shipments, rail and water, instead of all water, from Manila to New York.

Western Notes

Calgary, Alta.—J. J. McCarron, who has represented the Calgary house of the McClary Mfg. Co. in the northern part of the Province for the past three years, is leaving the service to enter business on his own account at Picardville, Alta.

Mr. McCarron was connected with the Alberta branches for ten years past, coming first to the Calgary branch from Halifax, and later having had charge of the stock and shipping department of the Edmonton warehouse, when it was opened in 1912.

He will be succeeded by J. A. Hall, city salesman of the city of Edmonton for the past year, and who was connected with the company's warehouse there previous to his enlistment and overseas service.

* * *

Calgary, Alta.—Miss T. Gahn, who has been with the Calgary office of the McClary Mfg. Co. for ten years past, resigned last month and was married to Mr. Paul Tempest.

As a mark of their appreciation of the good comradeship existing between them, and their good wishes for the future, the staff presented Miss Gahn with a cabinet of silver.

Mr. and Mrs. Tempest will reside in Bassano, Alta.

* * *

Vancouver.—The Vancouver Hardware Co. have moved from 819 Granville St. to newly-fitted quarters at 897 Granville Street.

Hemp Company Formed in Winnipeg

Winnipeg.—Canada Fibre Products Company, of Winnipeg, has been incorporated by order-in-council of the Provincial Government with a total capitalization of $1,000,000.

The new company will engage extensively in the production of hemp in the Province and will establish a plant in Winnipeg in which the raw product will be manufactured.

The directors named are: J. S. Laidlaw, of Chicago; Col. William Grassie, Arthur Sullivan, David Forrester, Col. J. G. Rattray, commissioner of the Provincial police; W. E. Humphries, George Wilson and J. M. Carruthers, all of Winnipeg. The company has already obtained 500 acres of land in Iberville, west of Assiniboia, and has cropped it with hemp. It is expected that within the next five years the company will have between twenty and twenty-five thousand acres under crop. Machinery for the separation of the wood from the hemp is at present under order. The company, it is stated, will not go into the manufacturing of the finished products, but will only manufacture hemp.

"Build Now" Theme of Co-operative Campaign

Winnipeg.—The B. C. Lumber and Shingle Association are commencing a co-operative campaign under the motto, "Build Now." The campaign is being run in the interests of the Western Retail Lumbermen's Association which operates 1,700 lumber yards in Western Canada. This will have a tendency to increase the sale of builders' hardware, paints, etc.

O-Rib-O Company Expanding

Winnipeg.—The O-Rib-O Mfg. Co. are building a two-storey factory, 40 x 200, on Erin Street, near Portage Avenue. The foundation is in and they expect to move into their new premises about the first of August. This building is of brick and concrete construction and is to cost in the neighborhood of $40,000. It will be equipped with all new machinery and one of the new lines which they contemplate manufacturing is a line of hot air furnace fittings. J. Brockest is the president of the firm.

A Western Dealers' Profitable Vacation

A hardware dealer in a prairie town, interviewed by Hardware and Metal's Western representative last week, had what might be termed a very profitable vacation. A short time after Christmas, last year, he sold his business and took a three weeks' holiday in a nearby city. After the holiday he returned to the town to close up his business affairs and one of the first persons he met was the man to whom he had sold his store. The purchaser had discovered in that short time that he was evidently not fitted for the work because he had already lost much of the trade of the store and offered to return the business. Thus within a very short time the hardware dealer sold his business, had a good holiday, and then purchased it back and made $1,000 on the deal. Needless to say he is now very contented, for he not only found out that idleness is not desirable, but that he has a personality and a knowledge of doing business as proved by the success he has made. He thinks a lot more of the hardware business and is now better satisfied with his portion.

Newsy Notes From Here and There

Toronto. — The annual picnic of the Vokes Hardware Company's employees took place last week at the summer residence of the president, Mr. Miles Vokes, at Erindale. Following an excellent programme of athletic events and a ball game, supper was served on the lawn.

Montreal.—George Henderson, president Brandram-Henderson, Limited, left Montreal on Monday for the Western Provinces, and will address "Save-the-Surface" conventions at Winnipeg, Calgary and Vancouver. W. S. McLennan, general sales manager, Brandram-Henderson, Limited, spent a few days in the Gatineau district last week in pursuit of pleasure and big fish.

Montreal.—D. W. Armstrong, formerly of Canada Foundries & Forgings, Limited, has accepted an appointment as district sales manager at Montreal for Dillon's Crucible Alloys, Limited, Welland, Ont.

Montreal.—W. D. Ross, vice-president of the Nova Scotia Steel & Coal Company, Limited, was in Montreal early this week, having attended a meeting of his company at the Eastern offices.

Montreal.—W. S. Fallis, managing-director of the Sherwin-Williams Company of Canada, left on July 2nd for a trip through the Western Provinces. Mr. Fallis will go through as far as Vancouver and will be absent from Montreal about a month.

F. Flintoff, of Flintoff & Son, hardware merchants, made a business visit to Toronto this week.

C. E. Jones, Ontario sales manager of The Gurney Foundry Co., Ltd., Toronto, is making a business trip to Montreal this week.

London, Ont.—Mr. John Gilmour, for several years a members of the head office staff of the McClary Mfg. Co., and latterly assistant purchasing agent, has obtained a year's leave of absence, which he will spend in the West for the benefit of his children's health.

Sudbury. — Jas. Purvis, one of Sudbury's pioneer merchants, who has carried on a hardware business here for thirty years, has retired owing to ill-health.

Toronto. — H. G. Rogers, of H. G. Rogers Co., St. John, N. B., Eastern representative for the Steel Co. of Canada, Ltd., is visiting in Toronto this week, and will be accompanied by his daughter, who has recently graduated and received the gold medal for general proficiency from Havergal College, Toronto.

Toronto. — The capital of the Bond Hardware Company has been increased from $100,000 to $250,000.

Toronto.—Stuart Ingles Kell, Montreal representative for the Steel Co. of Canada, Ltd., Sudbury and Ottawa valley district, in view of the happy event of his wedding on Tuesday, June 29, was tendered a jubilation on Friday evening by the employees of the company, who presented him with a handsome mahogany mantle clock. Prior to Mr. Kell's connection with the Steel Co. of Canada, Ltd., he was with the firm of The Thomas Davidson Manufacturing Co., Ltd., Montreal.

INCORPORATIONS

Toronto. — The Toronto Computing Scale Co., Ltd., has been incorporated with capital of $200,000, to manufacture scales and other products of wood and metal.

Why Merchants Should Keep Books

Bankruptcy Act Makes It Necessary for Every Merchant to Keep Books—How One Merchant Lost Because He Didn't Have a Record of His Business.

A MERCHANT in Ontario, who carried a stock valued at $9,000, sustained a fire loss; the insurance company allowed him $3,000.

Why?

This merchant did not keep books which gave him particulars of his business. He did not even have a safe. He had a couple of files, one showing accounts that were unpaid, and as soon as these were paid they were taken off that file and stuck on another. The fire came along and wiped out everything including his stock, which he felt sure was valued at at least $9,000. There were no records to show that this was the case and the insurance company settled with him at $3,000.

A general store in another Ontario town changed hands some years ago. The new merchant had $2,000 to pay for stock valued at $8,000. It took considerable nerve to go into the business, but he figured that the store had been making money and that he could very soon sell sufficient goods to meet the balance of his payment.

At the time the first payment came due he found he did not have the money to meet it. He discussed the matter with a traveller, who had a pretty good knowledge of how facts could be secured about the business. He was asked for lists of his purchases since he had taken over the business, amount of stock on hand, and expenses and amount of sales. It required considerable time to get all this information, and when it was secured, it was found that he had bought more goods than he had sold.

"I'll never let that occur again," he said, and several years have passed since, and that situation has never since happened in his business. To-day he keeps a simple set of books, but one that gives him the details of his business, quickly and accurately.

The new Canadian Bankruptcy Act makes it necessary for every merchant to keep books. Apart from any compulsion it is only good business for a retailer to know where he is at. One retailer who has the facts at his finger tips, made up his income tax report in twenty minutes. Another retailer committed suicide in the act of getting at his figures. Every man in the retail business owes it to himself, his family and the firms from whom he buys to see where he is at.

Hardware Letter Box

Oil Burners

R. T. Holman, Ltd., Summerside, P.E.I. —Could you tell us where we could procure oil burning devices for coal cook stoves?

These may be procured from the Canada Oil Burner Co, 35 Adelaide Street W., Toronto, or the Canadian Specialties Mfg. and Sales Co., 95 King Street E., Toronto, Ont.—Ed.

Asbestos Shingles

Geo. D. Dahmer, Esq., Conestogo, Ont. —Could you give us the names of manufacturers of Asbestos Shingles?

These are manufactured by Canadian H. W. Johns-Manville Co., Toronto, Ont.; Canadian Asbestos Company, Montreal, Que., and the Asbestos Mfg. Company, Limited, Montreal.

* * *

Copp Stove Repairs

S. B. Andrews, Esq., Minnedosa, Man.— Could you tell us where we could procure stove repairs for stoves formerly made by Copp Bros. at Hamilton, Ont.?

Reid and Coombs of Fort William, Ont., have taken over the patterns of this firm and are manufacturing repairs.—Ed.

British Tinplate Production Booked Up

Hardware Trades Have Completed Work of Reconstruction—Aluminum Hollow-Ware to Be Produced on Larger Scale—Seamless Copper Tubing Now Available for Export.

The following data have been furnished to Hardware and Metal by the British Trade Commissioner at Toronto, based on information supplied by the British Government's Department of Overseas Trade:

TINPLATES.—Enquiries continue to be received in large volume from all parts of the world, but only a small proportion result in definite business, owing to the fact that most works have sold their output for as long a time ahead as they consider advisable. There is a brisker demand from consumers in the home market now that they find that the fall in tin has not affected the price of tinplates. Continental trade is seriously affected by the existing adverse rates of exchange, which cause buyers to reduce their purchases to the lowest possible point.

The Welsh market is very firm and the supply of plates for early delivery extremely limited.

GALVANIZED SHEETS.—The position in this industry is more or less as last reported. The enquiries for thick gauges have been rather fewer than of late, but prices show no signs of weakening. Thin gauges continue in request from all markets, and some business has been transacted as far forward as December. The current nominal quotation for 24 gauge corrugated in bundles is about £56 per ton.

HARDWARE.—The hardware trades in the Birmingham district are plentifully supplied with orders, and overseas demands are well maintained. A large number of works have now practically completed their task of reconstruction and are in a position to give a much greater output of their products. Arrears of work are being rapidly overtaken, and fairly prompt delivery can be given of certain lines, amongst which may be mentioned aluminium hollow-ware.

Quite a number of firms have taken up this trade since the conclusion of peace, the plant they had installed for the manufacture of munitions being admirably suited to the production of a large range of domestic utensils. Aluminum ware is rapidly gaining in favor and there should be a good future for the industry in this country.

The expected boom in builders' brass-foundry is developing very slowly, owing to the unexpectedly slow rate of progress made with the various housing schemes. For the present, however, the orders in hand for this class of goods are sufficient to keep manufacturers well occupied.

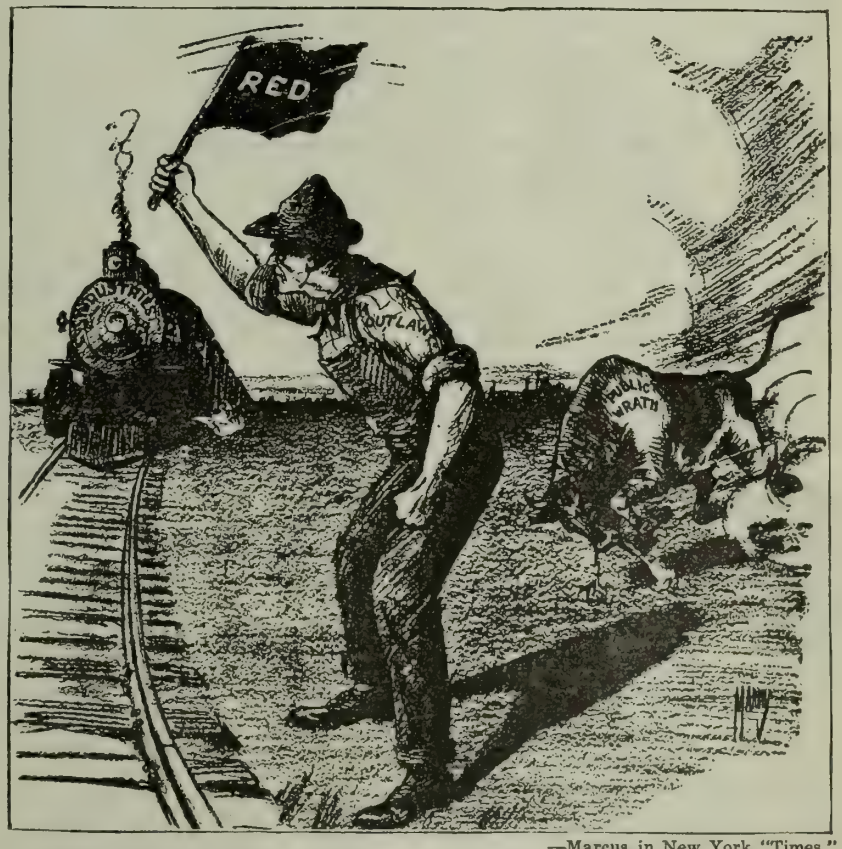
Prompt delivery can be given of seamless copper tubing, and the present is a very favorable time for overseas firms to obtain their requirements in respect of this material from the United Kingdom.

HOW TO RETAIN VALUABLE CLERK

Continued from page 46

years shows that your average net profits—I mean absolutely net with all shrinkages, losses and reasonable depreciation of all kinds out—is $2,400 a year. It might be good to arrange to give the man 1-8 or 3-16 of the net profit in addition to his salary as now fixed. This is safe, for the net profits accrue over and above your expenses, and those expenses now include his salary. Yet this would give him $300 to $450 additional a year.

That figure would be well inside the $48 a week to which 8 per cent. on sales would entitle him, while the chances are that, with such incentive to work, he would so exert himself and be so greatly additionally helpful to you that he would more than earn his extra pay. Suppose, for example, that together you could make $3,000 net and your agreement was to pay him 3-16 of the net. His extra would be $462.50, and that deducted from $3,000 would leave you $2,537.50 or $137.50 more than your former total.



—Marcus in New York "Times."

WHEN YOU WAVE A RED FLAG, LOOK OUT FOR THE BULL.

"A fuller appreciation of the basic conditions promoting the changes in the purchasing power of money would do much to stop the outcry against the "profiteer," as a significant factor in the general increase in prices, and to remove the impression that the Government can, by the fixing of the prices of this or that commodity, restore the blessed days when a dollar bought what we are prone to consider a dollar's worth. . . . The urgent need of Governments for supplies during the year permitted high prices to be asked in the case of both foodstuffs and munitions. In the case of the latter, new or larger plants had to be constructed, equipment procured and considerable risk taken as to the period during which the demand would continue, all conditions justifying an increase in price. Higher prices once being established, circumstances throughout the world were such as to drive to higher and higher levels the whole range of prices."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

Steel Fence Posts

A new departure in the line of fence posts is being offered the trade by the Burlington Steel Co., Ltd., Hamilton, Ont., who claim that they have perfected a fence post that eliminates many disadvantages of fence building as well as bringing out many new features. Some of the features, as pointed out by the manufacturers, are that due to the "U" shape the maximum strength is acquired. The formation of the ribs as well as the shape make them self-anchoring. Being all steel they are fireproof, and weeds, dead leaves and other accumulation may be burned without damage to the structure. The fence may be erected very readily on account of having no holes to dig as the posts are driven in.

Fence Posts

The manufacturers describe their new product as follows: The standard length is 7 ft. 3 ins. On account of the U shape they may be driven, making the small amount of space required to ship or store them a decided advantage; there being approximately sufficient posts to fence 28 miles to the carload. This method also makes them very readily handled on a wagon for distribution, while the fence is being erected. These posts are also treated with an anti-rust prevention which greatly preserves their life.

In order to preserve the maximum strength the manufacturers state that the punching of holes in the post in order to attach the wire strands has been overcome, by placing regular ribs on the face of the post 1½ inches apart, which prevents the fence from riding up or sagging, and to which the wire may be readily fastened by means of wire fence hooks or ordinary loops of wire.

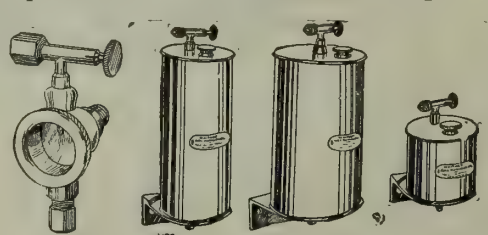
The makers also claim that the posts are self-anchoring by the design of the U shape and the ribs on the post, and that this shape also does away with the necessity of having the bottom end pointed, as same drives quite easily and on account of the bottom being even is much easier to drive straight.

Gas Humidifiers

The R. S. Whitney Mfg. Co., 74 Nichols St., Lewiston, Maine, U.S.A., are putting on the market a new device for humidifying the atmospheric condition of the gas mixture in automobile engines which they state will give the car pronounced flexibility, power and speed.

The Whitney gas humidifier is the trade name of the new device which the makers say is an upright cylindrical tank acting as a reservoir for water and by means of copper tubing, water vapor is drawn by vacuum through these ducts and a dash sight feed gauge into the intake manifold. Within the humidifier is an automatic shut-off valve placed at the lowest possible water level which checks the inrush of air into the motor when the humidifier becomes emptied of water, therefore it cannot act as an auxiliary air valve if neglected.

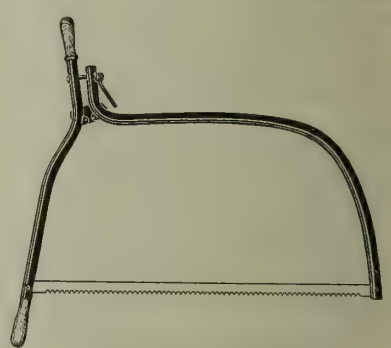
Other features pointed out by the manufacturers are: The gauge is finished in nickel plate and is designed to be mounted on the dash or cowl board, it being piped with the motor and humidifier, acting as a constant tell-tale on the action of the humidifier, by showing the rate of feed, when the humidifier requires refilling or ceases feeding. This gauge combines no complications and enables the driver to control the amount of water-vapor entering the motor. Occasionally this valve may be opened a complete turn and the motor flushed with water, creating a steaming-out process to remove carbon which is positive in its action. It is manufactured in three models for motor cars, trucks, tractors, motorcycles; marine, portable, and stationary gasoline or kerosene engines, namely, the No. 1, No. 2, and No. 3. All models are designed alike, the difference being in the water capacity only. The No. 3 model is designed for motorcycles.



Auto Humidifyer

Buck and Pulpwood Saw

Lumber Products Co., Lewiston, Maine, are offering the trade a new style of buck saw, which they state is a new departure from the regular styles. The new saw goes under the trade name of "The Little Wonder Buck and Pulpwood Saw." The makers claim that special construction principles are carried out in their new device, the entire frame being constructed from cold drawn bicycle tubing ⅞ inch in diameter, and the weight of the material being 16 gauge.



Buck and Pulpwood Saw

The diameter and weight of this material, they state, makes a very rigid frame and is sufficiently heavy to eliminate warping, twisting or breaking, but owing to its construction the frame is comparatively lighter than the regular weights.

In describing their new product the manufacturers state that their saw consists of two specially shaped pieces of specially toughened bicycle tubing, the top or head piece having two well-finished wooden handles or grips. At the bend near the top handle is fastened a plate securely bolted, and a few inches further up is a long threaded bolt which extends for several inches sufficiently to pass through the other section and still leave a space between the two parts for leverage purposes. The other section of the saw is bow shaped and is made of the same material as the part first described. At the top of the bow is an L-shaped extension, which is bolted to the plate in such a way as to be on a swivel or hinge. To adjust the saw a lever nut is turned on the long-threaded bolt which also connects the two parts after the blade has been inserted.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

IMPORTANT advances in hardware prices have again been made this week and many basic lines have been marked up as a result. The price tendency on nearly all hardware commodities manufactured from iron or steel is still upwards and there seems little indication for lower quotations at present.

Scale prices have been revised upwards and new lists and discounts have been issued. Carpenters' tools have again been marked higher. Wrapping paper, snare wire, scythe stones, sash weights, tire tape and buggy washers are also higher in price. Hose nozzles, tower bolts, sash rollers, screen door spring hinges and stove boards all have higher quotations. Fuel oil prices have again advanced and some grades of machine and gas engine oil have also been marked higher. Some makes of heating stoves and ranges are also higher priced.

The removal of the war tax of 7½ per cent. has favored certain lines of silver plate and game traps.

The situation regarding freight transportation has developed serious shortages of coal and other fuel and in some cases raw materials and some industries have had to close down as a result, while others are greatly handicapped.

Jobbers are very much concerned for future deliveries from their buying sources and state that their stocks are becoming very low and if replenishments do not soon come forward some lines may be entirely exhausted.

In spite of the shortage merchants are enjoying very brisk trade and the demand for nearly all commodities is seasonably heavy. Collections continue to come forward freely.

MONTREAL MARKETS

MONTREAL, June 30.—Changes are quite numerous in hardware commodities still, and the market undertone on all iron and steel goods is strong. Wrapping papers are moving upward, and snare wires have been raised to higher levels. Scale prices have been revised upward, with new lists and discounts issued to the trade. Lanterns for fall delivery are a feature of the market and some jobbers look for higher prices on these. Ammunition is steadily firm, with sales active for fall delivery. Boiler tubes are scarce and high in price. Nails and bar iron and steel are ruling firm, and both are rather scarce, certain sizes in particular. Sales are still reported of refrigerators, ice cream freezers, and seasonable summer goods are actively selling. While present stove demand is limited, booked orders total up well. Some improvement has been noted in steel sheets, although the shortage is still very acute in manufacturing and jobbing circles. Crude oil is scarce and high, and may reach the 20 cent figure ere long. Sargent line of tools, etc., have been revised in price. Shipments to outside points have been well maintained and there has been a splendid volume of business all around. The removal of the war tax of 7½% has favored certain lines of silver plate, prices, in some instances, being reduced to this extent.

Ammunition Sales Are Getting Heavier

Montreal.

AMMUNITION.—Jobbers report that the volume of ammunition business this year is most gratifying. It is stated that the old-time sportsmen will buy ammunition this fall in increasing quantities, regardless of the heavy taxes imposed by the Budget. Already orders are heavy, in the hands of jobbers, and business is coming to hand every day. The demands have been specially heavy for loaded shells.

New Scale List Has Been Issued

Montreal.

SCALES.—The scales manufactured by Burrow, Stewart and Milne Co., Ltd., Hamilton, are now sold on a new list, effective June 10. On this list discounts are altered and on the No. 81 catalog the following discounts apply to the hardware trade:

Pages 5 to 84, 10/5%.
Pages 85 to 92, on application.
Pages 93 and 94, steel bar weigh beams, 10%.
Pages 95 to 97, scale weights.
Champion Scales, per new price list, 5%.
Champion Platform, 10/5%.

Please note the following changes in list prices:
No. 212, household scale, page 15, now $4.90.
No. 214, household scale, page 16, now $6.60.
All former discount sheets are cancelled.

Is Very Difficult to Buy Boiler Tubes

Montreal.

BOILER TUBES.—At the present time a great scarcity of boiler tubes is manifest in this market. One large importer states that they are practically unprocurable. This situation may not be easily overcome as the difficulties of labor and raw material will probably continue for some time, and even should improvements soon come, it would take a long while to overcome the existing shortage. The undertone is naturally a very firm one.

Record Price Basis For Wrapping Papers

Montreal.

WRAPPING PAPER.—There seems to be nothing in sight but an upward tendency on kraft wrapping paper. With such a heavy demand for pulp products, there is bound to be a prevailing high price for wrapping papers and regular kraft paper is now selling at

$14.50 per 100 pounds, which is a new record figure.

Net Prices Snare Wire Are Higher Than Before

Montreal.

SNARE WIRE.—In addition to the information given last week on snare wire the following prices now apply for various gauges: No. 20, per lb., 64c; No. 22, 65c; No. 24, 70c; No. 26, 85c.

Tax Removal Makes Plate Prices Less

Montreal.

SILVERWARE. — A revision of the basis of Community plate is announced. This comes about as a result in the removal of the 7½ per cent. war tax, and doubtless the lowered price of silver has had its effect. The change will be a very welcome one to the trade.

It is to be noted that no change has been made in the basis for Par plate or Reliance plate, these both remaining on previous basis.

Greater Scarcity Now of Standard Nails

Montreal.

NAILS. — Demands have continued heavy for nails, but the situation grows worse, rather than better, from the standpoint of supply. Jobbers are sending out advice sheets from week to week stating what sizes can be supplied, and it is noteworthy that the big selling sizes are practically unobtainable, except in small quantities. With shortage of material, and labor conditions none too rosy, it is doubtful if the situation will improve for many weeks.

Standard wire nails are still selling on the basis of $6.10 per keg, and cut nails at $6.35.

Picks and Crow Bars Are in Good Demand

Montreal.

CROW BARS, PICKS.—At the present time crow bars are reported to be rather scarce. The same condition applies to clay and rock picks and this is another indication of the growing shortage of raw material. The demand is quite heavy, seasonably speaking, and in view of all the surrounding conditions the price basis is naturally very firm, and advances would not come as a surprise.

Iron and Steel Active; Scarcity

Montreal.

IRON AND STEEL.—Jobbers state that it is difficult to get certain sizes of bars, and band steel in particular is in short supply. One reason for this is a shortage of labor to roll the band steel into bundles. A Montreal jobber stated to Hardware and Metal that while they could get certain quantities of band steel they had to take it in the long strips, and as this was so difficult to handle they preferred not to purchase it.

IRON AND STEEL

Iron finish machinery steel	$5 05
Norway iron	15 00
Single reeled machinery steel	6 50
Spring steel	5 50
Sleigh shoe steel	5 00
Tire steel	5 20
Toe calk steel, per 100 lbs.	5 90
Band steel	5 00
Harrow tooth steel	5 15
Mining tool steel, per lb.	0 24½
Black diamond tool steel, per lb.	0 24½
Black diamond cast steel, per lb.	0 24½
Common bar iron, per 100 lbs.	4 65
Refined iron, per 100 lbs.	5 65
Mild steel	5 00

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Still Demand For Ice Cream Freezers; Firm

Montreal.

FREEZERS, REFRIGERATORS. — While the season is well advanced, jobbers are still selling large quantities of ice cream freezers and refrigerators. There has been a temporary shortage of both lines, but recent shipments have improved the situation, and some are again making deliveries. No change has been made in the price basis on medium lines, but the undertone is at an advance.

Heavy Sales Made of Garden Tools

Montreal.

GARDEN TOOLS.—While the heavy selling season is past, there still is a fairly active inquiry for garden tools, and altogether the season has been a big one. Lawn hose has sold well, and the undertone on this continues strong. There is naturally a heavy sale just now for hose couplings, menders, nozzles, etc.

Various Wares Strong, With Tendencies Firmer

Montreal.

WARES.—There has been a steadily active demand for various wares from the trade, and galvanized ware has been moving specially well. The undertone of this market as well as that for enamelled ware, aluminum ware, and other lines is seasonably active. In a general sense, while no definite price changes are manifest this week, conditions are firm.

Slight Improvement in Sheet Deliveries

Montreal.

SHEETS AND PLATES. — Large manufacturers claim that there has been some improvement in the matter of delivery during the past week or two. This would apply to black sheets used for manufacturing various wares, and while the improvement is very slight it is very welcome. If the railway difficulties and labor troubles do not manifest themselves again in a serious way, there will doubtless be a steady improvement right along, although it may be some time before deliveries are at all what manufacturers desire them to be.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Stove and Range Trade Seasonable

Montreal.

STOVES.—The present demand for stoves and ranges is seasonably light—but some bookings are still being received for fall delivery. Manufacturers state that orders already in hand total a considerable tonnage, and it is very questionable whether manufacturers will be able to entertain many large orders in addition to those already secured. The delivery of various material already on order is likely to be delayed. This will mean that any excess production that may have been looked for some months ago will hardly be possible this year. The undertone is particularly firm.

Oil and Gasoline Have Sold Freely

Montreal.

COAL OIL, GASOLINE—The demand for coal oil has reached the usual seasonable proportions, and from all quarters sales are reported heavy. The same is true of gasoline and the only question is that of supply, even though prices are high. Present quotations on coal oil are from 29 to 31 cents per gallon, and on gasoline the price of motor grade is 38½ cents.

Various Lines Goods Advanced and Revised

Montreal.

TOOLS, ETC.—Prices have been completely revised on Sargent and Co.'s goods. Many lines that were previously sold at a price per gross are now selling at a unit price in multiples of 100, or at a price, each. Some of the prices have been advanced on goods of this firm's manufacture, while others have been revised entirely, without definite price change.

Rope and Cordage Quiet; Basis Holds

Montreal.

ROPE CORDAGE.—There is a seasonably fair demand for rope, although the usual summer quietness is settling down. Supplies are quite ample for ordinary trade requirements and the basis is as follows: Pure manila, per pound, 35½c; British manila, 28c, and sisal, 22½c. Seine twines are hard to get and the demand is active. Prices are naturally very high.

Higher Prices Likely on Crude Fuel Oil

Montreal.

FUEL OIL.—A record price of 18.70 cents per gallon has been reached for fuel oil. This is due to an increasing demand and a definite shortage of the commodity, which refiners see no hope of improving in the near future. It is probable that even 20 cents per gallon may be reached on this crude product.

Plumbers Using Many Lead Products

Montreal.

LEAD PRODUCTS—Prices have been ruling steady on sheet lead, lead pipe and fittings. There has been a steady demand from plumbers for these goods, and as there is still much building under construction this condition will perhaps continue. Supplies are adequate to take care of the needs of the trade and there is a willingness to buy, on the part of the trade, in moderate quantities.

Old Material List Still on Weak Side

Montreal.

OLD MATERIAL.—Prices have been easing off on old scrap, and this condition still prevails. Some foundries have had to close down for several weeks and they were off the market, naturally. Now operations have been resumed and there is a possibility of the undertone improving and of more numerous sales being made. The movement of old waste material from the country has been more active of late.

Tin Holds Basis; Ingots Are Quiet

Montreal.

INGOT METALS.—For the most part the quiet conditions of the past few weeks have been maintained and price changes are absent. Tin, while still somewhat unsettled in London, has remained unchanged here, while lead has been more active in some parts.

COPPER.—Trading here is still of small compass and the price remains at 24c per lb. for electro., and at 23½c for casting.

TIN.—Some fluctuating in London markets, but local conditions rule without change, 57-58c per lb. still being quoted.

LEAD.—Demands, in a general way, have been heavier in large buying circles. The undertone is steady here, with 10½c per lb. being quoted.

ANTIMONY.—Outside enquiry is improved, but the price remains still at 11½c per lb.

SPELTER.—Little local trading has been effected. Zinc has been easier. Montreal basis on spelter is unchanged at 10½ cents per lb.

ALUMINUM.—What small amount of business is transacted here is done on the basis of 34 to 35c per lb.

TORONTO MARKETS

TORONTO, June 30.—Hardware commodities manufactured from iron or steel continue to advance in price and in many cases the tendency is for higher quotations. Heating stoves and ranges are on the list for higher prices and some makes will now cost the dealer more. Fuel oil also has come up for further price revision having advanced 2 cents per gallon. Champion scales have also been advanced and a new list with revised discounts is being sent out to the trade. Butchers' beams and household scales are also included in this list. Sash weights have again advanced.

Nails are very scarce and the demand is greater than the supply. Barbed wire, number 9 galvanized oiled and annealed, and other fence wires are daily becoming more scarce and replacements are coming very slowly.

The great scarcity of coal and fuel is seriously handicapping production and some industries have been forced to temporarily close their plants. The scarcity of raw materials, as well as manufactured products, is causing considerable inconvenience to all concerned.

Collections continue to come forward freely.

Heating Stoves, Ranges, Etc., Advance 5 to 15%

Toronto.

STOVES AND RANGES.—New and higher prices have been made on some styles and makes of heating stoves and ranges. Manufacturers whose lines are affected state this is not a general advance but is more in line with their costs. The very unsettled condition of nearly all markets pertaining to iron and steel and also the receipt of deliveries of raw material are all problems which the manufacturers have to face, and they state for this reason they are unable to tell any great distance ahead regarding future prices. Manufacturers also point out that the prospects for a very prosperous business are very bright for the coming Fall season, and while they do not advise speculative buying it is their belief that dealers should cover themselves for their legitimate needs. The new prices vary considerably and will approximate an increase from 5 to 15 per cent. over former quotations.

Higher Quotations Again Made on Fuel Oil

Toronto.

FUEL OIL.—The situation which has developed in fuel oil is a very satisfactory one and supplies are said to be limited. This seems to have been reflected in the new price which is of a higher nature, having advanced 2 cents per gallon and is now quoted at 20 cents per gallon in barrels, and 18 cents per gallon in tank quantities.

Machine Oils Again Are Revised Upwards

Toronto.

MACHINE OIL has also been revised upwards again, and the new price is now being quoted at 54½ cents per gallon. Imperial gas engine oil has also been marked up and is now quoted at 59 cents a gallon, while the Imperial kerosene oil has been revised upwards to $1.35 per gallon.

Bench Axes Have Been Readjusted to 45% Off

Toronto.

BENCH AXES.—As announced in last week's issue, bench axes of Smart's manufacture have been revised upwards. These prices have been readjusted by the manufacturers and the new revised price now reads 45 per cent. discount from the list.

Various Brushes May Again Advance

Toronto.

BRUSHES.—The present tendency of prices on nearly all kinds of brushes is still upwards, and some are of the opinion that higher prices will again be

made in the near future. However, it is hard to say just what the situation will be as there are so many developments taking place throughout the whole situation. The difficulty of securing the long bristles as well as other supplies continues to be one of the biggest drawbacks to the manufacturer, it is stated.

Disston Saws Now Cost Dealer $45.25 Doz.

Toronto.

DISSTON SAWS, which were quoted at an advanced price in last week's issue have had a readjustment of price, and the new quotation is now $42.25 per doz. for the D8 26 inch.

Champion Scales Have Upward Revision

Toronto.

CHAMPION SCALES.—Higher revisions have again been made in the price of Champion scales, and the new quotations, including the charges for stamping, are as below. Standard scales have also been revised upwards and are now being quoted at a discount of 5 per cent. from the list, stamping charges being extra. Weigh beams have also been revised upwards, the new discount being 10 per cent. from the list and extras being charged for stamping.

Champion Scales—

	Each.
4 lbs.	6 65
10 lbs.	8 85
240 lbs.	13 00
600 lbs.	35 55
1200 lbs.	43 40
2000 lbs.	57 65
2000 lbs. drop lever	65 40

Butcher Beams Advance; Household Scales Up

Toronto.

BUTCHER BEAMS.—New and higher prices have also been made on butcher beams. The 30-pound being quoted at $10 each and the 50-pound being quoted at $11.55 each in line with advances on other scales the household line has been revised upwards, the smaller size being quoted at $4.50 each, while the larger ones are $6 each.

Sash Weights Now Cost Dealer $5 Cwt.

Toronto.

SASH WEIGHTS also come up for revision and a higher price of $5 per hundred pound is being quoted on the solid 3 pound and over.

Wire Nails Very Scarce; May be a Famine

Toronto.

WIRE NAILS.—Little relief has been shown in the situation which has developed in wire nails, and jobbers are of the opinion that the situation will be real tight in the near future, and give as a reason the fact that the manufacturers were unable to fill their orders for sometime back, and now that the coal and fuel famine is prevailing many have had their production greatly curtailed, and it may be some considerable time before they are again back in full swing. The demand for nails is a very heavy one and jobbers state their stocks are moving out very rapidly, and whether they will soon be able to replenish the stocks remains to be seen. There is no doubt, however, that there are many factors in the situation, and few, if any, are predicting the future situation. The quotation remains at $6.10 per keg base, while the cut nails are quoted at $7 per keg base.

Lead and Zinc Products Firm; Unchanged

Toronto.

LEAD AND ZINC PRODUCTS.—Nearly all products shown on the list are quoted from a very firm base this week, and while the price remains steady the tendency is for a very firm price. However, on account of the recent fluctuations it is difficult to state how long this situation will last or when there will be a revisal, as the basic metals for this commodity are of such a fluctuating nature. Lead pipe is still being quoted at 17 cents per pound, while the lead waste pipe is quoted at 18 cents per pound. Lead traps and bends show no change and are quoted at an additional 30 per cent. to the list. Solders are also holding quite firm, the strictly being sold at 35 cents per pound and the guaranteed at 39 cents per pound. The following are quotations of some of the better known products:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets. 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Corrugated Sheets Firm; Scarcity Not Overcome

Toronto.

CORRUGATED SHEETS.—Little improvement has been offered the situation as regards the supply of raw material for the manufacture of corrugated sheets and manufacturers are very much concerned for the future; they state there is very little material coming forward and that the local markets are almost bare. This situation is entirely attributed to the freight transportation difficulties as well as the shortage of raw material. The great shortage of coal is also said to be a factor and in some cases the mills both in United States and Canada have been forced to close down for the want of fuel. Owing to the great difficulty of securing supplies, as well as premiums that have to be paid in order to secure immediate delivery, many are charging premiums over the prices shown herewith, although these prices generally are acceded to be the booking or standard prices. However, manufacturers state it is often necessary for them to go into the local markets and pick up material in small quantities in order to fill their orders, and they are often required to pay premiums for these pick-ups. The following are the present quotations:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$10.50	$ 8.50
No. 26 gauge	11.25	9.75
No. 24 gauge	16.75	12.00
No. 22 gauge	19.75	15.00
No. 20 gauge	23.50	19.25
No. 18 gauge	30.00	23.75

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equallized on Montreal.

Discount, 7½%.

Warehouse Stocks of Boiler Tubes Are Light

Toronto.

BOILER TUBES.—Jobbers state their stocks are becoming very low, which is a decided reversal from the situation of several weeks ago. This, however, they state is due to the transportation difficulties as well as to the mills not being able to supply them freely. Some have it that the demand for pipes is so keen that the skelp mills are handling large contracts at premium prices and which may have checked the manufacture of boiler tubes. However, it is hard to state any main factor in the case as there are so many sides to the situation. The following are quotations on tubes:

BOILER TUBES—	Seamless	Lapweld
1 inch	$23 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	30 00
2 inch	34 00	30 00
2¼ inch	38 00	33 00
2½ inch	47 00	37 00
3 inch	53 00	47 00
3¼ inch	.....	54 00
3½ inch	70 00	49 50
4 inch	98 00	64 00

Famine Prevails For Sheets and Plates

Toronto.

SHEETS AND PLATES. — The great famine for sheets and plates of nearly all kinds has prevailed so long that little comment is being made on the situation, although jobbers and manufacturers state the conditions are even worse than previously. Some state they had hopes of fair delivery after the congestion on the railroads had been cleared up. This, however, they state has been offset by some of the mills being forced to partly close on account of the great shortage of coal and other fuel. Some state they have had light shipments of sheets but that the demand is so great that little improvement has been made on the situation, as numerous carloads are required before the situation will be righted. The following quotations are published merely as a guide, and while these prices are fairly standard many are charging premiums on account of having to go into the local markets or where they have been fortunate enough to secure their shipments from the mills for which they have been required to pay heavy premiums.

BLACK SHEETS	
14 gauge	$8 95
16 gauge	9 00

18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40

12 and 14	10 55	10 20	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Waste Materials Still Have Sagging Tendency

Toronto.

WASTE MATERIALS.—Owing to the reduced activity of the mills and many industries the demand for waste materials of nearly all kinds has considerably fallen off, and practically all lines have a very weak sagging downward tendency with every indication of lower prices unless the situation shows considerable improvement in the near future, it is stated. Iron and steel, which have been holding at very firm, high figures, have had a decided slump and a great weakness is noted on this line. However, it is expected that the railway transportation difficulties will soon be overcome, and this would relieve the tension at the mills and incidentally strengthen the market on these commodities, it is stated. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾

Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

May be Scarcity of Iron and Steel Bars

Toronto.

IRON AND STEEL BARS.—The situation regarding iron and steel bars has tightened up very considerably. This is attributed to the great scarcity of coal and fuel of all kinds, mainly brought about by the freight transportation tie-up, and it is stated that both in the United States and Canada that several mills have been closed down on this account. Jobbers state that if this situation is not soon cleared up that there will likely be a great shortage, and while they state there are fair stocks of this material on hand in the warehouses it is also true that there are certain sizes that are becoming very low, and with little prospects for immediate replacements.

STRUCTURAL ANGLES and shapes are said to be very hard to procure and the price tendency is upwards. The following are the present quotations on iron and steel bars:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Fair Demand For Rope; Price Steady; Unchanged

Toronto

ROPE.—A fair amount of business is being handled throughout the trade on rope, although the situation is somewhat quiet. Prices remain very steady and no change is immediately expected. The quotation on manila is 35½ cents per pound, while the sisal is quoted at 22½ cents per pound, and the Beaver manila and New Zealand hemp is quoted at 28 cents per pound base.

Poultry Wire Has Heavy Demand; Stocks Light

Toronto.

POULTRY WIRE is a very scarce commodity and little relief is looked for from the manufacturers for some time to come, it is stated. Jobbers state their stocks are daily becoming depleted and many state there are numerous sizes they are already sold out of. The present quotations are very firm, although unchanged, and are as the current quotation pages.

Various Kinds of Wire Still Hard to Procure

Toronto.

WIRE.—There is a great scarcity at present of nearly all kinds of wire, and jobbers are in a quandary as to what the situation will develop. They state that enquiries are coming into them very persistently, but they are unable to secure delivery from the manufacturers, who in turn state that they are up against a serious shortage of coal and other fuel, and that so many other disturbances have taken place that they are unable to maintain a sufficient production to fill the demand, which is an unusually heavy one; especially is oiled and annealed wire and other fence wire very hard to procure. The present quotations are very firm, although no recent changes have been made in prices which are as current quotation pages.

Ingot Metals Steady; Price Unchanged

Toronto.

INGOT METALS.—Little change has been made on these metals this week, the price being fairly steady.

TIN is fairly steady, the quotation remaining unchanged at 60 cents per pound.

LEAD prices show no change, 10½ cents per pound still being the quotation.

COPPER shows no change over last week's quotation. The present price is quoted at 24 cents per pound.

SPELTER.—A fair demand is being made for spelter. The price remains unchanged and is quoted at 10½ cents per pound.

ANTIMONY stocks continue light although the situation is somewhat firmer. The present price is 15½ cents per pound.

LONDON MARKETS

LONDON, June 30.—There seems little to indicate that lower prices will be made on hardware commodities and the tendency is for still higher quotations. This week's budget of price changes is no exception to this condition and many lines have been marked up. Household scales of many kinds have been revised upwards. Scythes stones of various makes have new higher quotations. Tire tape has again been marked higher. Buggy washers will also cost more. Gem hose nozzles and English tower bolts and sash rollers have also advanced in price. Various push drills, ratchet screw-drivers and other carpenters' tools all have been revised upwards.

The removal of the 7½ per cent. tax has been the means of lowering the price of game traps of the cheaper variety.

All in the hardware trade seem to be enjoying a very brisk turnover, and the sale of all summer lines is still in full swing. Goods are very scarce and some lines such as fence wire, fence staples, slating nails and roofing nails, cannot be procured in some districts and in others many times the quantities offered for sale could be used. Prices on No. 9 and barbed wire are based on the cost as small shipments arrive and are quoted on application. Collections continue excellent.

Higher Revisions Made on Various Scythe Stones

London, Ont.

SCYTHE STONES.—A heavy demand is being made for scythe stones of various kinds, and some lines have been advanced in price. The Western red-end has been marked up to $3 per box of 3 doz.; while the Quinebog is now quoted at $4 per box of 3 doz. The English round, $5.25 per box of 25; and the Canadian emery has been revised up to $1.10 per dozen.

Small Packages of Tire Tape Now Cost 89c Lb.

London, Ont.

TIRE TAPE.—A further advance has again been made on the price of tire tape, the ounce packages having been marked up to 89 cents per lb. The 2 oz., 4 oz. and 8 oz. also are quoted at 89 cents per lb.; while the 1-lb. packages are quoted at 85 cents per lb.

1-in. Coil Buggy Washers Cost Dealers 30c Box

London, Ont.

COIL BUGGY WASHERS.—A higher revision has been made on the price of coil buggy washers. This is said to be due to the advanced cost of manufacture. The ⅞ inch is now quoted at 29 cents per box, while the 1 inch has been marked up to 30 cents per box.

Gem Hose Nozzles Are Marked Up to $13 Doz.

London, Ont.

HOSE NOZZLES. — Higher revised prices have been made on some lines of hose nozzles, and this week's price changes include an advance on Genuine Gem pattern, the ¾ inch now being quoted at $13 dozen.

Higher Prices Made on English Tower Bolts

London, Ont.

TOWER BOLTS.—New and higher quotations have been made on English japanned tower bolts. The new quotations on the various sizes of the number 09 are as follows:

English Japanned Tower Bolts—No. 09 x 3 in., $1.85 doz.; 4 in., $2.10; 5 in., $2.50; 6 in., $2.85; 8 in., $3.75; 9 in., $4.25.

Hay Fork Pulleys Are in Good Demand

London, Ont.

PULLEYS.—In view of the close proximity of the haying season, hay fork pulleys are moving very briskly. The present quotations are very firm, although the prices remain unchanged. The quotations on some of the most familiar lines are as follows:

Hay Fork Pulleys—6 inch, wood wheel knot passing, with heavy malleable frame, $8.75 doz.; 6 inch wood, with light malleable frame, $8 doz.; 6 inch iron wheel knot passing, with heavy malleable frame, $8.75 doz.; 6 inch wood wheel, plain, with malleable frame, $8.50 doz.; 6 inch, iron plain, with cast frame, $7.20 doz.

No. 10 Sash Rollers Have Been Revised Upwards

London, Ont.

SASH ROLLERS.—New and higher quotations have been made on sash rollers. This is said to be in line with advancing prices on many commodities that constitute the builders' hardware line. The new prices on the various sizes of the No. 10 sash pulleys are as follows:

Sash Rollers—10 x ⅝ in., 35c doz.; ¾ in., 40c; ⅞ in., 50c; 1 in., 65c.

Lower Revisions Made on Various Game Traps

London, Ont.

GAME TRAPS.—A readjustment has been made on the price of various game traps, and lower prices approximating a 7½ per cent. decrease have been made. It is stated that this lower revision is not on account of lower cost of material or manufacture, but is entirely due to the removal of the 7½ per cent. tax formerly imposed. The following are the new quotations:

Victor, with chain.—No. 0, $2.20 doz.; No. 1, $2.65; No. 1½, $4; No. 2, $5.50; No. 3, $9.85; No. 4, $11.25.

Oneida Jump, with chain—No. 0, $3 doz.; No. 1, $3.50; No. 1½, $5.25; No. 2, $8.40.

Carpenters' Tools Advance About 5%

London, Ont.

CARPENTERS' TOOLS. — The price tendency on nearly all commodities manufactured from iron or steel is still upwards, and in many cases manufacturers find difficulty in securing sufficient supplies of raw material for their purpose. Carpenters' tools of various kinds are no exception to this rule and this week records an advance on the prices of the Yankee line, including ratchet screw-drivers, push drills, etc. Some of the new quotations are as follows:

Screw Drivers.—No. 11 x 2 inch, $9.10 doz.; 3 inch, $11.15; 4 inch, $11.85; 5 inch, $13.05; 6 inch, $14.75; 8 inch, $16.60.

No. 15 x 3 inch, $10.4 doz.; 4 inch, $10.90; 5 inch, $11.4.

No. 12, $13.05 doz.

No. 30, spiral, $41.50 doz.; No. 31, $55.70; No. 35, $30.80; No. 130, $47.40; No. 131, $64.

Automatic Drills—No. 4, $40.30 doz.; No. 41, $35.95; No. 42, $28.45; No. 43, $18; No. 44, $43.25.

Warm Weather Increases Demand For Electric Fans

London, Ont.

ELECTRIC FANS.—With the return of warmer weather a very brisk demand has again set in for various electric fans. The Polar Cub is quoted at, 6 inch, $7.50 each, or in dozen lots at $7 each; the 9 inch sells for $12 each and $11.75 in dozen lots.

Even Balance Scales Advance About 5%

London, Ont.

SCALES.—Higher prices have again been made on scales, the new quotations affecting many of the even balance lines. The new advance is approximately 5 per cent. higher than former quotations. The Imperial Standard and Champion platform scales are now quoted at a discount of 10 per cent. and 5 per cent. off the list. The Champion, even-balanced scales of 5 and 10 lb. capacity, have a new discount of 5% off the list. The The Champion union scales, of 240 lbs. capacity, take a discount of 5 per cent. off list. Steel bar weigh beams have also been advanced, now being quoted at a discount of 10 per cent. off the list. Stamping charges are additional to the net prices.

No. 20 Door Springs Cost Dealers $1.90 Doz. Pr.

London, Ont.

SCREEN DOOR SPRINGS.—New and higher prices have been made on some lines of screen door springs, and the No. 20 will now cost the dealer $1.90 per dozen pairs.

New Booking Prices Made on Stove Boards

London, Ont.

STOVE BOARDS.—Booking orders are now beginning to be made on stove boards at the advanced prices which have recently been made. The following is the list of new prices, which are subject to a discount of 5 per cent.:

Stove Board, wood lined—List, 24 in. square, $18.50 doz.; 26 in., $21; 28 in., $23.50; 30 in., $25.50; 33 in., $32; 36 in., $37.

Oblong, 18 x 28, $19; 24 x 32, $25; 26 x 34, $26.50; 26 x 38, $28.50; 28 x 44, $40; 30 x 48, $50.

Rafter Brackets and Hangers Moving Freely

London, Ont.

RAFTER HANGERS AND BRACKETS are beginning to have a very brisk demand and enquiries are very numerous. The present prices are quoted from a firm basis and are as follows:

Rafter Brackets and Hangers—Rafter Brackets, $1.08 doz.; rafter hangers, ½ in. x 10 in., 95c doz.; ½ in. x 12 in., $1.05 doz.

Wire Nails Show Little Improvement; Price Firm

London, Ont.

WIRE NAILS.—The situation in regards to wire nails shows little change and stocks are becoming very nearly exhausted. When it is considered the condition that the mills are in at present on account of the shortage of coal, the future prospects for receiving wire nails in any quantity do not look very bright. The demand continues to be a very heavy one and the quotations are very firm, although no change has been made this week. The prices on wire nails are now being quoted at $6.00 per keg base, and the cut nails are quoted at $7.50 per keg base.

Rope in Fair Demand; Binder Twine Also Moves

London, Ont.

ROPE.—A fair demand is being made for rope of all kinds, although the whole situation has a tendency to quietness.

The price remains very steady, no change having recently been made.

BINDER TWINE is having a very good demand and many dealers are beginning to receive their stocks.

The quotation on pure manila rope still remains at 35½c per lb. base, while Beaver manila and New Zealand hemp continues to be quoted at 28c per lb., and the sisal at 22½c per lb.

Lawn Mowers Show No Change; Light Stocks

London, Ont.

LAWN MOWERS.—A fair demand is being made for lawn mowers of all kinds and fair stocks are moving, although it is believed that the present demands are somewhat slackened. The Daisy, Star, Woodyatt and Empress continue to sell at a discount of 25 per cent. off the list.

Garden Tools Still Have Brisk Movement

London, Ont.

GARDEN TOOLS of nearly all kinds are having a very brisk demand and fair volumes are daily moving out and all in the trade seem to be very well satisfied with the amount of business being offered. The discount remains unchanged, and is still quoted at 50 per cent. and 10 per cent. off the list

Screen Wire Cloth Continues to Move Freely

London, Ont.

SCREEN WIRE CLOTH.—A fair demand is being made for screen wire cloth, although it is believed that if the weather was somewhat warmer, that this present demand could be greatly stimulated, while it is believed that dealers generally are having a good sale for this commodity jobbers state that their sales are fair and are in hopes for a continuation of the warm weather in order to keep up the demand for this and similar commodities. It is believed that owing to the higher prices of screen doors and windows this season that many are repairing their last season's doors, screens, etc., and incidentally been the means of a heavy demand for screen wire cloth.

The present quotation is firm and unchanged, the painted black still being quoted at $3.60 per 100 square feet, and the galvanized $4.25 per 100 square feet.

Scythes, Snaths, Grass Hooks All Move Freely

London, Ont.

SCYTHES AND SNATHS.—This season's growth has been very satisfactory up to present, and many seasonable tools are being called for. Probably first on the list of these are scythes and snaths. The present quotations are very firm and are as below.

GRASS HOOKS are also moving freely. The price on this line is also very firm, although this week's quotations show no change. The present quotations are as below:

Scythes—Cast steel, $17.25 doz.; clipper, $18.25; cutlery steel, $19.25; brush, $17.75.

Snaths—Patent No. 1, $15.85; No. 2, $15.20; No. 3, $14; No. 00, $16.50; brush, $17.20 doz.

Grass Hooks—Canadian, No. 2, $4.90 doz.; No. 3, $5; No. 4, $5.10; No. 5, $5.30; Little Giant, $7.25.

Linseed Oil Prices Steady; Unchanged

London, Ont.

LINSEED OIL.—Although the scarcity has been relieved to some extent on linseed oil the situation has not righted itself yet, it is stated, by the crushers. Usually at this time of the year, the smaller boats have been formerly hauling fair tonnages of Canadian seed down the lakes. However, it is believed that some of the larger boats have disrupted this system owing to the bigger tonnages they could carry and at cheaper rates. This, however, creates a situation where instead of the crusher getting daily supplies of seed, irregular large shipments come forward. It is also believed that considerable seed has been tied up in some of the United States harbors on account of the congestion on the railroads owing to the strikes of the employees. The following are the present quotations:

	Raw	Boiled
1 to 2 bbls., gal.	2 50	2 53
3 to 5 bbls., gal.	2 49	2 52
6 to 9 bbls., gal.	2 47	2 50

Less barrels add 15c gal.

A Decline of 25c Gal. Made on Turpentine

London, Ont.

TURPENTINE.—A decline of 25 cents has again been made on the price of turpentine this week. Considerable improvement is daily being made in the turpentine situation. Supplies are coming to hand in much larger volumes. Although the present price is fairly steady, the tendency is still for lower prices in the near future. It is stated that many are looking for a decided increase in this season's receipts over that of last and base their opinions on the satisfactory returns which are coming forward daily. One of the main drawbacks, it is stated, has been the tardy delivery by the railroad companies, and many have had shipments tied up in transit for some considerable time, and have not as yet received them. The following are the present quotations:

	Imp. Gal.
1 barrel lots	3 25
2 to 4 barrels	3 24
5 gal. lots	3 40

White Lead in Oil Has Good Buying Movement

London, Ont.

WHITE LEAD IN OIL.—A very active demand is being made for white lead in oil, and every day sees a new budget of enquires for good sized quantities. Jobbers state they have had some difficulty in securing supplies, although there is said to be no real scarcity. Corroders say this is due to the difficulty of keeping up with the present heavy demand. The present quotations are very firm. Although no change has been made in price, the pure, in ton lots, continues to be quoted at $20.45 per hundred lbs., and less than ton lots, $20.80 per hundred lbs. The Elephant brand, in ton lots, is quoted at $20.95 per hundred lbs., and in less than ton lots, $21.30 per hundred lbs.

WINNIPEG MARKETS

WINNIPEG, July 1.—The tendency of all lines affected by the changes in this week's markets is still upwards, and many of the more important basic commodities are involved. Chief among the lines showing change are to be found lumbering tools, scoops and shovels, beaver board, blacksmiths' coal, wrought washers, nails, plain wire, wire door mats, meat choppers, sheet iron and sheet steel. Metals, it will again be noticed, predominate, an occurrence that plainly predicts higher prices for manufactured lines dependent upon the basic metals for their production. Reports from all quarters show that the trade generally continues to be inconvenienced by acute shortage in the stocks of many of the basic lines and present conditions show little chance of extra supplies in appreciable quantities being procurable owing to manufacturers being unable to cope with the greatly increasing demands from all quarters, a condition that rapidly absorbs the full output of the manufacturers and at the same time makes little impression on the present shortage that is existing in nearly all the more important lines. Crop conditions throughout the West are reported good to date, a condition that augurs well for the business of the year.

Lumbering Tools Advance About 18% on Old Prices

Winnipeg.

LUMBERING TOOLS are named in the latest changes for revision of prices, and as a result show an approximate advance of 18 per cent., the same applying to all styles, also parts and handles. The wide range of goods covering this

line does not permit individual classification. The change occurring can be accepted as general, however, the approximate advance applying to all lines under this heading. The advanced cost and scarcity of raw material is said to be the chief factor responsible for the present change.

Higher Prices Quoted on Snow Shovels and Scoops

Winnipeg.

SNOW SHOVELS.—The new prices appearing on snow shovels and furnace scoops now quote these lines 10 per cent. higher than was previously quoted, and as a result give the following net lists as the present ruling prices: Snow shovels, Garry, $11.85; furnace scoops, Garry, $13.20 per dozen.

Expected Increase Now Occurs on Beaver Board

Winnipeg.

BEAVER BOARD.—The possible increase anticipated on beaver board, remarked upon in a recent issue of Hardware and Metal, occurs in this week's changes, and advances this line to the extent of 8 per cent. on previous prices. The present demand for this class of goods is of an exceptionally heavy character; so that this, coupled with the existing shortage prevailing in wood pulp, makes allowance to some extent for the latest increase of price of the manufactured product, the occurrence of which has been anticipated for some time. Present prices now quote this line as follows:

Beaver Board—In 5M ft. lots, $53; original bundles, $54; small quantities, $55.50 per 1,000 sq. ft.

Revision in Blacksmiths' Coal Advances Price

Winnipeg.

BLACKSMITHS' COAL.—New prices appearing on blacksmiths' coal show an advance of 15 per cent. over old prices, an occurrence said to be fully expected on considering the past stability of this line, which cannot help but eventually be affected by the continually changing markets. To-day's prices now show: Blacksmiths' coal, per ton, $20.00; less than ton lots, $1.10 per 100 lbs

A 6% Increase Revises Wrought Iron Washers

Winnipeg.

WROUGHT IRON WASHERS.—New prices also appear for wrought iron washers, advancing same a further 6 per cent., the addition of which now places this class of goods at an exceptionally high figure owing to previous repeated advances occurring. The present unsatisfactory conditions prevailing in the major markets are named as the chief cause for the latest revision. Present prices are quoted as under:

WROUGHT IRON WASHERS

Size	100 lbs. Case lots	100 lbs. Small lots
3-16 in.	$22 00	$22 50
¼ in.	19 30	19 80
5-16 in.	18 10	18 60
⅜ in.	16 75	17 25
7-16 in.	15 70	16 20
½ in.	15 10	15 60
9-16 in.	14 95	15 45
⅝ in.	14 80	15 30
¾ in.	14 65	15 15
⅞ in.	14 50	15 00
1 in.	14 50	15 00
1⅛ in.	14 50	15 00
1¼ in.	14 80	15 30
1⅜ in.	14 80	15 30
1 7-16 in.	14 80	15 30
1½ in.	14 80	15 30

Nails Are Scarce and Higher Priced

Winnipeg.

WIRE NAIL prices are again changed, and show still higher tendencies to the extent of 25 cents per hundred lbs. Although the new advance cannot be said to be of a heavy character, it on the other hand shows clearly the decided trend of this market, which owing to greatly depleted, and in many cases practically exhausted stocks, combined with the present heavy demand, shows little tendency to the possibility of better conditions prevailing for some time to come, as further supplies in satisfactory quantities are difficult to procure. Ruling prices now quote:

Wire Nails—Fort William, $6.50; Winnipeg, $7 per 100 lbs.

Wire Finishing Nails—1 in., $9.50; 1⅛ in., $9.50; 1¼ in., $9.15; 1½ in., $8.90 per 100 lbs.

Plain Wire Is Also Advanced 35c Per Cwt.

Winnipeg.

PLAIN WIRE.—In conjunction with the new revision prevailing in nails, plain wire also shows further advance, an occurrence that plainly indicates the general tendencies of these markets, besides showing clearly the possible future quotations on nails, which it will be seen will bear toward still higher levels, unless quick and unexpected changes appear for the betterment of present conditions at present influencing the wire market. Exceedingly low stocks are at present reported on practically all wire, and new supplies being received are in small quantities only.

Wire—Coiled Spring, No. 9, $6.80; No. 12, $7.05. Plain galvanized, No. 9, $6.75; No. 12, $7 per 100 lbs.

Steel Wire.—Galvanized, gauge 8, $7.75; gauge 9, $6.75; gauge 10, $7.75; gauge 11, $7.85; gauge 12, $7; gauge 13, $7.15; gauge 14, $8.25; gauge 15, $9; gauge 16, $9.25 per 100 lbs.

Wire Door Mats Are Again Higher Priced

Winnipeg.

WIRE DOOR MATS.—New and advanced prices appear on wire door mats, affecting this line to the extent of a further 12 per cent. on previous lists. Wire and wire products, it would seem, are being well represented in this week's market changes, with all lines showing decided advance, as has been previously shown. It is generally known, however, that wire of all styles and kinds is at present very scarce, with little hope being extended as to the possibility of early relief occurring, hence the new increase in price. The latest prices now showing on wire door mats are:

Wire Door Mats—Galvanized cold rolled steel wire, size, inches, 16 x 24, $1.45; 18 x 30, $2; 22 x 36, $2.75; 26 x 48, $4 each.

Meat Choppers Incline To Higher Levels

Winnipeg.

MEAT CHOPPERS.—Enterprise meat choppers have also advanced prices following the new market changes and show accordingly a further 10 per cent. increase. The new prices named appear of firm character and little possibility of a severe change occurring for an indefinite period is to be looked for, it is said, in view of the fact that the basic material is metal scarcity, and the high prices of the raw material are named as the chief cause of the present advance. To-day's prices are quoted as follows on:

Meat Choppers—Genuine Enterprise, No. 5, $5; No. 10, $7.75; No. 12, $7.25; No. 22, $12; No. 32, $15.50; No. 042, $38.50 each.

Iron and Steel Sheets Scarcity Advance Price

Winnipeg.

SHEET IRON AND STEEL prices have again advanced, the showing for this week being a further 75 cents per hundred lbs. The sheet situation is now considered to be practically hopeless, in view of the fact that the past shortage has now literally reached the famine stage, practically no sheets or plates being obtainable from any quarter, and with every indication pointing, it is said, to a continuance of the present scarcity over an indefinite period. As might be imagined, in view of these unsatisfactory conditions, prices are firm with every indication of further advance being probable at no distant date. Present ruling prices are herewith quoted:

Sheet Steel—Black, gauge 10, $10; gauge 12, $10; gauge 14, $10; gauge 16, $10.35; gauge 18, $10.40: gauge 20, $10.40; gauge 22, $10.45; gauge 24, $10.45; gauge 26, $10.50; gauge 28, $10.50, per 100 lbs.

Sheet Iron — Galvanized, gauge 16, $12.35; gauge 18, $12.50; gauge 20, $12.50; gauge 22, $12.65; gauge 24, $12.65; gauge 26, $12.80; gauge 28, $13.10; 10¾ oz., $13.50, per 100 lbs.

PITTSBURGH MARKETS

PITTSBURGH, July 1.—Transportation conditions as affecting the shipment of pig iron and finished steel products have not improved during the past week or two, and on a precise showing would probably be seen to have grown a shade worse. Supplies of raw materials, however, appear to have been kept up, whereby production is not decreased. The rate of output is indeed quite high considering the general financial and industrial situation, which is one of doubt and uncertainty rather than of full activity and confidence.

Effective Monday of last week the Interstate Commerce Commission issued

an order requiring that full preference be given the coal mines in the matter of car supplies, up to 100 per cent. of mine ratings. The previous rule had been for preference up to 50 per cent. Already there is a materially heavier movement of coal as a result of the order. Quite typical of the fault-finding spirit so generally prevalent, which is perhaps the main retarding influence now to real progress and prosperity, complaints regarding the coal car order are made in various quarters, and newspaper space is generously given to the complaints. For instance, the Connellsville coke operators complain that the order is going to take cars away from them, with the intimation that nothing could be worse than to restrict the movement of Connellsville coke. Now coke is used mainly for making and melting pig iron and the by-product ovens have been very short of coal, so that a better coal movement will help them. As to the relative importance, last year the Connellsville region produced 10,000,000 tons of coke and the by-product ovens 25,000,000 tons. After pig iron has been made, the steel mills need coal, and the better coal movement will help the steel mills also. Nevertheless, what one sees in the average daily or trade paper is not that the steel mills are going to get more coal, which they need badly, but that their car supplies for shipping steel may be decreased a trifle. Even then, however, it is improbable that any such thing will occur. Pittsburgh bankers, who are interested in seeing all the wheels of industry move freely, have been expressing grave apprehensions over the coal market situation, Pittsburgh coal having brought $10 per net ton at mine, a price some industries cannot afford to pay so that they are forced to close. If the industries cannot run there is no use making steel or shipping it.

American Federation of Labor

By reason of the action taken at the Montreal convention of the Federation of Labor it is thought in the iron and steel industry that no attempt will be made by the Federation to call a strike in the industry in the near future. The Federation directed that the committee which handled the strike of last September be disbanded, its field workers be called in by July 1, and its funds turned over to the Federation's executive committee. A meeting of the heads of the international unions is to be held in Washington, to appoint a new committee and lay plans for a fresh general campaign to organize the industry. No doubt the Federation will attempt to profit by the experience of the last strike, which had too much of the "red" element in it. Doubtless the Federation management did not like this, but it was not strong enough to curb the Fitzpatrick-Foster element that dominated the committee now disbanded, Fitzpatrick and Foster themselves having resigned several months ago.

Any activity of the Federation will be entirely apart from the Amalgamated Association, which broke with the union sheet and tin plate mills as detailed in last issue, and which will have a strike this summer unless there is a last-hour recession from the impossible demands it made upon the mills.

Coke and Pig Iron

Connellsville coke for spot shipment has advanced further, being now fully $16 for furnace and $16 to $17 for foundry. Many consumers will not pay anything like such prices, preferring to curtail operations, but the offerings are so limited that everything is absorbed by those who are willing to pay practically any price asked. Production in the Connellsville and Lower Connellsville region is about 70 per cent. of the rate in Ma before the rail strike and the consequent traffic congestion.

Before the traffic difficulties became pressing a moderate amount of furnace coke had been put under contract for the second half of the year, at what then seemed to be very high prices, but prices lately asked are still higher, and the furnaces are placed in a particularly awkward position because they are called upon to buy their coke for the half year and they have sold only a part of their output, perhaps less than half, for the six-month period, while the market is too dull now to sell the remainder, and no one knows whether pig iron is going to advance or decline on the next buying movement. The coke operators say it is going to advance. Some business was done, as noted in previous reports, on a 4-to-1 ratio basis, which would make the coke cost $11, if basic pig iron stays at its present level of $44, valley, but would help the furnace in case pig iron declined. The lowest flat price quoted seems to $12, and furnaces do not care to risk paying that price.

While the pig iron situation generally is quiet and the balance of probability seems to be that before the end of the year iron will decline rather than advance, the bare fact is that Bessemer and basic have advanced in the past week. The only market to quote is the prompt market and deliveries are so scant that higher prices are obtainable. Two lots of 2,000 tons each of Bessemer and basic have been sold, for early delivery, establishing the market at advanced prices, $44 for Bessemer, or a $1 advance, and $44 for basic, a 50c advance, while foundry iron remains at its old price of $45, and strong at the figure, all prices here mentioned being f. o. b. valley furnaces.

Unfinished Steel

The billet and sheet bar market presents an easier tone, though prices can hardly be quotable definitely at lower levels than formerly There was a sale a few days ago of over 5,000 tons of sheet bars at $75, the old price, but it seems the buyer was influenced by ulterior motives. Reports have it that prospects of idleness at some of the sheet and tin mills, hitherto union, led to the offering of some sheet bars by these mills for resale, at between $65 and $70. Then there was a sale of a few thousand tons of small billets at $67.50, lower than the price lately regarded as the market in the absence of definite sales.

Prices on finished steel products for early shipment continue to soften, but the offerings in most cases are very light. Sheets can hardly be obtained at all. Plates, however, are more readily obtainable for reasonably prompt shipment, and 3.50c can be done, if not 3.25c, while a couple of months ago prompt plates were bringing 4c readily, and up to 4.50c in a few cases.

FIGURING EMPLOYEES PAY

Continued from page 47

Twice a year we go over the cards and, noting everyone's increased sales, we raise the quota of each to the point where it will still give him a comfortable working margin, the salary being raised in proportion. We try never to assign anyone a quota so high that he will be in danger of falling behind it. But if any salesperson has honestly achieved a certain quota, and then begins persistently to fall below it, we begin to seek the cause. Perhaps the employee is in poor health; perhaps there is sickness or trouble at home; there may be other reasons. We take these into consideration in handling the case; but if nothing appears save negligence or lassitude to account for the falling off, we feel compelled to discharge the salesperson. Anyone who has attained a given volume of sales should, we feel, be able to hold it or increase it. There should be no retrogression.

I have said that when a salesman is ill, we continue his salary just as if he were on duty. It must be remembered, however, that his quota liability is piling up against him during all the time he is absent. When he returns he must sell enough goods to catch up with his back quotas before he can begin to earn any extra commissions. This is only a measure of fairness to the store. Special circumstances, it is true, have sometimes induced us to wipe out any unfinished quota of sales and start off a clerk on a brand new basis. In fact, at the first of each year we usually wipe out all existing deficiencies and start with a clean slate.

TRADE INQUIRIES

998. **Raw materials and manufactured goods.**—French importer wishes to get in touch with Canadian exporters of raw material and manufactured goods.

1092. **Binder Twine.**—A co-operative organization in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export binder twine.

1000. **Wire nails, enamelled ware—West African trade.**—An English firm wish to purchase for direct shipment to customers on the Gold Coast (West Africa) supplies of wire nails, enamelled ware, and galvanized corrugated iron sheets, and invite prices from Canadian manufacturers. Terms cash against documents at London bank.

Keeping Paint Trade at Home

How the Sumner Company, Moncton, N.B., Keep Enthusiasm at a High Pitch Throughout the Year and Keep the Trade at Home—One-fifth of Retail Wall Space Devoted to Paint Department—Salesmen in Touch with Contractors.

"HOW do you obtain paint sales?" was a question put to the manager of the paint department of the Sumner Company, Moncton, N.B., by a representative of Hardware and Metal. The answer, coming from the head of a paint department which has been successful in developing an all-year trade in paints, was: "We have but one answer, and that is by keeping it constantly before the public. We make our paint department work every day for twelve months. Window displays, newspaper advertising, mailing lists, etc., all are made use of at different seasons to call the attention to the lines that are specially appropriate."

In the spring when the housewife starts to clean out the winter's accumulation of dirt and dust and the days of sunshine call to brighten up, we feature floor paints and varnishes, varnish stains for the furniture, wall finishes, household varnishes, enamels, etc.

Paving the Way by Personal Canvass

"Later comes the big spring and early summer house paint drive which, with the help of the manufacturers, mailing lists, distribution of color cards and personal canvass we have already paved the way for. Besides always carrying a complete line of pure, ready-mixed paints in all sizes, from ¾ pints to 5 gallon cans, we finish those who wish to mix their own with white lead, colors, oils, turpentine, driers, etc. I mention these points t oshow how by carrying a complete line we have been able to keep the trade at home.

Summer Cottage Trade in the Summer

"Our efforts and sales of house paints, however, are by no means confined to the spring, but continue all through the summer and fall. At this time we also devote considerable attention

Continued on page 64

In the article entitled "Keeping Paint Trade at Home" emphasis is laid on the importance of keeping the sale of paint active throughout the twelve months of the year by means of window and store displays, newspaper advertising, etc. In combination with the other factors there is perhaps no more effective medium than the window display, providing it is arranged with a view to appealing in a forceful manner to passers-by. A suggestion is made that the trim be changed to make a seasonable appeal at all times. For instance, at this time of year there is the summer cottage, boat, waggon, carriage and automobile trade in paints, and through the scarcity of painters this trade will likely last well on toward midsummer. Then later there will be school opening, with manual training requirements to be filled, stove pipe enamel, aluminum and gold bronze for radiators, floor varnish and other seasonable lines will then move rapidly. Change the window and store display and the advertising simultaneously to make a special bid for seasonable trade and the results will justify the attention required.

80th Anniversary of Carpenter-Morton Co.

Employees and Friends Enjoy Outing in Honor of Carpenter-Morton Co.—History of the Company.

CARPENTER-MORTON Co., paints, varnishes, etc., gathered 340 of its employees and friends into one large family at the New Ocean House, Swampscott, Mass., recently to celebrate the eightieth anniversary of that company.

The big event of the day was the banquet, at which George C. Morton, treasurer, presided. He drew a word picture of Boston in 1840, the year the company was founded. In that year Boston had a population of 90,000, three short lines of single track steam railroads. All other places were reached by stage coach or sailing vessels. Boston, as a city, was eighteen years old; the Cunard Steamship Line established the first Atlantic steam traffic service from Boston in that year.

Eleazer F. Pratt founded the Carpenter-Morton Co. at 5 Broad Street, selling white lead, zinc white, linseed oil, turpentine, putty, dry colors, a few kinds of paint brushes and two or thre grades of varnish. Painters had grinding mills in their shops, bought dry colors and ground these. Sales were largely for painting vessels.

In 1843 Mr. Pratt took a partner, George B. Rogers, and the firm became Pratt & Rogers. In 1846, George W. Banker became a partner and the firm name, Pratt, Rogers & Co. Three years later, George O. Carpenter and Mathias Crocker bought Messrs. Pratt & Rogers' interests and the firm became Banker, Crocker & Co. The firm name changed again in 1852 to Bankers & Carpenter, and continued as such until 1868, when it became Carpenter, Woodward & Morton. Back in 1892 the business was incorporated under its present name, Carpenter-Morton Co.

During the eighty years, the business location has changed six times, as follows: 5 Broad Street, 107 State Street, Clinton Street, 101 Milk Street, 151 Milk Street, 77 Sudbury Street, where it is now located. The company's first factory was on State Street; to-day it is in Everett. The company successfully passed through the Civil, Spanish and World wars, and through five hard times periods.

Frederick H. Newton, president; M. Elton Vose, vice-president; James B. Lord and John W. Campbell, directors; A. Irving McLauthlin, William E. Gilman, officers, and Mrs. John D. Norton, director, all addressed those present. Alice Bonney, assistant to sales manager, on behalf of the employees presented the officers of the corporation with silver bowls suitably inscribed

Livening up the Summer Paint Trade

If your town is a centre of trade from tourists, you can perhaps plan some stunts to secure their patronage. Moreover, if tourists enjoy trading at your store, they are very likely to remember it is one of the pleasing things of their trip and comment favorably upon your methods of doing business. "When you get back home, tell the folks to drop in the next time they are in ———," is the printed phrase on an enclosure placed in all merchandise bought by those who are obviously tourists. It is printed by the local hardware man.

The Canadian flag in a store window attracts attention and an Ontario dealer hit upon the idea of exhibiting flags which have played an important part in Canadian history. Each day a new flag in chronological order appeared in his window with a small note giving the facts.

KEEPING PAINT TRADE AT HOME

Continued from page 62

to those who are getting their summer cottages fixed up for the season and porch and marine paints play a prominent part. Waggons and carriages are also being gone over and we divide our windows and advertising among these lines. Straw hat enamel and small items are not forgotten.

School Opening and Fall Trade

"When school opens, manual training demands for wood dyes, fillers, varnishes, etc., are encouraged as are also the requirements of the re-opened home. In the fall, stove pipe enamel, aluminum and gold bronze for radiators, a new coat of varnish on the floor and the general brightening up for the long winters furnish a brisk demand for the dealer who is prepared and whose advertising and reputation has made his name to be naturally associated with paint requirements, and we never fail to take advantage of it.

One-Fifth of Wall Space in Paint Department

"Fully one-fifth of our retail wall space is devoted to our paint department and is kept well stocked. Our brushes we keep in shelves behind a sliding display board 4 ft. x 6 ft., framed in dark oak to match our other store fixtures ,and protected by a plate glass front. Glue, whiting, plaster paris, bulk and package, wall finishes, dry paints, etc., are all kept under the same ledge; thus customers' requirements are filled complete over one counter.

Salesmen in Touch With Contractors

"Sales are made from sample color boards and counter books and seasonable and attractive displays are arranged at the ends of the counter and frequently changed. A salesman who spends all his time among the contractors and builders keeps thoroughly in touch with new work from the time the cellar is dug till the house is painted. I might have left out nearly all of this and let my first answer cover it: 'We have made a success of our paint department by keeping it constantly before the public.' "

How Hardwaremen Advertise Paints--No. 13, 14

A good type of paint ad. is the one which gives the reader something to think about. Take for example this advertisement by the Watt Hardware Co., Ltd., Innisfail, Alta. Definite information is given as to the amount of space covered by a gallon of the paint handled by them, and the cost for that amount of space for two coats of paint is quoted. Immediately the reader, if he is a prospect, considers the amount of space he would have to cover and what the approximate cost would be. If he decides to carry out the suggestion, the great chance is that the store which made the suggestion will be the one to get the business. This ad. goes further and deals a blow at the mail order competition with which it evidently contends. It points out that widely advertised paints of the mail order variety cover a smaller extent of space and are therefore dearer in the end.

* * *

Making a seasonable appeal that "Now is the time to do painting," the ad. by J. S. Neill & Sons, Ltd., Fredericton, N.B., emphasizes the point that it is not the painting that costs money—it's "not painting" that is expensive. It continues to point out how their line of paint preserves buildings, protects them from ravages of heat and dampness, is good insurance against depreciation, beautifies the building, denotes thrift, pride and good business judgment. These represent a lot of claims for painting, but they are each worthy of mention in good paint advertising, for they carry a strong appeal to the reader.

What It Costs To Paint

RAMSAY'S PAINTS

The Right Paint to Paint Right

Covers 400 square feet per gallon. Two coats at a cost of $6.75. Widely advertised paints of the Mail Order variety cover 350 square feet, two coats. To cost the same as Ramsay's Guaranteed Pure Paint they would have to be purchased for $5.90 laid down in Innisfail, and take a chance on the paint proving satisfactory

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 30.—Paint circles are interested this week in the declines that have been registered in both linseed oil and turpentine. The lower prices were looked for on linseed oil, and Hardware and Metal's forecast of last week stated that "Before the end of the present week it is probable that linseed oil may have reached a lower figure." It is not probable that, by August, the $2 mark may be reached. The arrival of English oil has served to ease the market considerably.

Turpentine is easier, and is quoted at $3.15 per gallon. It is probable that a base price for single barrels, of $3, may soon be reached, and this depends on transportation. Varnishes are moving actively, putty and white lead in oil are selling seasonably well, and there is a satisfactory expression on all sides regarding the outlook.

Glass prices are higher in Belgium and this has placed a damper on orders to the mills there.

Linseed Oil Lower; Will be Lower Still

Montreal.

LINSEED OIL.—A considerable drop of prices is manifest in linseed oil this week and this is in very definite accord with the advices in Hardware and Metal last week. The situation has improved very largely owing to English oil arriving in this market. Considerable quantities of this oil have come to hand, and the supply is available at considerably lower prices. This has served to lower prices all around. A basis of $2.35 and $2.40 per gallon is being quoted at this writing and before the end of the week a price of $2.25 will be available. For July delivery some are quoting $2.25 per gallon on raw, and one crusher stated to Hardware and Metal this week that he believed a price of $2.00 would be available during August. Thus, the situation is very much improved over what it has been for a great many months.

	Imp. Gal.	
Raw—		
1 to 2 barrels	2 35	2 40
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 37½	2 42½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Turpentine Is Down; May Decline to $3.00

Montreal.

TURPENTINE.—A decline has been recorded this week in the price of turpentine and this change came about sooner than was expected in jobbing circles a week ago. The situation is sympathetic with that of the lower price tendency in the Southern market, and the only thing that prevents prices being considerably lower than they are is a short supply of this commodity on this market. "If this situation continues to improve as it has during the past week or two, we believe that prices may be 50c per gallon less than they are to-day," said a prominen jobber to Hardware and Metal this week. The tendency is downward, and a price of $3 or even less is looked for in the very near future if transportation improves.

	Imp. Gal.	
Turpentine—		
Single barrels	3 15	3 25
Small lots	3 50	3 60
(Packages extra.)		

Putty Sales Fair With Basis Unchanged

Montreal.

PUTTY.—Jobbers report steady sales of putty, and while the basis is unchanged, the difficulties of procuring necessary supplies of whiting from the English markets will doubtless preclude possibility of prices lowering at this time. The following prices are still effective:

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Many Sales Made of White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—A fair demand continues for this commodity and jobbers are sending forward fairly large quantities to different parts of the country. The undertone is steadily unchanged with Government Standard leads selling at $19.50 per 100 pounds, in 5 ton lots; $20.00 per 100 pounds in ton lots, and in smaller quantities, $20.35.

Prepared Paint Trade Has Continued Active

Montreal.

PREPARED PAINTS. — Considering that the mid-summer season has arrived, paint makers are very well satisfied with the volume of business which they are obtaining at this time. No price changes of any kind have been manifest, and the market condition seems to be very favorable.

Higher Belgian Prices Diverts Glass Orders

Montreal.

GLASS.—The feature of the glass situation this week is the higher prices that are being asked by Belgian producers for the product. Supplies of window glass had been coming forward from there rather freely for some weeks, but this advance put into effect very recently has resulted in holding back further orders, diverting business to the United States manufacturers. The situation at the present time is unchanged quotably, and demand is rather light at the moment.

Varnishes Active With Prospects Good

Montreal.

VARNISHES. — The diffiulties presenting themselves these days in manufacture seem to be those of turning out necessary quantities of stock, particularly of the better grades. High-priced gums, stated a Montreal manufacturer to Hardware and Metal this week, are holding firm, but steady in price, and there is plenty of demand for better grade goods, much forward business being already booked. The container situation, while not easier, seems to be reasonably satisfactory with those who buy well ahead.

TORONTO

TORONTO, June 30. — Continued activity is noted for nearly all paint and paint commodities. Putty shipments are beginning to move more freely and the situation has decidedly changed for the better. White lead in oil is still in big demand and some delays are caused owing to some not being able to secure all their requirements on demand. Belgian glass has been arriving in fair quantities, although it is stated that the shortage has as yet not been overcome, and little American glass is coming. Prepared paint is also having a good season and replacement orders are coming forward very freely. Shellac and varnish sales are also favorable, and the warm weather seems to be greatly stimulating sales. Linseed oil has declined 13 cents per gallon is becoming more plentiful, but crushers still have difficulty keeping up with the demand. Turpentine stocks have also been coming forward more freely although there is still considerable room for improvement, the price in some makes having dropped 15

GLIDDEN

EVERYWHERE ON EVERYTHING

All the Best Colors

Glidden Endurance Paint is made in a good practical line of colors. Not too many—not too few—just enough variety to cover your needs.

It's easy to satisfy your customers with Glidden Colors. Each color is a lasting quality color—always in demand. There are no freak colors to remain on your shelves unsold. Glidden Endurance Paint will help make your paint business a profitable one.

THE GLIDDEN COMPANY, LIMITED

Toronto, Ontario

Branches at Montreal and Winnipeg

If interested, tear out this page and keep with letters to be answered.

cents a gallon. Collections are very satisfactory.

Prepared Paint Sales Continue Brisk

Toronto.

PREPARED PAINT.—The very satisfactory business which has been transacted since the early spring is showing little abatement and manufacturers and jobbers are fairly well satisfied with the amount of business coming forward. Replacements are going out very freely and business generally seems to be very keen and active. The present quotations are very firm and no change has been made in the price; manufacturers point out that the last advance in paint was made during a period when oil was considerably lower than at the present time, and that when the oil and turpentine advanced to the higher levels they did not change their price on paints, and they state even considerably lower figures for oil and turpentine would hardly affect the situation. The present quotations are quite firm and are as per current quotation page.

Shellac and Varnish Prices Firm; Unchanged

Toronto.

SHELLAC AND VARNISH.—A very good buying movement is taking place for shellac and varnish of all kinds. This is mainly attributed to the hot weather, and from present indications all in the trade are looking forward to a very brisk period. The present quotations are very firm although little change has been made in the prices which are as per current quotation pages.

$20.35 *Still the Price on White Lead in Oil*

Toronto.

WHITE LEAD IN OIL.—A very heavy demand is being made for white lead in oil, and some report a scarcity, although others state they have fair stocks on hand. Corroders are kept very busy, it is stated, keeping up with the heavy demand, and while it is believed that little business is being lost on account of shortage, that many are often kept waiting for several days before the receipt of their goods. The pure in ton lots is quoted at $20.35 per hundred pounds, while in less than ton lots the quotation is $20.70 per hundred pounds.

Putty Stocks Move More Freely; Price Firm

Toronto.

PUTTY. — Prices remain unhanged although the present quotations are very firm. Supplies seem to be moving more freely and some very good shipments are coming forward. The present quotations are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quo-

Heavier Shipments of Belgian Glass Coming

Toronto.

GLASS.—Some improvement has been shown on shipments of glass, and the famine which has prevailed for some time is gradually being relieved. The shortage, however, is not completely overcome, although future prospects look more bright, it is stated. The single and double diamond continues to sell at a discount of 15 per cent. off the list, while the cut lights are quoted at a discount of 40 per cent. off the list.

Turpentine Prices Decline 15c Per Gal.

Toronto.

TURPENTINE.—A new lower quotation has been made on turpentine, the decline being 15 cents per gallon. The tendency still seems to be for lower prices, although the present quotation is fairly steady. The demand is very satisfactory, although it is believed that some are holding back their orders in hopes that the market will drop to their advantage. The new quotations are as follows:

Turpentine—	Per imp. gal.
1 barrel lots	3 10
2 to 4 barrel lots	3 09
5 gal. lots	3 25

Decline of 13c Per Gal. Made on Linseed Oil

Toronto.

LINSEED OIL.—Lower prices have again been made on linseed oil, and while the new quotation is fairly steady the tendency is for still lower prices. Fair shipments of seed have been coming forward and crushers have been very busy trying to catch up with the heavy demand. The new prices show a decline of 13 cents per gallon and are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 37	2 50
3 to 5 barrels, gal.	2 36	....
10 barrels and over, gal.	2 34	....
	Boiled	
1 to 2 barrels, gal.	2 40	2 53
3 to 5 barrels, gal.	2 39	....
10 barrels and over, gal.	2 37	....

Prices shown are those ruling on Thursday of curent week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Varnish Plant Damaged

MONTREAL.—The Holland Varnish Company, Ltd., suffered damage to one of their warehouses last week. While the firemen were readily on the job, the fire was well under way, and owing to the inflammable nature of the varnishes and gums, it proved a difficult fire to control. Mr. Norman Holland stated to Hardware and Metal that while damage had been done to the extent of $25,000 to $30,000, that the company's loss was fully covered by insurance.

Paint Official Resigns

MONTREAL.—C. F. Kendall, for some time past Paint and Color Works manager for McArthur, Irwin, Ltd., Montreal, has resigned. After a brief holiday, it is Mr. Kendall's intention to enter business on his own account.

Belgian Glass is Much Higher

MONTREAL.—Discussing the glass situation with W. R. Hobbs, Montreal, manager of the Consolidated Plate Glass Company, Limited, Hardware and Metal was informed that the recent advances made by Belgian manufacturers for window glass was having the effect of checking importations from that country. "Importations are likely to increase from the United States," said Mr. Hobbs, "owing to this condition."

"At present the situation is rather quiet as this is an in-between season. A convention is being held in the States of glass manufacturers on July 17 to 19, when the whole matter of price production will likely receive consideration. Should prices be advanced, it may stimulate Belgian trade again.

"The supply of plate glass is a little improved. From now on there may be continued improvement in this respect, and it will give manufacturers a chance to fill in their stocks that have been badly assorted of late," said Mr. Hobbs.

It was further intimated that with the exception of a short period the shipping season for fall would soon start again, and this will likely liquidate any increased stock that may be in the hands of manufacturers within the next few weeks.

Fear Further Labor Trouble in Iron and Steel Industry

"Prospects of labor disturbances of a serious character have been injected into the iron and steel situation, already grievously handicapped by continuing traffic demoralization," says The Iron Trade Review. "Radical demands presented by the union at the annual conferences of independent sheet, tin plate and bar iron manufacturers with representatives of the Amalgamated Association of Iron, Steel and Tin Workers have resulted in complete disagreements. These demands have not been matters of hours or wages but have dealt with the unionization of mill crafts which in the past have not been parties to these annual agreements. Since these proposals clearly are directed toward the closed shop and the extension of sympathetic strike powers, they have been flatly refused by the employers. Prevailing sheet and tin plate scales expire July 1, and many mills are likely to be closed indefinitely on that date unless the present differences are adjusted. Various manufacturers now are making plans to that end. Iron mill operation may be continued to Aug. 1."

MEAKINS BRUSHES

Satisfactory Salesmakers

The dealer can sell Meakins' Brushes with the utmost confidence that they will give satisfaction to the consumer and to himself. The brush-buying public has learned of the superior quality and finish of Meakins products. They know that they will have no work spoiled by bristles sticking to the surface, the bristles will stay in. Every Meakins Brush is rubber set. The Meakins line means quick sales, more profit, and repeat orders, to the dealer.

Brantford Asphalt Slates in big demand

The hardware dealer can meet every roofing requirement with this line of nationally advertised, first quality roofing.

Brantford Roofing Co., Limited

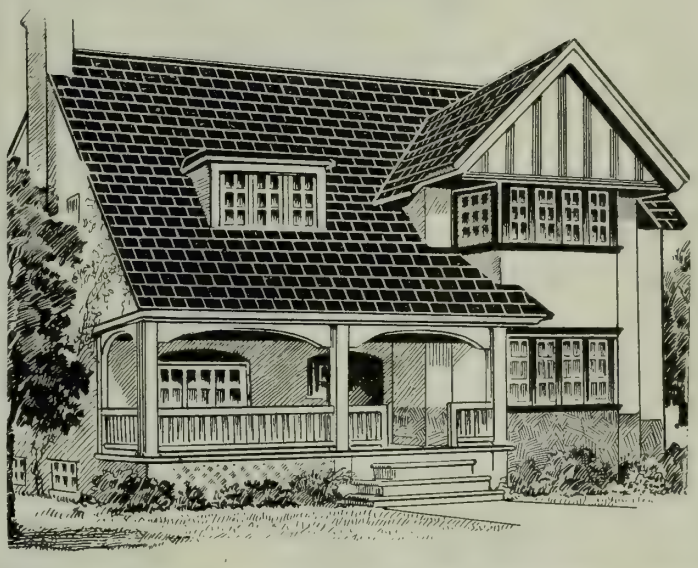
Head Office and Factory: BRANTFORD, Canada

Branches at: TORONTO, MONTREAL, HALIFAX, WINNIPEG

The output of Brantford Asphalt Slates in 1918 was double 1917—1919 double 1918. This indicates that there is a big, growing market for this artistic, durable, fire-resistant roofing.

Progressive hardware dealers who push the sale of Brantford Asphalt Slates will find it a very profitable line. In fact, there are good profits to be made in the entire line of Brantford Roofing—

Asphalt, Rubber, Crystal, Leatheroid and Standard Mohawk in rolls—Asphalt Slates in individual size shingles, and the Asphalt Slab Slate, which is four shingles in one—and Climax Sheathing Paper, a big seller.



Practise Thrift and Lessen Fire Hazard

By the use of our

Hand Oil Pump

It will eliminate the drips from your oil barrel.

HAMILTON MOTOR WORKS, LIMITED

HAMILTON CANADA

Every Workman a Prospect

WITH a hard day's work either ahead of or behind him, he does not like walking or waiting around for a crowded street car.

In this direction alone there is good business awaiting the progressive dealer who handles these widely advertised quality bicycles which have gained an enviable reputation.

Dressed by H. L. Huehn. $10.00

Winners in Window Dressing Contest

Mr. Davis, Editor of Hardware & Metal, who kindly consented to act as judge in the BT Window Dressing Contest, has just handed us his decision.
The prize winning windows are illustrated above and we heartily congratulate the prize winners on their success.
It is hardly possible, in small reproductions, to do justice to the original photos. The prize winning windows were exceptionally good.

Some Interesting Displays

The displays submitted brought out splendidly the usefulness of BT Washers and Ladders at house-cleaning time. One contestant reported that he sold four "Red Star Washers" within a few hours after putting in his window—so the display evidently paid.

House-cleaning time is now pretty well over, but a BT Washer is always a saleable article and particularly so in the hot days when standing over a steaming tub is very hard work. At all times of the year BT Ladders command a ready sale.

If you give these articles a share of your display space in window and store, you will find it well worth while.

Creating Sales for Famous Five Files

Given an established demand, we are constantly creating new sales for Famous Five Files by aggressive advertising.

The Famous Five Brands are well-known as the standard of file efficiency. By keeping this fact before the file-using public, we are helping the dealer to get new customers.

We also help the dealer by carrying large reserves, so that he may quickly replenish his stock through his jobber.

Get your share of profit on the Famous Five brands. They are:

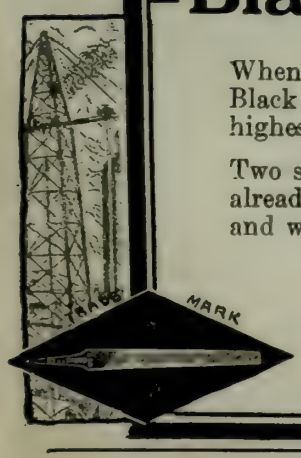
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

"Save the surface and you save all" *Paint & Varnish*

Stephens'

REGISTERED TRADE MARK

Barn Paint

Insuring Barns With Paint

The modern farmer is much like other business men—perhaps a little more cautious.

Farmers to-day insure their buildings, stock and crops against various possible dangers. It is therefore a logical and reasonable step to insure against depreciation of buildings and implements through weather destruction.

Most farmers take this precaution to-day and few men will leave the unpainted barn to rot, with lumber prices where they are to-day.

Farmers know the value of Stephens' and prefer it.

It pays you to offer Stephens'

When you handle LACO Lamps you are not *guessing*—you are not *hoping* your customers will get satisfaction—you are *guaranteeing* it to them absolutely and without equivocation.

By actual performance and by every test

LACO LAMPS ARE BEST

GREAT WEST ELECTRIC COMPANY, LIMITED

WINNIPEG

MADE IN CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

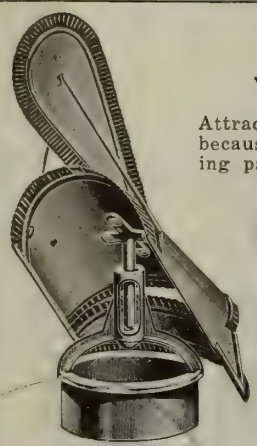
A Gas Engine Oil (for gasoline engines).

Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machine Oil (for general use.)

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG



O-Rib-O

Volcano Chimney Top

Attracts the customers and closes sales because the Deflector—the lower slanting part shown—receives wind through the sloped opening directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Sells readily for homes, stores, churches, factories and as a ventilator for barns and warehouses.

PYREX
Transparent OVEN-WARE

Saves Food -- Bakes Quickly

Pyrex is the labor-saving, greaseless, and odorless oven ware. The housewife's delight.

Pyrex saves about one-half the fuel usually required because it absorbs nearly all the oven heat and bakes food quickly.

Saves food; meats, vegetables, etc., when cooked in Pyrex, retain their natural color and flavor. Most foods cooked on top of the stove can be better prepared in the oven. Pyrex will not discolor, rust, craze, dent or chip, and is made in all sizes and shapes.

Has the Name on Every Piece. Guaranteed Not to Break in Use in the Oven.

Is There an Alien Menace in Canada?

IN THE years of war, people were quick to grasp the possibilities of danger that lie in Alien sympathies. But people quickly forget, and therein lies the danger for it is in the insidious breaking down of the ties of loyalty, that goes on in the piping times of peace, that makes the menace of the days of war.

In "The Stranger in Our Midst" the simple story of a school teacher's experience in foreign settlements in the West there lies a reproach and a warning, a reproach in that such things can be, and a warning that they may not happen again.

This is only one of the many stories and articles that make the June 15th issue of MacLean's Magazine of outstanding interest.

These are some other points of interest:

FICTION

"The Little Warrior"—Pelham Grenville Wodehouse's inimitable story.

"The Parts Men Play"—Arthur Beverly Baxter.

"The Sunset Homesteader"—Will E. Ingersoll.

"The Beetle and the Butterfly"—C. W. Stephens.

ARTICLES

"What Must Be Done?"—Mrs. Murphy's suggestions of a remedy for the drug menace.

"We Must Reform Dress"—Marian Keith.

"Gentlemen of the Fourth Estate"—The story of men who begin life in newspaper offices.

The Best From Everywhere

In the Review of Reviews department will be found the best articles from all magazines and periodicals the world over. Look at these titles and authors:

"Belgium Has Come Back"—by Frederick Palmer.

"How the English Came to Be"—by Rudyard Kipling.

"Eight Billions Wasted"—by Thomas V. Merle.

"Mankind Needs Change of Heart"—by Sir Philip Gibbs.

"Give Labor a Square Deal"—by Charles M. Schwab.

"The Slow Conquest of America"—by Forrest Crissey.

"Know Your Own Car"—by Alexander C. Johnson.

"Sending Pictures by Telegraph"—by Milton W. Stoddard.

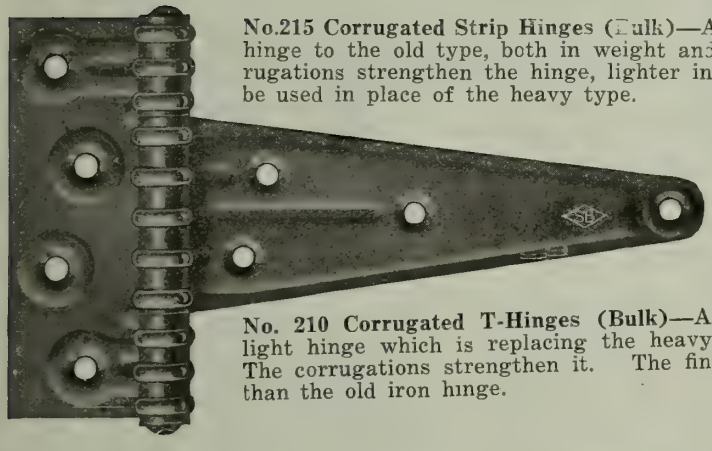
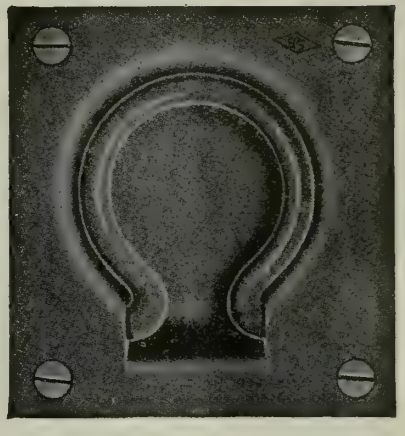
New SB *Lines*

Door *and* Chest Hardware



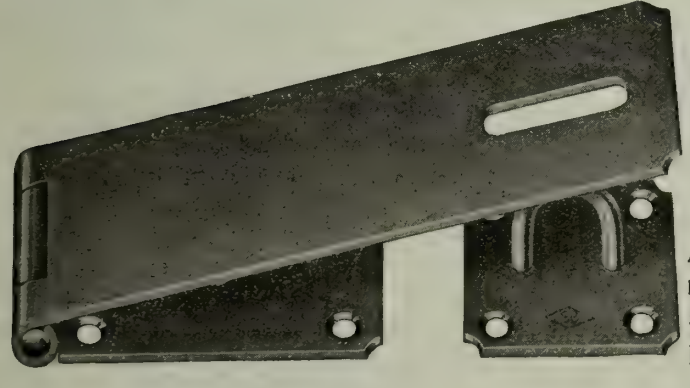
No.215 Corrugated Strip Hinges (Bulk)—A far superior hinge to the old type, both in weight and finish—corrugations strengthen the hinge, lighter in weight, can be used in place of the heavy type.

No. 210 Corrugated T-Hinges (Bulk)—A strong, neat, light hinge which is replacing the heavy type hinge, The corrugations strengthen it. The finish is better than the old iron hinge.



NO. 1215 JAPANNED TRAP DOOR RINGS

Size 3½" Wrought Steel Flush Trap Door Rings, Baked Japan Finish. Packed ½ dozen in carton with japanned screws. Supplied also in galvanized or plated finish at additional cost.



Some of our new lines

Ask for our new Catalog showing complete line.

NO. 1205 CHEST HANDLES

Made of best quality deep drawing steel, with heavy, easy grip handle, japanned. Also supplied in galvanized or plated finish at additional cost. Packed ¼ dozen pairs in box with screws.

No. 815 Wrought Steel Safety Hasps—Finished in Bright, Japan or Galvanized, made of wrought steel with hinged joints and concealed screw holes, which make it safe. Made in sizes 3-ins., 4½-ins. and 6-ins. Packed one dozen in carton.

A Tribute To Development

A splendid recognition of the work done by business papers in furthering advertising and merchandising has come in the election of Mr. C. A. Otis, publisher of "Finance and Industry," to the high post of President of the Associated Advertising Clubs of the World.

His election to this coveted position is a tribute to the section he represents—the business, financial and technical papers that have played such a part in the development of advertising and merchandising for many years.

It recognizes that business papers are leaders of progress in their respective industries. By their editorial contents they automatically select the men in each industry whose words carry the weight of buying authority.

Business paper advertising has developed because for a judicious expenditure of money, you reach a circulation of tremendous buying power which is being taught by the publication itself to want the very products advertised.

In the election of Mr. Otis the whole advertising and business fraternity joins in a tribute to the development and service of the business press of America.

"HERCULES" SASH CORD

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.

Compares in quality with the best imported brands, but is considerably lower in price.

Tests made by Strength of Materials Laboratory (University of Toronto) prove our claims as to quality.

All wholesale hardware dealers carry Hercules Sash Cord.

Manufactured in Canada

Those Hard-To-Get-At Nuts

In every garage. machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically heat-treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

The Keystone Manufacturing Co.
Buffalo, N.Y.
POSTAL STATION B

Extending the Uses of Your Product by Informing Dealers

When the efficient, modern advertiser finds his reputation firmly established, the confidence of the trade firmly held, distribution ideal and his product and trade-mark thoroughly familiar, he directs the full force of his continuous advertising toward increasing the uses of his product by showing the dealer and his salesmen each week new uses for his goods that both stimulate sales and increase the consumer satisfaction with the product.

A weekly message to the whole hardware trade of Canada through Hardware & Metal is productive, profitable and reliable "business insurance" for the future.

If interested, tear out this page and keep with letters to be answered.

'HEIRLOOM' PLATE

The beautiful and pleasing patterns of 'Heirloom' Plate were only selected and developed after years of concentrated study and far-sighted planning. These designs are exactly reproduced with painstaking care and attention to each minute detail by skilled craftsmen, many of whom received their early training in Sheffield and Birmingham.

A particularly heavy plating of silver gives to 'Heirloom' a length of service seldom equalled in similar wares. The highest possible recommendation of 'Heirloom' may be accorded your customer, with the certainty that service and genuine satisfaction will justify the commendation.

With its appeal to the aesthetic taste of the buyer, and with an intrinsic value commensurate with its artistic appearance, 'Heirloom' Plate presents an irresistible attraction.

You will take genuine pleasure as well as profit out of the sale of 'Heirloom.'

HARDWARE AND METAL

CANADA'S NATIONAL HARDWARE WEEKLY

PUBLISHED EVERY SATURDAY
SINCE 1888

$3.00 PER YEAR

P. O. BOX 368
143-153 UNIVERSITY AVENUE
TORONTO

From a Man Who Purchases Hundreds of Thousands of Dollars Worth of Hardware

The Buyer for a Western Canada hardware wholesaler (name on request)—a company rated upwards of one million dollars, best grade of credit, said last week, "I not only read Hardware and Metal carefully each week, but I prefer to deal with firms that advertise in Hardware and Metal and thus assist us in making the goods better known among the retail trade." This buyer expresses the views of practically every hardware buyer in Canada. We would be glad to have you make inquiries. Ask 100 of the biggest hardware buyers in Canada which paper they read, and which paper they recommend for advertising to the Canadian hardware trade. Advertisers have frequently made this test and the result has always been—Hardware and Metal—the paper that has become the most important connecting force in the Canadian Trade. This is due to 32 years of constant effort to produce each week a paper brimful of authentic and practical information for the hardware men of Canada. There is no other publication in Canada giving a weekly market service on hardware, paints, oils, electrical goods, motor accessories and other hardware lines. There is no other publication in any line that covers its field so thoroughly. This is proven by A.B.C. audit. Advertising in Hardware and Metal has a direct influence on the buying habits of Canadian hardware men both wholesale and retail. Canadian hardware men want to know something about the firms they buy from. You can tell them about your company and your product through Hardware and Metal.

We recommend the use of regular advertising in Hardware and Metal, and we particularly emphasize the importance of using the 32nd Annual Fall Sale and Directory Number to be issued on Aug. 21. Forms are now closing and reservations should be made immediately. Write us at once for interesting information regarding the importance of the Annual Fall Number. Rates: Full page, $65; half page, $36; quarter page, $21; two pages, $120; extra color if desired $25 per page extra. The Canadian hardware trade is awaiting this number because it will contain hundreds of business-building ideas. The buyer referred to above and over 3,600 other Canadian hardware buyers will read your message if you are represented in the 32nd Annual Fall Number. Positions in issue will be alloted in order of reservations.

If you are interested in Canadian hardware men, show your interest in a practical manner by placing your company and products before the trade in an issue that has been an annual feature for 32 years.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

The only weekly hardware paper in Canada, and the only hardware paper in Canada that will supply you with a circulation statement audited by the Audit Bureau of Circulations.

No. 1 Fire Pot
List Price, each $27.20
Ask for Discount.

How to Save Gasoline

The No. 1 Fire Pot has the highest degree of heat generating power with the smallest consumption of fuel. The saving in gasoline alone will soon pay the cost of the Fire Pot. The No. 1 is the greatest general utility Fire Pot made and is favorably known to all mechanics. The tank is made of seamless drawn steel, with large funnel and filler plug, and the powerful burner is swiveled so that the flame can be placed where needed. Jobbers supply at factory price. Send for catalog.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Big Increases in Auto Mirror Sales

The enormous increase in the sales of "Hindview" Auto Mirrors in 1919 and 1920 prove conclusively that motorists now consider the Auto Mirror an indispensable aid to safe driving, rather than a mere fad.

Auto Mirrors are now required by law on all trucks in the Province of Ontario.

Hindview Auto Mirrors

are substantially made—guaranteed to be free from defects, and absolutely waterproof. Clamps are large and firm; the Ball Joint—and exclusive "Hindview" feature—allows instant and convenient adjustment. There is a "Hindview" for every type of motor car and truck.

Dealers handling the "Hindview" are making big profits.

May we send you literature?

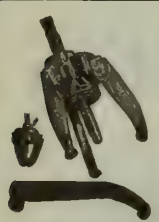
Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.



SAYS THE MASTER MECHANIC: The Greb Automatic Grip Puller is a One-Man Puller—Quick-acting, strong and simple in the extreme. May be locked in any desired position. A combination of two or three arms. Heavy Duty Size capacity 1" to 18"—Junior size capacity 1" to 7". Two sets of jaws furnished with each size.

TEN DAYS' TRIAL.—If your dealer or jobber does not have them we will send you one. Try it ten days. If not satisfactory return to us and we will refund your money. We also make the GREB RIM TOOL.

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

A large, progressive manufacturing concern in Toronto has an opening, with real future, for a young man with sales ability. Applicant must be ambitious and willing to devote considerable time and study to learning the business. Only those with these qualifications need apply. This is a real opportunity for right type of man. Give full particulars in first letter, stating age, previous experience, etc. Apply Box 253, Hardware and Metal.

PLUMBER AND TINSMITH WANTED TO rent shop, upstairs over hardware. Lots of room. Good light and good benches. A going concern for over forty years. First-class chance for a good man. For full particulars apply to Harland Bros., Clinton, Ontario.

WANTED — GOOD ROAD SALESMAN FOR Wholesale Hardware; must be a live wire, have good personality and be of steady habits. This is an excellent proposition for the right man. Territory covered in Western Canada. Apply in own handwriting, stating experience, age, height, etc., to Box 370, Hardware and Metal.

THERE IS AN OPENING IN THE ADVERtising sales department of Hardware and Metal for a young or middle-aged hardware salesman who has a good knowledge of the hardware trade. Must be thoroughly reliable, good appearance, and able to accept responsibility. The right type of man will be well paid for his services. Write giving complete details regarding experience and qualifications to Manager, Hardware and Metal, 153 University Ave., Toronto, Can.

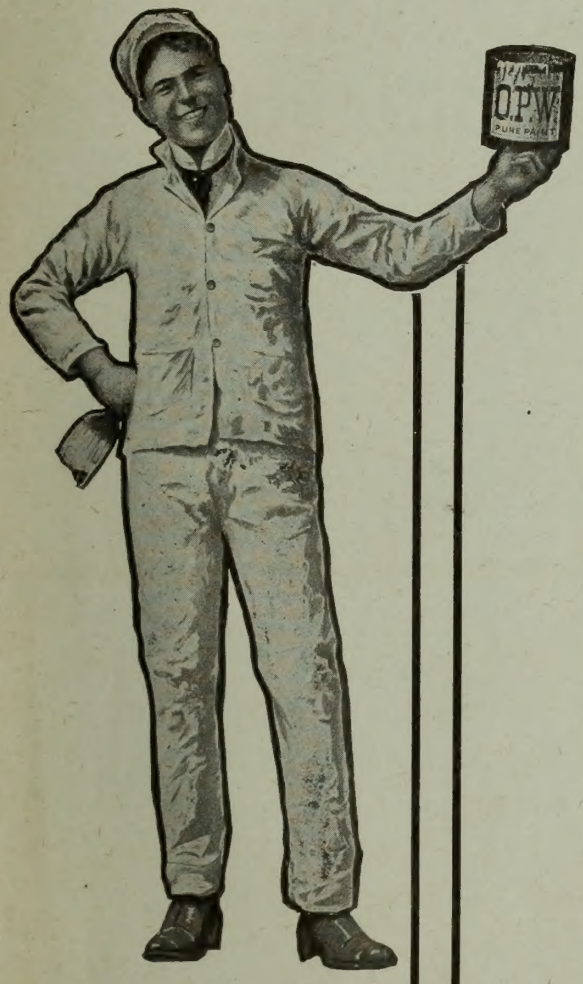
O.P.W.

Trade Mark Registered

"Paints and Varnishes for Every Purpose."



How Are the Roofs In Your Locality?

O.P.W. Barn and Roof Paints are making money hand-over-fist for those dealers that have harnessed them up to a systematic drive on their local field.

Have you systematized your paint sales? Make a list of the actual surfaces that need saving within your range of selling territory. There are barns, buildings, and church roofs. List them—then sell them.

Here and there—good territory is still open. We would like to correspond with dealers in those places

Y

is for O. P. W.'s years of yeoman service and power to bring yesterday's youth to surfaces no longer young. O. P. W. yields more for YOUR cash-register.

The Standard Razor Is Gaining in Popularity

Thousands of men write us asking where Genco razors can be purchased. These men have read the Genco advertising in Saturday Evening Post and a list of other national publications.

Advertising and the experience the men themselves have had with different types of shaving instruments have convinced them that the good old-fashioned blade is the dependable one.

The men have noted that the barber — the professional shaver — continues to use a razor of the Genco type.

They know that to deliver a really comfortable shave any razor must be stropped, and they know that Genco razors are made to strop.

They are familiar with our guarantee: "Genco razors must make good or we will."

The Demand for Genco Razors continues to Grow

Profit by Genco advertising and the demand it is creating. Ask your jobber to supply you with Genco razors. If he cannot, write us.

Geneva Cutlery Corporation
